

PROGRAM OUTCOME (POs)	
Course Code	MASTERS IN HOSPITAL ADMINISTRATION
PO1	Healthcare Knowledge and Technology: Apply advanced knowledge of healthcare systems, clinical procedures, and medical technologies to improve patient care and streamline hospital operations.
PO2	Critical Thinking and Problem-Solving: Use analytical skills and professional judgment to address healthcare challenges, make informed decisions, and develop effective solutions to improve patient outcomes and organizational efficiency.
PO3	Healthcare Research Skills: Conduct and analyze healthcare research to inform evidence-based practices, contribute to innovations in healthcare management, and improve decision-making processes.
PO4	Professional Ethics and Patient Care: Adhere to ethical guidelines in healthcare administration, ensuring that patient welfare and professional boundaries are maintained in all interactions.
PO5	Communication Skills: Communicate effectively with patients, caregivers, and healthcare professionals to ensure clear information exchange, foster collaboration, and resolve conflicts.
PO6	Teamwork and Collaboration: Collaborate effectively with multidisciplinary teams to deliver comprehensive patient care and address organizational challenges, fostering a cooperative work environment.
PO7	Holistic Development and Leadership: Develop intellectual, emotional, and leadership skills to manage healthcare teams, navigate challenges, and drive organizational growth.
PO8	Lifelong Learning: Cultivate a commitment to continuous learning, staying current with advancements in healthcare practices and management to support ongoing professional development.
PROGRAM SPECIFIC OUTCOMES (PSO)	
PSO 1	Graduates will be able to manage hospital operations efficiently, ensuring high-quality patient care and smooth functioning.
PSO 2	They will develop critical thinking and problem-solving skills to make informed decisions and address healthcare challenges.
PSO 3	They will have the ability to lead multidisciplinary teams and foster collaboration for improved patient outcomes.
PSO 4	They will be proficient in budgeting, financial planning, and optimizing hospital resources for sustainability.
PSO 5	They will be capable of designing and implementing quality assurance programs focused on patient safety and continuous improvement.
PSO 6	Additionally, they will demonstrate a commitment to professional ethics, continual learning, and staying updated with healthcare advancements.
COURSE OUTCOMES (COs)	
	Annexure-3.27 of AC-51/2025
Course Code	MASTERS IN HOSPITAL ADMINISTRATION
SEMESTER I	
MHA 101 T	Introduction to Human Biology, Public Health, Health Care System in India & Hospital Industry
CO1	To understand human biology and the functions of various body systems.
CO2	To grasp knowledge about key public health issues and environmental health impacts.
CO3	To gain insights into healthcare systems and policies in India and globally.
CO4	To understand the hospital industry's regulations, challenges, and opportunities.
MHA 102 T	Introduction to Epidemiology and Hospital Epidemiology and Demography
CO1	To apply epidemiological methods, including study designs and screening tests, to understand and analyse public health issues.
CO2	To understand and interpret epidemiological measures and study designs like cohort, case-control, and randomized control trials.
CO3	To analyse demographic data and trends, including fertility, mortality, and migration, and use this information in public health planning and policy development.
MHA 103 T	Introduction to Concepts & Principles of Management and Business Communication
CO1	To gain a solid understanding of management principles, which will help students manage and improve performance in various industries.
CO2	To acquire practical skills in applying management functions (planning, organizing, staffing, directing, and controlling) to improve organizational efficiency.
CO3	To apply key management theories to real-world business challenges and decision-making processes.

CO4	To demonstrate proficiency in business communication, including drafting professional business correspondence and delivering effective presentations.
CC 001 T	Research Methodology & Biostatistics (Core Course)
CO1	Student will be able to understand develop statistical models, research designs with the understating of background theory of various commonly used statistical techniques as well as analysis, interpretation & reporting of results and use of statistical software.
MHA 104 CP	Practice of Hospital Administration (Basic)
CO1	Gain hands-on experience in managing hospital operations, improving the ability to oversee departments and coordinate healthcare services.
CO2	To enhance the practical skills in hospital management, including patient care coordination, resource management, and staff leadership.
SEMESTER II	
MHA 105 T	Hospital Planning & Management
CO1	To design efficient healthcare facilities based on size, layout, and operational needs.
CO2	To manage the hospital planning process, including financial planning, resource management, and contractor selection.
CO3	To design hospital departments and equipment layouts for optimal patient care and staff functionality.
CO4	To apply knowledge of engineering systems, safety protocols, and environmental control to ensure smooth hospital operations.
MHA 106 T	Accounting & Costing and Management Information System
CO1	To understand and differentiate between various accounting disciplines.
CO2	To apply the double-entry system and manage financial transactions accurately.
CO3	To gain the ability to prepare financial statements and correct mistakes in trial balances.
CO4	To be able to use MIS for decision-making, customer management, and understand the importance of information security.
MHA 107 T	Human Resource Management and Organizational Behavior
CO1	To apply HRM principles to recruit, plan, and select the right employees based on job analysis and forecasting.
CO2	To gain skills in managing training and executive development, as well as implementing motivation and performance evaluation techniques.
CO3	To understand the role of industrial relations, grievance handling, and maintaining discipline within the organization.
CO4	To develop a deep understanding of organizational behavior, including leadership, group dynamics, power, politics, stress management, and organizational culture.
MHA 108 T	Health Economics
CO1	To understand basic health economics concepts and their application in healthcare.
CO2	To apply economic principles to analyze demand, supply, and costs in healthcare systems.
CO3	To use economic evaluation tools like CBA and CEA to assess healthcare interventions.
CO4	To grasp the significance of healthcare financing, reforms, and universal health coverage in improving systems.
MHA 109 CP	Practice of Hospital Administration - Advanced
CO1	Gain hands-on experience in managing hospital operations, improving the ability to oversee departments and coordinate healthcare services.
CO2	To enhance the practical skills in hospital management, including patient care coordination, resource management, and staff leadership.
SKILL ENHANCEMENT COURSES	
SEC 001 T	Innovation and Entrepreneurship
CO1	Students will grasp the concepts of innovation, its ecosystem, and the role of various stakeholders such as government policies, startups, and innovation hubs.
CO2	Cultivating an entrepreneurial mindset and leadership qualities necessary for driving innovation and leading ventures.

CO3	Understanding the intersection of technology and innovation and leveraging emerging technologies for entrepreneurial ventures.
SEC 002 T	AI in Human Resource Management (NPTEL)
CO1	Fully understand the concepts of AI and its relevance to the HR management.
CO2	Equip themselves with the knowledge of AI-based tools and systems.
CO3	Make organizations more vibrant and stable by embracing the developments in AI technology.
CO4	Undertake better management practices and decisions

PROGRAM OUTCOME (POs)	
Course Code	MASTERS IN HOSPITAL ADMINISTRATION
PO1	Healthcare Knowledge and Technology: Apply advanced knowledge of healthcare systems, clinical procedures, and medical technologies to improve patient care and streamline hospital operations.
PO2	Critical Thinking and Problem-Solving: Use analytical skills and professional judgment to address healthcare challenges, make informed decisions, and develop effective solutions to improve patient outcomes and organizational efficiency.
PO3	Healthcare Research Skills: Conduct and analyze healthcare research to inform evidence-based practices, contribute to innovations in healthcare management, and improve decision-making processes.
PO4	Professional Ethics and Patient Care: Adhere to ethical guidelines in healthcare administration, ensuring that patient welfare and professional boundaries are maintained in all interactions.
PO5	Communication Skills: Communicate effectively with patients, caregivers, and healthcare professionals to ensure clear information exchange, foster collaboration, and resolve conflicts.
PO6	Teamwork and Collaboration: Collaborate effectively with multidisciplinary teams to deliver comprehensive patient care and address organizational challenges, fostering a cooperative work environment.
PO7	Holistic Development and Leadership: Develop intellectual, emotional, and leadership skills to manage healthcare teams, navigate challenges, and drive organizational growth.
PO8	Lifelong Learning: Cultivate a commitment to continuous learning, staying current with advancements in healthcare practices and management to support ongoing professional development.
Course Outcomes (COs)	
Course Code	MASTERS IN HOSPITAL ADMINISTRATION
SEMESTER III	
MHA 110 T	Quality Management & Accreditation in Hospital Industry
CO1	Understand the evolution of quality management concepts and key principles in healthcare.
CO2	Explain the need and benefits of quality management programs in healthcare organizations.
CO3	Apply quality tools like medical audits, critical pathways, CAPA, and client satisfaction assessment.
CO4	Evaluate accreditation standards such as NABH, NABL, JCI, and the role of OCI.
CO5	Implement quality programs through management commitment, training, documentation, and audits.
MHA 111 T	Services Management and Marketing Management
CO1	Explain the principles of service culture and customer relationship management.
CO2	Demonstrate skills in crisis management and grievance handling in service organizations.
CO3	Apply service marketing concepts, quality models, and strategies in healthcare.
CO4	Analyze pricing and promotional methods for healthcare and hospital services.
CO5	Develop ethical and customer-focused marketing strategies for hospital services.
MHA 112 T	Strategic Management and Health Insurance
CO1	Understand strategic management concepts, vision, mission, and environmental analysis tools.
CO2	Analyze business and corporate level strategies, including outsourcing benefits.
CO3	Explain health insurance principles, functions of insurers, and industry structure.
CO4	Describe types of health insurance in India, US, and microinsurance models.
CO5	Identify challenges in health insurance and the government's role in regulation.
MHA 113 T	Legal Framework in Hospital
CO1	Explain basic legal procedures, courts, and consumer protection laws applicable to healthcare management.
CO2	Describe professional rights, responsibilities, ethics, and medico-legal precautions for healthcare professionals.
CO3	Analyze laws related to hospital establishment, medical councils, biomedical waste, organ transplantation, and reproductive technologies.
CO4	Apply legal principles of contracts, insurance, taxation, and funding in healthcare organizations.
CO5	Evaluate healthcare practices in the context of national health laws, environmental regulations, and international health standards.
MHA 114 T	Material Management and Medical Equipment Management
CO1	Explain the principles, objectives, and functions of material management in healthcare.
CO2	Apply planning, purchasing, and inventory control techniques for hospital materials and supplies.
CO3	Analyze processes for procurement, installation, maintenance, and condemnation of medical equipment.
CO4	Evaluate the role of biomedical engineering, risk management, and financial considerations in equipment management.
CO5	Demonstrate knowledge of commonly used medical equipment in hospitals and their operational requirements.
MHA 115 CP	Practice of Hospital Administration (Project)
CO1	Students will gain hands-on experience in managing hospital operations, improving their ability to oversee departments and coordinate healthcare services.
CO2	Students will enhance their practical skills in hospital management, including patient care coordination, resource management, and staff leadership.
SEMESTER IV	
MHA 116 T	Disaster Management and Mitigation Resources
CO1	Explain the concepts, types, and impacts of disasters along with disaster management cycles and financial/legal aspects.
CO2	Demonstrate knowledge of disaster communication systems, fire safety protocols, and community response measures.

CO3	Apply principles of triage, casualty management, evacuation, and hospital preparedness during emergencies.
CO4	Analyze hospital disaster management plans, policies, and risk assessment strategies for effective response.
CO5	Evaluate roles and responsibilities of hospital staff in disaster situations and design training/awareness programmes
MHA 117	Research Project / Dissertation
CO1	Students will successfully complete a dissertation that demonstrates their ability to design and execute original research, offering valuable insights into hospital administration practices.
CO2	Students will develop advanced research, analytical, and writing skills, enabling them to address complex issues in healthcare management and contribute to the field's academic and practical advancement.
MHA 118 CP	Practice of Hospital Administration (Internship)
CO1	To acquire practical experience in implementing public health programs, improving their skills in health assessments and intervention design.
CO2	To develop a deeper understanding of community health needs and gain proficiency in creating effective public health strategies.
