

MGM INSTITUTE OF HEALTH SCIENCES

(Deemed to be University u/s 3 of UGC Act, 1956)

Grade 'A⁺⁺' Accredited by NAAC

Sector-01, Kamothe, Navi Mumbai -410 209

Tel 022-27432471, 022-27432994, Fax 022 -27431094

E-mail: registrar@mgmuhs.com; Website :www.mgmuhs.com

Curriculum for Bachelor in Prosthetics & Orthotics

(with effect 2017-2018 Batch till 2024-2025 batch)

Amended as per AC-53/2026, Dated 21/04/2026

Amended History

1. Approved as per BOM- 51/2017, Resolution No.1.3.13.7, Dated 28/08/2017.
2. Amended as per BOM – 53/2018, Resolution No. 4.6.2, Resolution No. 4.6.10, Dated 19/05/2018.
3. Amended as per BOM – 55/2018, Resolution No. 4.13, Dated 27/11/2018.
4. Amended as per BOM – 57/2019, Resolution No. 3.1.4.2, Resolution No. 3.2.2.8 Dated 26/04/2019.
5. Amended as per BOM – 59/2019, Resolution No. 3.2.2, Resolution No.3.2.4.7, Resolution No.3.2.4.8 Dated 11/11/2019.
6. Amended up to AC-44/2022, Resolution No. 6.12, dated 09/12/2022.
7. Amended up to AC-46/2023, Resolution No. 6.13, Resolution No. 6.14, dated 28/04/2023.
8. Amended up to AC-49/2024, [Resolution No. 3.15] dated 25/04/2024.
9. Amended up to AC-50/2024, [Resolution No. 3.15] dated 27/11/2024.
10. Amended as per AC-52/2025, [Resolution No. 5.18, (Annexure-31C)]; Dated 28/11/2025.
11. Amended as per AC-53/2026, [Resolution No. 5.9, (Annexure-50)]; Dated 21/04/2026.
(Till entry batch 2024-25).

Bachelor in Prosthetics and Orthotics (B.P.O.) programme¹

I. PREAMBLE

Prosthetics and Orthotics is a specialized health care profession, which combines a unique blend of clinical and technological skills. The Prosthetic and Orthotic Professionals assess and evaluate patients, prescribe custom design, fabricate, and fit the orthoses and prostheses. Rehabilitation of persons with locomotor disabilities or neuromuscular disorder is a team work, where Centre of attention are the persons with disabilities. This work requires substantial clinical and technical judgment. Prosthetic and Orthotic Professional does not only provide service to persons with neuro-musculoskeletal disorder and persons with disability, but also it provides service to general health and work-related disorder such as foot disorders, fracture, sports injuries, disorders due to aging, tendinitis, muscular pain, aesthetic restoration etc.. Prosthetics and Orthotics Professionals play an important role in the comprehensive pre and post-surgical management of amputee and other neuro-musculoskeletal disorders. Prosthetics and Orthotics Professionals make the patient independent, confident and useful member of the society through comprehensive prosthetic and orthotic management.

II. OBJECTIVES

At the end of the BPO Course, the learner shall be able:

1. To assess, prescribe and provide comprehensive prosthetic and orthotic management to the individual and the community appropriate to his/her position as a member of the health care team.
2. Be competent to take preventive, supportive, corrective and rehabilitative steps in respect to the commonly encountered problems related to prosthetics and orthotics.
3. To carry out Evidence Based Practice in prosthetics and orthotics
4. Appreciate the psycho-social, cultural, economic, and environmental factors affecting health, and develop humane attitude towards the patients/relatives, in discharging one's professional responsibilities
5. Be familiar with the various National policies and acts related to empowerment of Persons with Disabilities.

¹This Degree is as per UGC Notification on Specifications of Degree: March 2014 as published in the Gazette of India, July 5, 2014.

6. Acquire basic management & administrative skills in the areas of materials, financial and human resources related to prosthetics and orthotics
7. Develop the communication skills to establish effective communication with the stake holders
8. Practice prosthetics & orthotics ethics in patient care, service delivery, and research.
9. Develop attitude for self-learning and acquire necessary skills including the use of appropriate technologies.

III. NOMENCLATURE

BACHELOR IN PROSTHETICS & ORTHOTICS (B.P.O.)

IV. PROGRAM ME STRUCTURE FIRST YEAR

Course Code	Title	Theory Hrs	Practical Hrs	Total Hrs	Marks Theory	Marks Practical	Total Marks	Credit Points
BPO101	Anatomy	120	40	160	100	--	100	
BPO102	Physiology	90	30	120	100	--	100	
BPO103	Workshop Technology & Material Science	80	20	100	100	--	100	
BPO104	Applied Mechanics & Strength of Materials	80	20	100	100	---	100

	Total	220	1000	1220	300	700	1000	

**Joint projects may also be undertaken.

Note: All theory & Practical examinations in the discipline of Prosthetics and Orthotics shall be conducted only by the regular appointed Prosthetic and Orthotic Faculty/ Teachers from a teaching institution.

V. ADEQUACY OF THE SYLLABUS

The syllabus prescribed for the B.P.O. is on the basis of minimum requirements and therefore, Universities and Institutes implementing the B.P.O programme can exercise flexibility in opting the number of papers without compromising on the adequacy and validity of the contents prescribed by the RCI.

VI. DURATION OF THE PROGRAMME

The duration of the programme is of Four and half academic years (inclusive of 6 months of internship), which can be completed in a maximum of 6 years from the date of admission to the programme.

VII. WORKING DAYS & ATTENDANCE

The programme will be conducted for at least 200 working days each year, exclusive of the period of examination and admission. The institution shall work for a minimum of thirty six hours in a week (five or six days), during which physical presence in the institution of all the teachers and student clinician is necessary to ensure their availability for advice, guidance, dialogue and consultation as and when needed.

No student will be allowed to appear in the examination unless she/he has attended at least 75% of total number of classes in theory and 80 % in practical. 100% attendance in internship is compulsory.

VIII. ELIGIBILITY FOR ADMISSION

A. Candidate who has passed 10+2 in science or equivalent with physics, chemistry biology/ mathematics, and English with minimum aggregate 50% marks in PCBE/PCME will be eligible for admission to this course. Relaxation and reservation for SC/ST/OBC/PwD and other categories shall be as per the rules/instructions of the Central Govt /State Govt whichever is applicable.

B. Lateral Entry for Diploma in Prosthetics and Orthotics (D.P.O.) holders

- Candidates who have passed D.P.O. from a RCI recognized institute shall be eligible for admission directly in 3rd year of B.P.O. programme.
- Admissions will be on the availability of the seats within sanctioned seats by the Council.
- In-service candidates may be permitted to undergo internship at their parent organization.

Admission process as per affiliating University norms.

All reservations in admission will apply as per Govt. rules for aided and Govt. institutions. The infrastructure will have to be enhanced as per the seats getting increased under reservation policy.

IX. PROGRAMME PATTERN

The programme pattern has been developed on Annual basis.

X. EXAMINATIONS

Examinations are conducted as per the MGMIHS University norms. Minimum passing marks for every subject will be **50% both in theory and practical, separately**. Each candidate will be given **maximum (n+ 2) attempts** to clear the examination in the annual examination pattern.

XI. NATURE OF EVALUATION

Internal assessment for theory and practicals will not exceed 20% of the maximum marks in each subject. Internal Assessment should be calculated by conducting minimum two class tests, two assignments, examination/practical examination and any other activities implemented by the parent organizations/university. Marks of Internal Assessment should be informed to the Students prior to commencement of university examinations. Eligibility criteria to appear in the University examination should be 40% of the total marks of internal assessment (combined theory and practical). Minimum passing marks for every subject will be **50% both in theory and practical, separately**. The total passing for theory should be inclusive of University theory marks and Internal assessment marks. The total passing for practicals should be inclusive of University practical marks and Internal assessment marks.

XII. TRANSITORY REGULATIONS

Whenever a course or scheme of instruction is changed in a particular year, two more examinations immediately following thereafter shall be conducted according to the old syllabus / regulations. Candidates not appearing at the examinations or failing in them shall take the examinations subsequently according to the changed syllabus / regulations/as per University norms.

XIII. FACULTY-STUDENT RATIO

The faculty-student ratio in the area of B.P.O may be as per the RCI norms.

XIV. BPO TEACHING FACULTY NORMS:

Senior faculty in the discipline of Prosthetics and Orthotics shall be considered as course coordinator. The coordinator should be the controlling and informant authority for the correspondence related to the BPO Programme. He/she should hold qualification as laid down by RCI.

XV. CERTIFICATION AS A REGISTERED PROFESSIONAL

It is mandatory as per Section 13 of RCI Act for every Prosthetist and Orthotist to obtain a "Registered Professional Certificate" from the Rehabilitation Council of India to work in the field of Prosthetics and Orthotics in India. As continuous professional growth is necessary for the renewal of the certificate, the faculty as well as Prosthetist and Orthotist should undergo in-service programme periodically to update their professional knowledge. Amendments, if any, to the regulations of the course will be made periodically by the Rehabilitation Council of India. Any deviation from the above regulations should have the prior approval of the Rehabilitation Council of India.

The successful students will be registered as Prosthetist and Orthotist(Professional). The training institution/organization would take appropriate action to ensure that all passed out students are registered with the Council.

XVI. AWARD OF DEGREE

After successful completion of all examinations and internship candidate will be awarded with the degree of Bachelor in Prosthetics and Orthotics (B.P.O.). The said degree will be classified in accordance with the affiliating University norms.

XVII. CLINICAL PRACTICUM-

The student should be able to meet the following learning objectives:

- Assess the medical condition of a patient related to their orthotic or prosthetic management using appropriate investigative techniques, which include patient history taking and clinical testing.
- Formulate an optimal prosthetic and orthotic solution using information from the patient assessment, other members of the health care team, medical charts, etc.
- Communicate and discuss patient goals and expectations and discuss and debate the prosthetic management with the patient, co-workers and other members of the health care team.
- Reliably measure and capture a positive cast or image of patient / clients' appendage, while correctly positioning the body part and if appropriate, apply the necessary corrective force system.
- Identify, prescribe and justify selection of appropriate materials and components in the fabrication of the prostheses or orthoses.
- Construct the prostheses or orthoses by using appropriate fabrication techniques in preparation for the initial fitting.
- Fit the prostheses or orthoses to the patient using static and dynamic functional criteria established from the original assessment.
- Evaluate the quality of the prostheses or orthoses fit to ensure the appropriate interface contouring, force application and trim lines.
- Identify problems related to device fit and/or alignment and be able to suggest and implement appropriate correction.
- Assess and solve prosthetic or orthotic problems as part of short and long term patient care.
- Maintain accurate records of patient treatment and follow up as well as confidentiality of such information.
- Communicate effectively with patient, co-workers, and other health care professionals in such a manner that will ensure the highest quality of service and reflect a professional attitude on the part of the student.
- Educate the patient /client and/or caregiver on use, care and function of the prostheses or orthoses.
- Understand the methodology of problem identification, problem solving in a process that includes all stake holders, with the patient at the centre.

XVIII. INTERNSHIP

1. Internship is compulsory.

2. Duration: 6 months

3. Eligibility: Internship will start immediately after the declaration of result of final year & candidate is declared pass in all four years.

4. Structure and duration of the postings:

i) The place of postings of the students for internship will be decided by the respective institute conducting the course.

ii) Students should spend minimum of 50% period of internship at parent institute and upto 50% period outside the parent institute like hospital set ups, educational set ups, special clinical facilities. Exposure should be for those areas where limited exposure was provided in the parent institute.

5. Mode of supervision during internship: Supervision should be provided by a Qualified Prosthetics and Orthotics Professional.

6. Maintenance of records by students: Every student should maintain records of the number of hours of clinical work in different areas and institutions. This should be certified by the head of the department/organization/ institution or his/her nominee where the student is undergoing internship.

7. Extension of internship: Internship shall be extended by the number of days the student remains absent.

8. Stipend: As per the norms of the parent Institute.

9. Grading and evaluation of student: Grading and evaluation should be done by the institute, where the candidate is doing internship. The student will be required to repeat those postings in which his/her performance is found unsatisfactory.

10. Certification: The parent institute/affiliating University will award a certificate after successful completion of the internship.

11. The University shall award the degree certificate only after the successful completion of the internship.

FIRST YEAR

ANATOMY
COURSE CODE--- BPO101
TEACHING HOURS ---- 160 (Theory-120, Practical-40)
CREDITS --- As per affiliated university norms

Course Description:

The student should understand the function of individual joints and muscles and be proficient in explaining their interaction. He/she should be knowledgeable in the area of clinical conditions and be able to analyze them by means of appropriate measuring instruments as well as by applying his/her knowledge of range of motion in order to be able to identify a viable prosthetic/orthotic treatment. The student should recognize that biomechanical as well as pathological factors must be viewed concurrently with anatomical factors.

The student should be able to meet the following learning objectives:

- Explain the process of human growth and development;
- Demonstrate competence in identifying and differentiating between surface anatomical structures of the lower limb, upper limb spine and trunk;
- Understand the inter-relations between the systems described. (student should know origin, insertion, nerve connection and blood supply of each muscle)
- Describe and relate the structure and function of the upper and lower limbs to clinical pathologies

DETAILED CONTENTS

Histology: General Histology, study of the basic tissues of the body;

Microscope. Cell. Epithelium, Connective Tissue, Cartilage, Bone, Muscular tissue, Nerve

Embryology:

Development of bones. axial and appendicular skeleton and muscles

Regional anatomy

Thorax:

a) Cardio – Vascular System

- Mediastinum: Divisions and contents
- Pericardium: Thoracic Wall: position, shape and parts of the heart; conducting System; blood Supply and nerve supply of the heart

b) Respiratory system

- Outline of respiratory passages
- Pleura and lungs: position, parts, relations, blood supply and nerve supply
- Diaphragm: Origin, insertion, nerve supply and action, openings in the diaphragm.
- Intercostal muscles and Accessory muscles of respiration: Origin, insertion, nerve supply and action.

c) Abdomen:

- Peritoneum: Parietal peritoneum, visceral peritoneum, functions of peritoneum.
- Location, size, shape, features, blood supply, nerve supply and functions of the following: stomach, kidney, urinary bladder, intestines.

d) Musculo Skeletal Anatomy

- Anatomical positions of body, axes, planes, common anatomical terminologies
- Connective tissue classification
- Bones- Composition & functions, classification and types according to morphology and development
- Joints-definition-classification, structure of fibrous, cartilaginous joints, blood supply and nerve supply of joints

Upper Extremity:

a) Osteology: Clavicles, Scapula, Humerus, Radius, Ulna, Carpals, Metacarpals, Phalanges.

b) Soft parts: pectoral region, axilla, cubital fossa, palm, dorsum of hand, muscles, nerves, blood vessels.

c) Joints: Shoulder girdle, shoulder joint, elbow joints. radio ulnar joint, wrist joint and joints of the hand.

d). Arches of hand. skin of the palm and dorsum of hand.

Lower Extremity:

a) Osteology: Hip bone, femur, tibia, fibula, patella, tarsals, metatarsals and phalanges.

b) Soft parts: Gluteal region, front and back of the thigh (Femoral triangle, femoral canal and inguinal canal), medial side of the thigh (Adductor canal), lateral side of the thigh, popliteal fossa, anterior and posterior compartment of leg, sole of the foot, lymphatic drainage of lower limb, venous drainage of the lower limb, arterial supply of the lower limb, arches of foot, skin of foot.

c) Joints: Hip Joint, Knee joint, Ankle joint, joints of the foot.

Trunk & Pelvis:

a) Osteology: Cervical, thoracic, lumbar, sacral and coccygeal vertebrae and ribs

b) Soft tissue: Pre and Para vertebral muscles, intercostals muscles, anterior abdominal wall muscles, Inter-vertebral disc.

c) Pelvic girdle and muscles of the pelvic floor

Head and Neck: Osteology: Mandible and bones of the skull

Applied Anatomy: Surface anatomy, locomotion and movements. Anthropometry.

Anatomy Practical:

Demonstration of various tissues and cells and Dissection - Demonstration of Lower limbs, upper limbs, spine, surface anatomy and marking.

SCHEME OF UNIVERSITY EXAMINATION (THEORY ONLY)

THEORY 80 MARKS + 20 MARKS INTERNAL ASSESSMENT [100 MARKS]

The question paper would give appropriate weight age to all the topics in the syllabus

Section A S.A.Q.: - Q.1- Answer any FIVE out of SIX [5X 3=15]

Q.2 - Answer any FIVE out of SIX [5X 7=35]

Section B L.A.Q.: - Q.3 - Answer any TWO out of THREE [15X2=30]

INTERNAL ASSESSMENT

1. Two Exams-Terminal and Preliminary examination of 80 marks each

Total-160 Marks

2. Internal Assessment to be calculated out of 20 Marks.

3. Internal Assessment as per University pattern.

RECOMMENDED BOOKS & JOURNALS

ANATOMY

Sl.No.	Author	Title	Publisher	Year/Vol.
1.	Chaurasia, B D	Human Anatomy: Regional and Applied	CBS, New Delhi	2004 3V
2.	Chaurasia, B D	Human Osteology	CBS, New Delhi	1991

6.	Richard L. Drake, Wayne Vogl & Adam W.M. Mitchell	Gray's Anatomy for Students		

PHYSIOLOGY

COURSE CODE--- BPO102

TEACHING HOURS ---- 120 (Theory-90, Practical-30)

CREDITS --- As per affiliated university norms

Course Description:

The course is designed to assess the students to acquire the knowledge of the normal physiology of human body and understand the alteration in the physiology for the fabrication of the prosthesis and orthosis.

The student should be able to meet the following learning objectives:

- Describe and explain cell biology;
- Explain and give examples of basic tissues, their properties and structure
- Compare and contrast the structure and properties of biological substances (ie: blood, lymphatic fluids, serum):

- Describe parts and organs of the body by systems.

DETAILED CONTENTS

General Physiology: Cell: Organelles: their structure and functions

- Transport Mechanisms across the cell membrane
- Body fluids: Distribution, composition.

Blood

- Introduction: Composition and functions of blood.
- Plasma: Composition, functions. Plasma proteins.
- RBC: count and its variations, Haemoglobin - Anemia. Blood indices, PCV, ESR.
- WBC: Classification. Functions, count, its variation of each. Immunity
- Platelets:, functions, count, its variations
- Blood coagulation. (brief)
- Lymph: Composition, and functions.

Nerve Muscle Physiology

- Introduction: Resting membrane potential. Action potential
- Nerve: Structure and functions of neurons. Properties and impulse transmission of nerve fibres.
- Neuroglia: Types and functions.
 - Muscle: Classification. Skeletal muscle: Structure, Neuromuscular junction, Motor Unit
 - Fatigue.

Cardiovascular System

- Introduction: Physiological anatomy and nerve supply of the heart and blood vessels.
- Conducting system: Components. Impulse conduction Cardiac Cycle: Definition. Phases of cardiac cycle. Pressure and volume curves. ECG: Definition.
- Cardiac Output: Definition.
- Functional anatomy of vascular and lymphatic system
- Arterial Blood Pressure: Definition. Normal values and its variations
- Hypertension

Respiratory System

- Introduction: Physiological anatomy – Pleura, tracheo-bronchial tree, alveolus, respiratory membrane and their nerve supply. Functions of respiratory system. Respiratory muscles.
- Mechanics of breathing: – Inspiration: Expiration: Intrapleural pressure. Recoil

tendency and lung volumes

- Hypoxia
- Disorders of Respiration: Dyspnoea, Orthopnoea, Hyperpnoea, hyperventilation, Apnea, Tachypnoea :definitions

Nervous System

- Introduction: Organization of CNS – central and peripheral nervous system.
- Functions of nervous system.
- Synapse: Functional anatomy, classification, Synaptic transmission.
- Sensory Mechanism: Sensory receptors: function, classification and properties.
- Sensory pathway: The ascending tracts – Posterior column tracts, lateral spino thalamic tract and the anterior spino thalamic tract – their origin, course, termination and functions.
- Pain sensation: mechanism of pain. Cutaneous pain –slow and fast pain, hyperalgesia. Deep pain. Visceral pain – referred pain.
- Sensory cortex. Somatic sensations: crude touch, fine touch, tactile localization, tactile discrimination, stereognosis, vibration sense, kinesthetic sensations
- Motor Mechanism: Motor Cortex. Motor pathway: The descending tracts – pyramidal tracts, extrapyramidal tracts – origin, course, termination and functions.
- Reflex Action: Monosynaptic and polysynaptic reflexes, superficial reflexes, deep reflexes. Muscle tone –definition, and properties hypotonia, atonia and hypertonia.
- UMNL and LMNL
- Spinal cord Lesions: Complete transection and Hemisection of the spinal cord.
- Cerebellum: Functions
- Posture and Equilibrium:
- Thalamus and Hypothalamus: Nuclei. Functions.
- Basal Ganglia: Structures, functions.
 - Cerebral Cortex: Lobes. Brodmann's areas and their functions. Higher functions of cerebral cortex – learning, memory and speech.

Kidney and micturition

- Introduction and functional anatomy of kidney, innervations, renal circulation and care of any appliances fitting for dysfunction.
- Micturition – Physiological anatomy and nervous connection of the bladder, cystometrogram micturition reflex.

Integumentary system: Structure of skin, function of skin: Protection, heat regulation, sensation and elasticity.

Endocrinology

Endocrine Pancreas: Secretory cells, action, regulation of secretion of insulin and glucagon. Glucose metabolism and its regulation. Disorder: Diabetes mellitus.

Nutrition & Metabolism

- An Introduction to Nutrition and Metabolism
- Factors influencing energy expenditure

Practical:

1. Clinical examination of nervous system.
2. Clinical examination of sensory system.
3. To study the phenomenon of fatigue in human by Dynamometer

Note: for above practical – physiology practical manual for B.Sc. [Hons.], OT, PT, B.Sc. Nursing and allied sciences Edition first reprint 2006 by CBS publishers

Author: Raj Kapoor can be referred.

SCHEME OF UNIVERSITY EXAMINATION (THEORY ONLY)

THEORY 80 MARKS + 20 MARKS INTERNAL ASSESSMENT [100 MARKS]

The question paper would give appropriate weight age to all the topics in the syllabus.

WORKSHOP TECHNOLOGY AND MATERIAL SCIENCE

COURSE CODE--- BPO103

TEACHING HOURS---- 120

CREDITS --- As per affiliated university norms

Course Description: Students would have competence in practicing effectively and safely within a workshop environment.

- Be familiar with the occupational health and safety policy and procedures in the workplace.
- Demonstrate proficiency in the use of hand tools and machine tools commonly used in the fabrication of Prostheses & Orthoses.
- Explain the important properties of various types of materials: metals, ceramics, polymers, and composites.
- Describe the relationships that exist between the structural elements of these materials and their characteristics.
- Explain mechanical and failure behaviour of these materials, along with techniques used to improve the mechanical and failure properties in terms of alteration of structural elements.
- Describe the basis for the selection of different materials for specific prosthetic and orthotic applications.
- Demonstrate knowledge of toxicity and safety issues associated with the use of specific materials.

DETAILED CONTENTS

General: Introduction to bench work, hand tools, measuring tools and instruments. Equipment for mass production, introduction to lathe machine and its operation, milling machine and its operations, tooling, attachment, Shaping machine and its uses.

Grinding machine, Drilling Machine Abrasive machine etc. Special tools and equipment

used in fabrication of orthoses and prostheses. Compressors, Vacuum Pumps and Dust Collection Equipment. Cutting Tools (Chisels, Saws and Metal Cutters), Pneumatic Tools Power Cutting tools

Workshop Safety & Hazards and Care

Mechanical working of metals such as steel and aluminium.

Fundamental of riveting, soldering, brazing and welding.

Workshop Technology Practical Practice: Practical work on workshop practices.

Practical training on lathes, Drilling Machine (Bench and Pedestal), Grinding Machine, Router, hot air oven, sanding machine, heat gun, pneumatic machines and other machines. Practical work on various materials and tools and its use in prosthetics & Orthotics.

MATERIAL SCIENCE

Metal Alloys: Fundamentals of metals and alloys both ferrous and nonferrous. Properties, testing and inspection of metals and alloys, heat treatment of metals. Powder metallurgy, surface coating of metals.

Wood: Wood, types, seasoning, preservation, lamination properties and adhesives for wood. Wood work: Introduction to Wood, wood work and wood working tools. Pattern making and making of various kinds of joints.

Leather: Leather, types, tanning, preservation, lamination, properties and adhesives for leather.

Fabric: Fabric types, properties, utilization, selection and quality control.

Polymers & composite materials: Introduction to Plastics, type of plastics and molecular structures. Relationship of properties to structures. Monomers, Polymers, additives, Mechanical properties, effect on properties of method of production.

Fabrication processes, Effects of fabrication, process, micro structural changes, shrinkage and other degradation during processing, environmental effects. Thermoforming plastics, their fabrication process, thermosetting plastics and fabrication process Composite materials and their uses-Resin: Acrylic and Polyester.

Elastomers H.D.P.E. PP, PP-CP, Viscoelastic behavior of plastics.

Introduction to fibre reinforced plastics.

Introduction and their processing of various techniques of moulding and lamination. Joining of plastics, welding, adhesives and their effect on structure and plastics properties.

Foams: Different types of foams used in P&O especially Latex, Polyurethane, polyethylene and other kind of rigid/semi rigid/ flexible foams.

Plaster of Paris & Silicon and its application procedure in Prosthetic & Orthotic techniques

SCHEME OF UNIVERSITY EXAMINATION (THEORY ONLY)

THEORY 80 MARKS + 20 MARKS INTERNAL ASSESSMENT [100 MARKS]

The question paper would give appropriate weight age to all the topics in the syllabus.

- Section A S.A.Q:- Q.1- Answer any FIVE out of SIX [5X 3=15]
Q.2 - Answer any FIVE out of SIX [5X 7=35]
- Section B L.A.Q.: - Q.3 - Answer any TWO out of THREE [15X2=30]

INTERNAL ASSESSMENT

1. Two Exams-Terminal and Preliminary examination of 80 marks each
Total-160 Marks
2. Internal Assessment to be calculated out of 20 Marks
3. Internal Assessment as per University pattern.

APPLIED MECHANICS & STRENGTH OF MATERIALS
COURSE CODE--- BPO104
TEACHING HOURS---- 100
CREDITS --- As per affiliated university norms

Course Description:

The student should be able to meet the following learning objectives:

- Demonstrate an ability to utilize appropriate terminology and units to describe mechanical principles.
- Derive free body diagrams in order to describe clinical problems and generate treatment solutions.
- Apply the mechanical principles of statics and dynamics to quantify and explain linear and angular motion of the human body
- Apply the concepts of stress and strain in the analysis of basic structural elements.
- Determine and draw diagrams for internal forces and bending moments (axial

forces, shear forces, moments and torques) in a structural member.

- Explain the principles of composition and resolution of forces and use these principles to solve clinical problems
- Discuss the concepts of work energy and power
- Explain the principles of fluid mechanics and describe how the principles can be applied in clinical situations.
- Explain mechanisms underlying failure of structures under deformation.

DETAILED CONTENTS

General Mechanics: Definition of Mechanics, Foundation material on Units, dimensional homogeneity, scalar and vector quantities, Co-ordinate systems, Newton's laws. Resolution and summation of forces and moments in two and three Dimensions, equivalent force systems, free body diagrams, equations of Equilibrium, plans and space frame analysis. Parallel and non- parallel Forces, torque. Linear and angular motion, uniform acceleration, friction, inertia, moment of inertia, dynamic equilibrium (translation/rotation), Energy, momentum.

Simple stress & Strain: Definition of stress and strains, factor of safety stress, modulus of elasticity, longitudinal strain and internal strains. Poisson's ratio etc. stress and strain curve, statement of formulae relating between different modules, simple problems to understand the above principles of composite bars-formula relating to loads and strains in individual members simple to understand the above relations.

General: Practices on parallel and non-parallel forces, torque. Linear and angular motion, uniform acceleration, friction, inertia.

Design concept: Buckling, theories in failure, fatigue and stress concentrations, connections, Shear force and bending moment diagrams, centroids, 2nd moment of area and mass, theorem of parallel axes, bending stress, torsional stress of circular shafts, combined axial and bending stresses. Combined and torsional stresses, combined axial bending torsional stresses. Open and closed helical springs and beam deflection.

Control systems: Introduction to control theory and its applications in Prosthetics and Orthotics.

Ergonomics with applied mechanics

General: definition and scope in modern industrial social studies on Machinery man oriented topics. Displays devices for transmitting information from machine to man. Controls in information from man to machine. Safety factors. Pollution, noise, fumes. atmospheric pollution if motion study in relation to Ergonomics principles.

SCHEME OF UNIVERSITY EXAMINATION (THEORY ONLY)

BIO-MECHANICS- I
COURSE CODE--- BPO 105
TEACHING HOURS---- 80
CREDITS --- As per affiliated university norms

Course Description: The understanding of Bio-mechanical principles of Prosthetics and Orthotics will be the foundation of the work of the students. It is essential to have a sound theoretical knowledge of the subject and students are able to demonstrate the rigorous application of these principles to practical P&O situations and in the analysis of those situations.

The student should be able to meet the following learning objectives:

- Demonstrate an ability to apply principles of tissue mechanics to explain the principles of P&O treatment, (involving various force systems) and the practical problems encountered in prosthetics and orthotics
- Use biomechanical terminology to describe position and motion of the human body
- Discuss mechanical principles governing human motion
- Utilise temporal spatial, kinematic and kinetic information to distinguish between normal and abnormal function of the upper limbs, lower limbs & Spine.
- Analyse the forces at a skeletal joint for various static and dynamic activities
- Demonstrate the ability to analyse forces and moments applied to the body by prosthetic and orthotic devices.
- Apply biomechanical principles to generate optimal solutions to clinical problems in prosthetics and orthotics.
- Understand the concepts of differentiation and integration and evaluate derivatives and integrals of a function

DETAILED CONTENTS

Basic Concepts in Biomechanics: Kinematics and Kinetics:

Types of Motion, Location of Motion, Direction of Motion, Magnitude of Motion, Definition of Forces, Force of Gravity Reaction forces, Equilibrium, Objects in Motion, Force of friction, Concurrent force systems, Parallel force systems, Work, Moment arm of force, Force components Equilibrium of levers.

Joint structure and Function: Joint design, Materials used in human joints, General Properties of connective tissues, Human joint design, Joint function, Joint motion

Introduction to Normal Human locomotion. Biomechanics of Ankle & Foot. Biomechanics of Foot & Ankle Foot Orthoses. Biomechanics of Symes prosthesis. Partial Foot prosthesis. Below Knee (trans tibial) prosthesis.

BASIC ELECTRONICS
COURSE CODE--- BPO 106
TEACHING HOURS---- 80
CREDITS --- As per affiliated university norms

Course Description: The student will have knowledge of basic principles of electricity and electronics with particular reference to applications in prosthetics, orthotics and workshop practice.

The student should be able to meet the following learning objectives:

- Explain basic concept of electricity and electronics covering following:
DC circuits, inductance and capacitance, AC circuits, power, supplies, amplifiers, feedback, interference rejection techniques, myoelectrodes and bioelectricity
- Explain electronics measuring system
- Explain safety practice of electricity

DETAILED CONTENTS

Electricity: Basic Concepts: Introduction to SI System of units, charge, current, resistance, potential differences, electromotive force, Energy power, Voltage and current Relationship, energy storage. DC circuits, AC circuits, sine wave, Frequency, Period, phase, RMS value, inductive and capacitive reactance.

Resistors: Resistors sensitive to temperature, strain and light, Resistors in series and in parallel.

Transformers: Principle of the transformer, voltage, turns and current ratios. **Semi-Conductors:** Outline Concepts of semiconductors and insulators. Conduction in intrinsic and extrinsic semiconductors.

Amplifiers: Amplifiers as a system element. Operational amplifiers and their ideal characteristics. The small signal equivalent circuit having a controlled source. Voltage and current gain, the decibel power gain. Noise and drift voltages, Source in amplifiers and bio-systems.

Feed Back: The general Feedback equation, Feedback Voltage series, negative feedback and loop gain, loop gain Accuracy, input resistance, output resistance, band width of noise. Feedback as a control mechanism in the wider sense. Positive feedback – instability and self-oscillation in amplifiers and oscillators.

Measurements: Electronics measuring instruments. Summary of recording instruments. Concepts of resolution and accuracy applied to digital and analogue instruments. Transducers for temperature, light, pressure, sounds, description, specification and use in circuit.

Myoelectrodes: Technology of metal and metal paste electrodes, the equivalent circuit between electrodes, stability, source of unwanted voltage electrode systems. Other types of myoelectrodes micro electrodes, implanted electrodes, comparison with surface electrodes. Sensors, microprocessors etc.

Electrical Safety: Description of single phase and three phase supply system and voltage involved. Function of line, neutral and earth in single phase system. Current practice in pin connection and colour codes. Simple safety procedure to be taken when servicing equipment. Effect on safety of fault conditions. Fuses, Conductors and earth leakage detectors – miniature circuit breakers (MCB). Voltage regulators integrated circuits.

Bio-Electricity: Biological Potentials, Muscle action potentials, Electro-myography and Myo-electricity

PROSTHETICS SCIENCE-I

COURSE CODE--- BPO107

TEACHING HOURS---- 80 (Theory-80)

CREDITS --- As per affiliated university norms

Course Description: This subject is delivered in a coordinated manner with the Practical part of the Prosthetic Science course. The student will be required to acquire and comprehend the necessary theoretical knowledge and to be able to integrate this effectively in clinical practice.

The student should be able to meet the following learning objectives:

- Compare and contrast strategies for clinical assessment of patients and describe appropriate investigative techniques including patient history taking and physical examination.
- Recognize and describe the signs and symptoms of the most common pathologies which require prosthetic solutions including. etiology, clinical presentation, prognosis and appropriate device management.
- Demonstrate empathy between Prosthetics theory and the environment in which the client is situated.
- Distinguish between the physical characteristics of the limbs and discuss the

relative implication for device design.

- Describe and compare temporo- spatial and kinematic characteristics of normal and pathological gait and use this information to justify the selection and design of appropriate devices.
- Discuss biomechanical force systems and use these principles in generating an appropriate prosthetic prescription.
- Describe the mechanics of materials and be able to apply these concepts to the design and construction of devices.
- Compare and contrast the functional characteristics of prosthetic components.
- Formulate appropriate prosthetic and orthotic prescriptions for wide range clinical situations.
- Understand and describe the roles of key members of the health care team and identify how they interrelate with the Prosthetist and Orthotists

DETAILED CONTENTS

Introduction: Introduction to Prosthetics, definitions of various terminologies, Historical development in Lower Extremity Prosthetics in India and abroad.

Prosthetic Feet: Classes of Various types of Prosthetic Feet

Partial Foot Prostheses: Various types of Partial foot prosthesis. Biomechanics of Partial foot prosthesis, Prescription Principles, Materials used for partial foot prostheses, various casting & fabrication techniques of Partial foot prosthesis.

Syme's: Various types of Symes Prosthesis, Prosthetic components, Prescription criteria, Principles. Materials used for Symes prosthesis, casting techniques. Cast modification. Fabrication & alignment techniques for Symes prosthesis.

Trans Tibial: Various types of trans-tibial prostheses technology, Prosthetics Components – both conventional and modular. Trans-tibial, Prosthetic Prescription Criteria and principles. Materials used in Trans-tibial Prosthesis. Measurement and casting techniques for Trans-tibial prosthesis. Cast modification., Fabrication techniques for trans-tibial prosthesis. Fabrication Technique for trans-tibial Conventional Prosthesis – both Open and close ended socket, Different types of socket designs – PTB, PTS, PTBSC, PTB-SCSP TSBetc, Different types of suspension. Alignment techniques

Gait Deviations and Analysis: Person with Chopart, Symes, Trans-tibial prosthesis.

Check-Out Procedures with Chopart, Symes & Trans-tibial prosthesis.

ORTHOTICS SCIENCE-I	
COURSE CODE---	BPO108
TEACHING HOURS----	80 (Theory)
CREDITS ---	As per affiliated university norms

Course Description: This subject is delivered in a coordinated manner with the Practical part of the Orthotic course. The student will be required to acquire and comprehend the necessary theoretical knowledge and to be able to integrate this effectively in clinical practice.

The student should be able to meet the following learning objectives:

- Compare and contrast strategies for clinical assessment of patients and describe appropriate investigative techniques including patient history taking and physical examination.
- Recognize and describe the signs and symptoms of the most common pathologies which require Orthotic solutions including, etiology, clinical presentation, prognosis and appropriate device management.
- Demonstrate empathy between Orthotic theory and the environment in which the patient is situated.
- Distinguish between the physical characteristics of the limbs and discuss the relative implication for device design.

- Describe and compare temporo spatial and kinematics characteristics of normal and pathological gait and use this information to justify the selection and design of appropriate devices.
- Discuss biomechanical force systems and use these principles in generating an appropriate orthotic prescription.
- Describe the mechanics of materials and be able to apply these concepts to the design and construction of devices.
- Compare and contrast the functional characteristics of orthotic components.
- Formulate appropriate orthotic prescriptions for wide range clinical situations.
- Understand and describe the roles of key members of the health care team and identify how they interrelate with the Prosthetist & Orthotist.

DETAILED CONTENTS

General: Introduction to Orthotics, definitions of various terminologies, History of Orthoses in India and abroad. Various materials used in Orthotics. Foot & Ankle Deformities.

Different types of Orthoses: Users/Client's assessment and prescription criteria, Measuring and casting, cast modification, three point force system, fabrication, fitting, aligning, checking out and finishing of the following devices:

Pedorthics: Medial/Lateral raise (Inside /outside shoe), M.T. Bar (Inside / Outside shoe), Arch support, Meta tarsal pad, Calcaneal heel wedge, Heel raise, Thomas Heel, Heel pad for Calcaneal spur, 'T' strap (Medial and lateral), Fixation of stirrup plate in shoes/ Sandal, Various types of Arch Supports – flexible/semi rigid/rigid/custom molded, SMO-Custom molded Supra Malleolar Orthosis.

Various types of Foot Orthoses for diabetic feet and other sensory deficiencies.

AFO (Ankle Foot Orthosis): Conventional AFO, Custom made AFO, Articulated & Non articulated A.F.O & various types of ankle joints, Clubfoot Orthosis: Orthotic management of CTEV, Ankle support

Orthotic management of Anaesthetic Foot. Orthosis for the management of below knee fracture.

PRACTICAL PROSTHETIC SCIENCE-I
COURSE CODE--- BPO 151
TEACHING HOURS---- 310
CREDITS --- As per affiliated university norms

Course Description: This should include the supervised manufacture and fitting of all common devices and at least exposure to the range of devices not routinely seen in clinical practice.

The student should be able to meet the following learning objectives:

- Assess the medical condition of a patient related to their orthotic or prosthetic management using appropriate investigative techniques which include patient history taking and clinical testing.
- Formulate an optimal prosthetic solution using information from the patient assessment, other members of the rehabilitation team, medical charts, etc.
- Communicate and discuss patient goals and expectations and discuss and debate the prosthetic management with the patient, co-workers and other members of the rehabilitation team.
- Reliably measure and capture a positive cast or image of clients' appendage while correctly positioning the body part and if appropriate apply the necessary corrective force system.
- Identify, prescribe and justify selection of appropriate materials and component in the construction of the device.
- Construct the device using appropriate fabrication techniques in preparation for the initial fitting.
- Fit the device to the patient using static and dynamic functional criteria established from the original assessment.
- Evaluate the quality of the device fit to ensure the appropriate interface contouring, force application and tramlines.
- Identify problems related to device fit and/or alignment and be able to suggest and implement appropriate correction.
- Assess and solve prosthetic problems as part of long term patient care.
- Maintain accurate records of patient treatment and follow up as well as confidentiality of such information.
- Communicate effectively with patient, co-workers, and other health care

professionals in such a manner that will ensure the highest quality of service and reflect a professional attitude on the part of the student.

- Educate the patient / client and/or caregiver on use, care and function of the device.
- Understand the methodology of problem identification, problem solving in a process that includes all stake holders, with the client at the centre.

Prosthetics Practical:

1. Taking case history of a minimum of 10 individuals / Patients
2. Fabrication of Prosthetic Feet,
3. Assessment, casting & fabrication of Partial foot prosthesis on model / mannequins
4. Assessment, casting & fabrication of Chopart Prosthesis on model / mannequins
5. Assessment, casting & fabrication of Symes Prosthesis on model / mannequins
6. Assessment, casting & fabrication of Trans-tibial prosthesis on model / mannequins

UNIVERSITY PRACTICAL EXAM 80 MARKS + 20 MARKS INTERNAL ASSESSMENT [100 MARKS]

SECOND YEAR

PATHOLOGY
COURSE CODE--- BPO201
TEACHING HOURS---- 80
CREDITS --- As per affiliated university norms

Course Description: The student should be able to describe and contrast the etiology and progression of diseases and to identify early signs and symptoms of conditions that are commonly encountered by Prosthetist & Orthotist. In addition, s/he should be able to advise on care and appropriate treatment options.

The student should be able to meet the following learning objectives.

- Describe the basic pathological processes that underlie disease (eg: cell injury and necrosis, inflammation and healing, ischemia, infarction and neoplasia);
- Apply knowledge of basic pathological processes to explain the etiology, pathogenesis, structural and functional manifestations of diseases commonly encountered in clinical practice, including relevant conditions affecting locomotion and body systems (musculoskeletal system and nervous system, vascular system).

DETAILED CONTENTS

- a. **General:** Introduction to pathology, basic mechanism of health and disease, clarification of disease.

Inflammation – Acute inflammation: features, causes, vascular and cellular events.

Chronic inflammation: Causes, Types, Classification, Repair, Wound healing by primary and secondary union, factors promoting and delaying the process.

- b. Hemodynamic disorders, thrombo embolic disease & shock. Ischemic, necrosis, thrombosis, embolism, Infarction, shock. Gangrene. Thromboangitis obliterans.

Neoplasia – Definition, classification, Biological behaviour : Benign and Malignant, Carcinoma and Sarcoma, principles of their spread.

- c. Hypersensitivity diseases and immunity – Brief overview of hypersensitivity reaction allergies & auto immune diseases.
- d. Genetic disorders – Brief overview of genetic disease.
- e. Neurovascular diseases: Outline of Cerebral-vascular disorders. Trauma to brain and spinal cord, Demyelinating diseases like multiple sclerosis. Degenerative diseases like Parkinsons disease. Peripheral vascular disease. Poliomyelitis.

- f. Metabolic disorders – Diabetic mellitus- Types, Pathogenesis, Pathology, Laboratory diagnosis
- g. Disorders of blood. Constituents of blood and bone marrow, Regulation of hematopoiesis. Anemia: Classification, clinical features & lab diagnosis.

TITLE--- ORTHOPAEDICS, AMPUTATION SURGERY AND IMAGING
COURSE CODE--- BPO202
TEACHING HOURS--- 100
CREDITS --- As per affiliated university norms

Course Description: In this unit the students learn about the various orthopedic conditions in detail with review of the disabling conditions. It also covers the various common surgical techniques and its influences in the orthotics and prosthetics fit and design.

The student should be able to meet the following learning objectives:

- Have an understanding of different clinical conditions that may indirectly impact on the clients' ability to successfully rehabilitate using the device.
- Explain the management of different disabling conditions.
- Explain the principles of amputations and revision amputation, types and techniques
- Explain the post operative care of the stump and stump hygiene
- Describe the stump dermatology and the common skin diseases and management.
- Describe and fabricate the post operative fitting in the lower extremity.
- Describe common surgical technique and how they may influence prosthetics and Orthotics fit and design

DETAILED CONTENTS

Orthopedics: General: Introduction, Principles of Orthopedics.
Common investigative procedures.

Traumatology

Fracture, definition, types, signs and symptoms and management.
Subluxation/ dislocations – definition, signs and symptoms, management

Inflammatory and Degenerative Conditions

Osteomyelitis, arthritis and arthroses, eg - Inflammation of Joints, Rheumatoid Arthritis, infective arthritis, tuberculosis arthritis, Osteoarthritis, Ankylosing spondylitis, arthritis of hemophilic joints, Neuropathic joints. Inflammation of tendon sheath and bursa,

Disease of Bones and Joints

Metabolic diseases of bones, e.g. rickets, Osteomalacia, Osteopenia, Osteoporosis, gout, scurvy etc.

Congenital Deformities

Outline of Torticollis, Spina bifida, spinal anomalies, scoliosis, C.T.E.V.

Acquired Deformities

Scoliosis – all types, Kyphosis, Lordosis, Spondylolisthesis, Coxa-vara, Coxa-valga and Coxa magna, Otto pelvis, Genu valgus, Genu varum, Genu recurvatum.

Cervical and Lumbar Pathology

Prolapse of intervertebral disc, Spinal cord injury

Regional Conditions: Definition, Clinical features and management of the following regional conditions

Hip: Outline of Dislocations and subluxations & dysplasia (congenital, traumatic, pathological, paralytic, spastic and central),

Knee: Outline of Meniscal tears, dislocation of patella, Ligamentous injuries.

Ankle & foot: Outline of partial and total ligamentous injuries Sprain Heel and foot deformities (Calcaneovarus, Pes Valgus, varus, Metatarsalgia, plantar fasciitis, Anesthetic feet, Bunion toe Hallux Valgus)

Shoulder: Outline of Recurrent dislocation, Bicipital tendinitis and periarthrititis.

Elbow and forearm: Outline of Cubitus varus and valgus, Madelung's deformity, Tennis elbow, Volkmann's contracture, Dupuytren's disease, De Quervain's disease, entrapment neuropathies.

Wrist & Hand: wrist drop, Tenosynovitis, mallet finger, carpal tunnel syndrome, claw hand,

Specific Disorders: Leprosy, Burns, Tumors – Benign & malignant, Tuberculosis & Perthes Disease, AVN (Full) Peripheral Nerve Injuries, Congenital anomalies Muscular Dystrophy etc.

Sports injuries and their management.

Amputation Surgery

General: Indications/ causes, General Principles. Types of amputation, i.e., Guillotine. Flap, Osteoplastic Myoplastic, Osteo-myoplastic.

Individual's preparation for prosthesis. Ideal stump. Preoperative, operative and postoperative prosthetic management techniques in general.

Amputation: Amputation surgery in lower and upper limbs. stump refashioning and amputation revision

Amputation in special circumstances, like in infants and children, Congenital limb deficiencies and its universal classification, ischemic limbs, elderly persons, malignancy and Diabetes. Osseo integration and Osteogenesis-imperfecta. Congenital anomalies, podiatry, burns.

Different Imaging Techniques- X-ray, Sonography, CT Scan & MRI

Demonstration of different conditions & relevant x-ray films,
How to read x-ray, How to measure the deformity in x-ray,
Cobbs & Rib angle measurement etc. Assessment related to P&O management.

SCHEME OF UNIVERSITY EXAMINATION (THEORY ONLY)

THEORY 80 MARKS + 20 MARKS INTERNAL ASSESSMENT [100 MARKS]

The question paper would give appropriate weight age to all the topics in the syllabus.

Section A S.A.Q.:- Q.1- Answer any FIVE out of SIX [5X 3=15]

Q.2 - Answer any FIVE out of SIX [5X 7=35]

Section B L.A.Q.:- Q.3 - Answer any TWO out of THREE [15X2=30]

INTERNAL ASSESSMENT

1. Two Exams-Terminal and Preliminary examination of 80 marks each

Total-160 Marks

2. Internal Assessment to be calculated out of 20 Marks

3. Internal Assessment as per University pattern.

RECOMMENDED BOOKS & JOURNALS

Sl. No.	Author	Title	Publisher	Year/Vol.
1.	Adam,s	Outline of orthopaedics		
2.	Solomon, Louis	Apley's Systems of Orthopedics and Fracture	Arnold, London	
3.	Maheshwari, J	Essential Orthopedics		

4.	Terke, Samuel L.	Orthopedics: principles and their application	Lippencott, New York	
5.	MiroslowVitali	Amputation & Prosthesis		

COMMUNITY REHABILITATION & DISABILITY PREVENTION
COURSE CODE--- BPO203
TEACHING HOURS---- 60
CREDITS --- As per affiliated university norms

Course Description: The course is designed to assist the students to develop understanding of the health and socio-economic context of people with disabilities in the community.

The student should be able to meet the following learning objectives to

- Recognise members of the clinic team and identify benefits associated with a team approach
- Describe and discuss theoretical principles of Physiotherapy & Occupational Therapy
- Describe theories related to the psychology of loss and disability;
- Discuss the social causes of disability in India and the link between poverty and disability.
- Reflect and analyze on their attitude/values and attitudes towards persons with disabilities, their families and the community (Socio-cultural and religious)
- Explain the UN convention rights and role as Prosthetist and Orthotist

DETAILED CONTENTS

Normal Posture: definition & description, static and dynamic, alignments of various joints, centre of gravity, planes & muscular moments, and Analysis of posture

Movements: Anatomical definition and description, Movements and exercise as therapeutic modality and their effects, Physiological reaction of exercise.

Traction: Rational, Technique, indications & contra indications.

Therapeutic Techniques: Electrotherapy, Heat therapy, Hydrotherapy, Exercise Therapy

Muscle Testing: Concept, introduction, significance and limitations.

Grade systems, techniques of muscle testing, goniometry.

Child development in brief - milestone and delayed milestone, Assessment procedure.

Evaluation of muscle power, range of motion, checking of joint stability

Functional Assessment including Activities of Daily Living (ADL), stretching, pre prosthetic management, Exercise through games involving parents or guardians, Stump bandaging application etc.

Introduction to impairment, disability and handicap . International Classification of Functioning, Disability and Health (ICF). Introduction to disability issues, Government schemes and initiatives, legislation and UNCRPD,

Specific disorders and management: Peripheral nerve injuries. Poliomyelitis, Cerebral Palsy, Muscular Dystrophy, Club foot (CTEV), Spina Bifida, Hemiplegia, Spinal Cord injuries (paraplegia/ Quadriplegia),

- General re-actions of motor unit
- Disease of peripheral nerves – inflammatory neuropathies, immune mediated infections, polyneuropathies [leprosy, etc, hereditary neuropathies, acquired metabolic & toxic neuropathies, nutritional neuropathies, Traumatic neuropathies.
- Disease of skeletal muscle.
- Muscular dystrophies, Myotonic dystrophy

Concept of comprehensive Rehabilitation, Rehabilitation team and role of each member of the team.

Introduction to Physical Medicine, Principles of clinical examinations, diagnosis and treatment. Different aspects of physical medicine and rehabilitation.

Rehabilitation aspects of other disabilities including visual, speech & hearing and mental retardation and disability evaluation.

Rehabilitation of Geriatric population: problems related with ageing and their management.

Introduction to Health care System- Rehabilitation in Health care, rehabilitation under various ministries, introduction to Institute based rehabilitation (IBR) and Community Based Rehabilitation (CBR). Prosthetics & Orthotics in CBR and Role of CBR Workers in P&O.

Community Based Rehabilitation: CBR and its need – difference between IBR and CBR. Simple knowledge about other disabilities, its prevention and its management. Role of P&O Professionals in CBR. Role of other professionals in CBR. Early identification

and early Intervention, How to work as a team in CBR/IBR structure, Simple techniques to make CBR activities more purposeful, Telemedicine

SCHEME OF UNIVERSITY EXAMINATION (THEORY ONLY)

BIO-MECHANICS-II
COURSE CODE--- BPO 204
TEACHING HOURS---- 100
CREDITS --- As per affiliated university norms

Course Description: The understanding of Bio-mechanical principles of Prosthetics and Orthotics will be the foundation of the work of the students. It is essential to have a sound theoretical knowledge of the subject and students are able to demonstrate the rigorous application of these principles to practical P&O situations and in the analysis of those situations.

The student should be able to meet the following learning objectives:

- Demonstrate an ability to apply principles of tissue mechanics to explain the principles of P&O treatment, (involving various force systems) and the practical problems encountered in prosthetics and orthotics
- Use biomechanical terminology to describe position and motion of the human body

- Discuss mechanical principles governing human motion
- Utilize temporo-spatial, kinematic and kinetic information to distinguish between normal and abnormal function of the upper limbs, lower limbs & Spine.
- Analyze the forces at a skeletal joint for various static and dynamic activities
- Demonstrate the ability to analyze forces and moments applied to the body by prosthetic and orthotic devices.
- Apply biomechanical principles to generate optimal solutions to clinical problems in prosthetics and orthotics.
- Understand the concepts of differentiation and integration and evaluate derivatives and integrals of a function

DETAILED CONTENTS

Tissue Mechanics: Study of mechanical characteristics and function of Bones, skin, ligaments, cartilage and muscles.

Biomechanics of Hip , biomechanics of Knee

Posture & Gait: Normal gait: general features of gait, gait initiation, kinematics and kinetics of gait, energy requirements, Pathological gait Introduction to EMG studies and recording EMG

Joint Force Analysis: Body segment parameters, joint forces during swing and stance phase, force analysis of foot and ankle joint, knee joint and Hip joint.

Human locomotion and Gait analysis: Introduction to different ways to do gait analysis by using force plate/TV analysis/ electromyography studies, energy studies, gait repeatability, variation due to age, variation due to footwear, Orthoses/Prostheses. Trans Femoral Amputee, gait analysis and deviations, gait variations due to alignment or pathological conditions.

Through knee Biomechanics: Through knee Prescription Principles, socket biomechanics and alignment techniques.

Trans Femoral Prosthetics Biomechanics: General Socket biomechanics, Trans Femoral socket biomechanics and analysis of socket forces.
Analysis of Trans Femoral Prosthetic components.

Gait deviation: Gait deviation while using while using Foot Orthoses (FO). Ankle Foot Orthoses (AFO) and trans-tibial prostheses.

Above knee Orthotics Biomechanics: Biomechanical principals of various kinds of above knee Orthosis especially Knee Ankle Foot Orthosis and Floor Reaction Orthosis. Biomechanics of HKAF0 especially to prevent scissoring. Three/ four/five point force system. KAFO and HKAF0 gait deviations due to alignments or pathological conditions. Gait analysis of KAFOs and HKAF0s with various types of crutches.

PHARMACOLOGY
COURSE CODE--- BPO208
TEACHING HOURS--- 60
CREDITS --- As per affiliated university norms

1. General Pharmacology:

Introduction, Definitions, Classification of drugs, Sources of drugs, Routes of drug administration, Distribution of drugs, Metabolism and Excretion of drugs, Pharmacokinetics, Pharmacodynamics, Factors modifying drug response, Elementary knowledge of drug toxicity, drug allergy, drug resistance, drug potency, efficacy & drug antagonism.

2. Autonomic Nervous system

Cholinergic and Anti-Cholinergic drugs,

Adrenergic and Adrenergic blocking drugs, Peripheral muscle relaxants.

3. Neuropharmacology (in brief) : Sedative-Hypnotic Drugs: Barbiturates, Benzodiazepines, Antianxiety Drugs: Benzodiazepines, Other Anxiolytics, Drugs Used in Treatment of Mood Disorders: Monoamine Oxidase Inhibitors, Tricyclic Antidepressants, Atypical Antidepressants, Lithium, Antipsychotic drugs

4. Disorders of Movement (in brief) : Drugs used in Treatment of Parkinson's Disease, Antiepileptic Drugs, Spasticity and Skeletal Muscle Relaxants

5. Inflammatory/Immune Diseases-Non-narcotic Analgesics and Non steroidal Anti-Inflammatory Drugs, Acetaminophen, NSAIDs, Aspirin, Non-aspirin NSAIDs, drug Interactions with NSAIDs, Gluco-corticoids: Pharmacological Uses of Glucocorticoids, adverse effects, Physiologic Use of Glucocorticoids

Drugs Used in Treatment of Arthritic Diseases: Rheumatoid Arthritis, Osteoarthritis, Gout,

Drugs Used in the Treatment of Neuromuscular Immune/Inflammatory Diseases: Myasthenia gravis, Idiopathic Inflammatory Myopathies, systemic lupus Erythematosus, Scleroderma, Demyelinating Disease,

6. Respiratory Pharmacology (in brief) : Obstructive Airway Diseases, Drugs used in Treatment of Obstructive airway Diseases, Allergic Rhinitis

7. Digestion and Metabolism (in brief): Gastrointestinal Pharmacology: Peptic Ulcer Disease, Constipation, Diarrhea, Drugs Used in Treatment of Diabetes Mellitus: Insulin, Oral Hypoglycemics

8. Geriatrics: Pharmacology and the geriatric Population: Adverse effects of special concern in the Elderly, Dementia, Postural hypotension, urinary incontinence.

SCHEME OF UNIVERSITY EXAMINATION (THEORY ONLY)

PSYCHOLOGY AND SOCIOLOGY
COURSE CODE--- BPO 205
TEACHING HOURS--- 60
CREDITS --- As per affiliated university norms

Course Description: The course is designed to assist the students to develop understanding of the health and socio-economic context of people with disabilities in the community and their role and the role of CBR and introduce different members of the clinic team and theoretical principles of rehabilitation.

The student should be able to meet the following learning objectives

- Recognize members of the clinic team and identify benefits associated with a team approach
- Describe and discuss theoretical principles of rehabilitation;
- Reflect and analyse on their attitude/values and attitudes towards persons with disabilities, their families and the community (Socio-cultural and religious)
- Explain the different approaches to rehabilitation.
- Explain different component of CBR and the guiding principles of CBR implementation.
- Explain P & O role in a CBR programme.

Psychology & Social work:

Introduction to Psychology. Outline of Psychology and behavior. Intelligence and abilities. Learning and Remembering. Psychological Development.

Cognitive Processes, Personality. Moral Development. Psychological aspect of

disability. The Role of the Family, Child with the disability, parents of the disabled child. Acceptance of Severely disabled persons. Social-Sexual Relationships. Independent Living.

Introduction to Sociology and outline of Society, definitions, Outline of Social works, Nature of Social organization, types of organizations. Non-governmental organisations and its role in prosthetics & orthotics. Structure and functions of Social Institutions.

Village as a community. Social Changes, Social Problems, Social Welfare, Vocational Rehabilitation, Employment, Self-Employment Job analysis, Job placement.

Disability & Development:

Background to social, political and economic issues in India and other Low Income countries. Affect on poor who live in rural and urban areas. Disability and women

Introduction to community based rehabilitation as compared to the existing medical model and its function.

Local resources available and referral. Income generation schemes, Purpose of Sangha/group of PWDs. Access, adaptations and change of environment where people live or work.

Removing Environmental Barriers, Recreation for the Disabled Community Welfare organizations, Social welfare mes. Professional and social work in medical & rehabilitation set up. Practical and environmental difficulties of patients in use of appliances. Outline of Educational aspects, PWD act.

SCHEME OF UNIVERSITY EXAMINATION (THEORY ONLY)

THEORY 80 MARKS + 20 MARKS INTERNAL ASSESSMENT [100 MARKS]

The question paper would give appropriate weight age to all the topics in the syllabus.

Section A S.A.Q.: - Q.1 Answer any FIVE out of SIX [5X 3=15]

Q.2 - Answer any FIVE out of SIX [5X 7=35]

Section B L.A.Q.: - Q.3 - Answer any TWO out of THREE [15X2=30]

INTERNAL ASSESSMENT

1. Two Exams-Terminal and Preliminary examination of 80 marks each

Total-160 Marks

2. Internal Assessment to be calculated out of 20 Marks

3. Internal Assessment as per University pattern.

Proposed syllabus for Sociology

1. Introduction to Medical Sociology

- Introduction to Sociology and outline of Society, definitions,
- Outline of Social works, Nature of Social organization,
- Types of organizations.

2. The Social Construction of Health and Illness

- Structure and functions of Social Institutions.
- Village as a community.
- Social Changes,
- Social Problems,

3. Disability and Society

- Non-governmental organisations and its role in prosthetics & orthotics

4. Health Inequalities and Access to Care

- Low Income countries.
- Effect on poor who live in rural and urban areas.
- Disability and women
- Access, adaptations and change of environment where people live or work.
- Removing Environmental Barriers,
- Recreation for the Disabled
- Community Welfare organizations,
- Social welfare programmes
- Practical and environmental difficulties of patients in use of appliances

5. The Role of Healthcare Professionals

- Introduction to community based rehabilitation as compared to the existing medical model and its function.
- Professional and social work in medical & rehabilitation set up.

6. Policies and Healthcare Systems

- Social Welfare,
- Vocational Rehabilitation, Employment,
- Self-Employment
- Job analysis and Job placement.
- PWD act.

7. Disability and Development

- Outline of Educational aspects,
- Local resources available and referral. Income generation schemes, Purpose of Sangha/group of PWDs

PROSTHETIC SCIENCE-II

COURSE CODE--- BPO 206

TEACHINGHOURS ---- 80 (Theory)

CREDITS --- As per affiliated university norms

DETAILED CONTENTS

Knee Joints: Different types of Endoskeletal and exoskeletal knee joints - Single axis knee joints, Polycentric knee joints, Free knee, Constant friction knee joints, Variable friction Knee joint, microchip control knee, hydraulic knee joint, swing Phase control knee joints, Stance Phase control knee joints etc.

Hip Joints: For above knee as well as for hip disarticulation/ hemi- pelvictomy – all types of hip joints especially single axis and Swivel type.

Through Knee Prosthesis: Various types of through knee prosthesis - Through knee prosthetic Components. Materials used for through knee prosthesis. Casting techniques for through knee prosthesis, Cast modification, Fabrication Techniques of through hip prosthesis, through knee Gait analysis and deviations, Through knee Check-out Procedures.

Trans Femoral Prosthesis: Types of Trans Femoral Prosthesis. Trans femoral Prosthetic Components. Trans Femoral Socket designs. Casting and measurement techniques, Cast modification, Fabrication techniques of Trans Femoral socket. Various types of suspension used in Trans Femoral Prosthesis

Gait Deviations and Analysis: Trans Femoral Gait Analysis, Trans Femoral Check-out Procedures,

THIRD YEAR

COMPUTER SCIENCE & GRAPHICAL COMMUNICATION	
COURSE CODE---	BPO 301
TEACHING HOURS	80 hours Theory
CREDITS ---	As per affiliated university norms

Course description: Student will acquire computer knowledge to design the prosthetics and orthotics components and apply in research and development in prosthetics and orthotics field.

The student should be able to meet the following learning objectives:

Describe the advanced application of computer in prosthetics and orthotics field.
Design various components for prosthetics and orthotics use.
Make use of computer knowledge in the statistics data analysis and documentation.
Describe the principles of computer aided design (CAD) & computer aided manufacture (CAM)

DETAILED CONTENTS

Dimension on technical drawing, indication of linear and angular tolerance, methods of dimensioning and tolerating, cone methods of indicating surface texture on technical metal work

Orthographic projections, points, line and simple objects, Orthographic and isometric projection of P & O components

Introduction to computers and Components of computers: Physical Composition, Central Processing Unit, Main Memory, Input and Output units and also all kinds of common types of computer peripherals.

Hardware: Various Configurations. Specification of peripherals and computer system. Various types of storage facilities and its advantages and disadvantages.

Computing environments: Introduction to types of computers- Personal computers, Main frame and super computers. Networks. E-Mail. Internet. Introduction to operating systems. e.g. DOS. Windows. Linux. Unix. commands and introduction to General file systems.

Software: The current operating software's. Word Processor, spreadsheet, data base and presentation software. e.g. Windows XP or Windows 2000 Professional. Microsoft Office XP or 2000 Professional etc., upgraded as used currently. Anti Virus.

Basic Engineering Drawing:

Computer Aided Design & Manufacturing (CAD & CAM)

Basics of CAD: Introduction, Definition, History, Current status, Product Cycle, Automation, Designing, Application and Benefits. Computer Graphics: Introduction of software, Function of graphic package, Application Software. AutoCad updated version: Introduction, Foundation of AutoCad Commands, Execution of Simple 2D Drawings, Understanding 3D commands, Executing 3D Commands, Creating 3D objects Rendering and Image attach to an object Starting New Projects, Creating, Editing, Saving Drawing, Annotation, Dimension, Plotting, Customization, Auto Lisp.

Introduction to CNC, History of CNC, Advantages and disadvantages of N/C, CNC, DNC, Major part of CNC.

Basics of CAM: Introduction of CNC machine, basics of Computer Aided Designing and Manufacturing (CAD-CAM) and its use in P&O. Other kinds of Computer use in Prosthetics and Orthotics. CAD-CAM Technology in socket making and also making of different kinds of orthosis and prosthesis.

CAD/CAM in Prosthetics & Orthotics: types of digitizers used, concept of different types of modifying software, CNC carver and its specification, step wise fabrication procedure of sockets, shells and spinal orthoses, its advantages and disadvantages

BIO-MECHANICS-III

COURSE CODE--- BPO 302

TEACHING HOURS----70

CREDITS --- As per affiliated university norms

DETAILED CONTENTS

• Biomechanics of Hand, wrist complex, elbow complex & shoulder complex.

Upper Limb: Grasp patterns, grasp forces, mechanical replacement of hand function, augmentation of deficient hand function, upper limb prosthetic socket biomechanics – all types, Orthosis biomechanics, application of external power, myo-electric control of external power and usage of devices.

Control systems: Introduction to control theory. Application in Prosthetics and Orthotics of functional electrical stimulation (FES). hybrid orthosis, myoelectrics and bio-feedback.

Spinal Biomechanics: Motions of the spine. Biomechanics of different region in spinal column. Biomechanics Inter vertebral disk. Lumbar Spine loading during normal

activities and effects of Orthosis on this loads, Biomechanical Principles of spinal orthosis, Biomechanics of Corsets, Cervical/ thoraco/lumbar/sacral spinal orthosis. Biomechanics of scoliosis correction using different technologies and especially using Spinal orthosis.

Design concept part-I: Buckling, theories in failure/ fatigue/stress concentrations, connections, fluid mechanics and beam deflection.

Design concept part-II: Shear force and bending moment diagrams, centroids, 2nd moment of area and mass, theorem of parallel axes, bending stress, torsional stress of circular shafts, combined axial and bending stresses. Combined and torsional stresses, combined axial bending torsional stresses. Open and closed helical springs, beam deflection. Design test standards/materials/Philadelphia Loads/ISO. Design calculations for P&O devices. Practical: Different ways of design tests, use of FES and myoelectric control system in P&O devices.

Combined and torsional stresses, combined axial bending torsional stresses. Open and closed helical springs, beam deflection. Design test standards/materials/Philadelphia Loads/ISO. Design calculations for P&O devices/BIS. Column of the spine, biomechanics of spinal injuries, follower load, Euler's theory of buckling

SCHEME OF UNIVERSITY EXAMINATION (THEORY ONLY)

THEORY 80 MARKS + 20 MARKS INTERNAL ASSESSMENT [100 MARKS]

The question paper would give appropriate weight age to all the topics in the syllabus.

Section A S.A.Q.:- Q.1- Answer any FIVE out of SIX [5X 3=15]

Q.2 - Answer any FIVE out of SIX [5X 7=35]

Section B L.A.Q.: - Q.3 - Answer any TWO out of THREE [15X2=30]

INTERNAL ASSESSMENT

1. Two Exams-Terminal and Preliminary examination of 80 marks each

Total-160 Marks

2. Internal Assessment to be calculated out of 20 Marks

3. Internal Assessment as per University pattern.

ASSISTIVE TECHNOLOGY
COURSE CODE--- BPO303
TEACHING HOURS----80
CREDITS --- As per affiliated university norms

Course description: Students would learn about the use of various types of mobility aids required by PWDs and related analysis of the gait pattern.

The student should be able to meet the following learning objectives:

- Explain the prescription of commonly used mobility aids like crutches, walking stick, and walkers. Assess and prescribe the best possible mobility solution for a wheelchair user
- Carry out repair and maintenance of wheelchair
- Describe the correct use of the wheelchairs, transfers and various modifications of wheel chairs
- Train users to make the best use of their wheelchair.
- Assess, prescribe and fabricate different types of developmental aids
- Describe the analysis of gait with the related mobility aids.

DETAILED CONTENTS

Mobility and Walking aids: Canes, walking sticks, Crutches - auxiliary, elbow and forearm support. Different types of Walking Frame, Walker and their attachments. Parapodium etc

Developmental aids: Biomechanics of various kinds of developmental aids, Normal milestone and delayed milestone, prescription, design and materials used, measurement techniques, fabrication of Box seat, Special Chair with or without table/tray, Standing/tilting frame, Low-level cart, Prone board and various developmental and educational toys. Maximum use of Appropriate Technology while making developmental aids.

Molded seats: Biomechanics of various kinds of molded seats, prescription criteria, cast and measurement techniques, Cast modifications, fabrication of molded seats with inside or outside posting, use of different materials and technologies to fabricate the same, suspension or right kinds of strapping.

Wheelchair: Manual wheelchair: Benefits of appropriate wheelchair for a wheelchair user, Features and benefits of 'sitting upright' in wheelchair, Types of wheelchair, cushion and its components and its safe handling, pressure relief techniques, user assessment, prescription, measurement, fitting, Transfer techniques, Wheelchair mobility skills, customized wheelchair, Care & Maintenance of Wheelchairs and importance of wheelchair user instructions.

Cushions and its fabrication technique & wheelchair modification.

Other types: Introduction: Motorized wheelchair, tricycle and motorized tricycle, modified two wheeler for mobility. Robotics Arms,

Gait Training with various walking aids, Installation/ fabrication of Parallel bars.

Self help devices: Special gadgets to assist in activities of daily living (A.D.L.) – assistive device for SCI patients, stroke patients etc.

SCHEME OF UNIVERSITY EXAMINATION (THEORY ONLY)

THEORY 80 MARKS + 20 MARKS INTERNAL ASSESSMENT [100 MARKS]

The question paper would give appropriate weight age to all the topics in the syllabus.

Section A S.A.Q.:- Q.1- Answer any FIVE out of SIX [5X 3=15]

Q.2 - Answer any FIVE out of SIX [5X 7=35]

Section B L.A.Q.:- Q.3 - Answer any TWO out of THREE [15X2=30]

INTERNAL ASSESSMENT

1. Two Exams-Terminal and Preliminary examination of 80 marks each

Total-160 Marks

2. Internal Assessment to be calculated out of 20 Marks

3. Internal Assessment as per University pattern.

RECOMMENDED BOOKS & JOURNALS

1. Rehabilitation Engineering Applied to Mobility and manipulation by Rory A. Cooper
2. Wheelchair selection and Configuration by Rory A. Cooper
- 3.

RESEARCH METHODOLOGY & BIOSTATISTICS
COURSE CODE---BPO 304
TEACHING HOURS----60
CREDITS --- As per affiliated university norms

Course description: The student would acquire the knowledge of the research problem, design, Sampling, data collection, analysis of data, Testing hypotheses, interpretation and report writing to prosthetics and Orthotics

The student should be able to meet the following learning objectives:

- Explain the process, types, design, needs, principles of research
- Formulate an appropriate research plan in order to solve a clinical problem
- Examine the concepts of estimation and hypothesis testing with applications to population proportions, means, variances
- Describe the sampling, data collection and processing of data
- Examine the data by using different measures
- Perform effective descriptive statistical analysis as well as statistical inference for a variety of mainstream applications
- Use appropriate empirical and probability distributions to model data.
- Conduct a basic research study in order to solve a clinical problem

DETAILED CONTENTS

Introduction to Biostatistics

1. Definition – Statistics, Biostatistics
2. Applications of Biostatistics
3. Data collection from experiments & surveys.

4. **Variable – Qualitative & Quantitative, Discrete and continuous.**
5. **Presentation of Data: -**
 - a) **Tabular Presentation of Data – Statistical Table, Format of a Table.**
 - b) **Frequency Distribution – construction of Frequency Distribution, cumulative and relative frequency distribution, Exclusive and inclusive method of classification of Data.**
 - c) **Diagrammatic Presentation of Data: - Bar diagrams, Pie Diagram, Line Diagram, Pictogram, Cartogram or Statistical map.**
 - d) **Graphical representation of a Frequency distribution – Histogram, Frequency Polygon, Frequency curve, ogives or cumulative frequency curves.**

Research methodology:

1. **Introduction to Research methodology: Meaning of research, objectives of research, Types of research & research approaches,**
2. **Research problem: Statement of research problem: Statement of purpose and objectives of research problem, Necessity of defining the problem**
3. **Research design: Meaning of research design, Need for research design,**
4. **Sampling Design: Criteria for selecting sampling procedure**
5. **Measurement & scaling techniques: Measurement in research- Measurement scales, sources of error in measurement,**
6. **Methods of data collection: collection of primary data.**
7. **Sampling fundamentals, need for sampling**
8. **Analysis of data:, Types of analysis.**
9. **Testing of hypothesis: What is hypothesis? Basic concepts concerning testing of hypothesis.**

PROSTHETICS SCIENCE-III
COURSE CODE--- BPO 305
TEACHING HOURS--- 80 hours (Theory) and 320 hours (Practical)
CREDITS --- As per affiliated university norms

DETAILED CONTENTS

Upper Limb: Grasp patterns, grasp forces, mechanical replacement of hand function, augmentation of deficient hand function, upper limb prosthetic socket biomechanics – all types.

Control systems: Introduction to control theory, application in Prosthetics of functional electrical stimulation (FES), myoelectric and bio-feedback.

Upper limb prosthetics: Historical development in Upper Limb Prostheses – India and abroad, Upper Extremity Prosthetics Components - Terminal devices. Wrist units. Elbow units. Shoulder units, Harnessing systems in Upper extremity prosthesis.

Partial Hand: passive, cosmetics and functional types which also includes silicon prostheses. Cosmetic hand gloves and fingers. Devices for augmentation of function and cosmesis for partial hand amputation and finger amputation.

Wrist Disarticulation: Prescription Criteria, Types of prosthesis – Components, Socket Shape, Clinical Considerations, Casting and measurement techniques, Cast modifications, Fabrication techniques, alignment techniques, Harnessing and suspension mechanisms, Fitting, donning and doffing techniques. Checkout procedures, Testing and Training.

Trans Radial: Prescription Criteria, Types of Trans Radial prosthesis – Components, Types of Socket which includes Self suspending, flexible/rigid socket or combination of both, Clinical Considerations, Casting and measurement techniques, Cast modifications, Fabrication techniques – single wall and double wall, alignment techniques, Harnessing and suspension mechanisms, Control system – body powered and externally powered, Fitting, donning and doffing techniques. Checkout procedures, Testing and Training.

Trans Humeral: Prescription Criteria, Types of Trans Humeral prosthesis which also includes Elbow Disarticulation prostheses – Components, Different types of Elbow Mechanisms. Types of Socket which includes Self suspending, flexible/rigid socket or combination of both, Clinical Considerations, Casting and measurement techniques, Cast modifications, Fabrication techniques – single wall and double wall, alignment techniques, Harnessing and suspension mechanisms, Control system – body powered and externally powered, Fitting, donning and doffing techniques. Checkout procedures, Testing and Training.

Shoulder Disarticulation: Prescription Criteria, Types of prosthesis both cosmetics and functional, Components, Different types of Elbow and Shoulder Mechanisms. Types of Socket, Clinical Considerations, Casting and measurement techniques. Cast modifications, Fabrication techniques, alignment techniques, Harnessing and suspension mechanisms, Control system – body powered and externally powered, Fitting, donning and doffing techniques. Checkout procedures, Testing and Training.

ORTHOTIC SCIENCE-III
COURSE CODE---- BPO 306
TEACHING HOURS---- 80 hours (Theory) and 320 hours (Practical)
CREDITS --- As per affiliated university norms

DETAILED CONTENTS

Control systems: Introduction to control theory, application of Functional Electrical Stimulation (FES) in Orthotics, hybrid Orthosis.

Upper Limb Orthotics: Objectives of splinting and principles. Types & classification of Orthoses. Biomechanical principal of all types of upper limb Orthotics. Material used and its advantages and disadvantages. All types of Hand Orthoses, Wrist Hand Orthoses, Elbow Orthoses, Shoulder Elbow Wrist Hand Orthoses & Pelvic Shoulder Elbow Wrist Hand Orthosis. Measurement/casting and Fabrication of P.S.E.W.H.O, S.E.W.H.O, Elbow Orthoses, Elbow Wrist and Hand Orthoses, Elbow braces etc. Orthotic management of rheumatic arthritis and burns etc.

Immobilization/ mobilization, Appliances for flail elbows: Measurement/casting and Fabrication of Shoulder Orthoses, The shoulder joint braces and splints, Abduction splints and braces, Traction splint of Humerus, All types of Shoulder Elbow Wrist and Hand Orthoses which also includes both body powered and externally powered. All types of fracture Orthoses, Temporary splinting. Feeder and other assistive appliances.

Upper Limb: Orthosis biomechanics. application of external power, myoelectric control of external power and usage of devices.

Section B L.A.Q.: - Q.3 - Answer any TWO out of THREE [15X2=30]

INTERNAL ASSESSMENT

1. Two Exams-Terminal and Preliminary examination of 80 marks each

Total-160 Marks

2. Internal Assessment to be calculated out of 20 Marks

3. Internal Assessment as per University pattern.

RECOMMENDED BOOKS & JOURNALS

PRACTICAL PROSTHETICS SCIENCE-III
COURSE CODE--- BPO 351
TEACHING HOURS----320
CREDITS --- As per affiliated university norms

Prosthetics Practical: Fabrication of prosthesis for partial hand amputation or congenital absence, through wrist prosthesis, Below Elbow prosthesis, Above Elbow prosthesis, Shoulder Disarticulation prosthesis, Elbow Disarticulation prosthesis – preferably using various available technologies.

Practical: Different ways of design tests, use of FES and myoelectric control system in P&O devices.

SCHEME OF UNIVERSITY EXAMINATION (PRACTICAL ONLY)

UNIVERSITY PRACTICAL EXAM: 80 MARKS + 20 MARKS INTERNAL ASSESSMENT [100 MARKS]

PRACTICAL ORTHOTICS SCIENCE-III
COURSE CODE--- BPO 352
TEACHING HOURS----320
CREDITS --- As per affiliated university norms

Orthotics Practical: Fabrication of at least 5 types of splints belonging to each group on model / mannequins

SCHEME OF UNIVERSITY EXAMINATION (PRACTICAL ONLY)

**UNIVERSITY PRACTICAL EXAM 80 MARKS + 20 MARKS INTERNAL
ASSESSMENT [100 MARKS]**

PRACTICAL COMPUTER SCIENCE
COURSE CODE--- BPO 353
TEACHING HOURS---- 120
CREDITS --- As per affiliated university norms

Practical:

1. Student has to be thorough in all branches of MS Office especially WORD and POWER POINT. In addition to that, it would be better if student also learns one additional drawing and imaging software among e.g. Corel Draw, PageMaker, Photoshop or similar kind of softwares.
2. Student has to be thorough in all branches CAD-CAM especially AUTO CAD. Student should be able to make design of all common types of P&O components which are regularly in use by using AutoCAD software.

SCHEME OF UNIVERSITY EXAMINATION (PRACTICAL ONLY)

**UNIVERSITY PRACTICAL EXAM 80 MARKS + 20 MARKS INTERNAL
ASSESSMENT [100 MARKS]**

FOURTH YEAR

PROSTHETICS SCIENCE-IV
COURSE CODE--- BPO 401
TEACHING HOURS----60
CREDITS --- As per affiliated university norms

DETAILED CONTENTS

Hip Disarticulation Prosthesis: Various types of through hip Prosthesis. Prescription

principles, Materials and components to be used, Casting and measurement techniques, Cast modification, alignment, suspension, Fitting, donning and doffing techniques. Check out procedures, Testing and Training. Through hip Gait analysis and deviations.

Prosthetics: Bilateral Stubbies. Bilateral Prosthesis. Trans Lumber Prosthesis (Sitting and Standing), Prosthesis for Child Amputee, Prosthesis for Congenital anomalies, Prosthesis adaptation for sports and recreation, Immediate post surgical fittings, Check-out Procedures.

SCHEME OF UNIVERSITY EXAMINATION (THEORY ONLY)

THEORY 80 MARKS + 20 MARKS INTERNAL ASSESSMENT [100 MARKS]

The question paper would give appropriate weight age to all the topics in the syllabus.

Section A S.A.Q.: - Q.1- Answer any FIVE out of SIX [5X 3=15]

Q.2 - Answer any FIVE out of SIX [5X 7=35]

INTERNAL ASSESSMENT

1. Two Exams-Terminal and Preliminary examination of 80 marks each

Total-160 Marks

2. Internal Assessment to be calculated out of 20 Marks

3. Internal Assessment as per University pattern.

ORTHOTICS SCIENCE IV
COURSE CODE--- BPO402
TEACHING HOURS----80
CREDITS ---

Spinal Orthoses: Historical development of spinal orthoses. Anatomical and Physiological Principles of construction and fitting of spinal Orthoses. Biomechanical principle and Functions of spinal Orthoses. Indications and contraindications for spinal orthosis

Cervical Orthoses: Principle, material, measurement/ casting, fabrication of all types of Cervical Orthoses especially different types of cervical collar, semi-rigid/rigid

cervical orthoses both temporary and permanent. Cervical Traction, HALO traction and various types.

Thoraco-Lumbo-Sacral Orthoses: Flexible spinal Orthoses. Rigid spinal orthoses. Principle, material, measurement/ casting, fabrication of all types of Thoraco Lumbo sacral orthoses (TLSO) especially all types of orthoses for scoliosis & Kyphosis. All types of under arm orthoses and variants. Various types of Immobilisers, Fitting, donning and doffing techniques. Checkout procedures, Testing and Training. Lumbo sacral Orthoses: Principle, material, measurement/ casting, fabrication of all types of Lumbo sacral orthoses (LSO) especially Corsets and all types of orthoses for Lordosis and scoliosis. Pelvic traction and its uses. Cranial Orthoses Orthotic management of spinal deformities / injuries. Orthotic management of Pott's spine

MANAGEMENT & ADMINISTRATION

COURSE CODE--- BPO 403

TEACHING HOURS----60

CREDITS --- As per affiliated university norms

Course description: Students would have an understanding of the planning, construction, human management, store management and safety of the workshop

The student should be able to meet the following learning objectives:

- Explain techniques related to the design, planning, control and improvement of service and manufacturing operations.
- Demonstrate basic knowledge of financial management practices such as cost calculations and accounting processes.
- Address issues related to clinic management including, appointment systems and record keeping.
- Discuss the importance of quality control and workflow management.
- Apply appropriate inventory management protocols
- Understand and discuss the benefits associated with the use of quality assurance systems
- Understand the organization of the workplace environment.

DETAILED CONTENTS

Introduction: Principles of Administrative and Management structure, Industrial Management, Definition of Organization. Principles of good organization, type of Organizational setup Workshop Administration and management.

Management: Introduction, Discipline, Security, distribution of work, Work sheet, Time sheet and staff Welfare. Material Management: Store and store organization. Inventory Control. Purchase organization. Introduction to cost accounting. Use of computer for effective store management.

Safety: Industrial accidents, safety and hazards Planning: Planning of Prosthetics and Orthotics Departments at various levels, all types of various scales. Layout, plant Layout. Costing, billing, documentation especially development of recording system to manage individual's records. Leadership. Human resource management & Environmental Science: Hospital waste disposal. Role of the International Health Agencies

Economics: Business management practices such as cost calculations, accounting process and budgeting address issues related to clinic management including, appointment systems and record keeping, Quality control and the use of quality assurance system Appropriate code of ethical behaviour of P & O Professionals

Introduction of administration, Nature and scope of administration, How to be an effective administrator, Principles of administration and its applications to Prosthetics and orthotics setup. Rules of Professional Conduct.

**UNIVERSITY PRACTICAL EXAM 80 MARKS + 20 MARKS INTERNAL
ASSESSMENT [100 MARKS]**

PROSTHETICS CLINICAL PRACTICE
COURSE CODE--- BPO 453
TEACHING HOURS----250
CREDITS --- As per affiliated university norms

Course description: The student will have experience in the clinical environment of supplying prostheses and orthoses to patients undergoing treatment. This experience should cover as wide a range as possible but with emphasis on the major levels of provision.

The student will develop skills in the:

- communication
- assessment and prescription;
- clinical provision of prostheses and orthoses;
- manufacture of prostheses and orthoses;
- interpersonal relationships;
- organization and management;
- Clinical research.
- Contributing too and learning from the clinic team.

PROSTHETICS CLINICAL PRACTICE

Direct Service: In this period each trainee will be in touch directly with the persons with disabilities under supervision of the Instructor/Demonstrator. She/he would do all the necessary work from start to the finish for fittings of suitable prostheses. Each person fitted with prostheses has to be documented/ recorded well and to be presented in the clinics in front of health care team and other trainees. Besides fitting, trainee would also work with other rehabilitation team members to understand "Total Rehabilitation".

SCHEME OF UNIVERSITY EXAMINATION (PRACTICAL ONLY)

CASE PRESENTATION WOULD BE CONDUCTED OF 100 MARKS

(Case presentation should be of minimum 10 prosthetic patients)

**UNIVERSITY PRACTICAL EXAM 80 MARKS + 20 MARKS INTERNAL
ASSESSMENT [100 MARKS]**

ORTHOTICS CLINICAL PRACTICE
COURSE CODE--- BPO 454
TEACHING HOURS----250

**UNIVERSITY PRACTICAL EXAM 80 MARKS + 20 MARKS INTERNAL
ASSESSMENT [100 MARKS]**

PROJECT WORK
COURSE CODE— BPO
TEACHING HOURS---- 180
CREDITS --- As per affiliated university norms

Each Trainee shall take a project work under supervision of a guide. Project work has to be well documented and presented in essay form. The major focus will be trainee's original work which she or he has to present prior to final examination. The subject and the guide should be chosen within four weeks from the day of admission to the fourth year.

Resolution No. 4.6.2 of BOM-53/2018: Resolved to approve:

- For BPT course - 40% marks in internal assessment (**theory & practical/clinical combined wherever applicable**) to be considered as eligibility criteria to appear for University Examination in each subject with immediate effect.
- For BPO course -40% marks in internal assessment (**theory & practical/clinical combined wherever applicable**) to be considered as eligibility criteria to appear for University Examination in each subject with immediate effect.

Resolution No. 4.6.10 of BOM-53/2018:

- a) Approved Examination flowchart for BPO scheme of Examination for academic year 2018-19. [**Annexure-XXXI**]

MGM Institute's
(Deemed University u/s 3 of UGC Act, 1956)
Grade 'A' Accredited by NAAC

ANNEXURE-XXXI

University Department of Prosthetics & Orthotics

Sector 1, Plot No. 1 & 2, Kamothe, Navi Mumbai 410209

Date : 16/3/2018

Flow Chart to describe scheme of examination to be followed by various batches of BPO course

Students admitted in (2018-2019) batch will appear for I BPO University exam in June 2019 (as per RCI pattern).

* Examinations at 6 months interval till all subjects of I BPO and II BPO are cleared

Resolution No. 4.13 of BOM-55/2018: Resolved as follows:-

- (i) Slow learners must be re-designated as potential learners.
- (ii) Students scoring less than 35% marks in a particular subjects/course in the 1st formative exam are to be listed as potential learners. These learners must be constantly encouraged to perform better with the help of various remedial measures.
- (iii) Students scoring more than 75% marks in a particular subjects/course in the 1st formative exam are to be listed as advanced learners. These learners must be constantly encouraged to participate in various scholarly activities.

Resolution No. 3.2.2.8 of BOM-57/2019:

- Resolved to include “A Text Book of Computer Science for Prosthetics & Orthotics” by S.K Panda et al 1st edition of Purnima Panda Publication for III BPO course as text book for Computer Science subject. [**Annexure-38**]

A Text Book of Computer Science for Prosthetics & Orthotics

S.K. Panda
R.R. Swain

A.N. Nanda
S. Maharana

Annexure-38

Annexure-38

A Text Book of
Computer Science
for
Prosthetics & Orthotics

[A Text Book for both Undergraduate (2nd & 3rd Year BPO)
and Postgraduate (MPO) level & strictly under RCI Approved Syllabus.]

by

S. K. Panda
R. R. Swain

A. N. Nanda
S. Maharana

**This book is donated on behalf of

Department of Prosthetics & Orthotics
Swami Vivekanand National Institute of Rehabilitation, Training And Research
Olatpur, Post: Bairoi, District: Cuttack, Orissa, India, Pin - 754010

An appeal to the readers: Our profession is a small community in India, that is the reason no big publishing company can take up a wish in publishing text books only meant for Prosthetics and Orthotics students, that had happened some for us. So, we took up a risk (self-publishing) to provide at least a copy of this book to each student. Hence, we appeal all the students and faculties to join hands for this noble cause and only take a genuine copy of this book from the authorized outlet or directly by post from the publisher's address mentioned below. (Courier charges will be considered as deemed fit). This small effort will surely encourage other authors to self-publish books meant for prosthetics and orthotics.

Thanking You

Publisher

Resolution No. 3.1.4.2 of BOM-57/2019:

- i. Resolved to include “Gender Sensitization” into UG (from new batch 2019-2020) and PG (from existing batches) curricula. [**Annexure-21**]
- ii. Resolved to align the module of “Gender Sensitization” with MCI CBME pattern for MBBS students.
- iii. Resolved that Dr. Swati Shiradkar, Prof., Dept. of OBGY., MGM Medical College, Aurangabad will coordinate this activity at both campuses.

Annexure - 21

Gender sensitization for UG (2nd , 3rd , 8th semesters) and PG (3 hours)

INCLUSION OF “ GENDER SENSATIZATION” IN CURRICULUM

Introduction :

The health care provider should have a healthy gender attitude, so that discrimination, stigmatization, bias while providing health care will be avoided. The health care provider should also be aware of certain medico legal issues related with sex & gender.

Society particularly youth & adolescents need medically accurate, culturally & agewise appropriate knowledge about sex, gender & sexuality. So we can train the trainers for the same. It is need of the hour to prevent sexual harassment & abuse .

To fulfill these objectives, some suggestions are there for approval of BOS.

Outline

1)For undergraduates :- Three sessions of two hours each, one in 2nd term, one in 3rd term & one in 8th term.

2)For Faculties and postgraduates :- One session of two hrs .

3)For those want to be trainers or interested for their ownself, value added course, which is optional about sex, gender, sexuality & related issues.

Responsibility

ICC of MGM, MCHA , with necessary support from IQAC & respective departments.

Details of undergraduate sessions

1)First session in 2nd term

Aim – To make Students aware about the concept of sexuality & gender.

To check accuracy of knowledge they have,

To make them comfortable with their own gender identify & related issues.

To make them aware about ICC & it is functioning.

Mode – Brain storming , Interactive power point presentation experience sharing.

Duration – Around two hours

Evaluation – Feedback from participants.

2)Second session in 3rd / 4th term

Aim – To ensure healthy gender attitude in these students as now they start interacting with patients.

To ensure that the maintain dignity privacy while interacting with patients and relatives, particularly gender related.

To make them aware about importance of confidentiality related with gender issues.

To encourage them to note gender related issues affecting health care & seek solutions.

Mode – focused group discussions on case studies, Role plays & discussion.

--3--

Duration – Around two hours.

Evaluation – Feedback from participants.

Third session in 8th term.

Aim – To understand effect of gender attitudes on health care in various subjects.

To develop healthy gender attitude while dealing with these issues.

Mode – Suggested PBL by departments individually. (In collaboration with ICC till faculty sensitization is complete)

Evaluation – Feedback

FOR POSTGRADUATES

Session of 2-3 hrs preferably in induction program.

Aim – To introduce medically accurate concept of gender, sex, gender role & sex role.

To ensure healthy gender attitude at workplace.

To understand gender associated concepts on health related issues & avoid such bias while providing health care.

To make them aware about ICC & its functioning.

Mode – Interactive PPT

Role plays & discussion

Duration – 2 to 3 hrs

Evaluation – Feedback.

FOR FACULTIES

Session of 2 hours may be during combined activities.

Aim – To ensure clarity of concept about gender & sex.

To discuss effect of these concepts on health related issues.

To identify such gender & sex related issues in individual subject specialties.

To discuss methodology like PBL for undergraduate students when they are in 7th-8th semester.

Mode – Role play

Focused group discussion

Case studies

Evaluation – Feedback.

Resolution No.3.2.2 of BOM-59/2019: (an amendment to Resolution No. 3.2.2.11.iv of BOM-57/2019): Curriculum as per CBCS is not applicable for BPO programme as BPO is an annual programme as per Rehabilitation Council of India (RCI).

Resolution No.3.2.4.7 of BOM-59/2019: It is resolved to approve proposed Scheme of Examination for Psychology & Sociology subject in II BPO w.e.f. December 2019 University Examination:

Section-A (Psychology)		
Q.1	Answer any 5 out of 6	(5x3M)=15Marks
Q.2	Answer any 3 out of 5	(3x5M)=15Marks
Q.3	Answer any 1 out of 2	(1x10M)=10Marks
Total Marks		40 Marks
Section-B (Sociology)		
Q.1	Answer any 5 out of 6	(5x3M)=15Marks
Q.2	Answer any 3 out of 5	(3x5M)=15Marks
Q.3	Answer any 1 out of 2	(1x10M)=10Marks
Total Marks		40 Marks

Resolution No.3.2.4.8 of BOM-59/2019: It is resolved to approve the proposed flow chart for Bachelor of Prosthetics & Orthotics (BPO) University Examination. **[Annexure-28]**

Annexure - 28

Flow Chart to describe scheme of examination to be followed by various batches of BPO course

Students admitted in (2018-2019) batch will appear for I BPO University exam in June 2019 (as per RCI pattern).

Note:

- From II BPO onwards allowed To Keep Term (ATKT) for 3 subjects and is allowed till n+2 attempts, every after 6 months interval.
- Before appearing III BPO, all subjects of I BPO should be cleared and before appearing IV BPO, all subjects of II BPO should be cleared.
- If the student wants to continue after n+2 attempts, the MGMHS is not responsible for his/her RCI registration as a P&O professional.
- The duration of the programme is of 4& 1/2 academic years (inclusive of 6 months of internship), which can be completed in a maximum of 6 years from the date of admission to the programme.

Resolution No. 6.12 of Academic Council (AC-44/2022): Resolved to approve the revision in the Scheme of Examination for the subject 'Computer Science and Graphical Communication' for III BPO University Examination by dividing the paper in two domains i.e. Section A-Basic Computer Science (40% weightage) which will carry 30 marks and Section B-AutoCAD& CAD-CAM (60% Weightage) which will carry 50 marks. Further Section B will be given equal weightage i.e. 50% to AutoCAD (25 marks) and 50% to CAD-CAM (25 marks) applicable from all forthcoming University Examinations onwards [ANNEXURE-66].

Annexure-66 of AC-44/2022

Proposed scheme of examination for “Computer Science and Graphical Communication” in III BPO:

Section A – (Basic Computer Science = 30 Marks)		
Q1.- Short answer questions	Answer any 4 out of 5	(4 X 5 M) = 20 Marks
Q2. - Long answer questions	Answer any 1 out of 2	(1 X 10 M) = 10 Marks
Total Marks		30 Marks
Section B – (Auto CAD and CAD - CAM = 50 Marks)		
Section B – (Auto CAD = 25 Marks)		
Q1- Short answer questions	Answer any 3 out of 4	(3 X 5 M) = 15 Marks
Q2. - Long answer questions	Answer any 1 out of 2	(1 X 10 M) = 10 Marks
Total Marks		25 Marks
Section B – (CAD-CAM = 25 Marks)		
Q3- Short answer questions	Answer any 3 out of 4	(3 X 5M) = 15 Marks
Q4. - Long answer questions	Answer any 1 out of 2	(1 X 10 M) = 10 Marks
Total Marks		25 Marks

Resolution No. 6.13 of Academic Council (AC-46/2023): Resolved to change the existing structure of Scheme of Examination, so as to give equal weightage to both sections i.e. Section 'A' and Section 'B', for all subjects as per the attached Annexure except 'Psychology & Sociology' and 'Computer Science and Graphical Communication' subjects of BPO program applicable from the Academic Year 2022-23 onwards.

Resolution No. 6.14 of Academic Council (AC-46/2023): Resolved to approve the proposal for change in nomenclature from 'Short Answer Question' to 'Brief Answer' in BPO program

[ANNEXURE-55]

EXISTING SCHEME OF EXAMINATION FOR BPO UNIVERSITY EXAM

TOTAL MARKS = 80

Section A (50 Marks)

Q 1 – Short answer Question (Answer any 5 out of 6) [5 X 3 Marks = 15 Marks]

Q 2 – Short answer Question (Answer any 5 out of 6) [5 X 7 Marks = 35 Marks]

Section B (30 Marks)

Q 3 – Long answer Question (Answer any 2 out of 3) [2 X 15 Marks = 30 Marks]

PROPOSED SCHEME OF EXAMINATION FOR BPO UNIVERSITY EXAM (FNAHS)

TOTAL MARKS = 80

Section A (40 Marks)

Q1 - Brief Answer Questions (Answer any 4 of 5) [4 X 4 Marks = 16 Marks]

Q2 - Long Answer Questions (Answer any 2 of 3) [2 X 12 Marks = 24 Marks]

Section B (40 Marks)

Q3 - Short Answer Questions (Answer any 5 of 6) [5 X 8 Marks = 40 Marks]

Resolution No. 3.15 of Academic Council (AC-49/2024):

Resolved to approve the use of "Non-programmable scientific calculator" for Applied Mechanics subject (course code -BPO 104) for the I BPO University Examination, applicable from the Academic Year 2023-24 onwards. It was further resolved that calculators are to be provided by MGMIHS to avoid use of mobile phone as calculator. [ANNEXURE-13A & 13B].

Resolution No. 5.18 of Academic Council (AC-52/2025):

Resolved to approve the Academic Calendar, the revised Program Outcomes (POs) and Course Outcomes (COs), and the List of Demonstrations for the Bachelor in Prosthetics and Orthotics (BPO) program, applicable to the MGMIUDPO, Navi Mumbai Campus, from the Academic Year 2025-2026 onwards [ANNEXURE-31A, 31B & 31C].

Resolution No. 5.9 of Academic Council (AC-53/2026): Resolved to approve the revision in the evaluation pattern for the Project Work course in the 4th Year BPO programme, to be implemented from the Academic Year 2026–2027 for the BPO batch admitted from 2023–2024 onwards. The revised evaluation pattern shall consist of Internal Assessment (20 marks) and University Examination (80 marks). The proposed examination evaluation pattern shall also be reflected in the marksheet format [ANNEXURE-50].

Annexure-50 of AC-53/2026

Table 1: Scheme of Examination Pattern
(Applicable for batch admitted from Academic Year 2023–2024 onwards)

Subject	Internal Assessment (Formative)	University Exam (Summative)	Total Marks	Minimum Passing (IA + University)
Project Work / Dissertation	20 Marks	80 Marks	100 Marks	50 Marks
Passing Requirement	Min: 10 Marks	Min: 40 Marks		

Internal Assessment Scheme (For University Submission)
Two Internal Assessments for Project / Dissertation

Assessment	Maximum Marks
Internal Assessment – I	80
Internal Assessment – II	80
Total	160 Marks

Note: 160 marks to be converted to 20 Marks weightages for submission to the University

Internal Assessment Evaluation Format

Dissertation / Project Evaluation – 80 Marks

Date:

Student Name: _____

Title of Project / Dissertation: _____

Dissertation / Project Evaluation – Internal Assessment (80 Marks)

Sr. No.	Component	Sub-Component	Marks Allotted	Marks Obtained
1	Concept Design & Development	Research Problem Definition	10	
		Literature Review & Rationale	10	
		Methodology & Study Design	10	
		Tools / Instrument Development	10	
2	Project Execution & Documentation	Data Collection & Implementation	10
