/2022 24/08

Based on the discussion of the submitted documents for the scientific and ethical review, we approve the research protocol to be conducted and its presented form subject to the following conditions:

1. Applicable and mandatory regulatory permissions to be obtained prior to commencement of the study i.e. registration at clinical trial registry of India.(www.ctri.nic.in)

2. The investigators and other participants should be adequately trained on the protocol and its related procedures, the Good Clinical Practices (GCP) guidelines prior to commencing

3. Participating subjects should be adequately enlightened about the protocol during informed consent process and under insurance coverage in an event of any trial relatedinjury/accident.

4. Participating subjects should not be put to additional financial burden related to thestudy protocol.

The validity of this approval is for two years from date of approval. Within this period, the Institutional Ethics Committee expects to be periodically informed about the following:

The progress of the study

Any Serious Adverse Event (SAE) occurring in the course of thestudy

Any significant changes in the protocol/patient information/ informedconsent

Update on safety of the investigating product or procedure

To provide an abridge copy of the final report after completion of the study

5. It is mandatory for the investigators affiliated with other institutions to provide a letter of approval from the Ethics Committee of the respective institution.

Thanking you Yours Sincerely,

Dr. Shilpa Patel Member Secretary IEC, MGMDCH

MGM/DCH/IEC/697 22 /Date:-

y / or /2022

Based on the discussion of the submitted documents for the scientific and ethical review, we approve the research protocol to be conducted and its presented form subject to the following conditions:

 Applicable and mandatory regulatory permissions to be obtained prior to commencement of the study i.e. registration at clinical trial registry of India.(www.ctri.nic.in)

 The investigators and other participants should be adequately trained on the protocol and its related procedures, the Good Clinical Practices (GCP) guidelines prior to commencing thestudy.

 Participating subjects should be adequately enlightened about the protocol during informed consent process and under insurance coverage in an event of any trial relatedinjury/accident.

4. Participating subjects should not be put to additional financial burden related to thestudy protocol.

The validity of this approval is for two years from date of approval. Within this period, the Institutional Ethics Committee expects to be periodically informed about the following:

The progress of the study

- Any Serious Adverse Event (SAE) occurring in the course of thestudy
- Any significant changes in the protocol/patient information/ informedconsent
- Update on safety of the investigating product or procedure
- To provide an abridge copy of the final report after completion of the study
- It is mandatory for the investigators affiliated with other institutions to provide a letter of approval from the Ethics Committee of the respective institution.

Thanking you Yours Sincerely,

### Short event report

The industrial visit was organized by Dr. Mansee Thakur, Director of MGM School of Biomedical Sciences and managed by Mr. Yogesh Patil (PhD Scholar), Mr. Rishikesh Aher(Master's Scholar) and Ms. Shubhangi Dubey(Master's Scholar). I along with 43 students and 5 faculties as well as staffs of Department of Med. Biotech. And Med. Genetics left the MGM campus at 07:00AM in the morning and reached the destination by 10:30AM, where we were welcomed by Mr. Manish Raut (Product Specialist) of Higronics Pvt. Ltd. at their igatpuri farm, Where Mr. Manish was very kind to give us the tour of entire Green House and explain the process, aspects and future of Hydroponics.

Since the dawn of humanity plants has played a very important role in survival of our species, from being consumed as a dietary component to development of shelters and weapons. It has been said that the agriculture was the reason behind the establishment of tribal and civilized societies. Over the course of thousands of years agriculture has been revolutionized multiple times as per the needs and technological advances, as we have seen since past two centuries the industrial revolution has brought various changes in the methods of agricultural industry, be it the increase in yield, health or the nutritional and medicinal quality of plants and its products. Today, in various parts of the world we are facing major water crisis due to climate change and increase in population density, and the lack of water has become a huge issue for agricultural industries, causing failed and loss of crops, especially in the regions where the irrigation system is not very well established. And these all are happening when the demand of quality and organic food and population is increasing dramatically.

To tackle the issue of water crisis and produce non-GMO, pesticide free and nutritionally rich plant products a new sector i.e. Hydroponics in agricultural industry is emerging. Instead of genetic engineering, pesticides and immense amount of fertilizers, Hydroponics uses metabolic engineering and alternate or non-toxic mode of pest control.

The plants are grown inside the greenhouse, either on nutrient rich water instead of soil or in clay beads/pallets or coconut coir. In case of clay beads/pallets and coconut coir the plants are irrigated with nutrient rich media delivered to the roots in adequate amount. The method of irrigation, moisture control and recycling of water from raft based systems minimize the wastage of water. In near future hydroponics are going to play a crucial role in balancing the demand and supply of the plant products as it is very efficient qualitatively as well as quantitatively at very minimal expense of water.

These are few of the lots we learned during our industrial visit to higronics Pvt. Ltd., Igatpuri. We also got to test some of the products (Cherry tomatoes and Strawberries) of the hydroponic farm. At the end few of the students were invited to do their Master's dissertation in the R&D of higronics Pvt. Ltd.
