

## MGM INSTITUTE OF HEALTH SCIENCES

Accredited by NAAC with 'A' Grade
(Deemed University u/s 3 of UGC Act, 1956)
Sector-01, Kamothe, Navi Mumbai - 410 209
Tel 022-27432471, 022-27432994, Fax 022 - 27431094

E-mail: registrar@mgmuhs.com; Website: www.mgmuhs.com

## COMPETENCY BASED MEDICAL EDUCATION (CBME)

(With effect from 2019-20 Batches)

Curriculum for Second M.B.B.S

Pathology

Amended upto BOM 63/2021, dated 17/02/2021

Dr. Rajesh B. Goel
Registrar
MGM Institute of Health Sciences
Decemed University u/s 3 of UGC Act, 1956)
Navi Mumbai- 410 209

## II<sup>nd</sup> MBBS CBME Curriculum

## **Pathology**

|                         | Hrs     |
|-------------------------|---------|
| Lectures                | 80      |
| Integrated              | 26      |
| Small group Discussions | 14      |
| Tutorials               | 18      |
| Seminars                | 18      |
| DOAP/ Practicals        | 62      |
| SDL                     | 12      |
| Total:                  | 230 hrs |
|                         |         |

|  | Sr. No. | COMPETENCY The student should be able to                                  | Suggested<br>Teaching<br>Learning<br>Method | Topics   | Numb<br>er of<br>Hours |
|--|---------|---|---|--|------------------------|
| Topic:<br>Introduction to<br>Pathology | PA1.1   | Describe the role of a pathologist in diagnosis and management of disease | Lecture                                     | Introduction & Departmental orientation  | 1                      |
|  | PA1.2   | Enumerate common definitions and terms used in Pathology.                 |   | Introduction, history and evaluation. Common definitions in pathology and causes of cell injury. |                        |
|  | PA 1.3  | Describe the history and evolution of                                     |   |  |                        |

|                            |        | Pathology  |         |  |   |
|----------------------------|--------|--|---------|--|---|
| Cell injury and Adaptation | PA2.1  | Demonstrate<br>knowledge of the<br>causes,<br>mechanisms,<br>types and effects<br>of cell injury and<br>their clinical<br>significance | Lecture | Modes of cell injury:<br>Mechanisms of cell<br>injury  | 1 |
|                            | PA2.2  | Describe the etiology of cell injury. Distinguish between reversible-irreversible injury: mechanisms; morphology of cell injury.       | Lecture | Reversible cell injury: Definitions, cellular swelling, fatty change. Irreversible cell injury: Definition Necrosis: definitions & types | 1 |
|                            | PA2.3  | Intracellular<br>accumulation of<br>fats, proteins,<br>carbohydrates,<br>pigments.   | Lecture | Intracellular accumulations & alterations: Types of Intracellular accumulations with alterations in cell organelles & cytoskeleton.      | 1 |
|                            | PA2.4  | Describe and discuss Cell death- types, mechanisms, necrosis, apoptosis (basic as contrasted with necrosis), autolysis                 | Lecture | Apoptosis & its relevance. Difference Between Apoptosis and Necrosis   | 1 |
|                            | PA 2.5 | Describe and discuss pathologic  | Lecture | Calcification and  | 1 |

|             |        | calcifications, gangrene   |                 | Gangrene   |   |
|-------------|--------|--|-----------------|--|---|
|             | PA2.6  | Describe and discuss cellular adaptations: atrophy, hypertrophy, hyperplasia, metaplasia, dysplasia.                           | DOAP<br>session | Retogressive<br>changes & disorders<br>of cell growths   | 2 |
|             | PA2.7  | Describe and discuss the mechanisms of cellular aging and apoptosis  | Lecture         | Cellular ageing and mechanism  | 1 |
|             | PA2.8  | Identify and describe various forms of cell injuries, their manifestations and consequences in gross and microscopic specimens | DOAP<br>session | Necrosis & gangrene  | 2 |
| Amyloidosis | PA3.1  | Describe the pathogenesis and pathology of amyloidosis   | Lecture         | Amyloidosis: Definition, physical & chemical nature of amyloid, classification, pathogenesis, morphology, lab diagnosis with special stain & clinical correlation. | 1 |
|             | PA 3.2 | Identify and describe amyloidosis in a pathology session.  | DOAP<br>session | Amyloidosis:morpho logy, lab diagnosis with special stain.   | 2 |

| Inflammation       | PA4.1  | Define and describe the general features of acute and chronic inflammation including stimuli, vascular and cellular events      | Lecture         | Acute inflammation: Define & describe cellular & vascular changes. Outcomes & morphological patterns of acute inflammation.      | 1 |
|--------------------|--------|---|-----------------|--|---|
|                    | PA4.2  | Enumerate and describe the mediators of acute inflammation  | Lecture         | Chemical mediators of inflammation: definition, classification, description of each type, role in acute & chronic inflammation.  | 1 |
|                    | PA4.3  | Define and describe chronic inflammation including causes, types, nonspecific and granulomatous; and enumerate examples of each | Lecture         | Chronic inflammation: definition & causes.Granulomato us inflammation: etiology, pattern & systemic effects of granulomas.       | 1 |
|                    | PA 4.4 | Identify and describe acute and chronic inflammation in gross and microscopic specimens   | DOAP<br>session | Acute inflammation<br>,Chronic<br>inflammation &<br>repair   | 2 |
| Healing and repair | PA5.1  | Define and describe the process of repair and regeneration including wound healing and its types                                | Lecture         | Regeneration & repair: Healing by primary & secondary intention with local & systemic factors affecting wound healing. Repair in | 1 |

|                       |       |   |         | specialized tissue:   |   |
|-----------------------|-------|---|---------|---|---|
| Hemodynamic disorders | PA6.1 | Define and describe edema, its types, pathogenesis and clinical correlations                            | Lecture | Edema: Define, classify, pathogenesis & correlate morphology with clinical significance | 1 |
|                       | PA6.2 | Define and describe hyperemia, congestion, hemorrhage.  | Lecture | Hyperemia, congestion, hemorrhage.  | 1 |
|                       | PA6.3 | Define and describe shock, its pathogenesis and its stages  | Lecture | Shock: Define,<br>classify,<br>pathogenesis,<br>mediators & stages<br>of shock.         | 1 |
|                       | PA6.4 | Define and describe normal haemostasis and the etiopathogenesis and consequences of thrombosis          | Lecture | Thrombosis: Definition, etiopathogenesis, morphology, fate & effects of thrombosis.     | 1 |
|                       | PA6.5 | Define and describe embolism and its causes and common types  | Lecture | Embolism : Define types with clinical significance.                                     | 1 |
|                       | PA6.6 | Define and describe Ischaemia/infarcti on its types, etiology, morphologic changes and clinical effects | Lecture | Hyperemia & congestion ,Infarction: Define types with clinical significance.            | 1 |

|                      | PA 6.7 | Identify and describe the gross and microscopic features of infarction in a pathologic specimen  | DOAP<br>session | Circulatory disturbance  | 2 |
|----------------------|--------|--|-----------------|--|---|
| Neoplastic disorders | PA7.1  | Define and classify neoplasia. Describe the characteristics of neoplasia including gross, microscopy biologic, behaviour and spread. Differentiate between benign from maignant neoplams | Lecture         | Nomenclature, classification & differentiation between benign & malignant neoplasms.Precancer ous lesions. | 1 |
|                      | PA7.2  | Describe the molecular basis of cancer.  | Lecture         | Molecular basis of cancer & Biology of tumor growth  | 1 |
|                      | PA7.3  | Enumerate carcinogens and describe the process of carcinogenesis   | Lecture         | Carcinogenesis   | 1 |
|                      | PA7.4  | Describe the effects of tumor on the host including paraneoplastic syndrome  | Lecture         | Tumor host interactions: Systemic effects & paraneoplastic syndromes.                                      | 1 |
|                      | PA7.5  | Describe immunology and the immune response to   | Lecture         | Lab Diagnosis: Diagnostic workup including tumor markersSpread, grading &                                  | 1 |

|                                 |        | cancer  |                 | staging.Tumor<br>immunology  |   |
|---------------------------------|--------|---|-----------------|--|---|
| Basic<br>diagnostic<br>cytology | PA8.1  | Describe the diagnostic role of cytology and its application in clinical care                                   | Tutorials       | Cytology and its application (FNAC)  | 2 |
|                                 | PA 8.2 | Describe the basis of exfoliative cytology including the technique & stains used.                               | Tutorials       | Exfoliative cytology   | 2 |
|                                 | PA 8.3 | Observe a diagnostic cytology and its staining and interpret the specimen.                                      | DOAP<br>session | Cytology and stains  | 2 |
| Immunopathol ogy and AIDS       | PA9.1  | Describe the principles and mechanisms involved in immunity.  | Lecture         | Principles and mechanisms involved in immunity.  | 1 |
|                                 | PA9.2  | Describe the mechanism of hypersensitivity reaction.  |                 | Hypersensitivity reactions: Types & differentiate between different types of hypersensitivity reactions. |   |
|                                 | PA9.3  | Describe the HLA system and the immune principles involved in transplant and mechanism of transplant rejection. | Seminar         | Transplant rejections & HLA System   | 2 |

|                             | PA9.4 PA9.5 | Define autoimmunity. Enumerate autoimmune disorders.  Define and describe the | Lecture                      | Autoimmune diseases: Mechanism of autoimmunity.  Systemic Lupus Erythematosus  | 1 |
|-----------------------------|-------------|---|------------------------------|--|---|
|                             |             | pathogenesis of<br>systemic Lupus<br>Erythematosus.                           |                              |  |   |
|                             | PA9.6       | Define and describe the pathogenesis and pathology of HIV and AIDS.           | Lecture                      | AIDS:<br>Epidemiology,<br>etiopathogenesis.  | 1 |
|                             | PA9.7       | Define and describe the pathogenesis of other common autoimmune diseases      | Tutorials                    | Common autoimmune diseases.  | 2 |
| Infections and infestations | PA10.1      | Define and describe the pathogenesis and pathology of malaria                 | Integrated                   | Parasitic: Malaria: Types, morphological features in P. Vivax & Falciparum Malaria & lab diagnosis.                  | 1 |
|                             | PA10.2      | Define and describe the pathogenesis and pathology of cysticercosis.          | Small<br>group<br>Discussion | Leishmaniasis,<br>Filariasis, Hydatid,<br>Cysticercosis  | 1 |
|                             | PA10.3      | Define and<br>describe the<br>pathogenesis and<br>pathology of<br>leprosy     | Integrated                   | Leprosy: Classify, pathogenesis, differentiate between different types of leprosy, histological features & sequelae. | 1 |

|  | PA10.4 | Define and describe the pathogenesis and pathology of common bacterial, viral, protozoal and helminthic diseases | Lecture                      | Typhoid fever: Pathogenesis, morphology & clinical features. Syphilis: Classify various stages, pathogenesis & morphology. | 1 |
|--|--------|--|------------------------------|--|---|
| Genetic and paediatric diseases              | PA11.1 | Describe the pathogenesis and features of common cytogenetic abnormalities and mutations in childhood.           | Small<br>group<br>Discussion | Cytogenetic abnormalities and mutations in childhood.  | 1 |
|  | PA11.2 | Describe the pathogenesis and pathology of tumor and tumour- like conditions in infancy and childhood            | Seminar                      | Tumor and tumour-<br>like conditions in<br>infancy and<br>childhood  | 2 |
|  | PA11.3 | Describe the pathogenesis of common storage disorders in infancy and childhood                                   | Seminar                      | Storage disorders in infancy and childhood   | 2 |
| Environmental<br>and nutritional<br>diseases | PA12.1 | Enumerate and describe the pathogenesis of disorders caused by air pollution, tobacco and alcohol                | Seminar                      | Disorders caused by<br>air pollution, tobacco<br>and alcohol   | 2 |
|  | PA12.2 | Describe the pathogenesis of   | Seminar                      | Protein calorie malnutrition and   | 2 |

|                             |            | disorders caused<br>by protein calorie<br>malnutrition and<br>starvation                          |                 | starvation                                       |   |
|-----------------------------|------------|---|-----------------|--|---|
|                             | PA12.3     | Describe the pathogenesis of obesity and its consequences   | Integrated      | Obesity  | 1 |
| Introduction to haematology | PA13.1     | Describe<br>hematopoiesis<br>and<br>extramedullary<br>hematopoiesis.                              | Lecture         | Introduction to hematology & hemopoiesis         | 1 |
|                             | PA13.2     | Describe the role of anticoagulants in hematology   | DOAP<br>session | Anticoagulants, Blood collection & Hb Estimation | 2 |
|                             | PA13.3     | Define and classify anemia.   | Lecture         | Anemia: classification and clinical features.    | 1 |
|                             | PA13.4     | Enumerate and describe the investigation of anemia  |                 | crinical features.                               |   |
|                             | PA<br>13.5 | Perform, Identify<br>and describe the<br>peripheral blood<br>picture in anemia                    | DOAP<br>session | PCV, ESR &<br>Peripheral Smear                   | 2 |
| Microcytic anemia           | PA14.1     | Describe iron metabolism.   | Lecture         | Iron metabolism.                                 | 1 |
|                             | PA14.2     | Describe the etiology, investigations and differential diagnosis of microcytic hypochromic anemia |                 | Nutritional anemia:<br>Iron deficiency.          |   |
|                             | PA         | Identify and  | DOAP            | Development of                                   | 2 |

|                   | 14.3       | describe the peripheral blood picture of microcytic anemia   | session         | Blood & BM ,<br>Peripheral smear<br>findings in<br>microcytic anemia                            |   |
|-------------------|------------|--|-----------------|---|---|
| Macrocytic anemia | PA15.1     | Describe the metabolism of Vitamin B12 and the etiology and pathogenesis of B12 deficiency.  | Integrated      | Metabolism, etiology<br>and pathogenesis of<br>Vitamin B12                                      | 1 |
|                   | PA15.2     | Describe<br>laboratory<br>investigations of<br>macrocytic<br>anemia  | Lecture         | laboratory investigations in Folic acid/ Vit B12 deficiency anemia including pernicious anemia. | 1 |
|                   | PA<br>15.3 | Identify and describe the peripheral blood picture of macrocytic anemia.   | DOAP<br>session | Peripheral smear findings in macrocytic anemia & anemia Charts                                  | 2 |
|                   | PA15.4     | Enumerate the differences and describe the etiology and distinguishing features of megaloblastic and non-megaloblastic macrocytic anemia | Tutorials       | Megaloblastic and non-megaloblastic macrocytic anemia   | 2 |
| Hemolytic anemia  | PA16.1     | Define and classify hemolytic anemia.  | Integrated      | Classification of hemolytic anemia.   | 1 |
|                   | PA16.2     | Describe the pathogenesis and  | Lecture         | Hemolytic anemia:<br>Definition,  | 1 |

|          |            | clinical features<br>and hematologic<br>indices of<br>hemolytic anemia   |                 | classification,<br>pathogenesis and<br>investigations.                            |   |
|----------|------------|--|-----------------|---|---|
|          | PA16.3     | Describe the pathogenesis, features, hematologic indices and peripheral blood picture of sickle cell anemia and thalassemia. | Lecture         | Haemoglobinopathie<br>s: Thalassemia,<br>Sickle cell anemia.                      | 1 |
|          | PA16.4     | Describe the etiology pathogenesis, hematologic indices and peripheral blood picture of Acquired hemolytic anemia            | Lecture         | Hereditary<br>spherocytosis and<br>G6PD deficiency                                | 1 |
|          | PA16.5     | Describe the peripheral blood picture in different hemolytic anaemias  | Integrated      | Peripheral blood<br>picture in different<br>hemolytic anaemias                    | 1 |
|          | PA<br>16.6 | Prepare a peripheral blood smear and identify hemolytic anaemia from it  | DOAP<br>session | PS Staining & Dfferential WBC count   | 2 |
|          | PA16.7     | Discribe the correct technique to perform a cross match  | DOAP<br>session | Blood group<br>estimation and<br>correct technique to<br>perform a cross<br>match | 2 |
| Aplastic | PA         | Enumerate the  | Tutorials       | Aplastic anemia   | 2 |

| anemia                | PA17.2      | etiology, pathogenesis and findings in aplastic anemia  Enumerate the indications and describe the findings in bone        | DOAP<br>session              | Development of blood & bone marrow examination.   | 2 |
|-----------------------|-------------|--|------------------------------|---|---|
| Leukocytic            | PA18.1      | marrow aspiration and biopsy  Enumerate and  | DOAP                         | Total WBC Count /   | 2 |
| disorder              |             | describe the causes of leucocytosis leucopenia lymphocytosis and leukemoid reactions                                       | session                      | Leukemia/ Leucocytosis, leucopenia, Leukemoid reaction  | 2 |
|                       | PA`18.<br>2 | Describe the etiology, genetics, pathogenesis classification, features, hematologic features of acute and chronic leukemia | Lecture                      | Acute leukemia: classification and diagnosis. Chronic leukemia: classification and diagnosis. | 1 |
| Lymph node and spleen | PA19.1      | Enumerate the causes and describe the differentiating features of lymphadenopathy  | Small<br>group<br>discussion | Lymphadenitis: Non-specific   | 1 |
|                       | PA19.2      | Describe the pathogenesis and pathology of tuberculous lymphadenitis.  |                              | Lymphadenitis: granulomatous  |   |

|                          | PA<br>19.3 | Identify and describe the features of tuberculous lymphadenitis in a gross and microscopic specimen                        | DOAP<br>session | Lymphnode   | 2 |
|--------------------------|------------|--|-----------------|---|---|
|                          | PA19.4     | Describe and discuss the pathogenesis, pathology and the differentiating features of Hodgkin's and non-Hodgkin's lymphoma. | Lecture         | Hodgkin's and non-<br>Hodgkin's<br>lymphoma.  | 1 |
|                          | PA<br>19.5 | Identify and describe the features of Hodgkin's lymphoma in a gross and microscopic specimen                               | DOAP<br>session | Hodgkin's lymphoma in a gross and microscopic specimen and Tumor Pathology ( Benign & Malignant tumors) | 2 |
|                          | PA19.6     | Enumerate and differentiate the causes of splenomegaly.  | Integrated      | Diseases of spleen:<br>Splenomegaly and<br>effects  | 1 |
|                          | PA<br>19.7 | Identify and<br>describe the gross<br>specimen of an<br>enlarged spleen  | DOAP<br>session | Gross specimen of<br>an enlarged spleen &<br>Leukemias  | 2 |
| Plasma Cell<br>disorders | PA<br>20.1 | Describe the features of plasma cell myeloma   | DOAP<br>session | Plasma cell<br>myeloma & other<br>bone tumors   | 2 |
| Hemorrhagic disorders    | PA21.1     | Describe normal hemostasis.  | Lecture         | Hemorrhagic disorders: Classify   | 1 |

| PA21.2 | Classify and describe the etiology, pathogenesis and pathologyof vascular and platelet disorders including ITP and haemophilia's.            |                 | and lab. Screening<br>tests for hemorrhagic<br>disorders. Platelet<br>deficiency, ITP &<br>hemophilia |   |
|--------|--|-----------------|---|---|
| PA21.3 | Differentiate platelet from clotting disorders based on the clinical and hematologic features.   | DOAP<br>session | Coagulopathies:<br>Coagulation factor<br>deficiency, DIC<br>/Bleeding Disorders                       | 2 |
| PA21.4 | Define and describe disseminated intravascular coagulation, its laboratory findings and diagnosis of disseminated intravascular coagulation. | Integrated      | DIC   | 1 |
| PA21.5 | Define and describe disseminated intravascular coagulation, its laboratory findings and diagnosis of Vitamin K deficiency                    | Seminar         | DIC & Vitamin K deficiency  | 2 |

| Blood banking and transfusion | PA22.1 PA22.2 | Classify and describe blood group systems (ABO and RH).  Enumerate the indications, describe the principles, enumerate and demonstrate the steps of compatibility testing  Enumerate blood | Lecture                      | Blood groups and its relevance in transfusion medicine and hematology. Erythoblastosis foetalis.             | 1 |
|-------------------------------|---------------|--|------------------------------|--|---|
|                               | 1 A22.4       | components and describe their clinical uses  | Lecture                      | & Autologous Transfusion   | 1 |
|                               | PA22.5        | Enumerate and describe infections transmitted by blood transfusion.  | Tutorials                    | Blood transfusion<br>transmissible<br>infections including<br>HIV and hepatitis.                             | 2 |
|                               | PA22.6        | Describe transfusion reactions and enumerate the steps in the investigation of a transfusion reaction  | Lecture                      | Blood transfusion:<br>Indications, selection<br>of donor criteria,<br>cross matching,<br>untoward reactions. | 1 |
|                               | PA22.7        | Enumerate the indications and describe the principles and procedure of autologous transfusion  | Small<br>group<br>discussion | Autologous<br>transfusion  | 1 |
| Clinical<br>Pathology         | PA<br>23.1    | Describe abnormal urinary  | DOAP<br>session              | Urine Examination  | 2 |

|                         |         | findings in<br>disease states and<br>identify and<br>describe common<br>urinary<br>abnormalities in a<br>clinical specimen                          |                              |   |   |
|-------------------------|---------|---|------------------------------|---|---|
|                         | PA23.2  | Describe<br>abnormal findings<br>in body fluids in<br>various disease<br>states   | Small<br>group<br>discussion | Body fluids   | 1 |
|                         | PA 23.3 | Describe and interpret the abnormalities in a panel containing semen analysis, thyroid function tests, renal function tests or liver function tests | DOAP<br>session              | Thyroid function<br>tests, renal function<br>tests or liver function<br>tests ( Charts)   | 2 |
| Gastrointestin al tract | PA24.1  | Describe the etiology, pathogenesis, pathology and clinical features of oral cancers  | Lecture                      | Precancerous lesions of oral cavity and oral cancers: etiopathogenesis, gross and microscopic features. Differential diagnosis of swelling of salivary gland. | 1 |
|                         | PA24.2  | Describe the etiology, pathogenesis, pathology, microbiology, clinical and microscopic features of peptic ulcer disease.                            | Lecture                      | Peptic ulcer: definition, etiopathogenesis, gross and microscopic features and complications.   | 1 |

| PA24.3 | Describe and identify the microscopic features of peptic ulcer  | DOAP<br>session | Ulcers and tumors<br>of intestine &<br>Stomach (GIT)   | 2 |
|--------|---|-----------------|--|---|
| PA24.4 | Describe and etiology and pathogenesis and pathologic features of carcinoma of the stomach                      | Lecture         | Tumors of upper Gastrointestinal Tract: Gastric carcinoma: etiopathogenesis, classification, gross and microscopic features and clinical features. Carcinoid tumors of GIT. Esophagus: etiopathogenesis, morphology and clinical features. | 1 |
| PA24.5 | Describe and etiology and pathogenesis and pathologic features of Tuberculosis of the intestine                 | Lecture         | Ulcerative lesions of GIT  | 1 |
| PA24.6 | Describe and etiology and pathogenesis and pathologic and distinguishing features of Inflammatory bowel disease | Lecture         | Idiopathic inflammatory bowel disease: etiopathogenesis, morphology and differences between Crohn's disease and ulcerative colitis   | 1 |
| PA24.7 | Describe the etiology, pathogenesis, pathology and distinguishing features of carcinoma of the                  | Lecture         | Tumors of lower Gastrointestinal Tract: Carcinoma colon- Etiopathogenesis, morphology and clinical features.   | 1 |

|                         |        | colon   |            | Intestinal polyps and gastrointestinal stromal tumors.   |   |
|-------------------------|--------|---|------------|--|---|
| Hepatobiliary<br>system | PA25.1 | Describe bilirubin metabolism, enumerate the etiology and pathogenesis of jaundice, distinguish between direct and indirect hyperbilirubinemi a   | Integrated | Jaundice   | 1 |
|                         | PA25.2 | Describe the pathophysiology and pathologic changes seen in hepatic failure and their clincial manifestations, complications and consequences   | Integrated | Hepatic failure  | 1 |
|                         | PA25.3 | Describe the etiology and pathogenesis of viral and toxic hepatitis: distinguish the causes of hepatitis based on the clinical and laboratory features. Describe the pathology, complications and consequences of hepatitis | Lecture    | Viral hepatitis: Etiopathogenesis, types, clinical source, pathology, serologic diagnosis, sequelae. | 1 |
|                         | PA25.4 | Describe the pathophysiology, pathology and   | Lecture    | Alcoholic liver disease: Pathogenesis,   | 1 |

|                       |            | progression of<br>alcoholic liver<br>disease including<br>cirrhosis   |                 | morphology and correlation with clinical features.   |   |
|-----------------------|------------|---|-----------------|--|---|
|                       | PA25.5     | Describe the etiology, pathogenesis and complications of portal hypertension  | Lecture         | Cirrhosis: Etiopathogenesis, classification, pathology, complications & differential diagnosis & Portal Hypertension | 1 |
|                       | PA<br>25.6 | Interpret liver<br>function and viral<br>hepatitis serology<br>panel. Distinguish<br>obstructive from<br>non-obstructive<br>jaundice based on<br>clinical features<br>and liver function<br>tests | DOAP<br>session | Hepatobiliary<br>System  | 2 |
| Respiratory<br>system | PA26.1     | Define and describe the etiology, types, pathogenesis, stages, morphology and complications of pneumonia  | DOAP<br>session | Respiratory I & II   | 2 |
|                       | PA26.2     | Describe the etiology, gross and microscopic appearance and complications of lung abscess   | Tutorials       | Lung abscess: Etiopathogenesis, Morphology and complications.and atelectasis and hyaline membrane disease.           | 2 |
|                       | PA26.3     | Define and describe the etiology, types,  | Lecture         | Chronic obstructive pulmonary disease: Bronchial asthma  | 1 |

|      | pathogenesis,<br>stages,<br>morphology and<br>complications and<br>evaluation of<br>Obstructive<br>airway disease<br>(OAD) and<br>bronchiectasis                         | Lecture    | and Bronchiectasis - Etiopathogenesis, Morphology and complications.  Chronic bronchitis and Emphysema: Etiopathogenesis, Morphology types of emphysema and complications | 1 |
|------|--|------------|---|---|
| PA20 | describe the etiology, types, pathogenesis, stages, morphology microscopic appearance and complications of tuberculosis  | Integrated | Pulmonary<br>tuberculosis: primary<br>and secondary,<br>morphologic types<br>including pleuritis,<br>clinical course.   | 1 |
| PA20 | describe the etiology, types, exposure, environmental influence, pathogenesis, stages, morphology, microscopic appearance and complications of Occupational lung disease | Lecture    | Occupational lung disorders: Anthracosis, silicosis, asbestosis, mesothelioma.  | 1 |
| PA20 | describe the etiology, types, exposure, genetics environmental influence,  | Lecture    | Tumors of lung and pleura: Classification, etiopathogenesis, gross and microscopic features, pattern of spread,   | 1 |

|                           |        | pathogenesis,<br>stages,<br>morphology,<br>microscopic<br>appearance,metast<br>ases and<br>complications of<br>tumors of the lung<br>and pleura                         |            | staging, clinical<br>course, para-<br>neoplastic<br>syndromes.  |   |
|---------------------------|--------|---|------------|---|---|
|                           | PA26.7 | Define and describe the etiology, types, exposure, genetics environmental influence, pathogenesis, morphology, microscopic appearance and complications of mesothelioma | Integrated | Complications of mesothelioma   | 1 |
| Cardiovascula<br>r system | PA27.1 | Distinguish arteriosclerosis from atherosclerosis. Describe the pathogenesis and pathology of various causes and types of arteriosclerosis                              | Lecture    | Atherosclerosis: Definition, etiopathogenesis, gross and microscopic features, complications and clinical correlation | 1 |
|                           | PA27.2 | Describe the etiology, dynamics, pathology types and complications of aneurysms including aortic aneurysms  | Tutorials  | Other diseases of<br>blood vessels :<br>Aneurysms &<br>Vasculitis   | 2 |

| PA27.3 | Describe the etiology, types, stages pathophysiology, pathology and complications of heart failure   | Integrated | Heart failure  | 1 |
|--------|--|------------|--|---|
| PA27.4 | Describe the etiology, pathophysiology, pathology, gross and microscopic features, criteria and complications of rheumatic fever   | Lecture    | Rheumatic heart disease: Incidence, etiology, Pathogenesis, morphology, complications, clinical course & investigations.   | 1 |
| PA27.5 | Describe the epidemiology, risk factors, etiology, pathophysiology, pathology, presentations, gross and microscopic features, diagnostic tests and complications of ischemic heart disease | Integrated | Ischemic heart disease: Categories and pathogenesis. Myocardial infarction: incidence, risk factors, pathogenesis, morphology, complications, clinical course and investigations | 1 |
| PA27.6 | Describe the etiology, pathophysiology, pathology, gross and microscopic features, diagnosis and complications of infective endocarditis   | Lecture    | Infective endocarditis: Causes, Pathogenesis, morphology, complications and differential diagnosis of cardiac vegetations.   | 1 |

|               | PA27.7      | Describe the etiology, pathophysiology, pathology, gross and microscopic features, diagnosis and complications of pericarditis and pericardial effusion | Lecture                      | Pericarditis and other pericardial diseases  | 1 |
|---------------|-------------|---|------------------------------|--|---|
|               | PA<br>27.8  | Interpret abnormalities in cardiac function testing in acute coronary syndromes   | DOAP<br>session              | Cardiovascular<br>System including<br>cardiac function<br>testing in acute<br>coronary syndromes | 2 |
|               | PA<br>27.9  | Classify and describe the etiology, types, pathophysiology, pathology, gross and microscopic features, diagnosis and complications of cardiomyopathies  | Integrated                   | Cardiomyopathies   | 1 |
|               | PA27.1<br>0 | Describe the etiology, pathophysiology, pathology features and complications of syphilis on the cardiovascular system                                   | Small<br>group<br>discussion | Syphilis   | 1 |
| Urinary Tract | PA28.1      | Describe the normal histology of the kidney   | Lecture                      | Normal histology of<br>the kidney & Renal<br>failure: definitions,                               | 1 |

| PA<br>28.2 | Define, classify<br>and distinguish<br>the clinical<br>syndromes and<br>describe the<br>etiology,<br>pathogenesis,<br>pathology,<br>morphology,<br>clinical and<br>laboratory and<br>urinary findings,<br>complications of |                        | criteria, etiology, systemic manifestations and investigations. |   |
|------------|--|------------------------|---|---|
| PA28.3     | Define and describe the etiology, precipitating factors, pathogenesis, pathology, laboratory urinary findings, progression and complications of acute renal failure  | Small group discussion | Acute renal failure   | 1 |
| PA 28.4    | Define and describe the etiology, precipitating factors, pathogenesis, pathology, laboratory urinary findings progression and complications of chronic renal failure   | Small group discussion | Chronic renal failure   | 1 |

| PA | 28.5 Define and classify glomerular diseases. Enumerate and describe the etiology, pathogenesis, mechanisms of glomerular injury, pathology, distinguishing features and clinical manifestations of glomerulonephritis | Lecture                      | Glomerulonephritis:<br>Classification, Acute<br>nephritis, rapidly<br>progressive<br>glomerulonephritis.               | 1 |
|----|--|------------------------------|--|---|
| PA | Define and describe the etiology, pathogenesis, pathology, laboratory, urinary findings, progression and complications of IgA nephropathy  | Small<br>group<br>discussion | IgA nephropathy  | 1 |
| PA | Enumerate and describe the findings in glomerular manifestations of systemic disease   | Integrated                   | Glomerular<br>manifestations of<br>systemic disease  | 1 |
| PA | Enumerate and classify diseases affecting the tubular interstitium   | Lecture                      | Pyelonephritis and interstitial nephritis: etiopathogenesis of acute and chronic, morphology and clinical correlation. | 1 |

| DA          | Define and  | Lastwee                      | A outo Tule-1                               | 1 |
|-------------|---|------------------------------|---|---|
| PA<br>28.9  | describe the etiology, pathogenesis, pathology, laboratory, urinary findings, progression and complications of acute tubular necrosis   | Lecture                      | Acute Tubular<br>Necrosis                   |   |
| PA28.1<br>0 | Describe the etiology, pathogenesis, pathology, laboratory findings, distinguishing features progression and complications of acute and chronic pyelonephritis and reflux nephropathy     | DOAP<br>session              | Renal System I & II                         | 2 |
| PA28.1      | Define classify and describe the etiology, pathogenesis pathology, laboratory, urinary findings, distinguishing features progression and complications of vascular disease of the kidney. | Small<br>group<br>discussion | Renal vascular disorders and malformations, | 1 |
| PA28.1<br>2 | Define classify and describe the genetics,  | Small<br>group<br>discussion | Polycystic kidney.                          | 1 |

|             | inheritance,<br>etiology,<br>pathogenesis,<br>pathology,<br>laboratory,<br>urinary findings,<br>distinguishing<br>features,<br>progression and<br>complications of<br>cystic disease of<br>the kidney   |                              |  |   |
|-------------|---|------------------------------|--|---|
| PA28.1      | Define classify and describe the etiology, pathogenesis, pathology, laboratory, urinary findings, distinguishing features progression and complications of renal stone disease and obstructive uropathy | Lecture                      | Nephrolithiasis and obstructive nephropathy  | 1 |
| PA28.1      | Classify and describe the etiology, genetics, pathogenesis, pathology, presenting features, progression and spread of renal tumors  | Lecture                      | Tumors of kidney and pelvis: classifications, morphology, clinical course and paraneoplastic syndromes of common tumors. | 1 |
| PA28.1<br>5 | Describe the etiology, genetics, pathogenesis, pathology,   | Small<br>group<br>discussion | Thrombotic angiopathies  | 1 |

|                       |             | presenting<br>features and<br>progression of<br>thrombotic<br>angiopathies   |            |   |   |
|-----------------------|-------------|--|------------|---|---|
|                       | PA28.1<br>6 | Describe the etiology, genetics, pathogenesis, pathology, presenting features and progression of urothelial tumors   | Lecture    | Urinary bladder:<br>cystitis and<br>carcinoma               | 1 |
| Male Genital<br>Tract | PA29.1      | Classify testicular tumors and describe the pathogenesis, pathology, presenting and distinguishing features, diagnostic tests, progression and spread of testicular tumors | Lecture    | Testicular tumors   | 1 |
|                       | PA29.2      | Describe the pathogenesis, pathology, presenting and distinguishing features, diagnostic tests, progression and spread of carcinoma of the penis                           | Lecture    | Carcinoma of penis  | 1 |
|                       | PA29.3      | Describe the pathogenesis, pathology, hormonal dependency  | Integrated | Prostate : prostatitis<br>Nodular hyperplasia,<br>carcinoma | 1 |

|                         |        | presenting and distinguishing features, urologic findings & diagnostic tests of benign prostatic hyperplasia  |                 |   |   |
|-------------------------|--------|---|-----------------|---|---|
|                         | PA29.4 | Describe the pathogenesis, pathology, hormonal dependency presenting and distinguishing features, diagnostic tests, progression and spread of carcinoma of the prostate | Lecture         | Prostate: carcinoma   | 1 |
|                         | PA29.5 | Describe the etiology, pathogenesis, pathology and progression of prostatitis   | DOAP<br>session | Male Genital System   | 2 |
| Female<br>Genital Tract | PA30.1 | Describe the epidemiology, pathogenesis, etiology, pathology, screening, diagnosis and progression of carcinoma of the cervix   | Lecture         | Diseases of cervix:<br>cervicitis, cervical<br>carcinoma, etiology<br>cytological diagnosis | 1 |
|                         | PA30.6 | Describe the etiology and morphologic features of   |                 |   |   |

|        | cervicitis   |                 |   |   |
|--------|--|-----------------|---|---|
| PA30.2 | Describe the pathogenesis, etiology, pathology, diagnosis and progression and spread of carcinoma of the endometrium                     | Lecture         | Carcinoma of the endometrium                                | 1 |
| PA30.3 | Describe the pathogenesis, etiology, pathology, diagnosis and progression and spread of carcinoma of the leiomyomas and leiomyosarcomas. | DOAP<br>session | Female<br>Reproductive System                               | 2 |
| PA30.4 | Classify and describe the etiology, pathogenesis, pathology, morphology, clinical course, spread and complications of ovarian tumors     | Lecture         | Ovarian tumours   | 1 |
| PA30.5 | Describe the etiology, pathogenesis, pathology, morphology, clinical course, spread and complications of gestational trophoblastic       | Lecture         | Trophoblastic diseases: hydatidiform mole, choriocarcinoma. | 1 |

|        |        | neoplasms   |            |   |   |
|--------|--------|---|------------|---|---|
|        | PA30.7 | Describe the etiology, hormonal dependence, features and morphology of endometriosis                                | Integrated | Diseases of Uterus:<br>Endometriosis &<br>adenomyosis.  | 1 |
|        | PA30.8 | Describe the etiology and morphologic features of adenomyosis   | Integrated | Adenomyosis   | 1 |
|        | PA30.9 | Describe the etiology, hormonal dependence and morphology of endometrial hyperplasia                                | Integrated | Endometrial<br>hyperplasia                              | 1 |
| Breast | PA31.1 | Classify and describe the types, etiology, pathogenesis, pathology and hormonal dependency of benign breast disease | Lecture    | Breast: Non-<br>neoplastic Lesions                      | 1 |
|        | PA31.4 | Enumerate and describe the etiology, hormonal dependency and pathogenesis of gynecomastia                           |            |   |   |
|        | PA31.2 | Classify and describe the epidemiology,   | Lecture    | Neoplastic lesions of<br>the breast-<br>Classification, | 1 |

|                     |            | pathogenesis,<br>classification,<br>morphology,<br>prognostic<br>factors, hormonal<br>dependency,<br>staging and<br>spread of<br>carcinoma of the<br>breast |                 | Morphology, grading of carcinoma of breast and differential diagnosis of breast swellings. |   |
|---------------------|------------|---|-----------------|--|---|
|                     | PA<br>31.3 | Describe and identify the morphologic and microscopic features of carcinoma of the breast   | DOAP<br>session | Tumors of Breast<br>and Diseases of the<br>endocrine organs                                | 2 |
| Endocrine<br>system | PA32.1     | Enumerate,<br>classify and<br>describe the<br>etiology,<br>pathogenesis,<br>pathology and<br>iodine<br>dependency of<br>thyroid swellings                   | Lecture         | Thyroid: Differential diagnosis of thyroid nodule.   | 1 |
|                     | PA32.2     | Describe the etiology, cause, iodine dependency, pathogenesis, manifestations, laboratory and imaging features and course of thyrotoxicosis                 | Tutorials       | Thyrotoxicosis   | 2 |
|                     | PA<br>32.3 | Describe the etiology, pathogenesis, manifestations, laboratory and   | Integrated      | Thyrotoxicosis/<br>Hypothyroidism  | 1 |

|  |        | imaging features<br>and course of<br>thyrotoxicosis/<br>hypothyroidism  |                        |   |   |
|--|--------|---|------------------------|---|---|
|  | PA32.4 | Classify and describe the epidemiology, etiology, pathogenesis, pathology, clinical laboratory features, complications and progression of diabetes mellitus | Integrated             | Diabetes mellitus:<br>Classification,<br>pathogenesis of<br>system involvement,<br>sequelae and<br>complications. | 1 |
|  | PA32.5 | Describe the etiology, genetics, pathogenesis, manifestations, laboratory and morphologic features of hyperparathyroidi sm                                  | Small group discussion | Parathyroid hyperplasias and tumours, hyperparathyroidism. Pituitary tumours                                      | 1 |
|  | PA32.6 | Describe the etiology, pathogenesis, manifestations, laboratory, morphologic features, complications and metastases of pancreatic cancer                    | Integrated             | Pancreatic cancer   | 1 |
|  | PA32.7 | Describe the etiology, pathogenesis, manifestations, laboratory, morphologic features,  | Seminar                | Adrenal diseases:<br>Cortical hyperplasia,<br>atrophy,<br>tuberculosis.   | 2 |

|                      |        | complications of adrenal insufficiency   |         |  |   |
|----------------------|--------|--|---------|--|---|
|                      | PA32.8 | Describe the etiology, pathogenesis, manifestations, laboratory, morphologic features, complications of Cushing's syndrome               | Seminar | Cushing's syndrome   | 2 |
|                      | PA32.9 | Describe the etiology, pathogenesis, manifestations, laboratory and morphologic features of adrenal neoplasms                            | Seminar | Adrenal diseases:<br>tumours of cortex<br>and medulla  | 2 |
| Bone and soft tissue | PA33.1 | Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications of osteomyelitis | Lecture | Osteomyelitis and<br>Metabolic diseases:<br>rickets /<br>osteomalacia,<br>osteoporosis,<br>hyperparathyroidism | 1 |
|                      | PA33.2 | Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications and              | Lecture | Tumors: Primary, osteosarcoma, osteoclastoma, Ewing's sarcoma, chondrosarcoma, metastatic                      | 1 |

|             | metastases of bone tumors   |                              |   |   |
|-------------|---|------------------------------|---|---|
| PA33.3      | Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications and metastases of soft tissue tumors                    | Small<br>group<br>discussion | Classification, morphological features of lipomatous, fibrous, blood vessels tumours, Neural, muscle and fibro histiocytic tumours. | 1 |
| PA33.4      | Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications of Paget's disease of the bone                          | Integrated                   | Paget's disease of the bone   | 1 |
| PA33.5      | Classify and describe the etiology, immunology, pathogenesis, manifestations, radiologic and laboratory features, diagnostic criteria and complications of rheumatoid arthritis | Integrated                   | Arthritis: rheumatoid, osteoid and tuberculosis   | 1 |
| Skin PA34.1 | Describe the risk<br>factors<br>pathogenesis,<br>pathology and  | Lecture                      | Skin tumours: Non-<br>pigmented -<br>classification and<br>morphology & Basal   | 1 |

|                              | PA34.2  | natural history of squamous cell carcinoma of the skin  Describe the risk factors pathogenesis, pathology and natural history of basal cell carcinoma of the skin            |                 | Cell Carcinoma  |   |
|------------------------------|---------|--|-----------------|---|---|
|                              | PA34.3  | Describe the distinguishing features between a nevus and melanoma. Describe the etiology, pathogenesis, risk factors morphology clinical features and metastases of melanoma | Lecture         | Skin tumours: pigmented- classification and morphological features of common nevi and malignant melanoma.   | 1 |
|                              | PA 34.4 | Identify,<br>distinguish and<br>describe common<br>tumors of the skin  | DOAP<br>session | Diseases of Skin  | 2 |
| Central<br>Nervous<br>System | PA35.1  | Describe the etiology, types and pathogenesis, differentiating factors, CSF findings in meningitis   | Lecture         | CSF and its disturbances: Cerebral oedema, raised intracranial pressure.Inflammator y disorders: Pyogenic and tuberculous meningitis, brain abscess, tuberculoma. | 1 |

|     | PA35.2  | Classify and describe the etiology, genetics, pathogenesis, pathology, presentation sequelae and complications of CNS tumors | Lecture         | Classify CNS<br>tumours -primary<br>glioma and<br>meningioma and<br>metastatic. | 1 |
|-----|---------|--|-----------------|---|---|
|     | PA 35.3 | Identify the etiology of meningitis based on given CSF parameters (Including CNS lesions)                                    | DOAP<br>session | CSF Examination<br>Including CNS<br>lesions                                     | 2 |
| Eye | PA36.1  | Describe the etiology, genetics, pathogenesis, pathology, presentation, sequelae and complications of retinoblastoma         | Integrated      | Retinoblastoma  | 1 |

**Resolution No. 3.2.2.1 of BOM-62/2020:** Resolved to approve the restructured Formative and Summative assessment pattern for 2nd MBBS Para-Clinical disciplines (Microbiology, Pathology, Pharmacology and FMT) which is in line with Competency Based Medical Education (CBME) curriculum guidelines as mandated by MCI. [Annexure-46A, 46B, 46C, 46D]

# Format for Internal assessment examinations

| Sr.<br>No. | Exam  | Theor<br>y | Practical |
|------------|---|------------|-----------|
| 1.         | 1 <sup>st</sup> Internal assessment examination | 100        | 100       |
| 2.         | 2 <sup>nd</sup> Internal assessment examination | 100        | 100       |
| 2.         | Preliminary examination                         | 200        | 100       |
|            | Total   | 400        | 300       |

- > Preliminary examination pattern will be as per University examination
- > Respective colleges/ departments will conduct internal assessment examinations and maintain records of the same.

## Format for Internal assessment examinations

| Sr. No. | Exam                             | Theory | Practical |
|---------|----------------------------------|--------|-----------|
| 1.      | Internal assessment examinations | 200    | 200       |
| 2.      | Preliminary examination          | 200    | 100       |
|         | Total                            | 400    | 300       |

| Time – 3 hr  | <u>s.</u> :          |         | Format of question paper        |
|--------------|----------------------|---------|---------------------------------|
|              |                      | Prelir  | minary / University examination |
| Each subject | –2 papers (I / II) – | 100 X 2 | = Total 200 Marks               |
| Unit I & II  | –1 paper             |         | = 100 marks                     |

#### Each paper -

- <u>Section A</u> –MCQ 20 X 1 mark = **20 Marks**
- Section B
  - o Answer any 5 out of 6 SAQ = **30 Marks**
  - o Any one out of 2 LAQ (Structure LAQ to be made) = 10 marks
- **➢ Note: 1 AETCOM SAQ**
- Section C
  - o Any 5 out of 6 SAQ = **30 marks**
  - o Any one out of 2 LAQ (Structure LAQ to be made) = 10 marks
- > Note: At least 1 LAQ should be there clinically based.

# paper Time – 3 hrs. Format of question Preliminary & University

#### Applicable from 2020-21 Batch onwards

Each subject – 2 papers (I/II) – 100 X 2 = Total 200 Marks

#### **Portion:**

| Paper 1 | General Pathology inclusive of general Neoplasia, Hematology inclusive of transfusion medicine. AETCOM module 2.1 |
|---------|---|
| Paper 2 | Systemic Pathology inclusive of Systemic Neoplasia and Clinical   |

# **Theory Paper Pattern and Marks Distribution:**

| Paper   | Section   | Type and Number of Questions   | Marks allotted                                       | Total Marks |
|---------|-----------|--|--|-------------|
| Paper 1 | Section A | MCQs (20)  | 20 X1mk each=<br>20Mks                               | 20          |
|         | Section B | SAQs (5/6)  (1 SAQ compulsory from AETCOM)  LAQs (1/2)  (Atleast 1 LAQ clinical Based) | 5X 6 Mks each =30<br>Mks<br>1X 10 Mks each=10<br>Mks | 40          |
|         | Section C | SAQs (5/6)  LAQs (1/2)  (Atleast 1 LAQ clinical Based)                                 | 5X 6 Mks each =30<br>Mks<br>1X 10 Mks each=10<br>Mks | 40          |
|         |           | TOTAL  |  | 100         |
| Paper 2 | Section A | MCQs (20)  | 20 X1mk each=<br>20Mks                               | 20          |
|         | Section B | SAQs (5/6)  (1 SAQ compulsory from AETCOM)  LAQs (1/2)  (Atleast 1 LAQ clinical Based) | 5X 6 Mks each =30<br>Mks<br>1X 10 Mks each=10<br>Mks | 40          |

| Section C | SAQs (5/6)                        | 5X 6 Mks each =30        | 40  |
|-----------|-----------------------------------|--------------------------|-----|
|           | LAQs (1/2)                        | Mks                      |     |
|           | (Atleast 1 LAQ<br>clinical Based) | 1X 10 Mks each=10<br>Mks |     |
|           |                                   | TOTAL                    | 100 |

#### **Practicals Pattern and Marks Distribution:**

| SPOTS                                | 20Mks  |
|--------------------------------------|--------|
| Urine                                | 15 Mks |
| PS                                   | 07 Mks |
| DC/TLC/BG                            | 10Mks  |
| Histopath                            | 08Mks  |
| Interpretation of charts and reports | 10 Mks |
| Viva 1                               | 15Mks  |
| Viva 2                               | 15 Mks |
| TOTAL                                | 100Mks |

# **INTERNAL EXAMS**

There will be 2 Internal Exams besides prelims

There will be only one theory paper for both Internal Exams.

1<sup>st</sup> Internal Exam: End of January (Theory 100Mks, Practicals 100Mks)

| 2 <sup>nd</sup> Internal Exam: End of April (Theory 100 Mks, Practicals 100) |
|--|
|--|

#### **Portion for Internal Exams:**

#### 1<sup>st</sup> Internal Exam:

General Pathology inclusive of general Neoplasia, Hematology inclusive of transfusion medicine.

# 2<sup>nd</sup> Internal Exam:

Systemic Pathology - inclusive of Systemic – Oral cavity, thyroid, Gastrointestinal System, Liver, Lymphnode, Respiratory system, cardiovascular system, renal system.

#### **Prelims:**

| Paper 1 | General Pathology inclusive of general Neoplasia, Hematology inclusive of transfusion medicine AETCOM module 2.1 |
|---------|--|
| Paper 2 | Systemic Pathology inclusive of Systemic Neoplasia and Clinical Pathology. AETCOM module 2.6                     |

# 1<sup>St</sup> and 2<sup>nd</sup> Internal Exams: (Time 3hrs)

## **Theory Paper Pattern and Marks Distribution:**

| Paper               | Section   | Type and<br>Number of<br>Questions | Marks alloted            | Total Marks |
|---------------------|-----------|------------------------------------|--------------------------|-------------|
| 1 theory Paper only | Section A | MCQs (20)                          | 20 X1mk each=<br>20Mks   | 20          |
|                     | Section B | SAQs (5/6) (1 SAQ compulsory from  | 5X 6 Mks each =30<br>Mks | 40          |

| Histopath                            | 08Mks  |
| Interpretation of charts and reports | 10 Mks |
| Viva 1                               | 15Mks  |
| Viva 2                               | 15 Mks |
| TOTAL                                | 40014  |
| TOTAL                                | 100Mks |

#### Internal assessment calculation

| Sr. No. | Criteria  | Theory | Practical |
|---------|---|--------|-----------|
| 1.      | *All internal assessment examinations including preliminary examination | 80     | 60        |
|         | Day to Day assessment   |        |           |
| 2.      | > Day to Day assessment (PBL/ One line questions/ MCQ)                  | 20     | -         |
|         | > Day to Day assessment (Viva/ Seminars/ OSPE/ SDL)                     | -      | 20        |
| 3.      | Logbook + Journals (Journal + AETCOM logbook)                           | -      | 20        |
|         | Total   | 100    | 100       |

<sup>\*</sup>Internal assessment examinations marks conversion to internal assessment marks - Theory – Total 400 marks of Internal exams including Prelims will be converted to 80

Practical – Total 300 marks of Internal exams including Prelims will be converted to 60

# Total Marks on Final Marksheet for the subject of Pathology will be

| TOTAL     | 500 Mks |
|-----------|---------|
| IA        | 200 Mks |
| Practical | 100 Mks |
| Theory    | 200 Mks |

**Resolution No.3.1.2.3 of BOM-59/2019:** The updated list of Text books and Reference books for 2<sup>nd</sup> MBBS (Microbiology, Pharmacology, Pathology, FMT) are approved. **[Annexure-8]** 

(To be merged with syllabus i.e. Annexure-69 of BOM-57/2019 dt.26/04/2019)
