RAMANUJAN COLLEGE

Ramanujan College, a constituent College of the University of Delhi was established in 1958 as an evening college.

The College has been accredited Grade “A++” by the National Assessment and Accreditation Council (NAAC) in its Second Cycle.

At present, Ramanujan College offers sixteen undergraduate programmes in different disciplines. The College has been awarded the DDU KAUSHAL (Deen Dayal Upadhyay - Knowledge Acquisition and Upgradation of Skilled Human Abilities and Livelihood) Kendra (2016) by UGC and Teaching Learning Centre (2017) by the Ministry of Education. The College also offers short-term diploma, certificate, and executive development programmes on contemporary & skill - oriented themes to complement the regular graduation courses.

It is also the Study Centre of Non-Collegiate Women Education Board (NCWEB) and Indira Gandhi National Open University (IGNOU) for various courses. In 2018, the College conducted a Course on Human Rights, Environment and Ethics through its National Resource Centre (NRC), under the Annual Refresher Programme in Teaching (ARPIT) scheme of MoE.

The College has also entered into Memorandum of Understanding(s) with foreign universities. It is also working for collaboration with other higher education institutions located in remote areas of the country, under the Vidya Vistar Scheme of the University of Delhi.

TEACHING LEARNING CENTRE RAMANUJAN COLLEGE

Teaching Learning Centre (TLC) is mandated by the Ministry of Education (MoE) to organise Faculty Development Programmes (FDPs), Faculty Orientation and Induction Programmes (FIPs), discipline specific and interdisciplinary Refresher Courses, conferences, workshops, through offline and online modes. These programmes are based on indepth subject knowledge, quantitative and qualitative research methodologies, and on an interdisciplinary approach as is envisaged in the National Education Policy (NEP), 2020.

The TLC, Ramanujan College has been set up with the aim of "Reaching the Unreached" teachers in terms of regional diversity and geographically remote areas of the country. It has successfully conducted more than hundred learner-centric programmes since October 2017 and trained over one lakh teachers across the country in various discipline specific and interdisciplinary programmes.

The courses are offered through the customised Learning Management System (LMS), designed by the College's Research Development and Services Cell. It is predominantly participant-friendly and incorporates evaluation methods and comprehensive feedback systems to judge learning outcomes. The LMS is hosted on CLOUD with high scalability and reliability. The College has installed its own Cloud Infrastructure to host its servers for research and data analysis.

In the TLC Programmes distinguished and internationally acclaimed resource persons deliver lectures and conduct sessions on wide ranging disciplines/topics of relevance in the contemporary and ever evolving global scenario to benefit the teaching fraternity, corporates and researchers. The sessions are also uploaded for larger audiences on the official [YouTube Channel of the College](#).

CONCEPT NOTE

One of the main objectives of the course is to emphasize the importance of integrating online MOOCs into the conventional way of teaching across all disciplines. Online MOOCs offer several benefits, including increased accessibility, flexibility, and scalability. They can be an effective way of reaching a wider audience, providing personalized learning experiences, and fostering collaborative learning environments.

Moreover, online MOOCs can be integrated into the conventional way of teaching to enhance the learning experience for students. For instance, educators can use MOOCs to supplement classroom instruction, provide additional learning resources, and facilitate student engagement and participation.

The course will cover a range of topics, including online class design, pedagogical strategies for online instruction, assessment techniques, and tools for collaborative MOOC creation.

THEMES

- **Online class design and development**
- **Four Quadrant Approach for developing MOOCs**
- **Creating and managing discussion forums in online classes**
- **NEP 2020 & Creating MOOCs**
- **Blended Learning Techniques**
- **Tools for Active Participation**
- **Collaborative MOOC creation: best practices**
- **Video creation software**
- **E-content development**
- **Introduction to the use of Artificial Intelligence in teaching**
- **Open Educational Resources**
- **Apps for enhanced assessment and evaluation**
- **Safety and Security in Online Teaching and Learning**

Summary

MGM School of Physiotherapy, Chatrapati Sambhaji Nagar (Aurangabad), organized a faculty development program aiming to enhance the development of e-content. Dr. Sabih Khan (PT) Faculty Development Program on ChatGPT in Research Domain

Introduction

In recent years, artificial intelligence (AI) has made significant advancements, particularly in the field of natural language processing. One of the most prominent AI models in this domain is ChatGPT, a language model developed by OpenAI. ChatGPT has been widely used for various applications, including chatbots, text generation, and content creation. As faculty members, it is essential to stay updated with the latest technologies and tools to enhance our research capabilities. Therefore, this Faculty Development Program (FDP) aims to provide an overview of ChatGPT and its applications in the research domain.

Session 1: Introduction to ChatGPT

The first session of the FDP will focus on introducing participants to ChatGPT. The session will cover the basics of how ChatGPT works, its architecture, and the underlying principles of natural language processing. Participants will also learn about the training process of ChatGPT and how it generates human-like text responses.

Session 2: Applications of ChatGPT in Research

In the second session, participants will explore the various applications of ChatGPT in the research domain. They will learn how ChatGPT can be used for text summarization, language translation, sentiment analysis, and other research tasks. The session will also include case studies and examples of how researchers have successfully used ChatGPT in their projects.

Session 3: Hands-on Workshop

The third session will be a hands-on workshop where participants will have the opportunity to work with ChatGPT firsthand. They will learn how to fine-tune the model for specific research tasks, generate text using ChatGPT, and evaluate the performance of the model. Participants will also be encouraged to brainstorm ideas for their own research projects that can benefit from using ChatGPT.

Session 4: Ethical Considerations and Best Practices

In the final session, participants will discuss the ethical considerations surrounding the use of ChatGPT in research. They will learn about potential biases in AI models like ChatGPT and how to mitigate them. Additionally, best practices for using ChatGPT responsibly and ensuring data privacy will be discussed.

Conclusion

This Faculty Development Program on ChatGPT in the research domain aims to equip faculty members with the knowledge and skills to leverage AI technologies effectively in their research projects. By understanding how ChatGPT works and its applications in research, faculty members can enhance their research capabilities and stay at the forefront of technological advancements. We hope that this FDP will inspire faculty members to explore new research opportunities and collaborate with colleagues in utilizing ChatGPT for innovative research projects
