### Vision and Mission of MGM School of Physiotherapy

#### Vision

MGM Institute of Health Sciences aims to be a top ranking centre of Excellence in Health Science Education, Health Care and Research.

#### Mission

- Students graduating from the Institute will have the required skills to deliver the quality health care to all the sections of the society with compassion and benevolence, without prejudice or discrimination at an affordablecost.
- As a Research Centre, it shall focus on finding better, safer and affordable ways of diagnosing, treating and preventing diseases. In doing so, it will maintain highest ethicalstandard.

# **Description of Degree**

Name of the Degree Offered: Bachelor in Physiotherapy (BPT)

**Duration of Program:** 4 ½ years (4 years Academics + 6 months' compulsory rotator Internship).

#### **Program pattern:**

| First Semester   | August   |
|------------------|----------|
| Second Semester  | February |
| Third Semester   | August   |
| Fourth Semester  | February |
| Fifth Semester   | August   |
| Sixth Semester   | February |
| Seventh Semester | August   |
| Eight Semester   | February |
| Ninth Semester   | August   |

#### **Eligibility Criteria:**

- He/she has passed the Higher Secondary (10+2) with Science (PCB) or equivalent examination recognized by any Indian University or a duly constituted Boardwith pass marks in Physics, Chemistry, and Biology.
- Minimum percentage of marks: 50% aggregate.

#### **Medium of Instruction:**

English will be the medium of instruction for all the subjects of study and for examinations.

#### I. Preamble

Physiotherapy or Physical Therapy (PT) is a **Movement Science** with an established theoretical and scientific base and widespread clinical applications in the Prevention, **Restoration & Rehabilitation, Maintenance and Promotion of optimal physical function.** Physiotherapists **diagnose and manage movement dysfunction** and enhance physical and functional abilities. This physical dysfunction may be the sequelae of involvement of any of the systems like Musculoskeletal, Neurological, Cardiovascular, Respiratory or other bodysystems.

These practitioners contribute to society and the profession through practice, teaching, administration, and the discovery and application of new knowledge about physiotherapy experiences of sufficient excellence and breadth by research to allow the acquisition and application of essential knowledge, skills, and behaviors as applied to the practice of physiotherapy. Physiotherapist (PT) are autonomous, effective and compassionate professionals, who practice collaboratively in a variety of healthcare set ups such as neonatal to geriatric, from critical care to community fitness to sports training. Emerging graduate and post graduate students are required to demonstrate a substantial knowledge base, possess skills related to Physiotherapy practices, possess high emotional quotient to address family health and meet community responsibilities, demonstrate gender sensitivity and socio- culturally relevant competence. They should be aware of legal issues governing professional practice and follow evidence based clinical practices.

The Chairman, University Grants Commission (UGC) via letter D.O.No.F.1- 1/2015 (CM) dated 8<sup>th</sup> January, 2015, communicated the decision of the Ministry of Human Resources Development to implement Choice Based Credit System (CBCS) from the academic session 2015-2016 in all Indian Universities to enhance academic standards and quality in higher education through innovation and improvements in curriculum, teaching- learning process, examination and evaluation systems.

Diversity in the system of higher education, and multiple approaches followed by universities towards curriculum, examination, evaluation and grading system has led to the lack of uniformity. While the Universities must have the flexibility and freedom in designing the examination and evaluation methods that best fits the curriculum, syllabi and teaching—learning methods, there is a need to devise a sensible system for awarding the grades based on the performance of students. Presently the performance of the students is reported using the conventional system of marks secured in the examinations or grades or both. The conversion from marks to letter grades and the letter grades used vary widely across the Universities in the country. This creates difficulty for the academia and the employerstounderstandandinfertherelative performance of the students graduating from

different universities and colleges in the country. Hence the UGC has recommended the implementation of CBCS in Universities.

The grading system is considered to be better than the conventional marks system and hence it has been followed in the top institutions in India and abroad. Introduction of a uniform grading system will facilitate student mobility across institutions within and across countries and also enable potential employers to assess the performance of students. To bring in the desired uniformity, in grading system and method for computing the cumulative grade point average (CGPA) based on the performance of students in the examinations, the UGC has formulated the guidelines and communicated it to all Universities foradoption.

UGC, subsequently, in its notification No.F.1-1/2015 (Sec.) dated 10/4/15 has provided a set of model curricula and syllabi for CBCS program under the Faculties of Arts, Humanities and Sciences providing the academic flexibility for Universities to make changes/ innovation up to 20% in the syllabi of these program. It has also specified that all UG program should be for a minimum of three years' duration. UG Program with 120-140 credits in the 180 annual teaching days' system being designated as regular B. A/B.Sc./B.Com., B.B. A etc., Those UG programs with 140-160 credits or more with fully supported higher number of annual teaching days can be designated as B. A (Hons)/B.Sc.(Hons)/B.B. A(Hons)/B. Com(Hons) etc.,

Further, the University Grants Commission encourages higher education institutes to integrate learning outcome based framework into the curriculum for undergraduate education which is considered critical for enabling effective participation of young people in knowledge production, participation in knowledge economy, improving national competiveness in a globalized world and equipping young people with skills relevant to global and national standards. Outcome oriented curriculum enhances employability of graduates and enables translation of academic research into innovations for practical use in society andeconomy.

Learning outcomes-based approach specifies what graduates completing BPT program are expected to know, understand and able to do after completing the program. The BPT degree is awarded based on demonstration of achievement of outcomes in terms of knowledge, skills, attitudes and values and academic standards expected of the graduate. The expected learning outcomes help define the graduate attributes, qualification descriptors, program learning outcomes, course learning outcomes, curriculum planning, design, delivery and review of the academic program.

MGM Institute of Health Sciences, accredited A grade, has taken a proactive step in adopting the CBCS system for Physiotherapy programs implemented by its constituent unit, MGM School of Physiotherapy.

The duration of Bachelor in Physiotherapy (BPT) program is four and half years offering 184 credits with well-defined learning outcomes. The BPT CBCS Curriculum has been designed

with reference to existing curriculum of state Universities within the country, generic guidelines of University Grant Commission, global guidelines for curriculum, input from experts in the field of Physiotherapy and feedback from stakeholders namely students, teachers, alumni, employers and professionals to remain in consonance with the spirit of choice based credit system and learning objective based curriculum.

#### II. Introduction:

Physiotherapy is a branch of modern medical science which includes examination, assessment, interpretation, physical diagnosis, planning and execution of treatment and advice to any person for the purpose of preventing, correcting, alleviating and limiting dysfunction, acute and chronic bodily malfunction including life saving measures via chest physiotherapy in the intensive care unit, curing physical disorders or disability, promoting physical fitness, facilitating healing and pain relief and treatment of physical and psychological disorders through modulating psychological and physical response using physical agents, activities and devices including exercise, mobilization, manipulations, therapeutic ultrasound, electrical and thermal agents and electrotherapy for diagnosis, treatment and prevention.

(Definition as per the Maharashtra State Council for Occupational therapy & Physiotherapy, 2004)

**'Physiotherapist'** is a qualified professional who has acquired all the above mentioned knowledge and skills for entry into practice after being awarded a bachelor degree in the subject of "Physiotherapy" from a recognized institute affiliated to the University conducting a fulltime course not less than four years and six months of internship.

#### III. Objectives of the Bachelor's in Physiotherapy (BPT) program

This program is formulated to enable student to gain adequate knowledge, skills and clinical hands on experience leading to an ability to establish independent professional practice. The overall content of the curriculum focuses on learning experiences and clinical education experiences for each student that encompasses the following.

- 1. Ethical, evidence-based, efficient Physiotherapy treatment of adult as well as pediatric patients/clients with an array of conditions (e.g. musculoskeletal, neuromuscular, cardiovascular/pulmonary, integumentary etc.) across the lifespan and the continuum of care, to all people irrespective of gender, caste, nation, states and territories, region, minority groups or other groups.
- 2. Ability to prevent movement dysfunction or maintain/restore optimal function and quality of life in individuals with movement disorders.
- 3. Ability to operate as independent practitioners, as well as members of health service provider teams, act as first contact practitioners, from whom patients/clients may seek direct services without referral from another health care professional.
- 4. Ability to promote the health and wellbeing of individuals and the general public/society, emphasizing the importance of physical activity and exercise.

- 5. Prevent impairments, activity limitations, participatory restrictions and disabilities in individuals at risk of altered movement behaviors due to health factors, socio-economic stressors, environmental factors and lifestyle factors.
- 6. Provide interventions/treatment to restore integrity of body systems essential for movement, maximize function and recuperation, minimize incapacity, and enhance the quality of life, independent living and workability in individuals and groups of individuals with altered movement behaviors resulting from impairments, activity limitations, participatory restrictions and disabilities.
- 7. Ability to modify environmental, home and work access and barriers to ensure full participation in one's normal and expected societal roles.
- 8. Become an essential part of the health and community/welfare services delivery systems, practice independently of other health care/service providers and also within interdisciplinary rehabilitation/habilitation programs, independent professional practice in self-employed set up or employment at the multiple settings such as hospitals, nursing homes, institutions catering services to specific conditions (like paraplegic /geriatric homes), primary as well as rural & urban health care set up, community health, domiciliary practice like residential areas, education & research centers, fitness
  - /wellness centers like health clubs, occupational health centers g]- Schools including special schools, geriatric care units, and others.
- 9. Ability to carry out research projects

#### IV. Physiotherapy Graduate Attributes

The following graduate attributes are considered as "essential requirements" to strengthen abilities of a Physiotherapist for widening knowledge, skills and abilities through meaningful learning experiences, and critical thinking. These attributes are necessary for completing the professional education enabling each graduate to subsequently enter clinical practice. The purpose of this curriculum is to delineate the cognitive, affective and psychomotor skills deemed essential for completion of this program and to perform as a competent physiotherapist who will be able to evaluate, plan & execute physiotherapy treatment independently. Some of the characteristic attributes that a graduate should demonstrate are as follows:

- 1. **Disciplinary knowledge:** The student must demonstrate comprehensive knowledge and understanding of curricular content that form the program. The student must demonstrate cognitive learning skills, ability to receive, interpret, remember, reproduce and use information in the cognitive, psychomotor, and affective domains of learning to solve problems, evaluate work, and generate new ways of processing or categorizing similar information listed in course objectives.
- Psychomotor Skills: Physiotherapy students must demonstrate psychomotor skills of locomotor ability to access lecture halls, practical laboratory and clinics.

- a. They must possess ability to move with reasonable swiftness in emergency situations to protect the patient (e.g. from falling).
- b. They should be competent to perform physical tasks such as positioning patients to effectively perform evaluation, manipulate assessment tools used for evaluation of joint mobility, muscle strength, testing musculoskeletal, neurological and cardiorespiratory systems.
- c. Students should be competent to perform risk assessment, safely and effectively guide, facilitate, inhibit, and resist movement and motor patterns through physical facilitation and inhibition techniques (including ability to give timely urgent verbal feedback), perform transfers, positioning, exercise, mobilization techniques and use assistive devices and perform cardiopulmonary resuscitation.
- d. Students must possess fine motor skills to legibly record thoughts for written assignments (including diagrams) and tests, document evaluations, patient care notes, referrals, etc. in standard medical charts in hospital/clinical settings in a timely manner and consistent with the acceptable norms of clinical settings and safely use electrotherapy modalities and fine mobilisation techniques.
- e. Students must possess visual acuity to read patient's treatment chart, observe demonstrations, visual training, receive visual information from patients, treatment environment and clues of treatment tolerance. Auditory acuity to distinguish between normal and abnormal sounds, engage in conversation with patients and retrieve meaningful information relevant to patientcare.
- 3. Communication skills: The student must be able to express thoughts and ideas effectively in writing and verbally, communicate with others using appropriate media, share views, demonstrate ability to listen carefully, write analytically, present complex information in a clear, and concise manner. Student must be able to effectively communicate information and safety concerns with other students, teachers, patients, peers, staff and personnel by asking questions, giving information, explaining conditions and procedures, or teaching home programs. They should be able to receive and send verbal communication in life threatening situations in a timely manner within the acceptable norms of clinical settings. Physiotherapy education presents exceptional challenges in the volume and breadth of required reading and the necessity to impart information to others. Students must be able to communicate quickly, effectively and efficiently in oral and written English with all members of the health care team.
- 4. Critical thinking: Student should be able to apply analytical thought to a body of knowledge, analyze based on empirical evidence, draw relevant assumptions or implications, formulate arguments, critically evaluate policies and theoretical framework and formulate a scientific approach to knowledge development. They should be able to identify structural and functional impairments, identify contextual factors influencing function, critically appraise treatment options and implement care

- that is socio-culturally relevant to each patient.
- 5. **Problem Solving:** Students must demonstrate capacity to extrapolate theoretical knowledge and apply competencies gained to solve non-familiar problems and real life situations.
- 6. **Analytical reasoning:** To a certain extent, students should be able to evaluate reliability and relevance of evidence, synthesize data, draw valid conclusions and support them with evidence.
- 7. Research Related Skills: Students should be able to define research problem, formulate hypothesis, manage resources, analyze and interpret data, explore cause effect relationships, plan and execute a report, present results of the experiment and demonstrate a sense of scientific enquiry, reflective thinking, self-directed learning and creativity.
- 8. **Co-operation /Team Work:** Students should demonstrate the ability to work effectively and respectfully with a multi-disciplinary team, facilitate co-operative and coordinated effort for the common cause in various clinical settings.
- 9. **Socio-cultural and multicultural competency**: Knowledge of socio-cultural values, attitudes and beliefs relevant to a particular society, nation and global perspectives must be present to effectively engage and identify with diverse groups.
- 10. Awareness of moral, ethical and legal issues: Students must demonstrate moral /ethical values in conduct, awareness of ethical issues related to patient care, work practices, refraining from malpractice, unethical Behaviour, falsification, plagiarism, misinterpretation of data, non-adherence to intellectual property rights, adhering to truthful, unbiased actions in all aspects of work without discrimination based on age, race, gender, sexual preference, disease, mental status, lifestyle, opinions or personal values.
- 11. **Leadership qualities:** Students must demonstrate ability for task allocation, organization of task elements, setting direction, formulating an inspiring vision, team building, to achieve a vision, engaging, knowledge and respect individual values and opinions in order to foster harmonious working relationships with colleagues, peers, and patients.
- 12. **Ongoing Learning**: Students must demonstrate ability to acquire knowledge and skills through ongoing learning, participation in continuous education programs, engaging in self-paced, self- directed learning aimed at personal development, meeting social and cultural objectives, skill development, adapting to changing environment and workplace requirements and challenges.

#### V. Qualification Descriptors for Bachelor of Physiotherapy (BPT)program

Students who complete the four and half years Bachelor of Physiotherapy program will be awarded a bachelor's degree. Expected outcomes that a student must demonstrate include:

- Systematic, extensive and coherent knowledge and skill in Physiotherapy and its
  applications including critical understanding of established theories, principles
  and concepts, knowledge of advanced and emerging issues in Physiotherapy,
  skills in musculoskeletal, neurological, cardio-respiratory Physiotherapy, recent
  advances and research in Physiotherapy evaluation and treatment procedures.
- 2. Comprehensive information about electrotherapy modalities, exercise equipment, advanced learning material, skills and techniques.
- Skill in collecting quantitative and qualitative data, analysis and interpretation of
  data using appropriate methodology and communicating results to scientific
  community and beneficiaries for formulating appropriate evidence based health
  care solutions.
- 4. Address self-learning needs related to current and emerging areas of study, use research and professional material, apply knowledge to new concepts and unfamiliar areas and seek solutions in real life situations.
- 5. Demonstrate profession related transferable skills relevant to patient care and employment opportunities.

#### VI. Program Outcomes for Bachelor of Physiotherapy Program

Students who complete four and half year's undergraduate program in Physiotherapy would earn a Bachelor of Physiotherapy (BPT) degree. The learning outcomes that a student should be able to demonstrate on completion of a degree level program include academic, personal, behavioral, entrepreneurial and social competencies. It is expected that a student completing a particular course must have a level of understanding of the subject and its sub-areas in consonance with the learning outcomes mentioned at the end of that course. Program learning outcomes include Physiotherapy specific skills, generic skills, transferable global skills and competencies that prepare the student for employment, higher education, and research thereby developing students as contributing members for overall benefit to the society.

The program learning outcomes relating to BPT degree program are summarized below:

|                                     | To demonstrate behavioral skills and humanitarian approach while   |  |  |
|-------------------------------------|--|--|--|
| PO 1                                | communicating with patients, relatives, society at large and co-professionals  |  |  |
| PO 2                                | To develop healthy Physiotherapist – Patient relationship  |  |  |
|                                     | To demonstrate and relate moral, ethical values and legal aspects concerned with   |  |  |
| PO 3                                | Physiotherapy management   |  |  |
|                                     | To demonstrate academic skills and knowledge related to understanding the  |  |  |
| PO 4                                | structural and functional of human body and applied anatomy, physiology in   |  |  |
|                                     | physiotherapy practice.  |  |  |
|                                     | To apply and outline pathology of medical conditions in context with   |  |  |
| PO 5                                | Physiotherapy, interpret& use medical communication.   |  |  |
|                                     | To apply knowledge of biomechanics of human movement in musculoskeletal,   |  |  |
| PO 6                                | neurological and cardio-respiratory conditions in planning, recommending, and  |  |  |
| 100                                 |  |  |  |
| executing Physiotherapy management. |  |  |  |
|                                     | To outline and implement Physiotherapy management by co-relating assessment and examination skills of clinical subjects like Orthopedics, General Surgery, |  |  |
| PO 7                                | Medicine, Neurology, Pediatrics, Dermatology & Gynecology & Obstetrics,  |  |  |
|                                     | Community Medicine and Sociology   |  |  |
|                                     | To demonstrate skill in maneuvers of passive movements, massage, stretchi  |  |  |
|                                     | strengthening, and various manual therapy techniques. Students will integrate  |  |  |
| PO 8                                | Physiotherapy evaluation skills including electro diagnosis on patients to arrive at   |  |  |
| 100                                 | a Functional/ Physical Diagnosis in musculoskeletal, neurological, cardiovascular  |  |  |
|                                     | and pulmonary conditions.  |  |  |
|                                     | To describe and analyze concepts of energy conservation, global warming and  |  |  |
| PO 9                                | pollution and justify optimal use of available resources.  |  |  |
|                                     | To demonstrate ability of critical thinking, scientific enquiry, experiential  |  |  |
| PO 10                               | learning, personal finance, entrepreneurship and managerial skills related to task   |  |  |
| 1010                                | in day-to-day work for personal & societal growth.   |  |  |
|                                     | To demonstrate and apply basic computer applications for data management, data   |  |  |
| PO 11                               | storage, generating data bases and for research purposes.  |  |  |
|                                     | storage, generating data bases and for research purposes.  |  |  |

# VII. Program Specific Outcomes for Bachelor of Physiotherapy Program

# Physiotherapist as a Professional **Reflect, learn and teach others**

| PSO 1 | Acquire, assess, apply and integrate new knowledge, learn to adapt to changing circumstances and ensure that patients receive the highest level of professional care.   |  |
|-------|---|--|
| PSO 2 | Establish the foundations for lifelong learning and continuing professional development, including a professional development portfolio containing reflections, achievements and learning needs.                        |  |
| PSO 3 | Continually and systematically reflect on practice and, whenever necessary, integrate that reflection into action, using improvement techniques and audit.  |  |
| PSO 4 | Manage time and prioritize tasks, and work autonomously when necessary and appropriate.   |  |
| PSO 5 | Recognize own personal and professional limits and seek help from colleagues and supervisors when necessary.  |  |
| PSO 6 | Function effectively as a mentor and teacher including contributing to the appraisal, assessment and review of colleagues, providing effective feedback, and taking advantage of opportunities to develop these skills. |  |

#### Learn and work effectively within a multi-professional team

|       | Analyze the roles and expertise of health and social care professionals in the     |
|-------|--|
| PSO 7 | context of working and functioning as a multi-professional team to the delivery of |
|       | safe and high-quality care.  |
|       | Demonstrate ability to work with colleagues in ways that best serve the interests  |
| PSO 8 | of patients, passing on information and handing over care, demonstrating           |
|       | flexibility, adaptability and a problem-solving approach.                          |
|       | Demonstrate ability to build team capacity and positive working relationships and  |
| PSO 9 | undertake various team roles including leadership and the ability to accept        |
|       | leadership by others.  |

#### Physiotherapist as a Scholar and a Scientist

Physiotherapy graduate will be able to apply biomedical scientific principles, method and knowledge relating to: anatomy, physiology, biochemistry, cell biology, pathology, and psychology to Physiotherapy clinical practice.

#### The graduate will be able to:

| PSO 10   | Explain normal human structure and functions, examine the correlation between structural and functional impairment.  |  |
|--|--|--|
| PSO 11   | PSO 11 Explain the scientific basis for common musculoskeletal, neurological, cardio respiratory, women's health related, geriatric and sports related disorder compare and contrast Physiotherapy treatment techniques applicable in relevant case scenarios. |  |
| PSO 12 Justify selection of appropriate clinical examination and investigation for common clinical conditions and critically analyze clinical findings |  |  |
| PSO 13 Plan appropriate rehabilitation goals for common disorders and design management protocols.   |  |  |
| PSO 14   | Examine the role of environmental and occupational hazards in ill-health and discuss ways to mitigate their effects.   |  |

#### Apply scientific method and approaches to Physiotherapy research

| PSO 15 | Plan, and conduct research experiments to evaluate current practices and design innovative physiotherapy interventions, based on evidence, to provide highest level of healthcare. |
|--------|--|
| PSO 16 | Critically appraise the results of relevant qualitative and quantitative studies as reported in scientific literature.   |
| PSO 17 | Outline the ethical issues involved in clinical research.  |

#### Physiotherapist as a Practitioner

#### The graduate will be able to

| PSO 18 | Record a patient's medical history, including family and social history;           |
|--------|--|
| 150 10 | communicate with relatives or other caretakers where ever appropriate.             |
|        | List patients' questions, their understanding of condition and treatment options,  |
| PSO 19 | their views, concerns, values, preferences and extent to which patients want to be |
|        | involved in decision-making regarding their care and treatment.                    |
|        | Assess structural, functional impairments, compare performance and capacity        |
| PSO 20 | through clinical examination and risk evaluation, prioritize goals, recommend      |
|        | Physiotherapy treatment and carry out independent consultation with a patient.     |
|        | Examine ethical and legal issues in patient care, obtain informed consent,         |
| PSO 21 | demonstrating community responsibility, good communication skills and socio-       |
|        | cultural competency  |
|        | Respond to patients concerns and preferences, and respect the rights of patients   |
| PSO 22 | to reach decisions with their doctor about their treatment and care and to refuse  |
|        | or limit treatment.  |

#### Communicate effectively with patients and colleagues in a health context

|        | Communicate clearly, sensitively and effectively with patients, caregivers, and       |
|--------|---|
| PSO 23 | colleagues from the medical and other professions, by listening, sharing and          |
|        | responding.   |
|        | Communicate clearly, sensitively and effectively with individuals and groups          |
| PSO 24 | regardless of their age, social, cultural or ethnic backgrounds or their disabilities |
|        | including when English is not the patient's first language.                           |
| PSO 25 | Communicate by spoken, written and electronic methods (including medical              |
| 150 25 | records), and be aware of other methods of communication used by patients.            |
|        | Communicate appropriately in difficult circumstances, such as when breaking bad       |
| PSO 26 | news, and when discussing sensitive issues, such as alcohol consumption, smoking      |
| 130 20 | or obesity, with difficult or violent patients, people with mental illness            |
|        | and with vulnerable population  |

#### Provide immediate care in medical emergencies

| PSO 27 | Assess and recognize the severity of a clinical presentation and a need for   |
|--------|---|
| 15027  | immediate emergency care.   |
| PSO 28 | Apply basic first aid and cardio-pulmonary resuscitation or direct other team |
| 130 28 | members to carry out resuscitation.   |

#### Use information effectively in a health context

| PSO 29 | Write accurate, legible and complete clinical records, use computers and other information systems for data storage, retrieval, prepare health promotion material for patients, research and education. |
|--------|---|
| PSO 30 | Demonstrate confidentiality, use data protection legislation and codes of practice in all dealings with information.  |

VIII. Course learning outcomes: are defined within the course content that makes up the program. The courses are structured such that learning is vertically and horizontally integrated into the curriculum. The CBCS curriculum offers a certain degree of flexibility in taking courses. Course learning is aligned to the program learning outcomes and graduate attributes. The BPT program is inclusive of 9 semesters inclusive of 54 core courses and 28 weeks of compulsory rotator internship, (122 Credits), 5 ability enhancement compulsory courses (AECC-12 credits), 6 ability enhancement elective courses (AEEC-6 credits) and 12 discipline specific skill electives (SEC-12 credits) and 2 generic electives (GEC-2 credits). In semester V to VIII practical training will place emphasis on specific skill training on healthy adults as well as patient in order to gain core competences. Supervised clinical training (CLT) is included in each semester (30credits).

Evaluation of the courses vary as appropriate to the subject area, inclusive of formative and summative assessment, ongoing comprehensive assessment in the form of closed and open book tests, objectively structured practical examination (OSPE), objectively structured clinical examination (OSCE), problem based assignments, practical assignments, observation of practical skills, project reports, case reports, viva, seminars, essays, and others.

#### **IX. CBCS Definition and Benefits:**

Choice Based Credit System is a flexible system of learning. The distinguishing features of CBCS are the following:

- It permits students to learn at their own pace.
- The electives are selected from a wide range of elective courses offered by the other University Departments.
- Undergo additional courses and acquire more than the required number of credits.
- Adopt an inter-disciplinary and intra-disciplinary approach in learning.
- Make best use of the available expertise of the faculty across the departments or disciplines
- Has an inbuilt evaluation system to assess the analytical and creativity skills of students in addition to the conventional domain knowledge assessment pattern.

#### 9.1 Definitions of Key Words:

- i. **Academic Year:** Two consecutive (one odd + one even) semesters constitute one academic year.
- ii. The CBCS provides choice for students to select from the prescribed courses (core, elective or minor or soft skill courses).
- iii. **Course**: Usually referred to, as "papers" is a component of a programme. All courses need not carry the same weight. The courses should define learning objectives and learning outcomes. A course may be designed to comprise lectures / tutorials /

- laboratory work/ outreach activities/ project work/ viva/ seminars/ term papers/assignments/ presentations/ self-study etc. or a combination of some of these.
- iv. **Credit Based Semester System (CBSS):** Under the CBSS, the requirement for awarding a degree or diploma or certificate is prescribed in terms of number of credits to be completed by the students.
- v. **Credit:** A unit by which the course work is interpreted. It functions the number of hours of instructions required per week. One credit is equivalent to one hour of teaching (lecture or tutorial) or two hours of practical work/field work per week.
- vi. **Cumulative Grade Point Average (CGPA):** It is a measure of overall cumulative performance of a student over all semesters. The CGPA is the sum total of the credit points obtained by the student in various courses in all semesters and the sum of the total credits of all courses in all the semesters.
- vii. **Grade Point:** It is a numerical marking allotted to each letter grade on a 10-point scale.
- viii. **Letter Grade:** It is an appreciated point of the student's performance in a selected course. Grades are denoted by letters O, A+, A, B, C and RAx.
- ix. **Programme:** An educational programme leading to award of a Degree certificate.
- x. **Semester Grade Point Average (SGPA):** It is index of performance of all performance of work in a semester. Its total credit points obtained by a student in various courses registered in a semester and the total course credits taken during that semester. It shall be expressed up to two decimal places.
- xi. **Semester:** Each semester will extend for 6 months and will consist of minimum of 130 teaching/learning days, exclusive of examinations and holidays. The odd semesters will be scheduled from August to January and even semesters from February to July.
- xii. **Transcript or Grade Card or Certificate**: Based on the grades earned, a grade certificate shall be issued to all the registered students after every semester. The grade certificate will display the course details (code, title, number of credits, grade secured) along with SGPA of that semester and CGPA earned till that semester.

## X. Semester System and Choice Based Credit System

The semester system accelerates the teaching-learning process and enables vertical and horizontal mobility of students in learning. The credit based semester system provides flexibility in designing curriculum and assigning credits based on the course content and hours of teaching. The choice based credit system enables students to take courses of their choice, learn at their own pace, undergo additional courses and acquire more than the required credits, and adopt an interdisciplinary approach to learning.

#### 10.1. Semesters:

#### An academic year consists of two semesters:

| Semesters   | UG              |
|---|-----------------|
| Odd Semesters 1 <sup>st</sup> ,3 <sup>rd</sup> ,5 <sup>th</sup> ,7 <sup>th</sup>    | August -January |
| Even Semesters 2 <sup>nd</sup> , 4 <sup>th</sup> , 6 <sup>th</sup> ,8 <sup>th</sup> | February-July   |

#### 10.2 Credits:

Credit defines the coefficient of contents/syllabus prescribed for a course and determines the number of hours of instruction required per week. Credits will be assigned in each course on the basis of number of lectures/ practical/tutorial/ laboratory work and other forms of learning required, to complete the course contents in a 15-20-weekschedule:

- a. *1 credit* = 1 hour of lecture per week
- b. *3 credits* = 3 hours of instruction per week
  - ✓ Credits will be assigned on the basis of the lectures (L) / Clinical Training (CT) / laboratory work (P) / Research Project (RP) and other forms of learning in a 15-20-week schedule L One credit for one-hour lecture per week
- c. **P** One credit for every two hours of laboratory or practical
- d. **CT** One credit for every three hours of Clinical training/Clinical rotation/posting
- e. **RP** One credit for every two hours of Research Project per week Maximum Credit 20-25

|          | Lecture - L | Tutorial - T      | Practical - P | Clinical Training/ Rotation— CT/CR | Research<br>Project–<br>RP* |
|----------|-------------|-------------------|---------------|------------------------------------|-----------------------------|
| 1 Credit | 1 Hour      | 2 Hours           | 2 Hours       | 3 Hours                            | 2 Hours                     |
| RP*      | Maximum Cre | dit 20 – 25 / Ser |               |                                    |                             |

- a. **Types of Courses**: Courses in the programme are of three kinds:
  - Core Course
  - Elective Course
  - Ability Enhancement Course

- **1. Core Course:** A course, which should compulsorily be studied by a candidate as a basic requirement to complete the program, is termed as a Core course. There are Core Theory (CT) and Core Practical (CP) Courses in every semester.
- **2 Elective Course:** A course which can be chosen from a very specific or advanced subject of study or which provides an extended scope or which enables exposure to some other domain or expertise, is called an Elective Course. Elective courses may be of two types
- **2a. Discipline Specific Skill Elective (SEC) Course:** Elective courses offered by the main subject of study are referred to as Discipline Specific Elective. The Institute may also offer discipline related Elective courses of interdisciplinary nature. An elective may be "Discipline Specific Electives (DSE)" gazing on those courses which add intellectual efficiency to the students.
- **2b. Generic Elective (GEC) Course:** An elective course chosen generally from an unrelated discipline/subject, with an intention to seek exposure is called a Generic Elective.

**Dissertation / Project:** An Elective/Core course designed to acquire special / advanced knowledge, such as supplement study / support study to a project work, and a candidate studies such a course on his own with an advisory support by a teacher / faculty member is called dissertation / project.

**3.** Ability Enhancement Courses (AEC): The Ability Enhancement (AE) Courses may be of two kinds: Ability Enhancement Compulsory Courses (AECC) and Skill Enhancement Courses(SEC).

"AECC" courses are the courses based upon the content that leads to Knowledge enhancement (i) Environmental Science and (ii) English/MIL Communication. These are mandatory for all disciplines.

**Skill Enhancement Courses (SEC):** SEC courses are value-based and/or skill-based and are aimed at providing hands-on-training, competencies, skills, Indian and foreign languages etc. These courses may be chosen from a pool of courses designed to provide value-based and/or skill-based knowledge.

- **2.4** Assigning Credit Hours Per Course: While there is flexibility for the departments in allocation of credits to various courses offered, the general formula would be:
  - All core courses will be restricted to a maximum of 4credits
  - All electives will be restricted to a maximum of 3credits
  - All ability enhancement courses will be restricted to a maximum of 2credits
  - Projects will be restricted to a maximum of 3credits

Any course requiring more than 4 credit hours for covering the syllabus content will be divided into two courses i.e., 6 Credits Course 1 - 3 credits + Course 2 - 3 credits or 6 Credits Course 1 Theory - 4 credits + Course 2 Lab - 2 credits.

**2.5 Assigning total Credits for a Program:** The UGC, in its notification No.F.1-1/2015 (Sec.) dated 10/4/15 has provided a set of Model curricula and syllabi for CBCS programs. In conformation with this notification, the BPT program credits for 41/2 years' duration will be 184 credits in total, inclusive of clinical rotation/clinical training and research project.

#### XI. Credit Value Per Course & Structure of Syllabus:

To ensure uniformity in assigning the credits to a course, a structured and unitized syllabus shall be observed. For UG & PG Programs each course will be provided a structured syllabus in the following format:

- a) Title of the Course
- b) Learning Objectives
- c) Units for

| Category                                      | Credits | BPT Syllabus units                   |
|---|---------|--------------------------------------|
| Core Theory (CT)                              | 3 - 4   | 6                                    |
| Core Practical(CP)                            | 2 - 4   | 10- 15 experiments/ cases/ spotters  |
| Ability enhancement (AE)                      | 2       | 4                                    |
| Skills enhancement (SE)- theory or practicals | 2       | 4                                    |
| General Elective                              | 2       | 2                                    |
| Clinical Training<br>(CLT)                    | 3-15    | Structured monitoring and assessment |
| Research Projects (RP)                        | 18-25   | Structured monitoring and assessment |
| Internship (IN)                               | Min.15  | Structured monitoring and assessment |

- d) Syllabus Content
- e) Learning Outcomes
- f) References
  - a. Text Books –2
  - b. Reference Books –2
  - c. Web Resources 2 Web Portals

Minimum credit allocation will be as per requirements of each course curriculum.

#### **Structure of CBCS BPT Curriculum**

| Se          | emester I                  | Ser                                   | nester II  | Sen                | nester III  |                    |  |   |

<sup>#</sup> Examination will be conducted at Constituent unit

## XIV. Rules and Regulation for Examination of Bachelor of Physiotherapy Program under MGM School of Physiotherapy offering CBCS Pattern

- 1. Title of the courses offered: Bachelor of Physiotherapy
- **2. Duration of the course:** Four and half years, including one year of Internship for UG course.
- 3. Medium of instruction: The medium of instruction and examination shall be in English
- 4. Letter Grades and Grade Points:

MGMSOP has adopted the UGC recommended system of awarding grades and CGPA under Choice Based Credit Semester System for all the UG/PG courses.

- 4.1 MGMSOP would be following the absolute grading system, where the marks are compounded to grades based on pre-determined class intervals.
- 4.2 The UGC recommended 10-point grading system with the following letter grades will be followed:

**Table 1: Grades and Grade Points:** 

| Letter Grade            | <b>Grade Point</b>                    |  |  |  |  |  |  |  |  |  |
|-------------------------|---------------------------------------|--|--|--|--|--|--|--|--|--|
| O (Outstanding)         | 10                                    |  |  |  |  |  |  |  |  |  |
| A+ (Excellent)          | 9                                     |  |  |  |  |  |  |  |  |  |
| A (Very Good)           | 8                                     |  |  |  |  |  |  |  |  |  |
| B (Good)                | 7                                     |  |  |  |  |  |  |  |  |  |
| C (Above Average)       | 6                                     |  |  |  |  |  |  |  |  |  |
| F (Fail)/ RA (Reappear) | 0                                     |  |  |  |  |  |  |  |  |  |
| Ab (Absent)             | 0                                     |  |  |  |  |  |  |  |  |  |
| Not Completed (NC)      | 0                                     |  |  |  |  |  |  |  |  |  |
| RC (<50% in attendance  | RC (<50% in attendance or in Internal |  |  |  |  |  |  |  |  |  |
| Assessmen               | nt)                                   |  |  |  |  |  |  |  |  |  |

4.3 A student obtaining Grade F/RA will be considered failed and will require reappearing in the examination.

4.4 Candidates with NC grading are those detained in a course (s); while RC indicate student not fulfilling the minimum criteria for academic progress or less than 50% attendance or less than 50% in internal assessments (IA). Registrations of such students for the respective courses shall be treated as cancelled. If the course is a core course, the candidate has to re-register and repeat the course when it is offered next time.

### 5. CBCS Grading System - Marks Equivalence Table

#### 5.1 Table 2: Grades and Grade Points

| Letter Grade              | <b>Grade Point</b> | % of Marks   |
|---------------------------|--------------------|--------------|
| O (Outstanding)           | 10                 | 86-100       |
| A+ (Excellent)            | 9                  | 70-85        |
| A (Very Good)             | 8                  | 60 -69       |
| B (Good)                  | 7                  | 55 -59       |
| C (Above Average) –       | 6                  | 50- 54       |
| Passing criteria for BPT  | U                  | 30- 34       |
| F (Fail) // RA (Reappear) | 0                  | Less than 50 |
| Ab (Absent)               | 0                  | -            |
| NC- not completed         | 0                  | -            |
| RC- Repeat the Course     | 0                  | 0            |

#### 5.2 Table 3: Cumulative Grades and Grade Points

| Letter Grade      | Grade Point | CGPA         |
|-------------------|-------------|--------------|
| O (Outstanding)   | 10          | 9.01 - 10.00 |
| A+ (Excellent)    | 9           | 8.01 - 9.00  |
| A (Very Good)     | 8           | 7.01 - 8.00  |
| B (Good)          | 7           | 6.00 - 7.00  |
| C (Above Average) | 6           | 5.01 - 6.00  |

- **6. Assessment of a Course:** Evaluation for a course shall be done on a continuous basis. Uniform procedure will be adopted under the CBCS to conduct internal assessments (IA), followed by one end-semester university examination (ES) for each course.
  - 6.1 For all category of courses offered (Theory, Practical, Discipline Specific Elective; Generic Elective [GEC] and Ability Enhancement Courses [AEEC/AECC]; Skills Enhancement Courses [SEC] Theory or Practical & RP (Research Project), assessment will comprise of Internal Assessment (IA) in the form of continuous comprehensive evaluation and mid-semester exam, end–semester examination or college exam as applicable.

Evaluation of elective courses and certain core courses will be carried out at the level of the constituent unit for academic batch admitted in 2019-2021. The pattern of examination is described in the curriculum.

Evaluation of all core and elective courses will be performed as End Semester University Exam from academic batch 2020-2021 onwards. Pattern of internal assessment and University Exam are described in the curriculum. As per resolution no.3.7 of AC -41/2021 and 3.11 AC -41/2021.

- 6.2 Courses in programs wherein Theory and Practical/Clinical are assessed jointly (UG or PG), the minimum passing head has to be 50% Grade each for theory and practical's separately. RA grade in any one of the components will amount to reappearing in both components. i.e. theory and practical.
- 6.3 Evaluation for a course with clinical rotation or clinical training or internship will be done on a continuous basis.

#### 7. Eligibility to appear for the end-semester examinations for a course includes:

- 7.1 Candidates having  $\geq$  75% attendance and obtaining the minimum 40% in internal assessment in each course to qualify for appearing in the end-semester university examinations.
- 7.2 The students desirous of appearing for university examination shall submit the application form duly filled along with the prescribed examination fee.
- 7.3 Incomplete application forms or application forms submitted without prescribed fee or application form submitted after due date will be rejected and student shall not be allowed to appear for examination.

#### 8. Passing Heads

- 8.1 Passing head for core theory and practical courses will be 50% inclusive of internal assessment.
- 8.2 Elective subjects The minimum prescribed marks for a pass in elective subject will be 50%. The marks obtained in elective courses will be communicated to the university before the commencement of the university examination.
- **9 Detention:** A student not meeting any of the above criteria maybe detained (NC) in that particular course for the semester. In the subsequent semester, such a candidate requires improvement in all, including attendance and/or IA minimum to become eligible for the next end-semester examination.
- 10 The maximum duration for completing the program will be 8 years (minimum duration of program x 2) i.e. (4x2) = 8 years for UG program & (2x2) = 4 years for PG program, failing which his/her registration will be cancelled. Full fees of entire program of 4 or 2 years as the case may be liable to be paid by the students.

#### 11 Carry over benefit:

- 11.1 A student will be allowed to keep term for Semester II irrespective of number of heads of failure in Semester I.
- 11.2 A student will be allowed to keep term for Semester III if she/he passes each Semester I and II OR fails in not more than 2 courses each in semester I and II.
- 11.3 Student will be allowed to keep term for Semester IV irrespective of number of heads of failure in Semester III. However, student must mandatorily have passed each course of Semester I and II in order to appear for Semester IV exam.
- 11.4 Student will be allowed to keep term for Semester V, if she/he passes Semester I, II, III and IV OR has passed in all courses of Semester I and II and fails in not more than two courses each of Semester III and IV.
- 11.5 Student will be allowed to keep term for Semester VI, irrespective of number of heads of failure in Semester V. However, student must mandatorily have passed each course of Semester I, II, III and IV in order to appear for Semester VI exam.
- 11.6 Student will be allowed to keep term for Semester VII, if she/he passes Semester I, II, III, IV, V and VI OR has passed in all courses of Semester I, II, III and IV and fails in not more than two courses each of Semester V and VI.
- 11.7 A student will not be allowed to appear for the Semester VIII examination unless she/he has cleared all previous examinations.
- 11.8 Student will be allowed to commence internship if he/she passes Semester VIII examination.

#### 12 Grace Marks for UG Courses:

- 12.1 A student shall be eligible for grace marks, provided he/she appeared in all the papers prescribed for the examination.
- Maximum up to 5 grace marks may be allowed for passing, spread over between subjects.
- 12.3 No grace marks will be awarded in internal evaluation.

#### 13 University End-Semester Examination

- 13.1 There will be one final university examination at the end of every semester.
- 13.2 A student must have minimum 75% attendance (Irrespective of the type of absence) in theory and practical in each subject to be eligible for appearing the University examination.
- 13.3 The Principal / Director shall send to the university a certificate of completion of required attendance and other requirements of the applicant as prescribed by the university, two weeks before the date of commencement of the written examination.
- 13.4 A student shall be eligible to sit for the examination only, if she / he secure a minimum of 40% in internal assessment (individually in theory and practical as applicable). Internal examinations will be conducted at the level of constituent unit.
- 13.5 Notwithstanding any circumstances, a deficiency of attendance at lectures or practical maximum to the extent of 10% may be condoned by the Principal / Director.
- 13.6 If a student fails either in theory or in practical, he/ she have to re-appear for both.
- 13.7 Student may apply to the University following due procedure for re-evaluation/recounting of theory marks in the presence of the subject experts.
- 13.8 Internal assessment shall be submitted by the Head of the Department to the University through Director of MGMSOP at least two weeks before commencement of University theory examination.
- **14 Supplementary examination:** The supplementary examination will be held in the next semester. Eligibility to appear for supplementary examination will be as per rule number 11.1-11.8.

#### 15. Re-Verification

There shall be provision of re-totaling/re-evaluation of the answer sheets; candidate shall be permitted to apply for recounting/re-totaling/re-evaluation of theory papers within 8 days from the date of declaration of results.

**16. Scheme of University Exam Theory UG/PG Program:** General structure / patterns for setting up question papers for Theory / Practical courses, for UG/PG program of MGMSOP are given in the following tables. Changes may be incorporated as per requirements of specific courses.

## 16.1 : Theory Question Paper Pattern for Core Subjects in University Examinations Under CBCS - 80 Marks

| Question type               | No. of questions | Marks/<br>Question | Question X<br>marks | Total marks |
|-----------------------------|------------------|--------------------|---------------------|-------------|
| Section 1                   |                  |                    |                     |             |
| Short answer questions      | 8                | 5                  | 8 x 5               | 40          |
| Section 2                   |                  |                    |                     |             |
| Medium long answer question | 4                | 10                 | 4 x 10              | 40          |
|                             |                  |                    |                     | Total= 80   |

## 16.2 : Theory Question Paper Pattern for Core Subjects in University Examinations Under CBCS - 40Marks

| Question type               | No. of questions | Marks/<br>Question | Question X<br>marks | Total marks |
|-----------------------------|------------------|--------------------|---------------------|-------------|
| Section 1                   |                  |                    |                     |             |
| Short answer questions      | 4                | 5                  | 4 x 5               | 20          |
| Section 2                   |                  |                    |                     |             |
| Medium long answer question | 2                | 10                 | 2 x 10              | 20          |
|                             |                  |                    |                     | Total= 40   |

#### **General Instructions (Theory):**

- A. Time duration of each Theory Paper will be of Three (3) hrs or 1 1/2 hrs as the case maybe.
- B. Total Marks of each Theory Paper will be 80 Marks / 40 Marks.
- C. There will be TWO Sections in Question Paper. Section 1 will be short answer questions and Section 2 will be medium long answer questions. There will be internal option.
- D. Both the Sections are compulsory.
- E. Both the sections are to be written in the separate answersheet

# 16.3 Practical Question Paper Pattern for University Examinations Under CBCS - 80 Marks (May vary as per course requirement)

| Exercise | Description                  | Marks      |
|----------|------------------------------|------------|
| Q No 1   | Long Practical exercise/Case | 30         |
| Q No 2   | Short Practical              | 20         |
|          | exercise/Case/OSPE/OSCE      |            |
| Q No 3   | Spots (4 x 5 marks)          | 20         |
| Q No 4   | Journal                      | 10         |
|          |                              | Total = 80 |

## 16.4 Practical Question Paper Pattern for University Examinations Under CBCS - 40 Marks (May vary as per course requirement)

| Exercise | Description                      | Marks        |
|----------|----------------------------------|--------------|
| Q No 1   | Long Practical exercise - 1      | 1 x15=15     |
| Q No 2   | Short station exercise/OSPE/OSCE | 3x5M=15      |
| Q No 3   | VIVA                             | 5 M          |
| QNo 4    | Journal                          | 5 M          |
|          |                                  | Total = 40 M |

#### **General Instructions (Practical):**

- A. All the students have to remain present at the examination centre 15 minutes before the scheduled time for examination.
- B. Students have to carry with them certified journal, I-card or examination receipt, and other necessary requirements for examination.
- C. Candidate should not leave the practical hall without the permission of examiner.
- D. Use of calculator is allowed but the use of mobile phones is strictly prohibited.
- E. The candidate has to leave the laboratory only after the submission of all the answer sheets of the exercises performed.

### 16.5 Internal examination pattern (Mid-Semester Theory): 40marks

| Question<br>type | No. of questions | Marks/question | Question<br>X marks | Total marks |
|------------------|------------------|----------------|---------------------|-------------|
| Short<br>answers | 4                | 5              | 4 x 5               | 20          |
| Long<br>answers  | 2                | 10             | 2 x 10              | 20          |
|                  |                  | Total          |                     | Total= 40   |

# 16.6 Internal Examination Pattern (Mid-Semester Practical): 40marks (May vary as per course requirement)

| Long Practical exercise/case | 20 marks     |
|------------------------------|--------------|
| Short station /OSPE/OSCE     | 10 marks     |
| Viva                         | 5 marks      |
| Log book                     | 5 marks      |
| Theory and practical         | Total = 40 M |

## G.16.7 Internal examination pattern (Mid-Semester Theory): 20marks

| Question type | No. of questions | Marks/question | Question X<br>marks | Total Marks |
|---------------|------------------|----------------|---------------------|-------------|
| Long essays   | 1                | 10             | 1x10                | 10          |
| Short answers | 2                | 5              | 2x5                 | 10          |

Marks should be submitted by respective departments at least 15 days prior to onset of university examination to the university.

# 16.6 Internal Examination Pattern (Mid-Semester Practical): 20 Marks (May vary as per course requirement)

| Short Exercise /Case/OSPE/OSCE | 10 marks     |
|--------------------------------|--------------|
| Viva                           | 5 marks      |
| Log book                       | 5 marks      |
| Theory and practical           | Total = 20 M |

Note – Internal assessment marks will be summative of continuous comprehensive assessment and mid semester exam and will be converted to as per determined weightage for submission to the University.

#### **16.7 College Examination Pattern**

| <b>Question Type</b> | No. of questions | Marks/question | Question x<br>marks | Total marks |
|----------------------|------------------|----------------|---------------------|-------------|
| Short answers        | 8                | 5              | 8 x 5               | 40          |

#### 16.8 Assessment of Seminar (50Marks)

| Description                  | Marks        |
|------------------------------|--------------|
| Submission of seminar report | 25           |
| Subject knowledge            | 5            |
| Concept and Methodology      | 5            |
| Presentation                 | 5            |
| VIVA                         | 10 M         |
|                              | Total = 50 M |

#### 16.9 Clinical Evaluation

| Clinical Placement Area       | Duration in<br>Weeks | Assignment/Case<br>Documentations |
|-------------------------------|----------------------|-----------------------------------|
| Musculoskeletal PT            | 6                    | 3                                 |
| Neurophysiotherapy            | 6                    | 3                                 |
| Cardiovascular & Pulmonary PT | 6                    | 3                                 |

- Presentation of required number of cases to the respective clinical supervisors and documentation in the Log book for each posting is mandatory, failing which the particular posting will be repeated.
- Attendance is mandatory at all clinical postings with a permission of only one official leave per month. Interns remaining absent for more than the permitted leaves and without prior intimation to the clinical supervisors, candidate will have to compensate the days absent after completion of the rotatory internship placement schedule.
- Appropriate dress code to be followed at all the clinical posting areas.

#### **16.10 Ongoing Comprehensive Evaluation:**

On completion of each unit of a course evaluation in the form of multiple choice questions, essays, case reports etc may be undertaken. Marks of all evaluation will be added along with the following summative evaluation and mid – semester marks to obtain the internal assessment score.

#### **Summative Evaluation**

| Sr |  |   |   |   |   |   |
|----|--|---|---|---|---|---|
| No | Criteria                               | 5 | 4 | 3 | 2 | 1 |
| 1  | Punctuality and dress code             |   |   |   |   |   |
| 2  | Attitude towards patients & colleagues |   |   |   |   |   |
| 3  | Urge for Learning/ Initiative          |   |   |   |   |   |

#### 16.12 Research Project Report: -

BPT student should submit a suitable research project topic forwarded by the guide to MGM School of Physiotherapy by 2<sup>nd</sup> month of commencement of Semester VII. Following approval of ethics & scientific committee, work should be carried out in subsequent semesters and internship. Completed project report should be submitted at least a month before end of internship.

### 17. Research Project report Evaluation Guidelines for BPT program:

The research project report allows the student to develop and display in-depth understanding of a theme in International Studies, as well as an in-depth understanding of the appropriate research tools, approaches and theories applicable to that theme. The dissertation should be based on a well-defined and clear research question of scholarly significance, and that the dissertation develops a theoretically and methodologically informed and evidence-based answer to that question.

Criteria for evaluating a research project report: The following guidelines and criteria should be applied when assessing a dissertation.

### Guidelines to Prepare Internship Research Proposal & Project

#### 1. Selection of Research Problem:

Select your interest area of research, based on felt need, issues, social concern.

- a. State the problem in brief, concise, clear.
- b. State the purpose of selected study &topic.
- c. State the objectives of proposal/project.
- d. Prepare conceptual framework based on operational definition.
- e. Write scope of research proposal/project.

#### 2. Organizing Review of Literature

- a. Study related and relevant literature which helps to decide conceptual framework and research design to be selected for the study
- b. Add specific books, bulletins, periodicals, reports, published dissertations, encyclopedia and textbooks
- c. Organize literature as per operational definition
- d. Prepare summary table for review of literature

# 3. Research Methodology: To determine logical structure & methodology for research project.

a. Decide and state approach of study i.e. experimental or non-experimental

Curriculum for Bachelor of Physiotherapy Program (BPT) BOS 63, AC 41-2021 2019-2020

- b. Define/find out variables to observe effects on decided items &procedure
- c. Prepare simple tool or questionnaire or observational checklist to collect data.
- d. Determined sample and sampling method
- e. Mode of selection ii) Criteria iii) Size of sample iv) Plan when, where and how data will be collected.
- f. Test validity of constructed tool
- g. Check reliability by implementing tool before pilot study (10% of sample size)
- h. Conduct pilot study by using constructed tool for 10% selected sample size

#### 4. Data collection: To implement prepared tool

- a. Decide location
- b. Time
- c. Write additional information in separate exercise book to support inferences and interpretation

#### 5. Data analysis and processing presentation

- a. Use appropriate method of statistical analysis i.e. frequency and percentage
- b. Use clear frequency tables, appropriate tables, graphs and figures.
- c. Interpretation of data:
- d. In relation to objectives
- e. Hypothesis
- f. Variable of study or project
- g. Writing concise report

#### 6. Writing Research Report

- a. Aims:
- i. To organize materials to write project report
- ii. To make comprehensive full factual information
- iii. To make appropriate language and style of writing
- iv. To make authoritative documentation by checking footnotes, references & bibliography
- v. To use computers & appropriate software

#### b. Points to remember

- i. Develop thinking to write research report
- ii. Divide narration of nursing research report
- iii. Use present tense and active voice
- iv. Minimize use of technical language
- v. Use simple, straightforward, clear & concise language
- vi. Use visual aids in form of table, graphs &figures
- vii. Treat data confidentially
- viii. Review & rewrite if necessary

## **Evaluation Criteria for Project Report**

| Sr.<br>No | Criteria  |   |   | Rati | ing |   | Remark |
|-----------|---|---|---|------|-----|---|--------|
|           | Cilicila  | 1 | 2 | 3    | 4   | 5 | Kemark |
|           | Statement of the problem  |   |   |      |     |   |        |
| I         | 1. Significance of the problem selected   |   |   |      |     |   |        |
|           | 2. Framing of title and objectives  |   |   |      |     |   |        |
|           | Literature Review   |   |   |      |     |   |        |
|           | Inclusion of related studies on the topic and its   |   |   |      |     |   |        |
| II        | relevance   |   |   |      |     |   |        |
|           | 2. Operational definition   |   |   |      |     |   |        |
|           | Dogovek Dogica  |   |   | 1    | 1   |   | 1      |
|           | Research Design  1. Use of appropriate research design  |   |   |      |     |   |        |
| III       | <ol> <li>Use of appropriate research design</li> <li>Usefulness of the research design to draw the</li> </ol> |   |   |      |     |   |        |
|           | _   |   |   |      |     |   |        |
|           | inferences among study variables/ conclusion  |   |   |      |     |   |        |
|           | Sampling Design   |   |   |      |     |   |        |
|           | 1. Identification & description of the target   |   |   |      |     |   |        |
|           | population  |   |   |      |     |   |        |
| IV        | 2. Specification of the inclusion & exclusion   |   |   |      |     |   |        |
|           | criteria  |   |   |      |     |   |        |
|           | 3. Adequate sample size, justifying the study   |   |   |      |     |   |        |
|           | design to draw conclusions  |   |   |      |     |   |        |
|           | Data Collection Procedure   |   |   |      |     |   |        |
|           | Preparation of appropriate tool   |   |   |      |     |   |        |
|           | Pilot study including validity & reliability of   |   |   |      |     |   |        |
| V         | tool  |   |   |      |     |   |        |
|           | 3. Use of appropriate procedure/ method for data  |   |   |      |     |   |        |
|           | collection  |   |   |      |     |   |        |
|           | Analysis of Data & Interpretation   |   |   |      |     |   |        |
|           | Clear & logical organization of the finding   |   |   |      |     |   |        |
| VI        | 2. Clear presentation of tables (title, table&  |   |   |      |     |   |        |
| . =       | column heading)   |   |   |      |     |   |        |
|           | 3. Selection of appropriate statistical tests   |   |   |      |     |   |        |
|           | Ethical Aspects   |   |   |      |     |   | 1      |

Signature of the Evaluator

#### 18. Eligibility for award of degree

18.1A candidate shall have passed in all the subjects of all semester's I-VIII, completed internship and submitted research project report to be eligible for award of BPT degree.

The performance of a candidate in a course will be indicated as a letter grade, whereas grade point will indicate the position of the candidate in that batch of candidates. A student is considered to have completed a course successfully and earned the prescribed credits if he/she secures a letter grade other than F/RA. A letter grade RA in any course implies he/she has to Re-appear for the examination to complete the course.

- 18.2The RA grade once awarded in the grade card of the student is not deleted even when he/she completes the course successfully later. The grade acquired later by the student will be indicated in the grade sheet of the subsequent semester in which the candidate has appeared for clearance in supplementary exams
- 18.3 If a student secures RA grade in the Project Work/Dissertation, he/she shall improve it and resubmit it, if it involves only rewriting / incorporating the revisions suggested by the evaluators. If the assessment indicates lack of student performance or data collection, then the student maybe permitted to re-register by paying the prescribed re-registration fee and complete the same in the subsequent semesters.
- A candidate shall be declared to have passed the examination if he/she obtains the following minimum qualifying grade / marks:-
- (a) For Core courses CT (Core Theory), CL (Core Lab), DE (Discipline centric Electives), clinical rotation and internship student shall obtain Grade B (50 % of marks) in the University End Semester Examination (ES) and in aggregate in each course which includes both Internal Assessment and End Semester Examination.
- (b) For Generic Electives (GE), Ability Enhancement (AE) and Skill Enhancement (SE) courses student shall obtain a minimum of Grade B (50% of marks) in the College Examination.

#### 19. Guidelines for Clinical Internship or Research internship:

19.1Internship may be commenced only on completion of all course work. The internship may be observed only at the clinical postings and areas of extension activities of MGM School of Physiotherapy, Navi Mumbai / Aurangabad. No external postings

will be considered during internship. Students are expected to act in a responsible and professional manner at all times during their postings.

- 19.2 Eligibility for appearing for Internship: On completion of all course work, a candidate is permitted by the Director/Principal to join internship during the beginning of the semester i.e., Odd/Even.
- 19.3 Responsibilities during internship: During the internship period candidates should show at least 90% attendance. They must engage in practice/ skill based learning of professional conduct. Their learning outcomes must be maintained and presented in the form of logbooks/ case studies/ research project report. The appropriate formats for the postings/ clinical rotations/ research assignments will be are prescribed as required.
- 19.4 Evaluation of internees and award of credits: All internees will be assessed based on their satisfactory attendance, performance in the postings/ research labs, presentation of the logbook, satisfactory completion of research project and end-semester clinical examination. The credits and hours of internship will be as defined in the BPT program.

### XV. Computation of SGPA and CGPA

The UGC recommends the following procedure to compute the Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

i. The SGPA is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone & earned by a student, i.e.,

SGPA (Si) = 
$$\sum$$
(Ci x Gi) /  $\sum$ Ci

where Ci is the number of credits of the ith course and Gi is the grade point scored by the student in the ith course.

ii. The CGPA is also calculated in the same manner taking into account all the courses undergone & earned by a student over all the semesters of a programme, i.e.

$$CGPA = \sum (Ci \times Si) / \sum Ci$$

where Si is the SGPA of the ith semester and Ci is the total number of credits in that semester.

iii. The SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.

#### Illustration of Computation of SGPA and CGPA

| Course   | Credit | Grade<br>Letter | Grade Point | Credit Point<br>(Credit x<br>Grade) |
|----------|--------|-----------------|-------------|-------------------------------------|
| Course 1 | 3      | A               | 8           | 3 X 8 = 24                          |
| Course 2 | 4      | B+              | 7           | 4 X 7 = 28                          |
| Course 3 | 3      | В               | 6           | 3 X 6 = 18                          |
| Course 4 | 3      | 0               | 10          | 3 X 10 = 30                         |
| Course 5 | 3      | С               | 5           | $3 \times 5 = 15$                   |
| Course 6 | 4      | В               | 6           | 4 X 6 = 24                          |
|          | 20     |                 |             | 139                                 |

#### **Illustration for SGPA**

Thus, SGPA = 139/20 = 6.95

| Semester 1            | Semester 2 | Semester 3 | Semester 4 |  |  |  |
|-----------------------|------------|------------|------------|--|--|--|
| Credit: 20            | Credit: 22 | Credit: 25 | Credit: 26 |  |  |  |
| SGPA: 6.9             | SGPA: 6.8  | SGPA: 6.6  | SGPA: 6.0  |  |  |  |
| Semester 5            | Semester 6 |            |            |  |  |  |
| Credit: 26            | Credit: 25 |            |            |  |  |  |
| SGPA: 6.3             | SGPA: 8.0  |            |            |  |  |  |
| Illustration for CGPA |            |            |            |  |  |  |

Thus,

$$20\ x\ 6.9 + 22\ x\ 6.8 + 25\ x\ 6.6 + 26\ x\ 6.0 + 26\ x\ 6.3 + 25\ x\ 8.0$$

 $CGPA = \underline{\hspace{1cm}} = \underline{\hspace{1cm}} = \underline{\hspace{1cm}}$ 

144

ii. Transcript: Based on the above recommendations on Letter grades, grade points and SGPA and CGPA, the transcript for each semester and a consolidated transcript indicating the performance in all semesters may be issued.

### XVII. Course Registration

- 17.1. After admission to a Program, a student identity number is generated. This PRN number may be used in the process of registration for a course.
- 17.2 The registration process is a registration for the courses in a semester. The registration card is generated after a student completes the choice of electives. Every student shall register for the stipulated number of Courses/Credits semester wise even if electives are not prescribed in their regulations for the said semester. Every student must register for Elective/Ability Enhancement Courses semester-wise for the courses he/she intends to undergo in that semester within two weeks of commencement of the semester.

The list of students registered for each elective will be communicated to the HoDs/ Course Chairpersons. Students will be requested to authenticate the chosen electives by appending their signature in acceptance with approval by the HoDs/ Course Chairpersons. A soft copy of the registered students will be submitted to the elective course offering departments for their official use.

### **XVIII.** Re - Entry after Break of Study:

The University regulations for readmission are applicable for a candidate seeking re-entry to a program.

- a) Students admitted the program and absenting for more than 3 months must seek readmission into the appropriate semester as per university norms.
- b) The student shall follow the syllabus in vogue (currently approved / is being followed) for the program.
- c) All re-admissions of students are subject to the approval of the Vice-Chancellor.

## XI. Ranking

The first two ranks of the programme will be decided on the basis of grades of CGPA in the courses (core and DE courses only). In case of a tie, marks % [of core and DE courses only] will be taken into account.

#### XII. Classification of Successful Candidates

Overall Performance in a Program and Ranking of a candidate is in accordance with the University regulations.

| Internal Assess    | ment)                                 |             |               |  |  |  |  |  |

#### A successful candidate will be:

- i. Who secures not less than O grade with a CGPA of 9.01 10.00 shall be declared to have secured 'OUTSTANDING' provided he/she passes the whole examination in the FIRSTATTEMPT;
- ii. Who secures not less than A+ grade with a CGPA of 8.01 9.00 shall be declared to have secured 'EXCELLENT' provided he/she passes the whole examination in the FIRSTATTEMPT;
- iii. Who secures not less than A grade with a CGPA of 7.01 –8.00 and completes the course within the stipulated course period shall be declared to have passed the examinations with 'Very Good'
- iv. All other candidates (with grade B and above) shall be declared to have passed the examinations.

| Semester              | Semester I                      |  |  |
| Credit per Semester   | 3 credits                       |  |  |
| Hours per Semester    | 60 hours                        |  |  |

| Course Learning Outcomes: The student will be able to |  |  |  |  |
|---|--|--|--|--|
| CO 1  | describe anatomical aspects of muscles, bones, joints, their attachments of thorax and upper quadrant & to understand and discuss analysis of movements with respect to bones, joints and soft tissues related to musculoskeletal system of thorax, & upper extremity. |  |  |  |
| CO 2  | describe structures of the cardio vascular & respiratory system, mechanism of respiration and the course of blood vessels, structure of rib cage & its contents with special emphasis to lungs, tracheo-bronchial tree, respiratory muscles & heart                    |  |  |  |
| CO 3  | describe source & course of major arterial, venous & lymphatic system, related to upper quadrant, thorax and heart.  |  |  |  |
| CO 4  | describe various structures of the genitor-urinary system, abdomen, pelvic organs and sense organs and apply knowledge to living anatomy   |  |  |  |

| Unit | Topics   | No. of<br>Hrs. |
|------|--|----------------|
| 1    | General anatomy  a. Introduction, Skin, fascia, vessels, Bone, joint, muscles & nerves  Imaging techniques     | 09             |
| 2    | General Histology  a. Epithelium  b. Connective tissue  c. Muscle  d. Bone and cartilage  e. Nerve and vessels | 05             |
| 3    | Embryology   | 05             |
| 4    | Musculoskeletal anatomy (dissection / pro-section mandatory)   | 15             |

|   | a. Superior extremity with shoulder girdle.                               |    |
|---|---|----|
|   | Cardiovascular system (Including Lymphatics) and Respiratory system       |    |
|   | a. Thoracic wall, Mediastinum   |    |
|   | b. Heart and major blood vessels  |    |
| 5 | c. Lungs  | 12 |
|   | d. Respiratory muscles, Diaphragm, Intercostal, Accessory muscles         |    |
|   | e. Lymphatics   |    |
|   | f. Applied Anatomy  |    |
|   | Systemic Anatomy  |    |
|   | a. Urinary system   |    |
|   | b. Reproductive system, (special emphasis to Female organs & Pelvic floor |    |
| 6 | muscles supporting system for uterus)                                     | 14 |
|   | c. Abdominal muscles  |    |
|   | d. Organs of gastro-intestinal system                                     |    |
|   | e. Sensory organs – Ear ,Eye  |    |
|   | Total   | 60 |

## **EXAMINATION SCHEME**

# Theory question paper pattern for University Semester Examination under CBCS - 80 marks

| Question type                                 | No. of questions | Marks/<br>question | Question X<br>marks | Total marks |  |
|---|------------------|--------------------|---------------------|-------------|--|
| Section1                                      |                  |                    |                     |             |  |

|          |                                      | Total = 80   |

**Internal examination pattern (practical): 40 Marks** 

(Examination pattern applicable for batch admitted in academic year 2019-2020)

| Exercise | Description | Marks     |
|----------|-------------|-----------|
| Q No 1   | Clinical    | 20        |
| Q No 2   | Spots /OSPE | 20        |
| Total    |             | Total= 40 |

Internal Assessment marks will be weighted out of 20 marks, for theory and practical, respectively.

#### RECOMMENDED TEXT BOOKS

- 1. Text book on Medical Physiology –Guyton
- 2. Textbook of Physiology A K Jain (for MBBS students)

#### RECOMMENDED REFERENCE BOOKS

- 1. Review of Medical Physiology Ganong
- 2. Samson & Wright"s Applied Physiology
- 3. Textbook of Medical Physiology Bern and Levy

| Name of the Programme     | Bachelor of Physiotherapy |
|---------------------------|---------------------------|
| Name of the Course        | Kinesiotherapy– I         |
| Course Code               | BPT005                    |
| <b>Course Description</b> | Core Theory               |
| Semester                  | Semester I                |
| Credit per Semester       | 2 credits                 |
| Hours per Semester        | 40 hours                  |

| Course Learning Outcomes |  |  |
|--------------------------|--|--|
| Cognitive                |  |  |
|                          | At the end of the course, the candidate will be able to:   |  |
| CO 1                     | define the various terms used in mechanics, biomechanics & kinesiology   |  |
| CO 2                     | explain the basic principles of biophysics related to mechanics of movement / motion & apply these principles to simple equipment designs along with their efficacy in Therapeutic Gymnasium & various starting positions used in therapeutics.                    |  |
| CO 3                     | explain the concepts of physical, social and mental health, differentiate between<br>physical activity and fitness, describe factors affecting physical fitness, and<br>importance of regular monitoring of fitness for prevention of non-communicable<br>diseases |  |
|                          | Psychomotor  |  |
|                          | At the end of the course, the candidate will be able to:   |  |
| CO 4                     | demonstrate use of various equipments of the Therapeutic Gymnasium   |  |
| CO 5                     | demonstrate movements in terms of anatomical planes and axes, demonstrate various starting & derived positions used in therapeutics.   |  |
| CO 6                     | apply therapeutic skills of massage  |  |
| CO 7                     | Demonstrate assessment of basic evaluation like sensations, reflexes & vital parameters  |  |
| CO 8                     | Acquire the diagnostic skill of objective assessment of Range of Motion of the upper quadrant, head and neck by Goniometry   |  |

| Unit. | Topics  | No. of<br>Hrs. |
|-------|---|----------------|
|       | Application of Biomechanics in Human Anatomy  |                |
|       | a. Types of Muscles- Anatomical &Physiological  |                |
|       | b. Types of muscle work /Contraction  |                |
| 1     | c. Muscle Action: Roles as Agonist, Antagonist, Fixators, Synergist                     | 5              |
|       | d. Active & Passive insufficiency   |                |
|       | e. Range of muscle work, Angle of pull – with importance to efficiency of muscle work   |                |
|       | and stability of joint  |                |
|       | Classification of Movements   |                |
|       | a. Definition and classification  |                |
| 2     | b. Principles of movements  | 5              |
|       | c. Effects, uses and Techniques (active: assisted, free, assisted- resisted, resisted & |                |
|       | passive)  |                |
|       | Starting Positions & Derived Positions  |                |
| 3     | a. Application of stability   | 5              |
|       | b. BOS, Gravity and muscle work in relation to various positions                        |                |
|       | Therapeutic Gymnasium   |                |
| 4     | a. Use of therapy accessories such as Pulleys Springs, Shoulder wheel, Walking aids,    | 5              |
|       | Finger ladder, Therapeutic balls, Weights, Resistance bands, tubes, & wands             |                |
|       | b. Applied mechanics of all above accessories   |                |
|       | Assessment of Vital Parameters  | <u> </u>       |
|       | a. Blood Pressure   |                |
|       | b. Heart Rate/ Pulse rate   |                |
|       | c. Respiratory Rate   | 5              |
| 5     | d. Chest expansion  |                |
|       | e. Assessment of Reflex testing   |                |
|       | f. Limb Girth   |                |
|       | Goniometry- Diagnostic application for identification of movement dysfunction           |                |
|       | Overview of surface anatomy   |                |
|       | a. Bony land marks of skeletal systemReference points for identification of             |                |
|       | vertebral level, Carpal & Tarsal bone Land marks for identification of articular        |                |
| 6     | surface & peri- articular structures of joints  | 5              |
|       | b. Definition and Types of Goniometers  |                |
|       | c. Principles   |                |
|       | d. Techniques for individual joints with biomechanical principles Uses – upper          |                |
|       | quadrant  |                |
| 7     | Soft Tissue maneuvers   | 5              |

|   | Total   | 40 |

| Course Learning Outcomes   |  |  |  |  |
|--|--|--|--|--|
|  | At the end of the course, the candidate will be able to:   |  |  |  |
| CO 1 Explain various terms used in relation to biophysics, mechanics, biomechanics & kinesiology.  Explain the physics principles & Laws of Electricity, & Electro magnetic spectrum |  |  |  |  |
| CO 2   | Discuss effects of environmental &man made electromagnetic field at the cellular level & outline risk factors on prolonged exposure.   |  |  |  |
| CO 3   | CO 3 Describe the Main electrical supply, Electric shock, examine precautions to be taken for prevention of electric shock   |  |  |  |
| CO 4   | Identify and describe in brief, certain common electrical components such as transistors, valves, capacitors, transformers etc. & the simple instruments used to test / calibrate these components (such as potentiometer, oscilloscope, mustimeter) of the circuit; & identify such components. |  |  |  |

| Unit | Topics  | No. of<br>Hrs. |
|------|---|----------------|
| 1    | Basic Physics:  a. Structure of atom, Isotopes, States of matter; b. Compound formation- (covalent formation), c. Properties of Electric lines of forces  Biophysics- Mechanics & Application to human Body a. Definition and terminologies: Mechanics (Statics & Dynamics), Biomechanics, Kinetics, Kinematics (Osteo-kinematics, Arthrokinematics, Open Chain & Closed Chain kinematics) b. Axes /planes, c. Laws of inertia &motion, | 20             |

|    | Total  | 40 |  |  |

|     | Course Learning Outcomes   |  |
|-----|--|--|
| CO1 | describe ecosystem and its structural and functional aspects, examine                  |  |
|     | interconnectedness among all the biotic and abiotic components of environment and      |  |
|     | dynamic nature of ecological processes in maintaining equilibrium in nature.           |  |
| CO2 | List Earth's resources, their generation, extraction and impact of human activities on |  |
|     | earth's environment, to examine effective management strategies, and critical insight  |  |
|     | on major sustainability issues.  |  |

| Units | Topics  | No. of<br>Hrs. |
|-------|---|----------------|
|       | Unit 1: Introduction to environmental studies   |                |
| 1.    | Multidisciplinary nature of environmental studies; components of environment – atmosphere, hydrosphere, lithosphere and biosphere.        | 5              |
| 2.    | Scope and importance; Concept of sustainability and sustainable development.  |                |
|       | Unit 2: Ecosystems  |                |
| 3.    | Structure and function of ecosystem.  Energy flow in an ecosystem: food chain, Food web, Ecological succession.                           |                |
| 4.    | Energy flow in an ecosystem: food chain, Food web, Ecological succession.  Case studies of the following ecosystems:  a) Forest ecosystem |                |
|       | Unit 3: Natural Resources: Renewable and Non-renewable Resources  |                |
| 5.    | Land Resources and land use change; Land degradation, soil erosion and desertification.   | 10             |
| 6.    | Deforestation: Causes and impacts due to mining, dam building on environment, forests, biodiversity and tribal populations.               |                |

| 7.<br>8. | Water: Use and over-exploitation of surface and ground water, floods, droughts, conflicts over water (international & inter-state).  Heating of earth and circulation of air; air mass formation and precipitation | _  |
|----------|--|----|
| 9.       | Energy resources: Renewable and non-renewable energy sources, use of alternate energy sources, growing energy needs, case studies  |    |
|          | Total  | 20 |

### **Examination Scheme**

# This course will not be assessed as Semester University Examination. Evaluation will be conducted at level of the constituent unit.

#### Applicable for batch admitted in academic year 2019-2020

#### Theory question paper pattern for assessment under CBCS - 40 Marks

| Question type          | No. of questions | Marks/<br>question | Question X<br>marks | Total marks |
|------------------------|------------------|--------------------|---------------------|-------------|
|                        |                  |                    |                     |             |
| Section 1              |                  |                    |                     |             |
| Short answer questions | 8 out of 10      | 5                  | 8x5                 | 40          |
|                        | -                |                    |                     | Total= 40   |

#### **EXAMINATION SCHEME**

APLICABLE FOR BATCH ADMITTED FROM ACADEMIC YEAR 2020-2021 ONWARDS as per Resolution No 3.7 and 3.11 of AC 41/2021

### University Examination pattern (Theory):40 marks

| Question type          | No. of questions | Marks/<br>question | Question X<br>marks | Total marks |
|------------------------|------------------|--------------------|---------------------|-------------|
|                        |                  |                    |                     |             |
| Short answer questions | 8 out of 9       | 5                  | 8x5                 | 40          |
|                        |                  |                    |                     | Total= 40   |

### Mid-Semester Examination Pattern (Theory):20 marks

| Question type          | No. of questions | Marks/<br>question | Question X<br>marks | Total marks |
|------------------------|------------------|--------------------|---------------------|-------------|
|                        |                  |                    |                     |             |
| Short answer questions | 4 out of 5       | 5                  | 4x5                 | 20          |
|                        |                  |                    |                     | Total= 20   |

Internal assessment will be weighted out of 10 marks from internal examination

| Name of the Programme | Bachelor of Physiotherapy    |
|-----------------------|------------------------------|
| Name of the Course    | Basic Skills in patient care |
| Course Code           | BPTCLT001                    |
| Course Description    | Clinical Training            |
| Semester              | Semester I                   |
| Credits per semester  | 3 credits                    |
| Hours per semester    | 200 hours                    |

Students will be introduced to basic skills in patient care such as history taking, reading patient files and communication skills.

#### Internal examination pattern (practical): 40 marks

| Exercise | Description | Marks      |
|----------|-------------|------------|
| Q No 1   | Case 1      | 10         |
| Q No 2   | Case 2      | 10         |
|          |             | Total = 20 |

<sup>\*</sup>Students will be evaluated as per their level of knowledge level.

#### (EXAMINATION SCHEME

# APLICABLE FOR BATCH ADMITTED FROM ACADEMIC YEAR 2020-2021 ONWARDS as per Resolution No 3.7 and 3.11 of AC 41/2021

#### University examination pattern (practical): 40 marks

| Exercise | Description | Marks             |
|----------|-------------|-------------------|
| Q No 1   | Case 1      | 20                |
| Q No 2   | Case 2      | 20                |
|          |             | <b>Total</b> = 40 |

#### Internal examination pattern (practical): 20 marks

|      | Course Learning Outcomes: The student will be able to   |  |  |
|------|---|--|--|
| CO 1 | describe anatomy of lower quadrant including spine, pelvis and lower extremities: list bones, |  |  |
|      | joints, soft tissues, muscles related to musculoskeletal system of spine & lower extremities  |  |  |
|      | and to localize various surface land-marks, apply related                                     |  |  |
|      | radiological and living anatomy   |  |  |
| CO 2 | describe anatomy of structures of head, face and neck   |  |  |
| CO 3 | describe and outline various parts of nervous system: Source, course & components of          |  |  |
|      | various trans-sections of spinal tracts and C.N.S; Source, course & components of various     |  |  |
|      | trans-sections of brain, cranial nerves (Special emphasis to III, IV, V, VI & VII) &          |  |  |
|      | peripheral nerves.  |  |  |
| CO 4 | describe blood circulation of C.N.S. & spinal cord.   |  |  |
| CO 5 | describe the course of peripheral nerves.   |  |  |
| CO 6 | discuss anatomical basis of clinical conditions of nervous system.                            |  |  |
| CO 7 | demonstrate movements of lower extremity joints – Identify & describe the                     |  |  |
|      | origin/insertion, nerve /blood supply, root value & function of various skeletal muscles      |  |  |
|      | (including lower extremity and spine)   |  |  |

| Unit | Topics  | No. of<br>Hrs. |
|------|---|----------------|
|      | Musculoskeletal anatomy                                 | 1115.          |

| Long Answer Question (from units 1,3)     | 1 out of 2 | 10       | 1 x 10     | 40          |
|   |            |          |            | Total= 40   |

| Name of the Programme     | Bachelor of Physiotherapy (BPT) |
|---------------------------|---------------------------------|
|                           | Human Anatomy-II                |
| Name of the Course        |                                 |
|                           | Practical                       |
| Course Code               | BPT-008                         |
| <b>Course Description</b> | Core Practical                  |
| Semester                  | Semester II                     |
| Credit per Semester       | 2 credits                       |
| Hours per Semester        | 80 hours                        |

|      | Course Learning Outcomes: The student will be able to   |
|------|---|
| CO 1 | Identify and list bones, joints, soft tissues, muscles related to musculoskeletal system of spine & lower extremities and to localize various surface land-marks, apply related radiological and living anatomy                           |
| CO 2 | Identify structures of head, face and neck  |
| CO 3 | Identify source, course & components of various trans-sections of spinal tracts and C.N.S; Source, course & components of various trans-sections of brain, cranial nerves (Special emphasis to III, IV, V, VI & VII) & peripheral nerves. |
| CO 4 | demonstrate movements of lower extremity joints – Identify & describe the origin/insertion, nerve /blood supply, root value & function of various skeletal muscles (including lower extremity and spine), course of peripheral nerves     |

| Unit        | Topics  | No of<br>Hrs |
|-------------|---|--------------|
|             | Musculoskeletal anatomy   | 30           |
| 1           | Lower Quadrant: Inferior extremity & Spine – with Radiological & Living Anatomy |              |
|             | and Osteology   |              |
| 2           | Head, face and neck – with Radiological & Living Anatomy, Osteology             | 20           |
| 3           | Neuro anatomy   | 30           |
| Total Hours |   |              |

# Practical question paper pattern for University Semester Examination under CBCS - 80 marks

| Exercise | Description  | Marks        | Total = 80 |
|----------|--|--------------|------------|
| Q No 1   | Spots (lower limb, spine, neuroanatomy, head, neck, face)  | 2M x 10 = 20 | 20         |
| Q No 2   | OSPE 2 supervised stations (lower limb, spine anatomy) 2 unsupervised stations (neuroanatomy, head, neck and face anatomy) | 10 M x 4= 40 | 40         |
| Q No 3   | Viva   | 10           | 10         |
| Q No 4   | Journal  | 10 M         | 10         |

### **Internal Examination Pattern (Practical): 40 Marks**

| Description    | Marks |
|----------------|-------|
| Spots<br>/OSPE | 25    |
| Viva           | 10    |
| Journal        | 05    |
| Total          | 40    |

Internal Assessment marks will be weighted out of 20 marks, for theory and practical, respectively.

### Practical question paper pattern for University Semester Examination under CBCS - 80 marks

| Exercise | Description                               | Marks        |
|----------|---|--------------|
| Q No 1   | OSPE (4 stations- Central Nervous system) | 10 M x 4= 40 |
| Q No 2   | Spots                                     | 2 M x 10= 20 |
| Q No 3   | Viva                                      | 10           |
| Q No 4   | Journal                                   | 10           |
|          |   | Total = 80   |

## Internal Examination Pattern (Practical): 20 Marks (Examination pattern applicable for batch admitted in academic year 2019-2020)

| Exercise | Description         | Marks        |
|----------|---------------------|--------------|
| Q No 1   | OSPE (2 stations)   | 20 marks     |
| Q No 2   | Spots (4 x 5 marks) | 20 marks     |
| Total    |                     | Total = 40 M |

### Internal Assessment marks will be weighted out of 20 marks, for theory and practical, respectively

### Text Books same as for Human Physiology I

### RECOMMENDED TEXT BOOKS

- 1. Text book on Medical Physiology –Guyton
- 2. Textbook of Physiology A K Jain (for MBBS students)

### RECOMMENDED REFERENCE BOOKS

- 1. Review of Medical Physiology –Ganong
- 2. Samson & Wright's Applied Physiology
- 3. Textbook of Medical Physiology Bern and Levy

| Name of the Programme | Bachelor of Physiotherapy |  |
|-----------------------|---------------------------|--|

| Course Code           | BPT011                    |  |
| Course Description    | Core Theory               |  |
| Semester              | Semester II               |  |
| Credit per Semester   | 2 credits                 |  |
| Hours per Semester    | 40 hours                  |  |

| Course Learning Outcomes  |  |  |  |
|---|--|--|--|
|   | At the end of the course, the candidate will be able to:                                     |  |  |
|   | describe the physiological effects, therapeutic use, merits / demerits of soft tissue        |  |  |
| CO 1  | manipulations (massage), & demonstrate the skill of application of various manipulations &   |  |  |
|   | the limbs, face, back & abdomen  |  |  |
|   | describe types of Goniometry, methods of assessment of joint range of motion,                |  |  |
| CO 2  | measure range of motion of joints of lower extremity and spine by using                      |  |  |
| Goniometry  |  |  |  |
| CO 3 discuss physiological basis, principles, therapeutic use of relaxation & demonstra |  |  |  |
| CO 3  | various methods of relaxation  |  |  |
|   | demonstrate group & recreational activities, examining advantages and disadvantages of       |  |  |
| CO 4  | group exercises, general fitness exercises used in physical training, describe physiological |  |  |
| CO 4  | responses and principles of aerobic exercises for general                                    |  |  |
|   | fitness & demonstrate fitness skills on self/healthy people.                                 |  |  |

| Units | Topics   | No. of<br>Hrs. |
|-------|--|----------------|
| 1     | Goniometry- Diagnostic application for identification of movement dysfunction  a. Overview of surface anatomy b. Bony land marks of skeletal systemReference points for identification of vertebral level, Tarsal bone Land marks for identification of articular surface & peri- articular structures of lower extremity joints c. Revision of Definition and Types of Goniometers d. Principles e. Techniques for individual joints with biomechanical principles— Lower quadrant f. Assessment of Spinal mobility | 12             |
| 2     | Soft Tissue maneuvers  a. Types of maneuvers b. Physiological principles of each c. Therapeutic uses d. Indications and contraindications e. Pre-session preparation—Type of media used for manipulation ; Environment f. Starting positions — used for model as well as therapist. g. Skills on Lower limb, Abdomen and back.   | 8              |
| 3.    | Principles of General Fitness  a. Physiology of aerobic and anaerobic exercise. b. Components of fitness (definition of terms only) c. Warmup d. Cool down exercises  Group & recreational activities  | 8              |
| 4.    | <ul><li>a. Advantages and disadvantages</li><li>b. Basic principles of General fitness exercises for healthy</li><li>c. Need for fitness exercise for sedentary life</li></ul>   | 7              |
| 5.    | Relaxation  a. Principles, b. Techniques along with their effects &uses General – Jacobson's, Shavasana & Reciprocal ( Laura Mitchell ) Local- Heat, Massage, Gentle/Rhythmic passive movements  Total   | 5              |

| Name of the Programme | Bachelor of Physiotherapy |  |
|-----------------------|---------------------------|--|

### **Examination Scheme**

This course will not be assessed as Semester University Examination. Evaluation will be conducted at the level of the constituent unit.

Applicable for batch admitted in academic year 2019-2020

**Examination pattern (theory): 40marks** 

| Question type                  | No. of questions | Marks/question | Question X<br>marks | Total marks |
|--------------------------------|------------------|----------------|---------------------|-------------|
| Short answers (from units 1-6) | 8 out of 9       | 5              | 8 x 5               | 40          |

### **Examination pattern (practical): 40marks**

| Exercise  | Question X marks | Marks |
|-----------|------------------|-------|
| Station 1 | 1x10             | 10    |
| Station 2 | 1x10             | 10    |
| Station 3 | 1x10             | 10    |
| Station 4 | 1x10             | 10    |
| Total     |                  | 40    |

### APLICABLE FOR BATCH ADMITTED FROM ACADEMIC YEAR 2020-2021 ONWARDS as per Resolution No 3.7 and 3.11 of AC 41/2021

### End Semester University Examination pattern (Theory): 40marks

| Question type                  | No. of questions | Marks/question | Question X<br>marks | Total marks |
|--------------------------------|------------------|----------------|---------------------|-------------|
| Short answers (from units 1-6) | 8 out of 10      | 5              | 8 x 5               | 40          |

#### **End Semester University Examination pattern (Practical): 40marks**

| Exercise | Question X marks | Marks |
|----------|------------------|-------|
| Case 1   | 1x10             | 10    |
| Case 2   | 1x10             | 10    |
| Case3    | 1x10             | 10    |
| Case 4   | 1x10             | 10    |
| Total    |                  | 40    |

### Mid-Semester Examination Pattern (Theory): 20 marks

| Question type                  | No. of questions | Marks/question | Question X<br>marks | Total marks |
|--------------------------------|------------------|----------------|---------------------|-------------|
| Short answers (from units 1-6) | 4 out of 5       | 5              | 4 x 5               | 20          |

### Mid-Semester Examination Pattern (Practical): 20marks

| Exercise | Question X marks | Marks |
|----------|------------------|-------|
| Case 1   | 1x10             | 10    |
| Case 2   | 1x10             | 10    |
| Total    |                  | 20    |

### Internal assessment will be weighted out of 10 marks from internal examination

|                       | Course continued from Semester I             |

|     | Course Learning Outcomes   |  |  |  |  |
|-----|--|--|--|--|--|
| CO1 | Categorize different aspects of environmental contamination, which adversely             |  |  |  |  |
|     | affect human health, mechanisms of pollutants impacting human health, different          |  |  |  |  |
|     | types of pollutants, their sources and mitigation measures                               |  |  |  |  |
| CO2 | Outline the legal structure of India and fundamentals of environmental                   |  |  |  |  |
|     | legislation and policy making.   |  |  |  |  |
| CO3 | Identify environmental hazards, their causes, classifications, and impacts, management   |  |  |  |  |
|     | strategies and governmental action plan to mitigate and prepare for such hazards, global |  |  |  |  |
|     | changes on human communities and initiatives taken at                                    |  |  |  |  |
|     | global and regional levels to combat them.   |  |  |  |  |
| CO4 | Describe the multidisciplinary nature, components of environment, concept of             |  |  |  |  |
|     | sustainable development and structure and function of ecosystem.                         |  |  |  |  |
| CO5 | Plan strategies to conserve and protect the natural resources such as fuel, food,        |  |  |  |  |
|     | water, electricity at home and in the community and social environment                   |  |  |  |  |
| CO6 | Assess the impact of significant global environmental issues such as acid rain, climate  |  |  |  |  |
|     | change, and resource depletion; historical developments in cultural, social and economic |  |  |  |  |
|     | issues related to land, forest, and water management in a                                |  |  |  |  |
|     | global context; interface between environment and society.                               |  |  |  |  |

| Units | Topics   | No. of<br>Hrs. |
|-------|--|----------------|
|       | Unit 4: Environmental Pollution  |                |
| 1     | Environmental pollution: types, causes, effects and controls; Air, water, soil, chemical and noise pollution   |                |
| 2     | Solid waste management: Control measures of urban and industrial waste   | 5              |
| 3     | Nuclear hazards and human health risks   |                |
|       | Unit 5: Environmental Policies & Practices   |                |
| 1     | Climate change, global warming, ozone layer depletion, acid rain and impacts on human communities and agriculture.   |                |
| 2     | Environment Laws: Environment Protection Act; Air (Prevention & Control of Pollution) Act; Water (Prevention and control of Pollution) Act; Wildlife Protection Act; Forest Conservation Act; International agreements; Montreal and Kyoto protocols and conservation on Biological Diversity (CBD). The Chemical Weapons Convention(CWC). | 5              |
| 3     | Nature reserves, tribal population and rights, and human, wildlife conflicts in Indian context   |                |
|       | Unit 6: Human Communities and the Environment  |                |
| 1     | Human population and growth: Impacts on environment, human health and welfares.  |                |
| 2     | Carbon foot-print.   |                |
| 3     | Resettlement and rehabilitation of project affected persons; case studies.   |                |
| 4     | Disaster management: floods, earthquakes, cyclones and landslides.   | 10             |
| 5     | Environmental movements: Chipko, Silent valley, Bishnios of Rajasthan.   | 10             |
| 6     | Environmental ethics: Role of Indian and other religions and cultures in environmental conservation.   |                |
| 7     | Environmental communication and public awareness, case studies (e.g., CNG vehicles in Delhi).  |                |
|       | Practical Aspects : Field Visits   | 40             |
|       | Total  | 60             |

### Applicable to batch admitted in academic year 2019-2020

This course will not be assessed as Semester University Examination. Evaluation will beconducted at the level of the constituent unit.

Theory question paper pattern - 40 Marks

|                               | No. of     | Marks/   | Question X |             |
|-------------------------------|------------|----------|------------|-------------|
| Question type                 | questions  | question | marks      | Total marks |
| Short answers (from unit 1-6) | 8 out of 9 | 5        | 8 x 5      | 40          |
|                               |            |          |            |             |
| Total                         |            |          |            | Total= 40   |

Practical evaluation – Students will submit a field visit report which will be evaluated for 20 Marks

### **EXAMINATION SCHEME**

APLICABLE FOR BATCH ADMITTED FROM ACADEMIC YEAR 2020-2021 ONWARDS as per Resolution No 3.7 and 3.11 of AC 41/2021

**University Theory question paper pattern - 40 Marks** 

|               | No. of     | Marks/   | Question X |             |
|---------------|------------|----------|------------|-------------|
| Question type | questions  | question | marks      | Total marks |
| Short answers | 8 out of 9 | 5        | 8 x 5      | 40          |
|               |            |          |            |             |
| Total         |            |          |            | Total= 40   |

Practical evaluation – Students will submit a field visit report which will be evaluated out of 40 Marks

Mid-Semester Examination Pattern (Theory) - 20 Marks

|               | No. of     | Marks/q | Question X |             |
|---------------|------------|---------|------------|-------------|
| Question type | questions  | uestion | marks      | Total marks |
| Short answers | 4 out of 5 | 5       | 4 x 5      | 20          |
|               |            |         |            |             |
| Total         |            |         |            | Total= 20   |

### Mid Semester Practical evaluation – Students will submit a field visit report which will be evaluated out of 20 Marks

| Name of the Programme | Bachelor of Physiotherapy                      |
|-----------------------|--|
| Name of the Course    | Biochemistry                                   |
| Course Code           | AECC004  |
| Course Description    | Ability Enhancement Compulsory Course - Theory |
| Semester              | Semester II                                    |
| Credit per Semester   | 3 credits                                      |
| Hours per Semester    | 60 hours                                       |

|      | Course Outcomes  |  |  |  |  |
|------|--|--|--|--|--|
| CO 1 | describe carbohydrate, fat and protein metabolism, classification, digestion,      |  |  |  |  |
| COT  | absorption, regulation and clinical application                                    |  |  |  |  |
| CO 2 | define bio-enzymes, classify, factors affecting enzyme action and therapeutic uses |  |  |  |  |
|      | describe vitamins, minerals, hormones - classify, discuss manifestations of        |  |  |  |  |
|      | nutritional deficiency   |  |  |  |  |
| CO 3 | discuss normal levels in body fluids required for functioning and their abnormal   |  |  |  |  |
| CO 3 | levels to understand the disease process   |  |  |  |  |
| CO 4 | discuss biochemical mechanisms of muscle contraction and biochemistry of           |  |  |  |  |
| 0.04 | connective tissue  |  |  |  |  |
| CO 5 | describe functions of nucleic acids  |  |  |  |  |

| Unit | Topics   | No. of<br>Hrs. |
|------|--|----------------|
| 1    | Cell -Introduction, Cell structure, Cell membrane structure and function, various types of absorption. Intracellular organelles and their functions, briefly on cytoskeleton.  | 1              |
| 2    | <ul> <li>a. Definition, general classification with examples, Glycosidic bond</li> <li>b. Structures, composition, sources, properties and functions of Monosaccharides, Disaccharides, Oligosaccharides and Polysaccharides.</li> <li>c. Glycosaminoglycan(mucopolysaccharides)</li> <li>Carbohydrate metabolism</li> <li>a. Introduction, Glycolysis – Aerobic, Anaerobic Citric acid cycle, Substrate level phosphorylation.</li> <li>b. Glycogen metabolism – Glycogenesis, Glycogenolysis, Metabolic disorders glycogen, Gluconeogenesis, Coricycle</li> <li>c. Hormonal regulation of glucose, Glycosuria, Diabetes mellitus.</li> </ul> | 6              |

|   | Proteins  |   |
|---|---|---|
| 3 | <ul> <li>a. Amino acid chemistry: Definition, Classification, Peptide bonds</li> <li>b. Peptides: Definition, Biologically important peptides</li> <li>c. Protein chemistry: Definition, Classification, Functions of proteins,</li> <li>Protein metabolism</li> <li>a. Catabolism of amino acids -Introduction, transamination, deamination,</li> <li>Fate of ammonia, transport of ammonia, Urea cycle</li> <li>b. Specialized products formed from amino acids - from glycine, arginine,</li> <li>methionine, phenylalanine and tyrosine.</li> </ul> | 6 |
|   | <ul> <li>a. Definition, general classification</li> <li>b. Definition, classification, properties and functions of Fatty acids,<br/>Triacylglycerol, Phospholipids, Cholesterol</li> </ul>  |   |
| 4 | <ul> <li>c. Essential fatty acids and their importance</li> <li>d. Lipoproteins: Definition, classification, properties, Sources and function Ketone bodies</li> <li>Lipid Metabolism</li> <li>a. Introduction to lipid metabolism, Lipolysis, Oxidation of fatty acids -oxidation</li> </ul>   | 6 |
|   | of fatty acids,  b. Lipogenesis - Denovo synthesis of fatty acids, chain elongation, desaturation, triacylglycerol synthesis, fat metabolism in adipose tissues  c. Ketone body metabolism: Ketone body formation (ketogenesis), utilization (ketolysis), ketosis, Rothera's test.  |   |
|   | <ul> <li>d. Cholesterol metabolism: synthesis, degradation, cholesterol transport</li> <li>e. Hypercholesterolemia and its effects (atherosclerosis and coronary heart diseases)</li> <li>Hypocholesterolemia agents, Common hypolipoproteinemia, Fatty liver</li> </ul>  |   |
| 5 | Digestion and Absorption  General characteristics of digestion and absorption, Digestion and absorption of carbohydrates, proteins and lipids. Disorders of digestion and absorption – Lactose intolerance.   | 2 |
| 6 | Enzymes  Definition, Active site, Cofactor (Coenzyme, Activator), Proenzyme. Classification with examples, Factors effecting enzyme activity, Enzyme inhibition and significance, Isoenzymes, Diagnostic enzymology (clinical significance of enzymes)  | 4 |
| 7 | <ul> <li>Vitamins</li> <li>a. Definition, classification according to solubility,</li> <li>b. Individual vitamins - Sources, Coenzyme forms, functions, RDA, digestion, absorption and transport, deficiency and toxicity.</li> </ul>   | 4 |

|    | Minerals  |   |
|----|---|---|
| 8  | Definition, Sources, RDA, Digestion, absorption, transport, excretion, functions, disorder of Individual minerals - Calcium, phosphate, iron, Magnesium, fluoride, selenium, molybdenum, copper. Phosphate, calcium and iron in detail.   | 3 |
|    | Nutrition   |   |
| 9  | <ul> <li>a. Introduction, Importance of nutrition Calorific values, Respiratory quotient – Definition, and its significance Energy requirement of a person - Basal metabolic rate: Definition, Normal values, factor affecting BMR Special dynamic action of food.</li> <li>b. Physical activities - Energy expenditure for various activities. Calculation of energy requirement of person</li> <li>c. Balanced diet  i. Recommended dietary allowances  ii. Role of carbohydrates in diet: Digestible carbohydrates and dietary fibers</li> </ul> | 3 |
|    | <ul> <li>iii. Role of lipids in diet</li> <li>iv. Role of proteins in diet: Quality of proteins - Biological value, net protein utilization, Nutritional aspects of proteins-essential and non- essential amino acids. Nitrogen balance</li> </ul>  |   |
|    | v. Nutritional disorders.  Hormones   |   |
| 10 | Definition, classification, Mechanism of hormone action. Receptors, signal transduction, second messengers and cell function.   | 1 |
|    | Muscle Contraction and Connective Tissue  |   |
| 11 | Contractile elements in muscle, briefly on the process of muscle contraction, Energy for muscle contraction Connective Tissue- Introduction, various connective tissue proteins: Collagen, elastin - Structure and associated disorders. Glycoproteins, Proteoglycans.  | 2 |
|    | Nucleic Acid  |   |
| 12 | <ul> <li>a. Nucleotide chemistry: Nucleotide composition, functions of free nucleotides in body.</li> <li>b. Nucleic acid (DNA and RNA) chemistry: Difference between DNA and RNA, Structure of DNA (Watson and Crick model), Functions of DNA. Structure and functions of tRNA, rRNA,mRNA.</li> </ul>  | 1 |
|    | Acid-Base balance –   |   |
| 13 | Acids, bases and buffers, pH. Buffer systems of the body, bicarbonate buffer system Role of lungs and kidneys in acid base balance, Acid base imbalance.  Water and Electrolyte –Osmorality and role of aldosterone and ADH   | 1 |

|                                       | constituents in various diseases. (1 hour each= 7 hours)  |    |
|                                       | Case studies based on Relevance of blood and urine levels of various                                  |    |
|                                       | electrolytes  |    |
|                                       | 13. Water balance and imbalance and Interpretation of serum   |    |
|                                       | 12. Demonstrate the estimation of ABG analysis  |    |
|                                       | 11. Normal and abnormal constituents of urine   |    |
|                                       | 10. Demonstrate the estimation of Uric acid   |    |
| 14                                    | 9. Demonstrate the estimation of alkaline phosphatase   | 20 |
|                                       | 8. Demonstrate the estimation of SGOT and SGPT  |    |
|                                       | 7. Demonstrate the estimation of serum bilirubin  |    |
|                                       | 6. Demonstrate estimation of calcium and phosphorous  |    |
|                                       | 5. Demonstrate estimation of serum proteins, albumin and A: Gratio                                    |    |
|                                       | clearance   |    |
|                                       | 4. Demonstrate the estimation of serum creatinine and creatinine                                      |    |
|                                       | 3. Demonstrate the estimation of blood urea   |    |
|                                       | 2. Demonstrate the estimation of blood glucose  |    |
|                                       | anticoagulants.   |    |
|                                       | 1. Introduction to clinical biochemistry laboratory, blood collection and                             |    |
|                                       | Normal levels of blood and urine constituents(1 Hour each= 13 hours)                                  |    |
|                                       | and Bicarbonate. Liver function tests, Renal function tests.  |    |
|                                       | levels of Glucose, Urea, Uric acid, Creatinine, Calcium, Phosphates, pH                               |    |
|                                       | Clinical Biochemistry  a. Normal levels of blood and urine constituents, Relevance of blood and urine |    |

### Applicable to batch admitted in academic year 2019-2020

## This course will not be assessed as Semester University Examination. Evaluation will be conducted at level of the constituent unit

Theory question paper pattern for Internal Assessment under CBCS - 40 Marks

| Question type | No. of questions | Marks/q<br>uestion | Question X<br>marks | Total marks |
|---------------|------------------|--------------------|---------------------|-------------|
| Short answers | 8 out of 9       | 5                  | 8 x 5               | 40          |
|               |                  |                    |                     |             |
| Total         |                  |                    |                     | Total= 40   |

### **EXAMINATION SCHEME**

### APLICABLE FOR BATCH ADMITTED FROM ACADEMIC YEAR 2020-2021 ONWARDS as per Resolution No 3.7 and 3.11 of AC 41/2021

**University Theory question paper pattern - 40 Marks** 

| Question type | No. of questions | Marks/q<br>uestion | Question X<br>marks | Total marks |
|---------------|------------------|--------------------|---------------------|-------------|
| Short answers | 8 out of 9       | 5                  | 8 x 5               | 40          |
|               |                  |                    |                     |             |
| Total         |                  |                    |                     | Total= 40   |

### Mid-Semester Examination Pattern (Theory) - 20 Marks

|               | No. of     | Marks/q | Question X |             |
|---------------|------------|---------|------------|-------------|
| Question type | questions  | uestion | marks      | Total marks |
| Short answers | 4 out of 5 | 5       | 4 x 5      | 20          |
|               |            |         |            |             |
| Total         |            |         |            | Total= 20   |

Internal assessment will be weighted out of 10 marks.

### RECOMMENDED TEXT BOOKS

- 2. Vasudevan DM, Sreekumari S, Vaidyanathan K. Textbook of biochemistry for medical students. JP Medical Ltd;2013
- 3. Naik P. Essentials of Biochemistry (for Medical Students). JP Medical Ltd;2011.

### RECOMMENDED REFERENCE BOOK

1. Wood EJ. Harper's biochemistry 24th edition

| Name of the Programme | Bachelor of Physiotherapy    |
|-----------------------|------------------------------|
| Name of the Course    | Basic Skills in patient care |
| Course Code           | BPTCLT002                    |
| Course Description    | Clinical Training            |
| Semester              | Semester II                  |
| Credits per semester  | 2 credits                    |
| Hours per semester    | 160 hours                    |

## Students will be introduced to basic skills in patient care such as history taking, reading patient files and communication skills.

### Internal examination pattern (practical): 40 marks

| Exercise | Description    | Marks      |
|----------|----------------|------------|
| Q No 1   | OSPE Station 1 | 10         |
| Q No 2   | OSPE Station 2 | 10         |
|          |                | Total = 20 |

#### **EXAMINATION SCHEME**

### APLICABLE FOR BATCH ADMITTED FROM ACADEMIC YEAR 2020-2021 ONWARDS as per Resolution No 3.7 and 3.11 of AC 41/2021

### University examination pattern (practical): 40 marks

| Exercise | Description  | Marks      |
|----------|--------------|------------|
| Q No 1   | Short Case 1 | 20         |
| Q No 2   | Short Case 2 | 20         |
|          |              | Total = 40 |

### Internal examination pattern (practical): 20 marks

| Exercise | Description  | Marks      |
|----------|--------------|------------|
| Q No 1   | Short Case 1 | 10         |
| Q No 2   | Short Case 2 | 10         |
|          |              | Total = 20 |

Internal assessment will be weighted out of 10 marks from internal examination.

| Hours per Semester        | 60 hours                        |

|      | Course Learning Outcomes: The student will be able to                                 |
|------|---|
| CO 1 | explain principles of biophysics related to mechanics of movement / motion & apply    |
|      | these principles to biomechanics of human movement                                    |
| CO 2 | explain kinetics and kinematics of spine, joints of upper and lower extremities,      |
|      | Temporo- Mandibular joint and thoracic cage   |
| CO 3 | explain musculoskeletal movements during normal gait and Activities of Daily Living   |
| CO 4 | explain factors determining muscle action during normal gait and Activities of Daily  |
|      | Living  |
| CO 5 | explain factors influencing normal human posture [static & dynamic], postural control |
|      | mechanisms and postural deviations  |

| Unit | Topics   | Hours |
|------|--|-------|
| 1    | INTRODUCTION TO BIOMECHANICS:  |       |
|      | <ul> <li>a. Muscle Biomechanics <ol> <li>i. Elements of muscle structure – fiber, size, motor unit, length tension, arrangement &amp; number relationship</li> <li>ii. Classification of muscles</li> <li>iii. Mobility and Stability of muscles</li> <li>iv. Types of muscle contraction and factors affecting muscle function.</li> </ol> </li> <li>b. Joint Biomechanics <ol> <li>Basic principles of joint design</li> <li>Classification of joints</li> <li>Osteo-kinematics &amp; Arthro-kinematics</li> <li>Concave Convex Rule</li> <li>Joint function, kinetics &amp; kinematics</li> </ol> </li> </ul> | 5     |

| 2 | REGIONAL KINESIOLOGY   |    |
|---|--|----|
|   | <ul> <li>i. Vertebral Column</li> <li>ii. Thorax</li> <li>iii. Upper Quadrant - Shoulder Complex, Elbow joint, Wrist and Hand Complex</li> <li>iv. Lower Quadrant - Sacroiliac, Hip, Knee, Ankle-foot complex</li> <li>v. Temporo-mandibular joint</li> </ul>  | 35 |
| 3 | KINETICS AND KINEMATICS OF GAIT AND ADLS   |    |
|   | <ul> <li>a. Gait <ol> <li>i. Human locomotion</li> <li>ii. Subjective &amp; Objective evaluation</li> <li>iii. Gait cycle &amp; Measurable parameters</li> <li>(Step Length, Step Width, Stride Length, Foot Angle, Cadence)</li> <li>iv. Kin0etics and kinematics of gait</li> <li>v. Determinants of gait</li> </ol> </li> <li>b. Kinetics and kinematics of various Activities of daily living <ol> <li>i. Supine to Sitting, sitting to Standing, Squatting, Climbing up &amp;down</li> <li>ii. Lifting, Pulling, Pushing, Overhead activities,</li> <li>iii. Running, Jogging.</li> </ol> </li> </ul> | 10 |
| 4 | POSTURE  | 5  |
|   | <ol> <li>Definition</li> <li>Human posture – Changes from quadruped to biped</li> <li>Correct and faulty posture</li> <li>Postural patterns and Postural Mechanism</li> <li>Factors affecting posture</li> <li>Physiological deviations</li> <li>Analysis of all views</li> </ol>  |    |
| 5 | BALANCE, MOTOR CONTROL AND POSTURAL CONTROL  | 5  |
|   | <ul> <li>i. Motor Control</li> <li>ii. Postural Alignment &amp; Weight Distribution</li> <li>iii. Sensory Organization</li> <li>iv. C.N.S. Integration</li> <li>v. Motor Strategies</li> </ul>   | 60 |

| <b>Course Description</b> | Core Theory                     |
| Semester                  | Semester IV                     |
| Credit per Semester       | 2 credits                       |
| Hours per Semester        | 40 hours                        |

|       | Course Learning Outcomes: The student will be able to   |  |  |  |  |
|-------|---|--|--|--|--|
| CO 1  | describe the biophysical properties of connective tissue, explain effect of mechanical loading & factors which influence the muscle strength, & mobility of articular &periarticular soft tissues   |  |  |  |  |
| CO 2  | apply the biomechanical principles governing assessment methods of mobility and muscle strength   |  |  |  |  |
| CO 3  | acquire the skill of subjective and objective assessment of individual & group muscle strength testing  |  |  |  |  |
| CO 4  | discuss, compare and contrast various methods of muscle strengthening, merits and demerits, physiological effects, benefits, risks and hazards of various strengthening techniques  |  |  |  |  |
| CO5   | explain the physiological effects, therapeutic uses, merits / demerits of various land and water based(Hydrotherapy)exercise modes  |  |  |  |  |
| CO6   | prescribe home exercise programs  |  |  |  |  |
| CO 7  | discuss functional re-education techniques, principles of application of balance and coordination exercises, PNF, principles governing postural correction exercises and methods used for postural correction   |  |  |  |  |
| CO 8  | identify and describe walking aids and methods used for gait training while using various walking aids  |  |  |  |  |
| CO 9  | describe types of lung expansion therapy- breathing exercises, physiological effects, benefits, indications-contraindications, methods of breathing retraining and lung reexpansion therapy, respiratory PNF, thoracic expansion techniques, adjuncts used  |  |  |  |  |
| CO 10 | describe anatomy of broncho-pulmonary segments, surface anatomy of lung, methods used for maintaining lung hygiene viz postural drainage, autogenic drainage, active cycle of breathing techniques, principles governing, physiological effects, benefits, indications-contraindications, method of application, humidification and nebulization therapy, adjuncts used |  |  |  |  |

| Unit | Topics   | Hours |  |  |  |
|------|--|-------|--|--|--|
|      | BIOPHYSICS   |       |  |  |  |
|      | i. Biophysical Principles: Structures & Properties of connective and |       |  |  |  |
|      | non-connective tissues   |       |  |  |  |
|      | ii. Stretching:  |       |  |  |  |
|      | 1. Definition  |       |  |  |  |
| 1    | 2. Types   | 4     |  |  |  |
|      | 3. Assessment of muscle length and fascia around the joint           |       |  |  |  |
|      | 4. Principles of stretching  |       |  |  |  |
|      | 5. Techniques for all joints   |       |  |  |  |
|      | 6. Individual muscle stretching                                      |       |  |  |  |
|      | JOINT MOBILITY   |       |  |  |  |
|      | 1. Definition  |       |  |  |  |
|      | 2. Causes of limitation  |       |  |  |  |
|      | 3. Indication and contraindications                                  |       |  |  |  |
| 2    | 4. Principles  | 4     |  |  |  |
|      | 5. Techniques  |       |  |  |  |
|      | 6. Assessment methods  |       |  |  |  |
|      | 7. Individual joints mobility Exercises— Upper Limb, Lower           |       |  |  |  |
|      | Limb & Spine (Using active, assisted, passive                        |       |  |  |  |
|      | movements)   |       |  |  |  |
|      | MANUAL MUSCLE TESTING AND ASSESSMENT (SUBJECTIVE &                   |       |  |  |  |
|      | OBJECTIVE)   |       |  |  |  |
|      | 1. Principle   |       |  |  |  |
| 3    | 2. Trick movements   | 3     |  |  |  |
|      | 3. Group Muscle Testing  |       |  |  |  |
|      | 4. Individual Muscle testing – Upper & Lower Limbs, Trunk&           |       |  |  |  |
|      | Face   |       |  |  |  |
|      | MUSCLE STRENGTHENING   |       |  |  |  |
|      | 1. Concepts -Strength, Power, Endurance                              |       |  |  |  |
|      | 2. Factors influencing the Strength of normal muscle/                |       |  |  |  |
|      | hypertrophy, recruitment of motor units, change after the            |       |  |  |  |
|      | training, training with isometric, isotonic &Iso-kinetic muscle      |       |  |  |  |
| _    | contraction  | _     |  |  |  |
| 4    | 3. Principles: Overload, Intensity, Motivation, Learning,            | 5     |  |  |  |
|      | Duration, Frequency, Reversibility, Specificity,                     |       |  |  |  |
|      | Determinants  4. Methods a Subjective & Objective                    |       |  |  |  |
|      | 4. Methods: Subjective & Objective                                   |       |  |  |  |
|      | 5. Individual joint Strengthening Exercises Upper Limb,              |       |  |  |  |
|      | Lower Limb &Spine  |       |  |  |  |
|      | 6. Concepts- 1 RM, 10 RM &Dynamometry                                |       |  |  |  |
|      | 7. Progressive Resisted Exercise - Delorme, Zinoveiff,Mc             |       |  |  |  |

|     | queen protocols  |           |
|-----|--|-----------|

| Name of the Programme | Bachelor of Physiotherapy |  |
|-----------------------|---------------------------|--|
| Name of the Course    | Electro-diagnostics       |  |
| Course Code           | BPT024                    |  |
| Course Description    | Core Practical            |  |
| Semester              | Semester IV               |  |
| Credit per Semester   | 2 credits                 |  |
| Hours per Semester    | 80 hours                  |  |

| Course Learning Outcomes: : At the end of the course, the candidate will be able to |  |  |  |
|---|--|--|--|
|   | Cognitive  |  |  |
| CO 1  | describe structure and function of nerve and muscle as a base for understanding the electro-diagnostic assessment  |  |  |
| CO 2  | describe neuro physiology of muscle and effect of various therapeutic currents on nerve-muscle complex, use of Tests-Galvanic-Faradic test, Sensory, pain, vibration threshold, Strength duration curves, nerve conduction velocity, needle and surface electromyography |  |  |
| CO 3  | knowledge regarding advanced methods of electro diagnosis and its application in pediatric and adult neurological conditions   |  |  |
|   | Psychomotor  |  |  |
| CO 4  | apply skills of electro-diagnosis (SD Curve), observe needle and surface EMG and NCV studies and analyze test results  |  |  |
| CO 5  | interpretation and analysis of assessment and findings   |  |  |

| Unit | Topics   | No of<br>Hrs |
|------|--|--------------|
| 1    | <ul><li>a) Faradic Galvanic Test</li><li>b) S.D.C.</li><li>c) Sensory, pain, vibration threshold</li></ul> | 60           |
| 2    | a) N.C. V Studies  | 10           |

|      | f. Informed Consent Steps of documentation – Title to Scope of study |                |

|    | RESEARCH ETHICS   |     |  |  |
|----|---|-----|--|--|
|    | a. Importance of Ethics in Research   |     |  |  |
| 4  | b. Main ethical issues in human subjects research                             | 05  |  |  |
|    | c. Main ethical principles that govern research with human subjects           |     |  |  |
|    | d. Components of an ethically valid informed consent for research             |     |  |  |
|    | OVERVIEW OF STUDY DESIGNS   |     |  |  |
|    | a. Observational-   |     |  |  |
| 5  | i. Descriptive-Case study/ series, Cross sectional, Normative,                | 03  |  |  |
| 3  | Correlational   | 03  |  |  |
|    | ii. Analytical; case control, cohort  |     |  |  |
|    | b. Experimental- True & quasi experimental                                    |     |  |  |
|    | SAMPLING  |     |  |  |
|    | a. Random and non-random sampling.  |     |  |  |
| 6  | b. Various methods of sampling – simple random, stratified, systematic,       | 03  |  |  |
|    | cluster and multistage. Sampling and non-sampling errors and methods of       |     |  |  |
|    | minimizing these errors.  |     |  |  |
|    | BASIC PROBABILITY DISTRIBUTIONS AND SAMPLING                                  |     |  |  |
|    | DISTRIBUTIONS  Converted from backliffer and market lifter distribution       |     |  |  |
|    | a. Concept of probability and probability distribution.                       |     |  |  |
| 7  | b. Normal, Poisson and Binomial distributions, parameters and application.    | 02  |  |  |
|    | c. Concept of sampling distributions.   |     |  |  |
|    | d. Standard error and confidence intervals.                                   |     |  |  |
|    | e. Skewness and Kurtosis TESTS OF SIGNIFICANCE                                |     |  |  |
|    | a. Basics of testing of hypothesis – Null and alternate hypothesis, type I    |     |  |  |
|    | and type II errors, level of significance and power of the test, p value.     |     |  |  |
|    | b. Tests of significance (parametric) - t – test (paired and unpaired), Chi   |     |  |  |
| 8  | square test and test of proportion, one-way analysis of variance.             | 03  |  |  |
|    | c. Repeated measures analysis of variance.                                    |     |  |  |
|    | d. Tests of significance (non-parametric)-Mann-Whitney u test, Wilcoxon test, |     |  |  |
|    | e. Kruskal-Wallis analysis of variance. Friedman's analysis of variance.      |     |  |  |
|    | CORRELATION AND REGRESSION  |     |  |  |
| 9  | a. Simple correlation – Pearson's and Spearman's; testing the significance    | 01  |  |  |
|    | of correlation coefficient, linear and multiple regressions.                  |     |  |  |
|    | STATISTICAL DATA  |     |  |  |
|    | a Tabulation Calculation of central tendency and dispersion. Using            |     |  |  |
| 10 | software packages, Analysis, Presentation of data in diagrammatic &           | 03  |  |  |
|    | Graphic form  |     |  |  |
| 44 | RESEARCH REPORT   | 0.7 |  |  |
| 11 | a. Overview, Types and Publication  | 05  |  |  |
|    | Total   | 40  |  |  |

#### Applicable for batch admitted in academic year 2019-2020

|--|--|--|--|--|
| Cognitive  |  |  |  |  |
| At the end of the course, the candidate will be able to: |  |  |  |  |
| CO 1   | explain movement dysfunction and models used to evaluate function-   |  |  |  |
|  | ICICDH, ICF  |  |  |  |
| CO 2   | explain choice of appropriate tools/instruments of assessment in musculoskeletal, neurological and cardio-vascular and respiratory conditions  |  |  |  |
| CO 3   | explain principles of manipulative skills, neurotherapeutic skills and skills of cardiopulmonary care and resuscitation  |  |  |  |
| CO 4   | document evaluation of patient based on ICF model identifying structural impairments, functional impairments, participation, contextual factors, performance and capacity measurement  |  |  |  |
|  | Psychomotor  |  |  |  |
|  | At the end of the course, the candidate will be able to:   |  |  |  |
| CO 4   | apply evaluation methods to measure body functions related to tissue mechanics, apply sound biomechanical principles for appropriate handling techniques that is ensuring privacy, positioning of body parts to be treated,          |  |  |  |
| CO 5   | position of therapist, , manual techniques, lifting and transfer techniques apply evaluation methods to measure body function related to motor control affecting activity and participation, quality of life and independence        |  |  |  |
| CO 6   | apply skills of manual therapy musculoskeletal, neurotherapeutics and cardiovascular and respiratory skills on models (Laboratory work)  |  |  |  |
|  | Affective  |  |  |  |
| CO 7   | use ethical, safe, gender sensitive methods to evaluate and treat movement dysfunction   |  |  |  |
| CO 8   | demonstrate ability to execute ethical, evidence-based practices, deliver effective, environment-friendly, physiotherapy management techniques appropriate to patient's clinical condition within constraints of available resources |  |  |  |
| CO 9   | communicate with patients and their families/caregivers regarding the need and uses of various assessment techniques, inform risks and benefits of therapy   |  |  |  |

| Unit | Topics  | Hours |
|------|---|-------|
| 1    | Functional Diagnosis using International Classification of Function, Disability & Health (I.C.F.) (Applicable for all units mentioned below) and Treatment Techniques   | 3     |
| 2    | Special Tests Cervical Spine: Foraminal compression, Distraction, Shoulder depression, vertebral artery, Dizziness tests Shoulder: Yergason's, Speed's, Drop- Arm, Supraspinatus, Impingement, Anterior & Posterior Apprehension, Allen's, Adson's test. Elbow: Cozen's, Miller's, Tinel's sign Forearm, Wrist &Hand: Phalen's,Bunnel-Littler, Froment's sign Lumbar Spine: Schober's, SLR, Prone,Knee Bending, Slump. Sacro Iliac joint: Faber- Patrick's, Gaenslen, Gillet, March's test Hip: Nelaton's line, Bryant's triangle, Thomas, Ober's, Tripod sign, Trendlenburg sign Knee: Tests for collateral & cruciate ligaments (valgus, varus, Lachman, Drawer's, McMurray's, Fluctuation, Patellar tap, Q- angle, Clarke's test Ankle & Foot: Anterior Drawer, Talar Tilt, Homan's & Moses test | 4     |
| 3    | Response of soft tissues to trauma: Trigger points, Spasm, Ligament Sprains, Muscle Strains   | 1     |
| 4    | Basics in Manual Therapy with Clinical Reasoning: Assessment of Articular and extra-articular soft tissue status Contractile tissues, Non contractile tissues, Examination of joint integrity, Accessory movement, End feel Examination of musculoskeletal Dysfunction: Subjective examination, Objective examination, Special tests, Functional Diagnosis using ICF  | 2     |
| 5    | Basic principles, indications, contra indications of mobilization skill for joints and Soft tissues: Maitland, Mulligan, Kaltenborn, Mckenzie, Cyriax, Myofascial Release Technique, Muscle Energy Technique, Neural Tissue Mobilization (Neuro Dynamic Testing)  | 2     |
| 6    | Cardiorespiratory techniques: Vital parameters, Chest expansion, Symmetry of chest movement, Breath Holding Test, Breath Sounds, Rate of Perceived Exertion (R.P.E.), 6minute walk test, Auscultation, Breathing exercises, postural drainage, thoracic expansion, rib mobilization, Respiratory PNF  | 2     |
| 7    | Energy Systems & Exercise Physiology: Physiological response to immobility and activity. Aerobic & Anaerobic metabolisms  | 3     |
| 8    | Fitness & Health Screening for risk factors Body composition-B.M.I., use of skin fold calipers, Girth measurement Physical fitness: Flexibility, Strength, Endurance, Agility   | 3     |

| Physical Activity Readiness Questionnaire                                   |    |
|---|----|
| Screening for health and fitness in childhood, adulthood and geriatric grou | ıp |
| Quality of life   |    |
| Principles & components of exercise prescription for healthy                |    |
| Total   | 20 |
|   |    |

|                          | At the end of the course, the candidate will be able to:   |  |  |  |  |
| CO 4                     | apply evaluation methods to measure body functions related to tissue mechanics, applysound biomechanical principles for appropriate handling techniques that is ensuring privacy, positioning of body parts to be treated, position of therapist, , manual techniques, lifting and transfer techniques |  |  |  |  |
| CO 5                     | apply evaluation methods to measure body function related to motor control affecting activity and participation, quality of life and independence  |  |  |  |  |
| CO 6                     | apply skills of manual therapy musculoskeletal, neurotherapeutics and cardiovascular and respiratory skills on models (Laboratory work)  |  |  |  |  |
|                          | Affective  |  |  |  |  |
| CO 7                     | use ethical, safe, gender sensitive methods to evaluate and treat movement dysfunction   |  |  |  |  |
| CO 8                     | demonstrate ability to execute ethical, evidence-based practices, deliver effective, environment-friendly, physiotherapy management techniques appropriate to patient's clinical condition within constraints of available resources   |  |  |  |  |
| CO 9                     | communicate with patients and their families/caregivers regarding the need and uses of various assessment techniques, inform risks and benefits of therapy   |  |  |  |  |

| Unit | Topics  | Hours |
|------|---|-------|
| 1    | Musculoskeletal Assessment and management Soft tissue flexibility, Joint mobility, Muscle strength & Endurance, Trick movement, Sensations, Limb length, Abnormal posture, Gait deviations due to musculoskeletal dysfunction   | 4     |
| 2    | Special Tests Cervical Spine: Foraminal compression, Distraction, Shoulder depression, vertebral artery, Dizziness tests Shoulder: Yergason's, Speed's, Drop- Arm, Supraspinatus, Impingement, Anterior & Posterior Apprehension, Allen's, Adson's test. Elbow: Cozen's, Miller's, Tinel's sign Forearm, Wrist &Hand: Phalen's,Bunnel-Littler, Froment's sign Lumbar Spine: Schober's, SLR, Prone,Knee Bending, Slump. Sacro Iliac joint: Faber- Patrick's, Gaenslen, Gillet, March's test Hip: Nelaton"s line, Bryant"s triangle, Thomas, Ober"s, Tripod sign, Trendlenburg sign Knee: Tests for collateral & cruciate ligaments (valgus, varus, Lachman, Drawer's, McMurray's, Fluctuation, Patellar tap, Q- angle, Clarke's test Ankle & Foot: Anterior Drawer, Talar Tilt, Homan"s & Moses test | 4     |
| 3    | Response of soft tissues to trauma: Trigger points, Spasm, Ligament Sprains, Muscle Strains   | 2     |
| 5    | Basics in Manual Therapy and Applications with Clinical Reasoning: Assessment of Articular and extra-articular soft tissue status Contractile tissues, Non contractile tissues, Examination of joint integrity, Accessory movement, End feel Examination of musculoskeletal Dysfunction: Subjective examination, Objective examination, Special tests, Functional Diagnosis using ICF   | 4     |
| 6    | Assessment of Pain: Types of pain: Somatic, Somatic referred, Neurogenic, Visceral Subjective Assessment: Location, duration, progression, distribution, quality, diurnal variations, modifying factors, Severity, nature of pain, tissue irritability Objective Measurement & Documentation- Visual Analogue Scale (V.A.S), Numerical Rating Scale(N.R.S.), McGill"s modified questionnaire(including Body Charts)   | 2     |
| 7    | Basic principles, indications, contra indications of mobilization skill for joints and Soft tissues: Maitland, Mulligan, Kaltenborn, Mckenzie, Cyriax, Myofascial Release Technique, Muscle Energy Technique, Neural Tissue Mobilization (Neuro Dynamic Testing)  | 4     |
| 8    | Cardiorespiratory Assessment and management techniques: Vital parameters, Chest expansion, Symmetry of chest movement, Breath Holding Test, Breath Sounds, Rate of Perceived Exertion (R.P.E.), 6minute walk test, Auscultation, Breathing exercises, postural drainage, thoracic expansion, rib mobilization, Respiratory PNF  | 4     |

| 9  | Energy Systems & Exercise Physiology:   | 4  |
|----|---|----|
|    | Evaluation of Functional Capacity using sub maximal tests (Exercise Tolerance     |    |
|    | - Six Minutes Walk test)Theoretical bases of different protocols for maximal      |    |
|    | exercise testing  |    |
|    | (e.g.: Bruce Protocol, Modified Bruce Protocol, Balke)                            |    |
|    | Interpretation of reports – A.B.G., P.F.T., P.E.F.R., E.C.G (Normal &             |    |
|    | Variations due to Ischemia & Infarction), X-ray Chest, Biochemical Reports        |    |
|    | Ankle Brachial Index  |    |
|    | Tests for Peripheral Arterial & Venous circulation                                |    |
| 10 | Assessment of Fitness & Health  | 4  |
|    | Screening for risk factors  |    |
|    | Body composition-B.M.I., use of skin fold calipers, Girth measurement             |    |
|    | Physical fitness: Flexibility, Strength, Endurance, Agility                       |    |
|    | Physical Activity Readiness Questionnaire   |    |
|    | Screening for health and fitness in childhood, adulthood and geriatric group      |    |
|    | Quality of life   |    |
|    | Principles & components of exercise prescription for healthy                      |    |
| 11 | Neurological Assessment and Movement Dysfunction                                  | 4  |
|    | Higher functions, Cranial nerves, Sensations, sensory organization & body         |    |
|    | image, Joint mobility, Tone, Reflexes-Superficial & Deep, Voluntary control,      |    |
|    | Muscle Strength, Co-ordination, Balance, Endurance, Trick movements, Limb         |    |
|    | Length, Posture deviations, Gait deviations due to neurological dysfunction,      |    |
|    | Functional Diagnosis using I.C.F., Interpretation of Electro diagnostic findings, |    |
|    | routine Biochemical investigations  |    |
| 12 | Basics in Neuro Therapeutics Skills & Applications with Clinical reasoning-       | 4  |
|    | Principles, Technique & Indications for Application of Bobath, Neuro              |    |
|    | Developmental Technique, Rood's Technique, P.N.F., Brunnstrom,                    |    |
|    | Techniques of Motor Relearning Program (M.R.P.)                                   |    |
|    | Total   | 40 |
|    |   |    |

#### RECOMMENDED TEXT BOOKS

- 1. Orthopaedic Physical Examination–Magee
- 2. Clinical Electro Therapy Nelson Currier --- Appleton & Lange publication
- 3. Clinical Electromyography–Mishra
- 4. Therapeutic Exercises Colby & Kisner
- 5. Physical Rehabilitation, Assessment and treatment Susan BO's Sullivan
- 6. Neurological Examination John Patten

#### RECOMMENDED REFERENCE BOOKS

- 1. Maitland's book on Manual therapy,
- 2. Mobilisation of Extremities Kaltenborn
- 3. Clinical Electromyography–Kimura

#### Curriculum for Bachelor of Physiotherapy Program (BPT) BOS 63, AC 41-2021 2019-2020

- 4. Orthopaedic Physical therapy–Donnatelli
- 5. NAGS, SNAGS and MWMS Brian Mulligan
- 6. Exercise & Heart–Wenger
- 7. Exercise Physiology William D Mc'Ardle
- 8. Facilitation techniques based on NDT principles Lois Bly Allison Whiteside
- 9. Movement therapy in Hemiplegia–Brunnstrom
- 10. Cash textbook of Physiotherapy in neurological conditions –Patricia Downie
- 11. Physical Dysfunction Trombly Scoot
- 12. Infant Motor Development-Jan Piek
- 13. Neurology & Neurosurgery Illustrated (3<sup>rd</sup> edition)-Bone & Callander
- 14. Neuro-developmental Therapy—Janett Howle

#### **EXAMINATION SCHEME**

### **Internal examination pattern (practical): 40 marks**

| Exercise | Description    | Marks     |
|----------|----------------|-----------|
| Q No 1   | Exercise       | 15        |
| Q No 2   | 2 OSPE station | 20        |
| Q No 3   | Journal        | 5         |
|          |                | Total= 40 |

#### **EXAMINATION SCHEME**

## APLICABLE FOR BATCH ADMITTED FROM ACADEMIC YEAR 2020-2021 ONWARDS as per Resolution No 3.7 and 3.11 of AC 41/2021

#### University Examination Pattern (Practical): 80 marks

| Exercise | Description     | Marks     |
|----------|-----------------|-----------|

| Course Code         | BPT-032                   |  |
| Course Description  | Core Theory               |  |
| Credit per Semester | 3 credits                 |  |
| Hours per Semester  | 60 hours                  |  |

| Course Learning Outcomes |  |  |
|--------------------------|--|--|
|                          | At the end of the course, the candidate will be able to:   |  |
| CO 1                     | Explain the concept of health care, determinants of health, health care delivery systems and management issues in Health Services. |  |
| CO 2                     | explain National Health Care Policies  |  |
| CO 3                     | explain epidemiology of communicable, non-communicable, nutritional diseases   |  |
| CO 4                     | explain levels of health care services, hospital waste management, disaster management   |  |

| Unit. | Topics  | No. of<br>Hrs. |
|-------|---|----------------|
|       |   |                |
| 1.    | General Concepts & Determinants Of Health & Diseases:   | 08             |
|       | <ul> <li>National &amp; International Definition of Health, Role of Socio-Economic &amp; Cultural Environment in Health &amp; Disease.</li> <li>Epidemiology – Definition &amp; scope, uses with relevance to physiotherapy Environmental Hygiene including man &amp; his surrounding,</li> <li>Occupational &amp; Industrial hygiene, Village &amp; Town Sanitation, Bacteriology of Water, Milk, &amp; Food Hygiene.</li> </ul> |                |
| 2.    | National Dublic Health Administration   | 04             |
|       | National Public Health Administration   | ~ -            |
| 3.    | Healthcare Delivery System:   | 06             |
|       | <ul> <li>Healthcare Delivery System of India</li> <li>National Health Programs</li> <li>Role of W.H.O.</li> <li>Millennium Development Goals for all</li> </ul>   |                |
| 4.    | Primary Healthcare  | 04             |
|       | <ul> <li>Definition</li> <li>Principles</li> <li>Elements &amp; its application</li> </ul>  |                |

| 5.  | <ul> <li>Epidemiology of Socio-Economical &amp; Cultural Issues - related to morbidity in relation to the following vulnerable groups.</li> <li>Women: Pregnant and lactating women, maternal health (ANC, PNC, INC), peri-menopausal women's health: physical &amp;psychological</li> <li>Infants: (Low Birth Weight, Breast feeding, Complimentary feeding, IYCN, IMNCI Vaccine preventable diseases, Immunization programs, Infant and childhood mortality)</li> <li>Children: Child health, Growth monitoring under five clinic, ICDS, PEM</li> <li>School aged population health: Early detection and prevention of disabilities, behavioral problems</li> </ul> | 08 |
|-----|---|----|
| 6.  | Demography and Objectives of National Family Welfare Programs And<br>National Population Policy   | 04 |
| 7.  | Epidemiology of Communicable Diseases   | 06 |
|     | An over-view [including prevention & control] T.B., H.I.V., Leprosy, Vector borne diseases- Malaria / Filariasis / Dengue/ Chikungunya/ Japanese encephalitis/Covid 19/SARS/H1N1.   |    |
| 8.  | Epidemiology of Non Communicable Diseases:  |    |
|     | Diabetes Mellitus, Hypertension, Coronary Heart Disease / Obesity / Blindness/<br>Accidents /Stroke/ Cancer.  |    |
| 9.  | Epidemiology of Nutritional Diseases:   | 04 |
|     | Malnutrition, Nutritional disorders and National nutrition programmes, Osteomalacia, Rickets, Neuropathies due to Vitamin - deficiency, skeletal Deformities.   |    |
| 10. | Hospital Waste Management:  | 04 |
|     | Universal Safety Precautions, Immunization of health care providers including them vaccination.   |    |
| 11. | Introduction to Disaster Management   | 06 |
|     | Types of disaster- Natural, manmade, complex emergencies, pandemic emergencies  Aspects of disaster management- disaster prevention, disaster preparedness, disaster response/ relief, disaster recovery  |    |
|     | Total   | 60 |

## Theory question paper pattern for University Semester Examination under CBCS - 40 Marks

| Question type          | No. of questions | Marks/<br>Question | Question X<br>marks | Total marks |

| Short answers | 4 out of 5 | 5              | 4 x 5      | 20          |
| Total         |            |                |            | Total= 20   |

#### RECOMMENDED TEXT BOOKS

- 1. An Introduction to Sociology Sachdeva & Bhushan
- 2. Indian Social Problems -Madan, Vol-I-Madras
- 3. Preventive and social medicine- K. Park.
- 4. WHO guidelines

| Name of the Programme     | Bachelor of Physiotherapy             |
|---------------------------|---------------------------------------|
| Name of the Course        | 2D Motion Capture                     |
| Course Code               | GEC001                                |
| <b>Course Description</b> | Generic Elective Theory and Practical |
| Credit per Semester       | 2 credits                             |
| Hours per Semester        | 60 hours                              |

| Course Learning Outcomes |  |  |
|--------------------------|--|--|
|                          | At the end of the course, the candidate will be able to:   |  |
| CO 1                     | explain process of capture of photographs and videos using digital cameras   |  |
| CO 2                     | explain technical considerations- equipment, concept of composition, light, exposure, focus, alignment, depth of field, different types of photography, post photo processing, , identify bony landmarks, position reflective markers and capturing unobtrusive movement |  |
| CO 3                     | apply ethical considerations while capturing photographs of human participants, seeking written informed consent   |  |
| CO 4                     | capture photographs and videos of healthy participants while performing ADL, walking, exercise, running etc.   |  |
| CO 5                     | use software's for analysis of 2D motion capture, measure spatial-temporal variables, joint angles, measure inter tester ad intra tester reliability of data captured  |  |

| Units | Topics  | Hours |
|-------|---|-------|
| 1     | Introduction to Photography and videography   | 2     |
| 2     | Technical aspects of photography and videography- Photography Equipment: Camera, Lens, Tripods, Digital storage Camera settings: Shutter speed, Aperture, ISO, Camera modes, Flash, Metering, Color filters, Focus, Exposure, Composition, Depth of field Common camera settings to take sharp pictures Lighting: Natural vs Artificial light, Indoor vs Outdoor photography, Reflection Different types of photography: Portrait, Landscape, Macro, Motion Photography Representation of digital image: Resolution, Pixel Depth, Pixel Aspect Ratio, Image Compression, File Formats. Digital Output: Placing photos in other documents, Printers as output devices — Different types of Print, Proofing, Photo quality printing | 8     |
| 3     | Post photo processing: Digital Retouching & Image Enhancement, Image editing through image editing software like Adobe Photoshop – Adjustment of Brightness, Contrast, Tonal and Color Values, fixing blemishes, color correcting.  | 4     |
| 4     | Ethical considerations and informed consent   | 1     |
| 5     | Softwares used to analyse 2D motion capture   | 5     |
|       | Theory Total  | 20    |

|   | Topics (Practical)                 |    |
|---|------------------------------------|----|
| 1 | 2 D capture of ADL                 | 10 |
| 2 | 2D capture of gait                 | 10 |
| 3 | Inter and intra tester reliability | 20 |
|   | Practical Total                    | 40 |

#### Applicable for batch admitted in academic year 2019-2020

## This course will not be assessed as Semester University Examination. Assessment will be conducted at the constituent unit level

| Course Description    | Generic Elective Theory and Practical |
| Credit per Semester   | 2 credits                             |
| Hours per Semester    | 60 hours                              |

|   | Course Learning Outcomes  |  |  |  |  |
|---|---|--|--|--|--|
|   | At the end of the course, the candidate will be able to:  |  |  |  |  |
| CO 1 Explain steps involved in developing medical device from prototype designing final product development and testing related to the same in order to improve healthcare among patients and general population. |   |  |  |  |  |
| CO 2  | explain technology innovation, product development, project and business management, intellectual property, regulatory affairs, clinical needs, entrepreneurship, emerging trends, globalization, reimbursement, and public policy. |  |  |  |  |
| CO 3  | apply a repeatable process for identifying and characterizing a significant unmet health need and inventing and evaluating a new technology to address it.  |  |  |  |  |
| CO 4  | explain risks and challenges that are unique to medical device innovation and develop strategies for assessing and managing them.  Work effectively in a multidisciplinary team.  |  |  |  |  |

| Units | Topics  | Hours |
|-------|---|-------|
| 1     | Introduction to Medical DeviceInnovation  |       |
|       | Orientation to thecurriculum  |       |
|       | Approaches in Device Innovation   | 2     |
|       | • Futurescope   |       |
| 2     | Clinical Foundations of Medical Device Innovation   |       |
|       | <ul> <li>Identifying need for device innovation: A problem-solution based approach<br/>to understand unmet healthcareneeds</li> </ul> | 3     |
| 3     | Product Innovation and Development Management   |       |
|       | <ul> <li>Concept of prototype and designdevelopment</li> </ul>  |       |
|       | • Framework for conceptualization, design, development and the commercializationprocessformedicalproducts, with a survey of keysteps  | 4     |

|   | in innovation from an engineering and business perspective.  |    |
|---|--|----|
| 4 | <ul> <li>Quality, Regulatory, and Manufacturing Management</li> <li>Examine process validations, Good Laboratory Practice (GLP), Good Manufacturing Practice (GMP), appropriate management of Standard Operating Procedures (SOPs) and knowledge sharing across the valuechain.</li> </ul> | 4  |
| 5 | <ul> <li>Role of IPR in device innovation</li> <li>Understanding various policies and steps for safeguarding newlydesigned devices through filing of copyright andpatent</li> </ul>  | 4  |
| 6 | Technical Writing  • Develop the professional skills required to communicatetechnical information to a broad audience in an effective manner   | 3  |
|   | Theory Total   | 20 |
|   | Topics (Practical)   |    |
| 1 | <ul> <li>Visit to Healthcare centers</li> <li>Interviews, Surveys among clinicians to identifyproblem</li> </ul>   | 10 |
| 2 | Visit to Macro environment of Technology incubation centers:  • Understanding basics of mechanics, availability, functioning and cost of resources   | 10 |
| 3 | <ul> <li>Development of Product design</li> <li>Multi-disciplinary team building to develop prototype, work on fabrication, making of final product and plan forcommercialization</li> </ul>   | 20 |
|   | Practical Total  | 40 |

#### Applicable for batch admitted in 2019-2020

## This course will not be assessed as Semester University Examination. Assessment will be conducted at the constituent unit level

Theory question paper pattern for internal assessment under CBCS - 40 Marks

| Question type          | No. of questions | Marks/<br>question | Question X<br>marks | Total marks |
|------------------------|------------------|--------------------|---------------------|-------------|
|                        |                  |                    |                     |             |
| Short answer questions | 8 out of 10      | 5                  | 8x5                 | 40          |
|                        | Total            |                    |                     | 40          |

#### Internal examination pattern (practical): 20 marks

| Exercise | Description     | Marks |
|----------|-----------------|-------|
|          |                 |       |
| Q 1      | 2 OSPE stations | 20    |

#### **EXAMINATION SCHEME**

## APLICABLE FOR BATCH ADMITTED FROM ACADEMIC YEAR 2020-2021 ONWARDS as per Resolution No 3.7 and 3.11 of AC 41/2021

#### University Semester Examination (Theory) - 40 marks

| Question type          | No. of questions | Marks/<br>question | Question x marks | Total marks |
|------------------------|------------------|--------------------|------------------|-------------|
|                        |                  |                    |                  |             |
| Short answer questions | 8 out of 10      | 5                  | 8x5              | 40          |
|                        |                  |                    |                  |             |
|                        |                  |                    |                  | Total= 40   |

#### University examination pattern (practical): 40marks

| Exercise | Description                     | Marks      |
|----------|---------------------------------|------------|
| Q No 1   | Prototype protocol presentation | 40         |
|          |                                 | Total = 40 |

#### Curriculum for Bachelor of Physiotherapy Program (BPT) BOS 63, AC 41-2021 2019-2020

| Checklist for evaluation of prototype protocol presentation | Marks |
|---|-------|
| Statement of problem  | 10    |
| Market research   | 10    |
| Designing and validation the prototype                      | 20    |
| Total marks   | 40    |

### Mid Semester Examination Pattern (Theory) :20 marks

| Question type          | No. of questions | Marks / question | Question x<br>marks | Total marks |
|------------------------|------------------|------------------|---------------------|-------------|
| Section 1              |                  |                  |                     |             |
| Short answer questions | 4 out of 5       | 5                | 4x5                 | 20          |
|                        |                  |                  |                     | Total = 20  |

#### Mid Semester Examination Pattern (Practical): 20 marks

| Exercise | Description                  | Marks                    |
|----------|------------------------------|--------------------------|
| Q No 1   | Designing and preparation of | 20                       |
|          | prototype proposal           |                          |
|          |                              | <b>Total</b> = <b>20</b> |

### Internal assessment will be weighted out of 10 marks each for internal examination (theory and practical)

| Course Code               | BPT-039                         |
| <b>Course Description</b> | Core Practical                  |
| Credit per Semester       | 1 credit                        |
| Hours per Semester        | 40 hours                        |

| Course Learning Outcomes |  |  |  |  |
|--------------------------|--|--|--|--|
|                          | Cognitive  |  |  |  |
|                          | At the end of the course, the candidate will be able to:   |  |  |  |
| CO 1                     | explain physiology of aging process and its influence on physical function   |  |  |  |
| CO 2                     | apply measures to improve physical function of elderly   |  |  |  |
|                          | Psychomotor  |  |  |  |
| CO 3                     | identify contextual {e.g. environmental and psycho-social cultural} factors serving as risk factors responsible for dysfunction and morbidity related to elderly and describe strategies to combat dysfunction at community level. |  |  |  |
| CO 4                     | collaborate with other health professionals for effective service delivery & community satisfaction  |  |  |  |
| Affective                |  |  |  |  |
| CO 5                     | develop as an empathetic health professional, especially for individuals with no access to health care   |  |  |  |

| Sr. No | Topics                                   | Hours |
|--------|--|-------|
| 1      | Geriatric Conditions                     | 8     |
|        | 1. Osteoporosis                          |       |
|        | 2. Degenerative conditions               |       |
|        | 3. Alzheimer disease                     |       |
|        | 4. Dementia                              |       |
|        | 5. Parkinsonism                          |       |
|        | 6. Incontinence                          |       |
|        | 7. Chronic obstructive pulmonary disease |       |
|        | 8. Diabetes Mellitus                     |       |
|        | 9. Hypertension                          |       |
|        |  |       |
| 2      | Geriatric Assessment: WHO ICF model      | 8     |

|   | Assessment of Body Functions and Structures:  |    |
|---|---|----|
|   | <ul> <li>Anthropometric measurement, Vital sign assessment.</li> </ul>                |    |
|   | <ul> <li>Musculoskeletal assessment: Muscle strength and range of motion</li> </ul>   |    |
|   | assessment.   |    |
|   | <ul> <li>Neurological assessment: Cranial nerve examination, sensory &amp;</li> </ul> |    |
|   | coordination assessment, Four stage step test and star excursion test                 |    |
|   | Cardiopulmonary assessment: Pulmonary function test, Peak expiratory                  |    |
|   | flow rate, respiratory strength measurement and chest wall mobility                   |    |
|   | Cognitive assessment: Mini Mental Scale   |    |
|   | Activity limitation:  |    |
|   | • Sit to stand & Transfers: Arm Curl, 30 sec Chair-Stand test, Back-Scratch           |    |
|   | test and Chair Sit and Reach test   |    |
|   | Balance & Gait: Tinetti Performance-oriented Scale                                    |    |
|   | Aerobic endurance: Six-minute walk test or Two minutes' walk-in place                 |    |
|   | test  |    |
|   | Stair-climbing: Stair climb test  |    |
|   | Participation restriction:  |    |
|   | World Health Organization Quality of Life instrument(WHOQoL),                         |    |
|   | Geriatric Depression scale and Barthel Index.   |    |
|   | Falls Assessment, Management and Prevention in Elderly                                |    |
|   | 1. Epidemiology of falls  |    |
| 3 | 2. Consequences of falls  | 6  |
|   | 3. Risk factors of falls  |    |
|   | 4. Fall prevention and Management   |    |
|   | Role of Physiotherapy in Geriatric Care   |    |
| 4 | Institutionalized & Community dwelling elders, Hospital based care, Half way          | 6  |
|   | homes   |    |
|   | NGO"s and Health related Legal rights and benefits for the elderly.                   |    |
|   | 7. National policy for senior citizen   |    |
|   | 8. National old age pension schemes   |    |
| 5 | 9. Insurance scheme   | 4  |
|   | 10. Jan Arogya  |    |
|   | 11. National council for older person   |    |
|   | 12. Annapurna policy  |    |
| 6 | Senior citizens in India  | 4  |
| 7 | Geriatric Assessment and treatment methods  | 4  |
|   | TOTAL HOURS   | 40 |

#### Applicable for batch admitted in academic year 2019-2020

# This course will not be assessed as Semester University Examination. Assessment will be conducted at constituent unit level

Internal examination pattern (practical): 20 marks

| Exercise | Exercise Description |           |
|----------|----------------------|-----------|
| Q No 1   | OSPE Station 1       | 20        |
|          |                      | Total= 20 |

#### **EXAMINATION SCHEME**

# APLICABLE FOR BATCH ADMITTED FROM ACADEMIC YEAR 2020-2021 ONWARDS as per Resolution No 3.7 and 3.11 of AC 41/2021

#### University examination pattern (practical): 40 marks

| Exercise | Description       | Marks     |
|----------|-------------------|-----------|
| Q No 1   | Case              | 20        |
| Q No 2   | OSPE Stations (2) | 20        |
|          |                   | Total= 40 |

#### Mid Semester Examination Pattern (Practical): 20 marks

| Exercise | Description              | Marks     |
|----------|--------------------------|-----------|
| Q No 1   | Case                     | 10        |
| Q No 2   | Q No 2 OSPE Stations (2) |           |
|          |                          | Total= 20 |

Internal assessment will be weighted out of 10 marks each for internal examination (practical)

- World Health Organization 2001. The International Classification of Functioning, Disability and Health (ICF). Geneva: WHO.http://www.who.int/classifications/icf/en/
- 2. Advanced Fitness Assessment and Exercise Prescription- Vivian. H.Heyward.
- 3. Physical Rehabilitation-Susan B O'Sullivan, Thomas. J.Schmitz
- 4. Geriatric Physical therapy- Andrew A.Guccione

| Name of the Programme | Bachelor of Physiotherapy                    |  |  |

| Course Learning Outcomes |  |  |  |
|--------------------------|--|--|--|
|                          | Cognitive  |  |  |
|                          | At the end of the course, the candidate will be able to:   |  |  |
| CO 1                     | formulate clinical research questions and refine them  |  |  |
| CO 2                     | explain the source of evidence and learn how to find out relevant evidence   |  |  |
| CO 3                     | establish authenticity of evidence   |  |  |
| CO 4                     | critically evaluate scientific studies on assessment tools and interventions/diagnostic /prognostic research studies         |  |  |
| CO 5                     | communicate with other clinicians about the evidence for best physiotherapy practice with consideration of patient's opinion |  |  |
| CO 6                     | implement the practice for the right purpose and in an appropriate time  |  |  |

| Sr.<br>No. | Topics  |   |
|------------|---|---|
| 1          | Introduction to Evidence Based Physiotherapy Definition, background, importance, model of Evidence Based Physiotherapy, role of   | 2 |
|            | evidence based practitioner   |   |
| 2          | Methods of forming clinical research questions and searching evidence Techniques of creating research/clinical questions, Strategies for searching evidence   | 2 |
| 3          | Exploring different terminologies Validity, reliability, Randomized Control Trial, Systemic Review, Meta-Analysis, Case Study, Diagnostic research study, Prognostic Research study, Intervention research study, etc.  | 2 |
| 4          | Analyze evidence about diagnostic test Diagnostic test and process in physiotherapy, appraise the quality of the studies, result of the studies, technique of pull out the summary of the studies and communicate with intra and inter professional for final clinical conclusion | 2 |
| 5          | Analyze evidence about prognosis  Concept of prognosis, research design relevant to prognostic studies, process of knowing the quality of study and method of discussion with other professional and physiotherapist to draw the summary for final clinical decision              | 2 |

|    | Total  | 20 |
|----|--|----|
| 10 | Evidence Based Physiotherapy and its Implementation  Economy, access to the source, population, ethical guideline in physiotherapy, recent clinical guideline for physiotherapy practice, applicability and authenticity of guidelines, clinically appraise them and draw the final conclusion, Knowing the right tract, appropriate time ,population, conditions, continue to provide quality of service                        | 2  |
| 9  | Patient review Process of feedback taking, knowing patient's expectations, making practical judgement for clinical decision  | 2  |
| 8  | Analyze evidence about systemic reviews and other research design  Overview of systemic review, stages and techniques involve in it, procedure to critically appraise it and extract the terminal results to make valid and relevant clinical decision, Introduction to case study and qualitative research, evaluating the robustness and fragility of the studies, methods of concise the studies to conclude clinical opinion | 2  |
| 7  | Analyze evidence about intervention  Concept of various types of intervention in physiotherapy, Research design related to intervention studies, know the strength and weakness of the study, method of discussion with other professional and physiotherapist, produce condensed zest to draw the clinical conclusion.  | 2  |
| 6  | Analyze evidence about outcome measure  Elements of outcome measure, method of knowing validity and reliability, take out the outline from the studies and method of interacting with other professional and physiotherapist for clinical reasoning and decision making  | 2  |

| Semester                    | Semester VI  |  |
| Credits per semester        | 2 credits  |  |
| Hours per semester          | 60 hours   |  |

| Course Learning Outcomes |   |  |  |
|--------------------------|---|--|--|
|                          | Cognitive   |  |  |
|                          | At the end of the course, the candidate will be able to:  |  |  |
| CO 1                     | describe biomechanics of connective tissue, laws governing forces, study of kinematics and kinetics, clinical and instrumented testing methods used to identify biomechanical impairments, muscle activity and postural control during motion |  |  |
| CO 2                     | describe impairments related to biomechanical alterations in conditions such as shoulder dysfunction, knee osteoarthritis and low back pain   |  |  |
| CO 3                     | describe gait deviations  |  |  |
|                          | Psychomotor   |  |  |
| CO 3                     | apply clinical and instrumented testing methods to measure kinematics and muscle action, identify altered biomechanics using clinical tests, 2D motion analysis, superficial EMG  |  |  |
| CO 4                     | analyze primary impairment and prescribe corrective strategies  |  |  |

| Unit | Topics  | No. of<br>Hrs. |
|------|---|----------------|
| 1    | Basic Biomechanics: Forces, Equilibrium, levers – laws – mechanical advantage, Material properties of bones and soft tissues. Gravity, balance & equilibrium  | 2              |
| 2    | Biophysics of ligament, Cartilage, tendon, muscle, neural tissues, response to mechanical loading Material properties of bones, tendons and ligaments:  Viscoelasticity, elastic properties, Stress, Strain, force and torque, moment and moment arm, muscle length tension relationships, factors affecting force production | 2              |
| 3    | <ul> <li>Muscular System</li> <li>Muscle Fibre arrangement</li> <li>Functional Characteristics of Muscle Tissue</li> <li>Length-Tension Relationship in Muscle Tissue</li> <li>Types of Muscle Contraction affecting force production</li> <li>Angle of Pull</li> <li>Kinetic Chains</li> <li>Surface EMG</li> </ul>          | 2              |

| 4   | Kinematics related to dysfunction of shoulder, knee and lumbar spine  | 6  |
|---|---|----|
| 5   | Kinetics  a. Anatomical structures that can produce internal forces and moments  b. Internal forces and moments around joints  c. Concentric versus eccentric muscle actions  d. Elasticity of muscles  e. Net joint moment and power during walking  f. Quantitative gait analysis | 4  |
| 6   | Activity limitations and participation restriction to common activities like gait, sit to stand, squatting, staircase ascent and descent, cross leg sitting   | 4  |
| <b>Practical:</b> Surface anatomy landmarks, ROM assessment, posture and gait analysis, measurement techniques of Spatiotemporal parameters, 2 D motion analysis for gait and functional movements, calculation of moment arm, clinical case presentations emphasizing on screening of muscular, neural and biomechanical impairments |   |    |
|   | Total   | 60 |

## **Examination Scheme**

#### Applicable to batch admitted in academic year 2019-2020

# This course will not be assessed as Semester University Examination. Assessment will be conducted at constituent unit level

Theory question paper pattern for internal assessment under CBCS - 40 Marks

| Question type          | No. of questions | Marks/<br>question | Question X<br>marks | Total marks |
|------------------------|------------------|--------------------|---------------------|-------------|
|                        |                  |                    |                     |             |
| Section 1              |                  |                    |                     |             |
| Short answer questions | 8 out of 10      | 5                  | 8x5                 | 40          |
| Total                  |                  |                    |                     | 40          |

#### **Internal examination pattern (practical): 20 marks**

| Exercise | Description    | Marks     |
|----------|----------------|-----------|
| Q No 1   | OSPE Station 1 | 20        |
|          |                | Total= 20 |

# APLICABLE FOR BATCH ADMITTED FROM ACADEMIC YEAR 2020-2021 ONWARDS as per Resolution No 3.7 and 3.11 of AC 41/2021

#### Theory question paper pattern for University Semester Examination under CBCS - 40 marks

| Question type          | No. of questions | Marks/<br>question | Question x<br>marks | Total marks |

| Hours per Semester    | 60 hours                               |

|      | Course Learning Outcomes: The student will be able to   |
|------|---|
|      | Cognitive   |
| CO 1 | Identify, evaluate, analyze & discuss primary and secondary musculo-skeletal dysfunction related to upper quadrant and cervical-thoracic spine, based on biomechanical, kinesiological & patho-physiological principles using ICF model.  |
| CO 2 | Correlate impairments with radiological, electrophysiological, biochemical/hematological investigations as applicable & arrive at the appropriate Physiotherapy diagnosis with skillful evaluation of structure and function with clinical reasoning for upper quadrant and cervical spine dysfunction.   |
| CO 3 | Understand the pharmaco-therapeutics, its interaction with physiotherapeutic measures and modify physiotherapeutic intervention appropriately   |
| CO 4 | Apply knowledge of psychosocial factors (personal and environmental factors in the context of disability associated with the musculo-skeletal system or multiple body systems) for behavioral and lifestyle modification and use appropriate training and coping strategies.  |
|      | Psychomotor   |
| CO 5 | Evaluation of mental and cognitive function including depression, anxiety, attitudes and beliefs. Apply theoretical basis of physiological effects, indications, contraindications; and best available evidence on the effectiveness, efficacy and safe application guidelines for a full range of physiotherapeutic strategies and interventions, including appropriate modes of soft tissue & joint mobilization, electrotherapy, therapeutic exercise, appropriate ergonomic advise, self-management techniques and home exercise that can be employed to manage problems of the individuals upper quadrant and cervical spine structures, functions, activities & participation, capacity and performance levels associated with the musculo-skeletal system, for relief of pain & prevention, restorationand rehabilitation measures for maximum possible functional independence at home, workplace and in community. |
| CO6  | Prescribe and train for appropriate upper quadrant and cervical-thoracic spine orthoses, prostheses and assistive devices based on musculoskeletal dysfunction  |

|       | Affective   |
|-------|---|
| CO7   | Acquire ethical skills by demonstrating safe, respectful and effective performance of     |
|       | physical handling techniques taking into account the patients clinical condition, the     |
|       | need for privacy, the physiotherapist, the resources available and the environment.       |
| CO 8  | Demonstrate communication and behavioral skills underpinned by humanitarian               |
|       | approach while interacting with patients, relatives, health care team members, co-        |
|       | professionals and society at large.   |
| CO 9  | List patients' questions, their understanding of condition and treatment options, their   |
|       | views, concerns, values, preferences and extent to which patients want to be involved in  |
|       | decision-making regarding their care and treatment. ( attitudes and beliefs)              |
| CO 10 | Examine Bioethical and legal issues in patient care, obtain informed consent,             |
|       | demonstrating community responsibility, good communication skills and socio-cultural      |
|       | competency  |
| CO 11 | Respond to patients concerns and preferences, and respect the rights of patients to reach |
|       | decisions with their doctor about their treatment and care and to refuse or limit         |
|       | treatment.  |
| CO 12 | Communicate clearly, sensitively and effectively with patients, caregivers, and           |
|       | colleagues from the medical and other professions, by listening, sharing and responding   |

| Unit | Topics  | Hours |
|------|---|-------|
| 1    | Manifestations of trauma and their complications  | 15    |
|      | a. Bones – fractures & fracture-dislocations of upper extremities & cervical-thoracic spine and their complications &management.  |       |
|      | <ul> <li>b. Soft tissues injuries of upper extremities &amp; cervical-thoracic spine and their complications &amp; management, contused lacerated wounds (CLWs) Burns complications and management, Crush injuries and its conservative and post-surgical management.</li> <li>c. Cumulative trauma disorders- Tennis elbow, carpal tunnel syndrome, tendinopathies.</li> </ul> |       |
| 2    | Degenerative Arthritis with associated conditions   | 10    |
|      | Physiotherapy management of common shoulder, degenerative conditions of cervical Spine - Spondylosis, Spondylolysis, Spondylolisthesis, and Spinal Canal Stenosis, Cord compression syndrome  |       |
| 3    | Inflammatory conditions   | 5     |

|    | a. Arthritis (including seronegative) – Rheumatoid arthritis, Gout, Septic arthritis   |    |
|----|--|----|
|    | b. Cellulitis and its complications.   |    |
|    | c. Post incisional inflammation and infection.   |    |
| 4  | Infectious Diseases of bones & joints of upper extremity and cervical-<br>thoracic spine- Osteomyelitis, Tuberculosis  | 2  |
| 5  | Metabolic & Hormonal Disorders – Osteoporosis, Osteomalacia  | 5  |
| 6  | Congenital & Acquired Deformities of upper extremity and cervical - thoracic spine- cervical rib, kyphosis, sprengel's shoulder, cubitus varus/valgus  | 5  |
| 7  | Peripheral Nerve Injuries & Plexus Injuries of upper extremity and Brachial plexus - Complications & Management  | 5  |
| 8  | Soft tissue injuries during sports and as a result of over-use of upper extremity and cervical-thoracic spine - Conservative and Operative management  | 3  |
| 9  | Vascular disorders affecting musculoskeletal system- Volkmann's ischemic contracture, Complex Regional Pain Syndrome, Compartment syndrome, Vertigo. Thoracic outlet syndrome, Vertebrobasilar artery syndrome | 5  |
| 10 | Traumatic Amputation of upper extremity  Types, Complications and management inclusive of prosthetic prescription & training   | 5  |
|    | Total  | 60 |

Theory question paper pattern for University Semester Examination under CBCS - 80 Marks

| Question type          | No. of questions | Marks/<br>question | Question X<br>marks | Total marks |
|------------------------|------------------|--------------------|---------------------|-------------|
| Section 1              |                  |                    |                     |             |
| Short answer questions | 8 out of 10      | 5                  | 8x5                 | 40          |
| Section 2              |                  |                    |                     |             |
| Long answer question   | 4 out of 5       | 10                 | 4 x 10              | 40          |
|                        |                  |                    |                     | Total= 80   |

#### Internal examination pattern (theory): 40marks

|               | No. of     |                | Question X |             |
|---------------|------------|----------------|------------|-------------|
| Question type | questions  | Marks/question | marks      | Total marks |
| Short answers | 4 out of 5 | 5              | 4 x 5      | 20          |
| Long answers  | 2 out of 3 | 10             | 2 x 10     | 20          |
| Total         |            |                |            | Total= 40   |

#### RECOMMENDED TEXT BOOKS

- 1. Therapeutic Exercise –O'Sullivan
- 2. Orthopaedic Physical Therapy -Donatelli
- 3. Cash's Textbook of Orthopedics & Rheumatology for Physiotherapists
- 4. Tidy's Physical Therapy
- 5. Manual Mobilization of Extremity Joints -Kaltenborn
- 6. Therapeutic Exercise: Foundations and Techniques Kolby & Carolyn Kisner
- 7. Physical Rehabilitation Susan O'sullivan

#### RECOMMEMDED REFERENCE BOOKS

- 1. Manual Therapy: Nags, Snags, MWMs, etc 6th Edition Brian Mulligan
- 2. Maitland's Peripheral Manipulation Elly Hengeveld
- 3. Neural tissue mobilization –Butler
- 4. Brukner& Khan's Clinical Sports Medicine Peter Brukner, Karim Khan (Mcgraw Medical)
- 5. Therapeutic Exercise: Moving Toward Function Carrie M. Hall, Lori Thein Brody
- 6. Manual Mobilization of Extremity Joints-Kaltenborn
- 7. Neural Tissue Mobilization -Butler
- 8. Taping Techniques –Rose MacDonald
- 9. Clinical Orthopaedic rehabilitation- Broadsman

| Name of the Programme | Bachelor of Physiotherapy (BPT)           |
|-----------------------|---|
| Name of the Course    | Musculoskeletal Physiotherapy I Practical |
| Course Code           | BPT 043                                   |
| Course Description    | Core Practical                            |
| Credit per Semester   | 1 Credit                                  |
| Hours per Semester    | 40 hours                                  |

| Course Learning Outcomes: The student will be able to |  |  |  |  |
|---|--|--|--|--|
|   | Cognitive  |  |  |  |
| CO 1  | Identify, evaluate, analyze & discuss primary and secondary musculo-skeletal               |  |  |  |
|   | dysfunction related to upper quadrant and cervical-thoracic spine, based on                |  |  |  |
|   | biomechanical, kinesiological & patho-physiological principles using ICF model.            |  |  |  |
| CO 2  | Correlate impairments with radiological, electrophysiological, biochemical/                |  |  |  |
|   | haematological investigations as applicable & arrive at the appropriate Physiotherapy      |  |  |  |
|   | diagnosis with skilful evaluation of structure and function with clinical reasoning for    |  |  |  |
|   | upper quadrant and cervical spine dysfunction.   |  |  |  |
| CO 3  | Understand the pharmaco-therapeutics, its interaction with physiotherapeutic measures      |  |  |  |
|   | and modify physiotherapeutic intervention appropriately                                    |  |  |  |
| CO 4  | Apply knowledge of psychosocial factors (personal and environmental factors in the         |  |  |  |
|   | context of disability associated with the musculo-skeletal system or multiple body         |  |  |  |
|   | systems) for behavioral and lifestyle modification and use appropriate training and        |  |  |  |
|   | coping strategies.   |  |  |  |
|   | Psychomotor  |  |  |  |
| CO 5  | Evaluation of mental and cognitive function including depression, anxiety, attitudes and   |  |  |  |
|   | beliefs. Apply theoretical basis of physiological effects, indications, contraindications; |  |  |  |
|   | and best available evidence on the effectiveness, efficacy and safe application guidelines |  |  |  |
|   | for a full range of physiotherapeutic strategies and interventions, including appropriate  |  |  |  |
|   | modes of soft tissue & joint mobilization, electrotherapy, therapeutic exercise,           |  |  |  |
|   | appropriate ergonomic advise, self-management techniques and home exercise that can        |  |  |  |
|   | be employed to manage problems of the individuals upper quadrant and cervical spine        |  |  |  |
|   | structures, functions, activities & participation, capacity and performance levels         |  |  |  |
|   | associated with the musculo-skeletal system, for relief of pain &                          |  |  |  |
|   | prevention,restorationandrehabilitationmeasuresformaximumpossiblefunctional                |  |  |  |
|   | independence at home, workplace and in community.  |  |  |  |
| CO6   | Prescribe and train for appropriate upper quadrant and cervical-thoracic spine orthoses,   |  |  |  |
|   | prostheses and assistive devices based on musculoskeletal dysfunction                      |  |  |  |
|   |  |  |  |  |

|       | Affective   |  |
|-------|---|--|
| CO7   | Acquire ethical skills by demonstrating safe, respectful and effective performance of     |  |
|       | physical handling techniques taking into account the patients clinical condition, the     |  |
|       | need for privacy, the physiotherapist, the resources available and the environment.       |  |
| CO 8  | Demonstrate communication and behavioral skills underpinned by humanitarian               |  |
|       | approach while interacting with patients, relatives, health care team members, co-        |  |
|       | professionals and society at large.   |  |
| CO 9  | List patients' questions, their understanding of condition and treatment options, their   |  |
|       | views, concerns, values, preferences and extent to which patients want to be involved in  |  |
|       | decision-making regarding their care and treatment. ( attitudes and beliefs)              |  |
| CO 10 | Examine Bioethical and legal issues in patient care, obtain informed consent,             |  |
|       | demonstrating community responsibility, good communication skills and socio-cultural      |  |
|       | competency  |  |
| CO 11 | Respond to patients concerns and preferences, and respect the rights of patients to reach |  |
|       | decisions with their doctor about their treatment and care and to refuse or limit         |  |
|       | treatment.  |  |
| CO 12 | Communicate clearly, sensitively and effectively with patients, caregivers, and           |  |
|       | colleagues from the medical and other professions, by listening, sharing and responding   |  |

| Unit | Topics  | Hours |
|------|---|-------|
| 1    | Manifestations of trauma and their complications  | 08    |
|      | d. Bones – fractures & fracture-dislocations of upper extremities & cervical-thoracic spine and their complications & management.   |       |
|      | <ul> <li>e. Soft tissues injuries of upper extremities &amp; cervical-thoracic spine and their complications &amp; management, contused lacerated wounds (CLWs) Burns complications and management, Crush injuries and its conservative and post-surgical management.</li> <li>f. Cumulative trauma disorders- Tennis elbow, carpal tunnel syndrome,</li> </ul> |       |
|      | tendinopathy etc. Management of fractures and traumatic injuries  |       |
| 2    | Degenerative Arthritis with associated conditions   | 05    |
|      | Physiotherapy management of common shoulder , degenerative conditions of cervical Spine - Spondylosis, Spondylolysis, Spondylolisthesis, and Spinal Canal Stenosis, Cord compression syndrome   |       |
| 3    | Inflammatory conditions   | 05    |

|    | e. Arthritis (including seronegative) – Rheumatoid arthritis, Gout, Septic arthritis   |    |
|----|--|----|
|    | f. Cellulitis and its complications.   |    |
|    | g. Post incisional inflammation and infection.   |    |
| 4  | Infectious Diseases of bones & joints of upper extremity and cervical-<br>thoracic spine- Osteomyelitis, Tuberculosis  | 02 |
| 5  | Metabolic & Hormonal Disorders – Osteoporosis, Osteomalacia  | 03 |
| 6  | Congenital & Acquired Deformities of upper extremity and cervical - thoracic spine- cervical rib, kyphosis, sprengel's shoulder,cubitus varus/valgus   | 03 |
| 7  | Peripheral Nerve Injuries & Plexus Injuries of upper extremity and Brachial plexus - Complications & Management  | 03 |
| 8  | Soft tissue injuries during sports and as a result of over-use of upper extremity and cervical-thoracic spine - Conservative and Operative management  | 03 |
| 9  | Vascular disorders affecting musculoskeletal system- Volkmann's ischemic contracture, Complex Regional Pain Syndrome, Compartment syndrome, Vertigo. Thoracic outlet syndrome, Vertebrobasilar artery syndrome | 4  |
| 10 | Traumatic Amputation of upper extremity  Types, Complications and management inclusive of prosthetic prescription & training   | 4  |
|    | Total  | 40 |

### **Practical/Clinical University Semester Examination under CBCS - 80 Marks**

| Exercise | Description  | Marks      |
|----------|--|------------|
| Q No 1   | Pain/ core muscle strength assessment (OSCE)           | 20         |
| Q No 2   | Strength/ Range of motion assessment (OSCE)            | 20         |
| QNo 3    | Case presentation/ OSCE of Upper extremity / Cervical- | 40         |
|          | Thoracic spine conditions/                             |            |
|          |  | Total = 80 |

#### Internal examination pattern (practical): 40marks

| Exercise | Description      | Marks      |
|----------|------------------|------------|
| QNo1     | Station 1 (OSCE) | 20         |
| QNo 2    | Station 2 (OSCE) | 20         |
|          |                  | Total = 40 |

#### RECOMMEMDED TEXT BOOKS

- 1. Therapeutic Exercise –O'Sullivan
- 2. Orthopaedic Physical Therapy -Donatelli
- 3. Cash's Textbook of Orthopedics & Rheumatology for Physiotherapists
- 4. Tidy's PhysicalTherapy
- 5. Manual Mobilization of Extremity Joints -Kaltenborn

|-----------|---|--|--|
|           | At the end of the course, the candidate will be able to:  |  |  |
| Cognitive |   |  |  |
| CO 1      | Identify and analyze cardiovascular dysfunction in terms of biomechanical, and biophysical basis and correlate the same with the health condition, routine electrophysiological, radiological, and biochemical investigations and arrive at appropriate Physical therapy diagnosis using WHO-ICF tool                                     |  |  |
| CO 2      | Utilize the knowledge about contextual factors to enhance capacity and performance of activities and participation in society   |  |  |
|           | Psychomotor   |  |  |
| CO 3      | Apply methods to evaluate functional impairments, perform pre-post-operative testing  |  |  |
| CO 4      | Plan, prescribe appropriate, and implement safe physiotherapy interventions with clinical reasoning for and prevention of impairments, activity limitations, participation restrictions and environmental barriers related to cardiovascular dysfunction in acute care settings, at home, work place, in society & in leisure activities. |  |  |
| CO 5      | Utilize the skill to deliver cardiac rehabilitation   |  |  |
|           | Affective   |  |  |
| CO 6      | Acquire ethical skills by demonstrating safe, respectful and effective performance of physical handling techniques taking into account the patients clinical condition, the need for privacy, the physiotherapist, the resources available and the environment.   |  |  |
| CO 7      | Demonstrate behavioral skills and humanitarian approach while communicating with patients, relatives, society at large and co-professionals   |  |  |
| CO 8      | list patients' questions, their understanding of condition and treatment options, their views, concerns, values, preferences and extent to which patients want to be involved in decision-making regarding their care and treatment.  |  |  |
| CO 9      | Examine ethical and legal issues in patient care, obtain informed consent, demonstrating community responsibility, good communication skills and socio-cultural competency  |  |  |

| CO 10 | Respond to patients concerns and preferences, and respect the rights of patients to reach decisions with their doctor about their treatment and care and to refuse or limit treatment. |
|-------|--|
| CO 11 | Communicate clearly, sensitively and effectively with patients, caregivers, and colleagues from the medical and other professions, by listening, sharing and responding                |

| Sr. No | Topics   | Hours |
|--------|--|-------|
|        | Review of Applied Anatomy & Physiology   |       |
| 1      | a. Cardiac anatomy & Physiology  | 5     |
| 2      | a. Investigation & Clinical Implication - X-ray, ECG, ABG, ABI, 2D Echo, PFT, Doppler, Angiography, Blood investigations, Special tests, claudication time, pulses, auscultation, postural hypotension  b. | 1.     | <b>Application of Management techniques:</b> Positioning, Breathing Control, Respiratory Muscle Strengthening, Relaxation techniques, Airway Clearance Techniques, Mechanical Assistive Devices, Nebulization and Humidification, Respiratory PNF, maximal and submaximal exercise testing.   | 05    |
| 2      | c. Investigation & Clinical Implication - X-ray, ECG, ABG, ABI, 2D Echo, PFT, Doppler, Angiography, Blood investigations, Special tests, claudication time, pulses, auscultation, postural hypotension  d. Stress testing, 6 Minute Walk test & Harward Step test Skill & Interpretation, Shuttle Walk Test & Modified Bruce Protocol   | 05    |
| 4      | Application Of ICF Model  Identify structural, functional impairment, activity and participation limitations, contextual factors influencing treatment, difference between performance and capacity, plan effective short term and long term goals to enhance functioning of cardiovascular system, outline patient specific goals and expected outcome within time frame with clinical reasoning, Documentation of observations  | 05    |
| 5      | Physiotherapy Management in Medical & Surgical Cardiovascular Diseases  h. Hypertension i. IHD, Myocardial Infarction, Rhythm Disorders, Pacemaker Implantation, Angioplasty, CABG, Minimally Invasive Surgeries j. Valvular Heart Disease and Corrective surgeries k. Congenital and Acquired Cardiovascular Diseases, Corrective Surgeries l. Thrombosis, Phlebitis andPhlebothrombosis m. Varicose Veins and ulcers n. Other Arterial disorders Exercises for vascular disorders, Berger's exercises, wound care | 10    |
| 6      | CARDIAC REHABILITATION (A.H.A./A.C.S.M./ AACVPR guidelines)   | 10    |

|   | Definition, Indications, Contraindications Phases(I,II,III,& IV), Outcome Measures, Quality of Life measures, Coughing techniques, Cardiac Rehabilitation, Strength training, Exercises to improve flexibility and endurance, Pain Relief, Home program |    |
|---|---|----|
| 7 | a Generic and disease specific b. Patient's perception of his disability and functioning and correlating the same with therapist evaluation.  |    |
|   | Total Hours   | 40 |

### **Practical/Clinical University Semester Examination under CBCS - 80 Marks**

| Exercise | Description   | Marks      |
|----------|---|------------|
| Q No 1   | Skill demonstration- Respiratory PNF/ Breathing     | 20         |
|          | exercises/Postural drainage/ AD/ACBT/ Positioning/  |            |
|          | Relaxation technique (OSCE), maximal and            |            |
|          | submaximal exercise testing                         |            |
| Q No 2   | Interpretation of ABG/ECG/X Ray/PFT (OSPE)          | 20         |
| Q No 3   | Case presentation/OSCE of cardiovascular conditions | 40         |
|          |   | Total = 80 |

#### Internal examination pattern (Practical/Clinical): 40marks

| Exercise | Description   | Marks      |
|----------|---|------------|
| Q No 1   | Skill demonstration- Respiratory PNF / Breathing    | 20         |
|          | exercises/Postural drainage/ AD/ACBT/ Positioning/  |            |
|          | Relaxation technique (OSPE), maximal and submaximal |            |
|          | exercise testing.                                   |            |
| Q No 2   | Interpretation of ABG/ECG/X Ray/PFT (OSPE)          | 20         |
|          |   | Total = 40 |

#### RECOMMENDED TEXT BOOKS

1. Cash's Textbook for Physiotherapists in Chest, Heart & Vascular diseases

- 2. Cash's text book in General Medicine & Surgical conditions for Physiotherapists
- 3. Chest Physical therapy & pulmonary rehabilitation -- Donna Frown Filter
- 4. Brompton's hospital guide
- 5. Physiotherapy in respiratory and cardiac problem Pryor and Prasad
- 6. Physiotherapy in Cardio Vascular rehabilitation Webber
- 7. Chest physiotherapy in intensive care Colin Mackenzie
- 8. Mechanical ventilation Ashfaq Hasan
- 9. Management of Mechanical ventilation –Pierce

#### RECOMMENDED REFERENCE BOOKS

- 1. Exercise & the Heart –Wenger
- 2. ECG P.J.Mehta
- 3. Cardiopulmonary Physical Therapy -- Irwin Scott
- 4. Essential of cardio pulmonary physical therapy –Hillgass And Sodosky
- 5. Exercise physiology, energy, nutrition and human performance –Mc'ardle
- 6. Exercise testing and prescription Skinner 8. Exercise in health and disease-Pollock

| Name of the Programme | Bachelor of Physiotherapy (BPT) |

| Name of the Course    | Neuro Physiotherapy I Theory    |
| Course Code           | BPT046                          |
| Course Description    | Core Theory                     |
| Credit per Semester   | 3 credits                       |
| Hours per Semester    | 60 hours                        |

| Course Learning Outcomes: The student will |  |  |
|--|--|--|
|  | Cognitive  |  |
| CO 1                                       | Be able to identify and analyze movement dysfunction due to neuromuscular skeletal disorders in terms of biomechanical and biophysical basis, correlate the same with the health condition, routine electrophysiological, radiological and biochemical investigations, and arrive at appropriate physical therapy diagnosis using WHO-ICF with clinical reasoning. |  |
| CO 2                                       | Be able to examine, evaluate, diagnose, plan, execute and document physiotherapy treatment independently or along with the multidisciplinary team in client with neurological dysfunction.   |  |
| CO 3                                       | Be able to plan realistic goals based on the knowledge of prognosis of the disease of the nervous system and prescribe appropriate, safe evidence based physiotherapy interventions with clinical reasoning.   |  |
| CO 4                                       | Understand infection control principles, best practices and techniques applicable to a range of setting where clients with neurological conditions would receive physiotherapy services.   |  |
| CO 5                                       | Know determinacy of health (environmental, nutritional, self-management/ behavioral factors) and chronic disease management principles related to neurological health.   |  |
|  | Psychomotor  |  |
| CO 5                                       | Be able to develop psychomotor skills to implement timely and appropriate physiotherapy assessment tools/techniques to ensure a holistic approach to patient evaluation in order to prioritize patient's problems  |  |
| CO6  | Be able to select timely physiotherapeutic interventions to reduce morbidity and physiotherapy management strategies, suitable for the patients' problems and indicator conditions based on the best available evidence.   |  |
| CO7  | Implement appropriate neuro-physiotherapeutic approaches, electrotherapeutic modalities, joint and soft tissue mobilizations and ergonomic advice for neuromuscular skeletal systems, contextual factors to enhance performance of activities and participation in society.  |  |

|     | Affective  |
|-----|--|
| CO8 | Be able to develop behavioral skills and humanitarian approach while communicating with patients, relatives, society and co-professionals, to promote individual and community health. |

| Unit | Topics  | Hours |
|------|---|-------|
|      |   |       |
| 1    | Theoretical basis of motor control and learning to understand various   | 10    |

Theory question paper pattern for University Semester Examination under CBCS - 40 marks

#### **EXAMINATION SCHEME**

APLICABLE FOR BATCH ADMITTED FROM ACADEMIC YEAR 2020-2021 ONWARDS as per Resolution No 3.7 and 3.11 of AC 41/2021

(Examination pattern applicable from batch admitted in academic year 2020-2021)

| Question type          | No. of questions | Marks/<br>question | Question x marks | Total marks |
|------------------------|------------------|--------------------|------------------|-------------|
|                        |                  |                    |                  |             |
| Short answer questions | 8 out of 10      | 5                  | 8x5              | 40          |
|                        | 1                | 1                  | 1                | Total= 40   |

#### University examination pattern (practical): 40marks

| Exercise | Description    | Marks                    |
|----------|----------------|--------------------------|
| Q No 1   | OSPE Station 1 | 20                       |
| Q No 2   | OSPE Station 2 | 20                       |
|          |                | <b>Total</b> = <b>40</b> |

#### Mid Semester Examination Pattern (Theory):20 marks

| Question type          | No. of questions | Marks / question | Question x<br>marks | Total marks |
|------------------------|------------------|------------------|---------------------|-------------|
| Section 1              |                  |                  |                     |             |
| Short answer questions | 4 out of 5       | 5                | 4x5                 | 20          |
|                        |                  |                  | •                   | Total = 20  |

#### Mid Semester Examination Pattern (Practical): 20 marks

| Exercise | Description    | Marks      |
|----------|----------------|------------|
| Q No 1   | OSPE Station 1 | 10         |
| Q No 2   | OSPE Station 2 | 10         |
|          |                | Total = 20 |

Internal assessment will be weighted out of 10 marks each for internal examination (theory and practical)

- 1. Rehabilitation of the Hand: Surgery and Therapy- James M.Hunter.
- 2. Rehabilitation of Hand and Upper extremity Terri M.Skirven.
- 3. Examination of the Hand and Wrist-RaoulTubiana.
- 4. Hand and Upper extremity Rehabilitation- Rebecca J.Saunders.
- 5. Management of Common Musculoskeletal disorders- Randolph M.Kessler
- 6. Oatis- Kinesiology: The mechaniscs and pathomechanics of HumanMovement.
- 7. Clinical Anatomy by regions- Richard S.Snell

| Name of the Programme     | Bachelor of Physiotherapy (BPT) |
|---------------------------|---------------------------------|
| Name of the Course        | Foot Rehabilitation             |
| Course Code               | SEC006                          |
| <b>Course Description</b> | Skill based Elective            |
| Credit per Semester       | 2 credits                       |
| Hours per Semester        | 60 hours                        |

| Course Learning Outcomes: The student will be able to |   |  |  |  |
|---|---|--|--|--|
|   | Cognitive   |  |  |  |
| CO 1  | Identify, evaluate, analyze and discuss primary and secondary dysfunction related to    |  |  |  |
|   | ankle and foot complex based on kinesiological and pathophysiological principles        |  |  |  |
|   | Psychomotor   |  |  |  |
|   | 1 sychomotor  |  |  |  |
| CO 2  | Apply theoretical basis of physiological effects and best available evidence on         |  |  |  |
|   | effectiveness, efficacy and safe application of management guidelines                   |  |  |  |
| CO 3  | Prescribe and train for appropriate prosthesis and orthosis based on dysfunction of     |  |  |  |
|   | ankle and foot complex  |  |  |  |
|   | Affective   |  |  |  |
| CO 4  | Acquire ethical skills by demonstrating safe and effective performance of physical      |  |  |  |
|   | handling techniques taking into account patient's clinical condition, need for privacy, |  |  |  |
|   | resources available and environment   |  |  |  |

| Unit | Topics   | Hours |
|------|--|-------|
| 1    | Anatomy of Ankle and Foot Complex                          | 03    |
|      | Basic Structure  |       |
|      | Bony Landmarks   |       |

- 1. Aquatic exercise for rehabilitation and training: Lori Thein Brody and Paula RichleyGeigle
- 2. Aquatic Rehabilitation: Richard G. Ruoti, David M. Morris and Andrew J.Cole
- 3. Aquatic exercise therapy: Andrea Bates and Norm Hanson
- 4. The use of aquatics in orthopedic and sports medicine rehabilitation and physical conditioning: Kevin E. Wilk and David M.Joyner
- 5. Aquatic Fitness Professional Manual 7<sup>th</sup> Edition: Aquatic Exercises Association

| Name of the Programme | Bachelor of Physiotherapy (BPT) |  |
|-----------------------|---------------------------------|--|
| Name of the Course    | Sports Physiotherapy            |  |
| Course Code           | SEC008                          |  |
| Course Description    | Skill based Elective            |  |
| Credit per Semester   | 2 credits                       |  |
| Hours per Semester    | 60 hours                        |  |

|      | Course Learning Outcomes: The student will be able to                                   |  |  |
|------|---|--|--|
|      | Cognitive   |  |  |
| CO 1 | identify, evaluate, analyze and discuss primary and secondary dysfunction and their     |  |  |
|      | management related to common sporting injuries  |  |  |
|      | Psychomotor   |  |  |
| CO 2 | apply theoretical basis of physiological effects and best available evidence on         |  |  |
|      | effectiveness, efficacy and safe application of management guidelines                   |  |  |
|      | Affective   |  |  |
| CO 4 | acquire ethical skills by demonstrating safe and effective performance of physical      |  |  |
|      | handling techniques taking into account patient's clinical condition, need for privacy, |  |  |
|      | resources available and environment   |  |  |

| Unit | Topics   | Hours |
|------|--|-------|
| 1    | Biomechanical techniques of Upper and lower extremity dependent sports | 4     |
|      | Throwing,  |       |
|      | Badminton  |       |
|      | • Swimming,  |       |
|      | • Cycling,   |       |
|      | • Football,  |       |
|      | Running.   |       |
|      |  |       |
| 2    | Sports Metabolism  | 4     |
|      | Carbohydrate, Protein and Fat Metabolism                               |       |
|      | Energy balance and transfer, calorimetry,                              |       |
|      | Resting metabolism and metabolic activity,                             |       |
|      | Oxidative processes. SteadyState.                                      |       |
|      | Transient phases and oxygen deficit                                    |       |

|   | Lactate production.  |    |
|---|--|----|
|   | Alactaci anaerobic energy sources  |    |
|   | Maximal aerobic power and limiting factors                               |    |
|   | Chronic fatigue in sportspersons   |    |
| 3 | Common Injuries in Sports  | 2  |
|   | Overuse injuries   |    |
|   | Traumatic injuries   |    |
|   | Soft tissue injuries   |    |
| 4 | On field and off field Examination                                       | 4  |
|   | Principle of assessment  |    |
|   | Specific History taking  |    |
|   | Differential Diagnosis based on History                                  |    |
|   | <ul> <li>Screening for Red and Yellow flags</li> </ul>                   |    |
|   | • Assessment   |    |
|   | Neurological Screening   |    |
| 5 | Sportswear- Protective gears in sports                                   | 2  |
| 6 | Management of Common Sports Injuries                                     | 2  |
|   | Principles   |    |
|   | Goalsetting  |    |
|   | Rehabilitation protocols   |    |
|   | Return back to sports  |    |
| 7 | Sports for specially abled   | 2  |
|   | Practical's: Visit to Sports Center, 2D motion analysis of sport related | 40 |
|   | videos, assessment and management techniques,                            |    |
|   | Total  | 60 |

#### Applicable to batch admitted in academic year 2019-2020

Internal examination pattern (theory): 40marks

(Examination pattern applicable from batch admitted in academic year 2019-2020)

|                        | No. of      |                | Question X |             |

| Credit per Semester   | 3 credits                       |
| Hours per Semester    | 60 hours                        |

|      | Course Learning Outcomes: The student will be able to  |  |  |  |  |
|------|--|--|--|--|--|
|      | Cognitive  |  |  |  |  |
| CO 1 | Identify, evaluate, analyze & discuss primary and secondary musculo- skeletal                  |  |  |  |  |
|      | dysfunction related to lower extremity, pelvis&lumbo-sacral,basedonbiomechanical,              |  |  |  |  |
|      | kinesiological & patho- physiological principles using ICF model                               |  |  |  |  |
| CO 2 | Correlate the same with radiological, electrophysiological, biochemical/ hematological         |  |  |  |  |
|      | investigations as applicable & arrive at the appropriate Physiotherapy diagnosis with          |  |  |  |  |
|      | skillful evaluation of structure and function with clinical reasoning for lower quadrant &     |  |  |  |  |
|      | lower spine dysfunction.   |  |  |  |  |
| CO 3 | Explain the pharmaco-therapeutics, its interaction with physiotherapeutic measures and         |  |  |  |  |
|      | modify physiotherapeutic intervention appropriately.   |  |  |  |  |
| CO 4 | Apply knowledge of psychosocial factors (personal and environmental factors in the             |  |  |  |  |
|      | context of disability associated with the musculo-skeletal system or multiple body systems)    |  |  |  |  |
|      | for behavioral and lifestyle modification and use appropriate training and coping              |  |  |  |  |
|      | strategies.  |  |  |  |  |
|      | Psychomotor  |  |  |  |  |
| CO 5 | Evaluation of mental and cognitive function including depression, anxiety, attitudes and       |  |  |  |  |
|      | beliefs. Apply theoretical basis of physiological effects, indications, contraindications; and |  |  |  |  |
|      | best available evidence on the effectiveness, efficacy and safe application guidelines for a   |  |  |  |  |
|      | full range of physiotherapeutic strategies and interventions, including appropriate modes      |  |  |  |  |
|      | of soft tissue & joint mobilization, electrotherapy, therapeutic exercise, and appropriate     |  |  |  |  |
|      | ergonomic advise, self-management techniques and home exercise that can be employed            |  |  |  |  |
|      | to manage problems of the individual's lower quadrant & lumbar spine structures,               |  |  |  |  |
|      | functions, activities and participation, capacity and performance levels associated with the   |  |  |  |  |
|      | musculo-skeletal system, for relief of pain & prevention, restoration and rehabilitation       |  |  |  |  |
|      | measures for maximum possible functional independence at home,                                 |  |  |  |  |
|      | workplace and in community.  |  |  |  |  |
| CO 6 | Prescribe and train for appropriate lower extremity& lumbar spine orthoses, prostheses         |  |  |  |  |
|      | and walking aids based on musculoskeletal dysfunction.   |  |  |  |  |

|       | Affective  |
|-------|--|
| CO 7  | Acquire ethical skills by demonstrating safe, respectful and effective performance of physical handling techniques taking into account the patient's clinical condition, the need for privacy, the physiotherapist, the resources available and the environment. |
| CO 8  | Demonstrate communication and behavioral skills underpinned by humanitarian approach while interacting with patients, ,relatives, health care team members, coprofessionals and society at large   |
| CO 9  | list patients' questions, their understanding of condition and treatment options, their views, concerns, values, preferences and extent to which patients want to be involved in decision-making regarding their care and treatment.                             |
| CO 10 | Examine bioethical and legal issues in patient care, obtain informed consent, demonstrating community responsibility, good communication skills and socio-cultural competency  |
| CO 11 | Respond to patients concerns and preferences, and respect the rights of patients to reach decisions with their doctor about their treatment and care and to refuse or limit treatment.   |
| CO 12 | Communicate clearly, sensitively and effectively with patients, caregivers, and colleagues from the medical and other professions, by listening, sharing and responding  |

| Unit | Topics   | Hours |
|------|--|-------|
| 1    | Manifestations of trauma and their complications:  | 10    |
|      | a. Bones – fractures & fracture-dislocations of lower extremity, pelvis&                     |       |
|      | lumbo-sacral spine and their complications & management                                      |       |
|      | b. Soft tissues injuries of lower extremities & lumbo-sacral spine and their                 |       |
|      | complications & Management, contused lacerated wounds (CLWs) Burns                           |       |
|      | complications and management.  |       |
|      | c. Overuse-syndromes: Piriformis syndrome, Ischioglueteal bursitis, IT band                  |       |
| _    | friction syndrome, trochanteric bursitis, Jumpers knee, housemaid knee etc                   |       |
| 2    | Degenerative Arthritis with associated conditions  | 5     |
|      | a. Osteoarthritis of Hip joint, knee joint and ankle joint                                   |       |
|      | b. Lumbar spine degenerative conditions like Spondylosis, degenerative disc                  |       |
|      | disease Spondylysis, Spondylolisthesis, and Lumbar Canal Stenosis                            |       |
| 3    | Inflammatory conditions  | 5     |
|      | a. Arthritis (including seronegative arthritis) Rheumatoid arthritis, Gout, Septic arthritis |       |
|      | b. Spondylo-arthropathies e.g. Ankylosing Spondylitis.                                       |       |
|      | c. Cellulitis and its complications.   |       |
|      | d. Post incisional inflammation and infection.   |       |
|      | e. Avascular necrosis  |       |
| 4.   | Infectious Diseases of bones & joints of lower extremities, pelvis and                       | 5     |

|     | lumbo-sacral spine   |    |

| Name of the Programme | Bachelor of Physiotherapy (BPT) |  |
|-----------------------|---------------------------------|--|
| Name of the Course    | Musculoskeletal PT II           |  |
| Course Code           | BPT-049                         |  |
| Course Description    | Core Practical                  |  |
| Credit per Semester   | 1 credit                        |  |
| Hours per Semester    | 40 hours                        |  |

|      | Course Learning Outcomes: The student will be able to  |  |  |
|------|--|--|--|
|      | Cognitive  |  |  |
| CO 1 | Identify, evaluate, analyze & discuss primary and secondary musculo- skeletal dysfunction related to lower extremity, pelvis& lumbo-sacral, based on biomechanical, kinesiological & patho- physiological principles using ICF model   |  |  |
| CO 2 | Correlate the same with radiological, electrophysiological, biochemical/ hematological investigations as applicable & arrive at the appropriate Physiotherapy diagnosis with skillful evaluation of structure and function with clinical reasoning for lower quadrant & lower spine dysfunction.   |  |  |
| CO 3 | Explain the pharmaco-therapeutics, its interaction with physiotherapeutic measures and modify physiotherapeutic intervention appropriately.  |  |  |
| CO 4 | Apply knowledge of psychosocial factors (personal and environmental factors in the context of disability associated with the musculo-skeletal system or multiple body systems) for behavioral and lifestyle modification and use appropriate training and coping strategies.   |  |  |
|      | Psychomotor  |  |  |
| CO 5 | Evaluation of mental and cognitive function including depression, anxiety, attitudes and beliefs. Apply theoretical basis of physiological effects, indications, contraindications; and best available evidence on the effectiveness, efficacy and safe application guidelines for a full range of physiotherapeutic strategies and interventions, including appropriate modes of soft tissue & joint mobilization, electrotherapy, therapeutic exercise, and appropriate ergonomic advise, self-management techniques and home exercise that can be employed to manage problems of the individual's lower quadrant & lumbar spine structures, functions, activities and participation, capacity and performance levels associated with the musculo-skeletal system, for relief of pain& prevention, restoration and rehabilitation measures for maximum possible functional independence at home, workplace and in community. |  |  |
| CO 6 | Prescribe and train for appropriate lower extremity& lumbar spine orthoses, prostheses and walking aids based on musculoskeletal dysfunction.  |  |  |

|       | Affective  |  |  |
|-------|--|--|--|
| CO 7  | Acquire ethical skills by demonstrating safe, respectful and effective performance of physical handling techniques taking into account the patient's clinical condition, the need for privacy, the physiotherapist, the resources available and the environment. |  |  |
| CO 8  | Demonstrate communication and behavioral skills underpinned by humanitarian approach while interacting with patients, relatives, health care team members, coprofessionals and society at large  |  |  |
| CO 9  | list patients' questions, their understanding of condition and treatment options, their views, concerns, values, preferences and extent to which patients want to be involved in decision-making regarding their care and treatment.                             |  |  |
| CO 10 | Examine bioethical and legal issues in patient care, obtain informed consent, demonstrating community responsibility, good communication skills and socio-cultural competency  |  |  |
| CO 11 | Respond to patients concerns and preferences, and respect the rights of patients to reach decisions with their doctor about their treatment and care and to refuse or limit treatment.   |  |  |
| CO 12 | Communicate clearly, sensitively and effectively with patients, caregivers, and colleagues from the medical and other professions, by listening, sharing and responding  |  |  |

| Unit | Topics   | TT    |

|           | Course Learning Outcomes   |  |  |
|-----------|--|--|--|
| Cognitive |  |  |  |
|           | At the end of the course, the candidate will be able to:   |  |  |
| CO 1      | Identify and analyze respiratory dysfunction in terms of biomechanical, and Biophysical basis and correlate the same with the health condition, radiological, and biochemical investigations, PFT,ECG,ABG, and arrive at appropriate Physical therapy diagnosis using WHO-ICF tool   |  |  |
| CO 2      | Apply the knowledge about contextual factors to enhance capacity and performance of activities and participation in society  |  |  |
|           | Psychomotor  |  |  |
| CO 3      | Apply the skill to deliver pulmonary rehabilitation, breathing retraining, lung reexpansion, breathing control, lung hygiene, nebulization, postural drainage, AD, ACBT, thoracic expansion, PNF, respiratory muscle strengthening, ergonomic applications, home program, training for flexibility, endurance, muscle strength and aerobic capacity, assistive devices |  |  |
| CO 4      | Plan, prescribe appropriate, safe physiotherapy interventions with clinical reasoning for and prevention of impairments, activity limitations, participation restrictions and environmental barriers related to pulmonary dysfunction in acute care settings, at home, work place, in society & in leisure activities.   |  |  |
|           | Affective  |  |  |
| CO 5      | Acquire ethical skills by demonstrating safe, respectful and effective performance of physical handling techniques taking into account the patient's clinical condition, the need for privacy, the physiotherapist, the resources available and the environment.   |  |  |
| CO 6      | Demonstrate behavioral skills and humanitarian approach while communicating with patients, relatives, society at large and co-professionals  |  |  |
| CO 7      | list patients' questions, their understanding of condition and treatment options, their views, concerns, values, preferences and extent to which patients want to be involved in decision-making regarding their care and treatment.   |  |  |
| CO 8      | Examine ethical and legal issues in patient care, obtain informed consent, demonstrating community responsibility, good communication skills and sociocultural competency  |  |  |
| CO 9      | Respond to patients concerns and preferences, and respect the rights of patients to  |  |  |

|       | reach decisions with their doctor about their treatment and care and to refuse or limit treatment.  |
|-------|---|
| CO 10 | Communicate clearly, sensitively and effectively with patients, caregivers, and colleagues from the medical and other professions, by listening, sharing and responding |

| Credit per Semester       | 1 credit                                      |
| Hours per Semester        | 40 hours                                      |

|      | Course Learning Outcomes   |  |  |
|------|--|--|--|
|      | Cognitive  |  |  |
|      | At the end of the course, the candidate will be able to:   |  |  |
| CO 1 | Identify and analyze respiratory dysfunction in terms of biomechanical, and Biophysical basis and correlate the same with the health condition, radiological, and biochemical investigations, PFT,ECG,ABG, and arrive at appropriate Physical therapy diagnosis using WHO-ICF tool   |  |  |
| CO 2 | Apply the knowledge about contextual factors to enhance capacity and performance of activities and participation in society  |  |  |
|      | Psychomotor  |  |  |
| CO 3 | Apply the skill to deliver pulmonary rehabilitation, breathing retraining, lung re-<br>expansion, breathing control, lung hygiene, nebulization, postural drainage, AD,<br>ACBT, thoracic expansion, PNF, respiratory muscle strengthening, ergonomic<br>applications, home program, training for flexibility, endurance, muscle strength and<br>aerobic capacity, assistive devices |  |  |
| CO 4 | Plan, prescribe appropriate, safe physiotherapy interventions with clinical reasoning for and prevention of impairments, activity limitations, participation restrictions and environmental barriers related to pulmonary dysfunction in acute care settings, at home, work place, in society & in leisure activities.   |  |  |
|      | Affective  |  |  |
| CO 5 | Acquire ethical skills by demonstrating safe, respectful and effective performance of physical handling techniques taking into account the patient's clinical condition, the need for privacy, the physiotherapist, the resources available and the environment.   |  |  |
| CO 6 | Demonstrate behavioral skills and humanitarian approach while communicating with patients, relatives, society at large and co-professionals  |  |  |
| CO 7 | list patients' questions, their understanding of condition and treatment options, their views, concerns, values, preferences and extent to which patients want to be involved in decision-making regarding their care and treatment.   |  |  |
| CO 8 | Examine ethical and legal issues in patient care, obtain informed consent, demonstrating community responsibility, good communication skills and sociocultural competency  |  |  |
| CO 9 | Respond to patients concerns and preferences, and respect the rights of patients to  |  |  |

|       | reach decisions with their doctor about their treatment and care and to refuse or limit   |
|-------|---|
|       | treatment.  |
| CO 10 | Communicate clearly, sensitively and effectively with patients, caregivers, and colleagues from the medical and other professions, by listening, sharing and responding |

| Sr. No | Topics   | Hours |
|--------|--|-------|
| 1      | Positioning, Breathing Control, Mechanical Assistive Devices, Nebulization and Humidification, Respiratory PNF, Maximal and submaximal exercise testing.                     | 10    |
| 2      | Respiratory Muscle Strengthening, Relaxation techniques, Airway Clearance Techniques, PEP devices.   | 10    |
| 3      | Exercises for vascular disorders, Special test for venous and arterial disorders, Berger's exercises, Wound Care, Coughing and huffing techniques, Pulmonary Rehabilitation. | 10    |
| 4      | Strength training, exercises to improve flexibility and endurance, Pain Relief, Home program   | 10    |
| Total  |  | 40    |

| Credits per semester      | 2 credit   |
| Hours per semester        | 60 hours   |

|  | Course Learning Outcomes: The student will be able to  |  |  |  |  |
|--|--|--|--|--|--|
|  | Cognitive  |  |  |  |  |
| CO 1   | Explain alterations in normal human structure and functions due to artificial ventilation, prolonged bed-rest, decubitus position in ICU and examine the correlation between structural and functional impairment.   |  |  |  |  |
| CO 2   | Explain indication and contra-indication of care in intensive care unit (ICU), provide appropriate interventions to the patient.   |  |  |  |  |
| CO3  | Analyze the roles and expertise of health and social care professionals in the context of working and functioning as a multi-professional team to the delivery of safe and high-quality care.                        |  |  |  |  |
| CO 4   | Explain function of artificial airways, ventilators, oxygen therapy, equipments used in ICUs, investigations and their interpretations   |  |  |  |  |
|  | Psychomotor  |  |  |  |  |
| CO 5   | Apply assessment skills, plan and implement physiotherapy interventions for patient in Medical and Surgical ICUs, Pediatric ICU, Cardiac Care ICU  |  |  |  |  |
| CO 6   | Monitor function during Physiotherapy treatment  |  |  |  |  |
|  | Affective  |  |  |  |  |
| CO 7   | Demonstrate ability to work with colleagues in ways that best serve the interests of patients, passing on information and handing over care, demonstrating flexibility, adaptability and a problem-solving approach. |  |  |  |  |
| CO 8  Examine ethical and legal issues in patient care, obtain informed consent, demonstrating community responsibility, good communication skills and socio cultural competency  Communicate clearly, sensitively and effectively with patients, caregivers, and colleagues from the medical and other professions, by listening, sharing and responding. |  |  |  |  |  |

| Sr.<br>No. | Topics  | No. of<br>Hrs. |
|------------|---|----------------|
| 1          | Anatomical and Physiological differences between the Adult and Pediatric lung           | 1              |
| 2          | Respiratory failure – Oxygen Therapy and Mechanical Ventilation.                        | 2              |
| 3          | Bedside assessment of the patient-Adult & Pediatric                                     | 1              |
| 4          | Introduction to ICU: ICU monitoring –Apparatus, Airways and Tubes used in the ICU       |                |
|            | - Physiotherapy in the ICU – Common conditions in the ICU – Tetanus, Head Injury,       |                |

|       | Course Learning Outcomes: The student will be able to   |  |  |
|-------|---|--|--|
|       | Cognitive   |  |  |
| CO 1  | demonstrate academic skills and knowledge related to understanding the structural and functional of human body and applied anatomy, physiology in physiotherapy practice.   |  |  |
| CO 2  | apply and outline pathology of medical and surgical conditions in context with Physiotherapy, interpret& use medical communication.   |  |  |
| CO 3  | apply knowledge of biomechanics of human movement in musculoskeletal, neurological and cardio-respiratory conditions in planning, recommending, and executing Physiotherapy management.   |  |  |
| CO 4  | outline and implement Physiotherapy management by co-relating assessment and examination skills of clinical subjects like Orthopedics, General Surgery, Medicine, Neurology, Pediatrics, Dermatology & Gynecology & Obstetrics, Community Medicine and Sociology  |  |  |
| CO 5  | describe and analyze concepts of energy conservation, global warming and pollution and justify optimal use of available resources.  |  |  |
|       | Psychomotor   |  |  |
| CO 6  | record a patient's medical history, including family and social history; communicate with relatives or other caretakers where ever appropriate.   |  |  |
| CO 7  | assess structural, functional impairments, compare performance and capacity through clinical examination and risk evaluation, prioritize goals, recommend Physiotherapy treatment and carry out independent consultation with a patient.  |  |  |
| CO 8  | demonstrate skill in maneuvers of passive movements, massage, stretching, strengthening, and various manual therapy techniques, integrate Physiotherapy evaluation skills including electro diagnosis on patients to arrive at a Functional/ Physical Diagnosis in musculoskeletal, neurological, cardiovascular and pulmonary conditions and health promotion strategies |  |  |
| CO 9  | conduct health and sport promotion camps and offer services in evaluation of fitness and ergonomic applications to special populations like school children, college students, industrial workers, geriatric homes, specially abled children, pregnant women, etc   |  |  |
| CO 10 | Listpatients' questions, their understanding of condition and treatment options, their views, concerns, values, preferences and extent to which patients want to be involved  |  |  |

|       | in decision-making regarding their care and treatment.                                       |
|-------|--|
|       | demonstrate ability of critical thinking, scientific enquiry, experiential learning,         |
| CO 11 | personal finance, entrepreneurship and managerial skills related to task in day-to-day       |
|       | work for personal & societal growth.   |
| CO 12 | manage time and prioritize tasks, and work autonomously when necessary and                   |
| CO 12 | appropriate.   |
|       | function effectively as a mentor and teacher including contributing to the appraisal,        |
| CO 13 | assessment and review of colleagues, providing effective feedback, and taking                |
|       | advantage of opportunities to develop these skills.  |
| CO 14 | Assess and recognize the severity of a clinical presentation and a need for immediate        |
| CO 14 | emergency care.  |
| CO 15 | Apply basic first aid and cardio-pulmonary resuscitation or direct other team members        |
| CO 13 | to carry out resuscitation.  |
|       | Write accurate, legible and complete clinical records, use computers and other               |
| CO 16 | information systems for data storage, retrieval, prepare health promotion material for       |
|       | patients, research and education.  |
|       | Affective  |
|       | communicate clearly, sensitively and effectively with individuals, groups, patients, care-   |
| CO 17 | givers, colleagues, professionals regardless of their age, social, cultural or ethnic        |
|       | backgrounds or their disabilities including when English is not the persons first            |
|       | language.  |
| CO 18 | communicate by spoken, written and electronic methods (including medical records),           |
|       | and be aware of other methods of communication used by patients.                             |
|       | communicate appropriately in difficult circumstances, such as when breaking bad news,        |
| CO 19 | and when discussing sensitive issues, such as alcohol consumption, smoking or obesity,       |
|       | with difficult or violent patients, people with mental illness and with                      |
|       | vulnerable population  |
| CO 20 | respond to patients concerns and preferences, and respect the rights of patients to reach    |
| CO 20 | decisions with their doctor about their treatment and care and to refuse or limit treatment. |
|       | examine ethical and legal issues in patient care, obtain informed consent,                   |
| CO 21 | demonstrating community responsibility, good communication skills and socio-                 |
| CO 21 | cultural competency  |

| CO 24 | patients, passing on information and handing over care, demonstrating flexibility,           |
|       | 1 , 1 6  |

|       | adaptability and a problem-solving approach.   |
|-------|--|
|       | demonstrate ability to build team capacity and positive working relationships and      |
| CO 25 | undertake various team roles including leadership and the ability to accept leadership |
|       | by others.   |

#### During the course of Internship, students will be expected to

- present cases and document the same in 3 clinical placement areas and conduct health promotional activities.
- Present required number of cases to the respective clinical supervisors, document the same in the Log book, seek scoring on Case Evaluation Assessment Form from clinical supervisors, for each case, failing which the particular posting will be repeated.
- Attend all clinical postings with not more than one day of absenteeism per month. Interns remaining absent for a greater number of days will have to compensate the days of absenteeism after completion of the rotatory internship placement schedule.
- follow appropriate dress code to be followed at all the clinical posting areas.

| Clinical Placement Area       | Duration in<br>Weeks | Assignment/Case<br>Documentations |
|-------------------------------|----------------------|-----------------------------------|
| Musculoskeletal PT            | 6                    | 3                                 |
| Neurophysiotherapy            | 6                    | 3                                 |
| Cardiovascular & Pulmonary PT | 6                    | 3                                 |
| Public Health Promotion       | 2                    | 2 camps/promotional activity      |

| CO 3 innovative physiotherapy interventions, based on evidence, to provide high |   |  |  |  |  |  |  |  |
|   | healthcare.   |  |  |  |  |  |  |  |
|   | develop understanding appropriate research tools, approaches and theories applicable to   |  |  |  |  |  |  |  |
| CO 4  | that theme, develop well-defined and clear research question of scholarly significance,   |  |  |  |  |  |  |  |
| CO 4  | and that the dissertation develops a theoretically and methodologically informed and      |  |  |  |  |  |  |  |
|   | evidence-based answer to that question.   |  |  |  |  |  |  |  |
| CO 5  | Critically appraise the results of relevant qualitative and quantitative studies as       |  |  |  |  |  |  |  |
| CO 3  | reported in scientific literature.  |  |  |  |  |  |  |  |
| CO 6  | Outline the ethical issues involved in clinical research.                                 |  |  |  |  |  |  |  |
|   | Write accurate, legible and complete clinical records, use computers and other            |  |  |  |  |  |  |  |
| CO 7  | information systems for data storage, retrieval, prepare health promotion materialfor     |  |  |  |  |  |  |  |
|   | patients, research and education.   |  |  |  |  |  |  |  |
| COS   | Demonstrate confidentiality, use data protection legislation and codes of practice in all |  |  |  |  |  |  |  |
| CO 8  | dealings with information.  |  |  |  |  |  |  |  |

Students would have submitted synopsis of their research projects and received ethical approval to conduct project from Institutional Ethics Committee in Semester VIII. They will be expected to carry out data collection, analysis, interpretation and prepare project report. Completed project report along with Research Project Evaluation Report signed by the guide, should be submitted at least a month before end of internship.

#### **Research Project Report Evaluation Guidelines:**

Criteria for evaluating a research project report: The following guidelines and criteria should be applied when assessing a dissertation.

#### Guidelines to Prepare Internship Research Proposal & Project

#### 7. Selection of Research Problem:

Identify research question based on area of interest, local health care needs, issues of social concern.

- f. State the problem in brief, concise, clear.
- g. State the purpose of selected study &topic.
- h. State the objectives of proposal/project.
- i. Prepare conceptual framework based on operational definition.
- j. Write scope of research proposal/project.

#### 8. Organizing Review of Literature

- e. Study related and relevant literature which helps to decide conceptual framework and research design to be selected for the study
- f. Search specific books, bulletins, periodicals, reports, published dissertations, encyclopedia and textbooks
- g. Organize literature as per operational definition
- h. Prepare summary table for review of literature

# 9. Research Methodology: To determine logical structure & methodology for research project.

- i. Decide and state approach of study i.e. experimental or non-experimental
- j. Define/find out variables to observe effects on decided items &procedure
- k. Prepare simple tool or questionnaire or observational checklist to collect data.
- 1. Determined sample and sampling method
- m. Mode of selection ii) Criteria iii) Size of sample iv) Plan when, where anyhow data will be collected.
- n. Test validity of constructed tool
- o. Check reliability by implementing tool before pilot study(10% of sample size)
- p. Conduct pilot study by using constructed tool for 10% selected sample size

#### 10. Data collection: To implement prepared tool

- d. Decide location
- e. Time

f. Write additional information in separate exercise book to support inferences and interpretation

#### 11. Data analysis and processing presentation

- h. Use appropriate method of statistical analysis i.e. frequency and percentage
- i. Use clear frequency tables, appropriate tables, graphs and figures.
- j. Interpretation of data:
- k. In relation to objectives
- 1. Hypothesis
- m. Variable of study or project
- n. Writing concise report

#### 12. Writing Research Report

- c. Aims:
- vi. To organize materials to write project report
- vii. To make comprehensive full factual information
- viii. To make appropriate language and style of writing
- ix. To make authoritative documentation by checking footnotes, references & bibliography
- x. To use computers & appropriate software

# **Evaluation Criteria for Project Report**

| Sr.<br>No   | Criteria   |   |   | Remark |   |   |  |
|-------------|--|---|---|--------|---|---|--|
|             |  | 1 | 2 | 3      | 4 | 5 |  |
| I           | Statement of the problem                           |   |   |        |   |   |  |
|             | Significance of the problem selected               |   |   |        |   |   |  |
|             | Framing of title and objectives                    |   |   |        |   |   |  |
|             |  |   |   |        |   |   |  |
| II          | Literature Review                                  |   |   |        |   |   |  |
|             | Inclusion of related studies on the topic and its  |   |   |        |   |   |  |
|             | relevance  |   |   |        |   |   |  |
|             | Operational definition                             |   |   |        |   |   |  |
|             |  |   |   |        |   |   |  |
| III         | Research Design                                    |   |   |        |   |   |  |
|             | 2. Use of appropriate research design              |   |   |        |   |   |  |
|             | 2. Usefulness of the research design to draw the   |   |   |        |   |   |  |
|             | inferences among study variables/ conclusion       |   |   |        |   |   |  |
|             |  |   |   |        |   |   |  |
| IV          | Sampling Design                                    |   |   |        |   |   |  |
|             | 4. Identification & description of the target      |   |   |        |   |   |  |
|             | population   |   |   |        |   |   |  |
|             | 5. Specification of the inclusion & exclusion      |   |   |        |   |   |  |
|             | criteria   |   |   |        |   |   |  |
|             | 6. Adequate sample size, justifying the study      |   |   |        |   |   |  |
|             | design to draw conclusions                         |   |   |        |   |   |  |
|             |  |   |   |        |   |   |  |
| V           | Data Collection Procedure                          |   |   |        |   |   |  |
|             | 4. Preparation of appropriate tool                 |   |   |        |   |   |  |
|             | 5. Pilot study including validity & reliability of |   |   |        |   |   |  |
|             | tool   |   |   |        |   |   |  |
|             | 6. Use of appropriate procedure/method for data    |   |   |        |   |   |  |
|             | Collection   |   |   |        |   |   |  |
|             |  |   |   |        |   |   |  |
| VI          | Analysis of Data & Interpretation                  | 1 |   |        |   |   |  |
|             | 4. Clear & logical organization of the finding     |   |   |        |   |   |  |
|             | 5. Clear presentation of tables(title, table&      |   |   |        |   |   |  |
|             | column heading)                                    |   |   | 1      |   |   |  |
|             | 6. Selection of appropriate statistical tests      |   |   |        |   |   |  |
