Note The seat allotted in 1st round, mentioned above, stand cancelled with immediate effect.the candidate has no claim on the cancelled seat.

Dear Candidate,

Based on your merit and choices of Institutions & Programs exercised by you during online Counselling, you have been provisionally allotted a seat in the above mentioned Institute and Program. Kindly report to allotted Medical College/ Institute within the stipulated period, as mentioned in the counselling schedule, failing which the allotted seat will be cancelled and Security Deposit will be forfeited.

- Candidates are required to produce all original documents at the time of reporting at the Allotted Institute as mentioned in the Information Bulletin of NEET PG 2022.
- The candidate will be required to undergo a medical examination at their own cost on a notified date(s) by the allotted college.
- The candidate is advised to report and join the allotted Medical College/Institute as early as possible. In some of the allotted Colleges /Universities, 3-4 days time is required to complete admission formalities. Please also take into consideration holiday(s)/ local holiday(s). The candidates are further advised to contact the allotted college authorities for details before proceeding.
- The candidate is requested to ensure that the Admission Letter issued by the allotted college should be generated through online submission of his/ her details by the allotted college through the portal provided by Medical Counselling Committee (MCC). Any offline admission which is not generated through the portal by the allotted institute will be treated as Null & Void.
- Report to Allotted College within stipulated period, as mentioned in counseling schedule, after obtaining relieving letter (Generated through MCC Software Only) from previously allotted institute, failing which the allotted seat will be cancelled and Security Deposit will be Forfeited.
- Candidate will be required to produce concerned certificate(Caste/PwD/EWS) at the time of admission.
- Once Round-2 Seat is joined the candidate will not be able to resign the seat.
- The Allotment Letter will be considered as e Pass/ Curfew pass to facilitate candidates along with one parent / attendant during travel for the purpose of reporting to allotted college in places under COVID related Lockdown.

Important Instructions:

- This Provisional Allotment Letter is based on the personal data viz. Category, Sub Category and Gender etc. submitted by the candidate. MCC /DGHS is not responsible for the truth/ factualness of the data. Neither DGHS nor MCC is responsible for any inadvertent error that may have crept in the Provisional Allotment Letter being published on the web. The allotment is purely "Provisional" and the seat of candidate is liable to cancel in case the candidate does not fulfill the eligibility criteria on verification of original documents at the time of Reporting or any time thereafter.

University
of Glasgow

University of Glasgow Student ID: 2824843
Name: SMIT RUPESHKUMAR JOSHI
12 May 2022

Dear SMIT RUPESHKUMAR,

Congratulations! We are pleased to confirm that you have been given an Unconditional offer for MSc (Med Sci) in Medical Genetics and Genomics starting 12 September 2022 at the University of Glasgow.

Your Offer	
Application number	01070959
Programme	MSc (Med Sci) in Medical Genetics and Genomics
Mode of Study	Full-Time
JACS Code / ATAS Requirement	A300 ATAS not required
Campus	Gilmorehill Campus, Glasgow
College	College of Medical, Veterinary and Life Sciences
School	School of Medicine
Academic Level	Postgraduate Taught
SCQF Level	11
ECTS credits	180
Expected Start Date	12 September 2022
Expected End date	12 September 2023
Tuition Fees	£23950
Tuition Fee classification / status	International For information on how the university determines fees status, or if you disagree with our assessment see - University of Glasgow - Postgraduate study - Fees and funding - Fee Status

Deposit Requirement £1000

Deadline: 15 June 2022

Congratulations again on your offer; I look forward to welcoming you to Team UofG!

Yours sincerely,

Director

MGM School of Biomedical Science
Kamothe, Navi Mumbai

What Happens Next

Accept your offer

You must accept this offer using Applicant Self Service within four weeks of date sent. If you do not accept this offer within four weeks, we may not be able to guarantee you a place on this programme. Please note after making a response you have a statutory right to contact us and change this within 14 days of your response.

Pay your deposit

In order to secure this offer you are required to pay a deposit of £1000.

The deadline for payment is 15 June 2022.

Deposit payments can be made via Applicant Self Service using the 'make a payment' link.

1. Log into your Applicant Self Service Account. You will see the 'Admissions' section at the bottom of the screen with the name of the programme you have an offer for and an 'Accept or Decline' link beside the name of the programme.
2. Click on the 'Accept or Decline' link to accept your offer and once you have accepted your offer you will see 'Make a Payment' button.
3. Click on the button and you will be taken to the 'Make a Payment' screen.
4. On the 'Make a Payment' screen you will see the name of the programme(s) you have an offer for.
5. Enter the amount you wish to pay towards your deposit, please note that the full amount of £1000 is required in order to secure your offer of a place.
6. You should enter the amount you wish to pay in the 'Payment Amount' column on the same line as the programme you hold an offer for. Please note that if you hold an offer to more than one postgraduate taught programme then you should only make a deposit payment to **your first choice programme**.
7. Click 'Next' and then 'Continue to make my payment' and complete your credit/debit card details.

A handwritten signature in blue ink, appearing to read "A. Brennan".

Director
MGM School of Biomedical Science
Kamothé, Navi Mumbai

Please note that it will not be possible to extend this deadline and if you do not make your payment by this date we cannot guarantee your admission to the programme and your offer may be withdrawn.

If you pay your deposit by the deadline date then you will have secured an offer of a place on the programme. Please see the terms and conditions relating to deposit payments and refunds. Please note that by paying the deposit, you are agreeing to these terms and conditions.

What to do once you have paid your deposit

- Once the payment has been made you can click on the "View Payment" link and view and print a receipt for the payment under the "Posted Cashier Payment" section.
- You will be able to confirm that the offer has been secured via Applicant Self Service.

Please note: if you are applying to, or have been awarded, a scholarship from your home country or an external funder that covers all tuition fees and you are therefore unable to make the deposit payment, you should upload a copy of your scholarship application or award letter to your application by the deadline date. If you are applying to a scholarship that is not open for applications yet and are therefore unable to upload a copy of your scholarship application or award letter then you should upload your written confirmation that you intend to fund your studies via external scholarship. If you do not upload evidence/confirmation of application by the deadline we cannot guarantee your admission to the programme and your offer may be withdrawn. To upload this evidence you should log in to Applicant Self Service and click on the "Upload Documents" link.

How to pay tuition fees	<u>University of Glasgow - Postgraduate study - Fees and funding - Self-funding students</u>
Browse our scholarships	For information on Scholarships or funding, our web pages contain full information on Postgraduate and Graduate School opportunities at <u>www.glasgow.ac.uk/studying/scholarships/</u>
Apply for your visa	<i>If you are an international student (outside the European Union) you will be required to apply for a Tier 4 student visa. You will require a Confirmation of Acceptance for Studies (CAS) form from the University in order that you can make your visa application. We will issue CAS to all international students who have received and accepted an unconditional offer, normally from four months prior to the start of the programme.</i>
How to request a deferral	Please see our deferral policy at <u>https://www.glasgow.ac.uk/postgraduate/news/#applications%2Cregistration%2Cenrolmentanddocuments</u> for eligibility criteria and deadline for deferral requests.

Handwritten signature

contact us	If you have any further questions about our offer or about the University of Glasgow, please visit the Offer Holders page. If you still can't find the answer to your question, please contact us .
Student Contract	<p>The Student Contract is a legally binding agreement between you and the University and is formed when you accept this offer and reconfirmed when you register for each academic year during your programme.</p> <p>The Student Contract is made up of:</p> <ul style="list-style-type: none"> • The terms of this offer • The Student Terms and Conditions which can be found at www.gla.ac.uk/studentcontract • The Regulations set out in the University Calendar (the annual publication of the University's academic regulations) which can be found at www.gla.ac.uk/myglasgow/senateoffice/policies/calendar/ <p>You should read this important information before accepting an offer.</p> <p>If you accept our offer less than 14 days prior to the expected start date of your programme, you agree that we may start delivering your programme within your statutory cancellation period (for more information on your cancellation rights, please refer to section 19 of the Terms and Conditions).</p>

Constituent: Symbiosis Institute of Health Sciences (SIHS)

Programme: M.Sc. Medical Technology

Dear ANKITA ANKUSH JADHAV

Congratulations! We are pleased to inform you that you have been selected for admission to the two years full time M.Sc. Medical Technology (Batch 2022-24) at Symbiosis Institute of Health Sciences (SIHS).

Please note that this admission is provisional and will be confirmed on payment of fees (As attached Annexure I) on or before **Friday, 24th June 2022, 11.59 pm**, subject to the fulfilment of eligibility conditions (As per Annexure II: Eligibility Documents New PG.pdf (sih.edu.in)) and in accordance with the rules of the Symbiosis International (Deemed University) [SIU].

As a constituent of the prestigious Symbiosis International (Deemed University), we strive to provide you with a learning environment which will help you to always be abreast of changing global practices and give you a head start in your chosen field of work. Your faculty will be drawn from accomplished academicians and practicing professionals with rich and varied experience.

Your programme commenced on **Tuesday, 9th August, 2022**. Please go through the various details given in the Post Graduate Prospectus and www.sihspune.org website.

You are advised to bring all relevant self-attested documents as mentioned in Annexure II for submission on the day of commencement of your programme.

We look forward to having you amidst us. Welcome to Symbiosis!

With Best Wishes.

Your Application Information

Name:	Mahima Rajubhai Modi
Date of Birth:	18/Sep/1998
Application Reference:	220677457
Course Application:	MSc FT Genomic Medicine
Course Code:	PFQM-C45M-09
Mode of Study:	Full-Time
Expected Start:	19/Sep/2022
Expected End:	18/Sep/2023
University Fees (Year 1):	£23,950
Deposit Amount:	£2000 (2000 GBP)
Tuition Fee Liability:	Overseas (Confirmed)

Dear Miss Modi,

Further to receipt of your results we are very pleased to confirm you are now holding an unconditional offer of a place on the above degree programme. This offer has been firmly accepted.

Deposit

In order to secure your place at Queen Mary University of London you will be required to pay a deposit of **£2000** (2000 GBP) towards your tuition fee.

For information about your deposit, please select the deposit tile which is available in your portal.

If you are in receipt of a scholarship or your fees will be paid by a sponsor, you may be exempt from the tuition fee deposit. We do however require a formal letter from your sponsor confirming the arrangement; please go to the "Deposits" icon on the main "my Application" page to provide this information (even if you have only applied for funding and not yet been awarded).

US Loans - if your studies are to be funded by loans from the USA, either Federal or Private, you will need to submit a separate application to QMUL in order to process this. Full details on your eligibility and the application process can be found on our website - <http://bit.ly/QM-AmericanLoans>

Our refund policy and the Tuition Fee regulations document can be found [here](#).

How to pay your deposit

1. Go to <https://epay.qmul.ac.uk/>
2. Complete your Student Details (enter 220677457 in the "Student ID / Application Number" field)
3. On the next page select "Tuition Deposits"
4. Make payment of £2000

Alternatively you can pay by direct bank transfer.

For further details on the different ways to pay your deposit, please refer to:
<https://www.qmul.ac.uk/postgraduate/taught/tuitionfees/deposits/>

Pre-Departure information / Before you arrive

When you're getting ready to join us, check out your [applicant portal](#) (select the "Events" option) and our [website](#) for the latest pre-departure events, guidance and tips before you start your studies with us.

Your offer of admission to Queen Mary University of London is subject to our terms and conditions. With your acceptance of this offer, you are also agreeing to abide by these terms and conditions and we therefore request that you read and familiarise yourself with these:
<https://www.qmul.ac.uk/prospective/termsandconditions/>

The terms and conditions include important information about the programme, our admissions policy, university fees and fee regulations, fee status, and your right to cancel. Please note that the university fees,

Director
QMUL School of Biomedical Sciences

regulations, and general terms and conditions that apply are for the academic year that you enter the course and not the year of your application. University fees may increase in future years.

If you require a visa to study in the UK, your enrolment is subject to meeting UK Visas & Immigration requirements including those relating to deposits, university fees and living expenses. Please see the guidance on our website for more information:
<https://www.welfare.qmul.ac.uk/international/immigration/>

We look forward to welcoming you to Queen Mary University of London.

Yours sincerely

Christopher Sleeman

Student ID Number 52212047

Please visit: www.abdn.ac.uk/students/new-students/

Dear Janvi Kishor

We are delighted that you have firmly accepted our unconditional offer of admission and look forward to welcoming you to the University of Aberdeen for the academic year **2022/2023**.

We hope the information contained in the accompanying Certificate of Acceptance and in this letter will help you to prepare for your arrival.

New Students Website

Your essential starting point is the New Students Website which will help to guide you through what to do before arriving and help you understand everything you need to know in your first few weeks as a student.

Information about Getting Started, Essential Welcome Information, Registration, Induction and Orientation details can all be found here www.abdn.ac.uk/students/new-students/

Immigration Information

If you need a visa to enter or remain in the UK, it is your responsibility to check the immigration requirements and to apply for the most appropriate visa before you make travel arrangements.

The University's Immigration Information Guide, which can be found at www.abdn.ac.uk/study/international/visa-information.php provides detailed information. Please check all the pages carefully to ensure that you are well-prepared before submitting a visa application.

You can find the Student visa application form and further detailed information on the UK Visas & Immigration website at www.gov.uk/student-visa

Applying for Student Accommodation

Full-time campus-based students are now eligible to apply for accommodation at the University of Aberdeen.

Please apply online at www.abdn.ac.uk/accommodation/apply-now.php Select Student Type 'Postgraduate' and enter your Student ID Number 52212047.

ID Card Photo Upload, Email Activation and eRegistration

Before commencing studies, students are required to upload a photo for their ID card, activate their University of Aberdeen e-mail account and begin e-registration. Full instructions available at www.abdn.ac.uk/students/new-students/registration.php

Director
MGM School of Biomedical Science
Kamothe, Navi Mumbai

Tuition Fees

Information about tuition fees and payment methods can be found on the following webpage www.abdn.ac.uk/students/finance/tuition-fees.php

If you are an Alumni student of the University of Aberdeen, you may be entitled to a discount on your tuition fees. Full information, including the application form, can be found at www.abdn.ac.uk/study/funding/69 If you are eligible, early application is encouraged to ensure the correct fee is recorded before you eRegister.

If you require a visa to enter the UK and, if you are awarded the Alumni Discount before you apply for a visa, please send confirmation of your Alumni Discount award to pauline.davidson@abdn.ac.uk so that the discount fee can be noted on your CAS.

University Regulations, Codes of Practice and Academic Quality Handbook

Regulations for Postgraduate Studies and Higher Degrees can be found at www.abdn.ac.uk/registry/calendar/postgraduate.php

The Code of Practice for students can be found at

Undergraduate and Postgraduate Taught Students: www.abdn.ac.uk/staffnet/teaching/undergraduate-and-postgraduate-taught-students-6124.php

Postgraduate Research Students:

www.abdn.ac.uk/staffnet/teaching/research-students-6125.php

The Academic Quality Handbook contains the University's policies, procedures and regulations relating to all aspects of teaching and learning, including research degrees at the University of Aberdeen. More information can be found at www.abdn.ac.uk/staffnet/teaching/academic-quality-handbook-838.php

We wish you every success in your studies.

Yours sincerely,
Admissions Office - Postgraduate
University of Aberdeen

Certificate of Acceptance

This document details the information that appears on your CAS. UK Visas & Immigration (UKVI) will refer to this information when considering your Student visa application for study at the University of Aberdeen.

We recommend that you i) provide the UKVI with a copy of this document; ii) provide the documents detailed in section 4 below; iii) note that your CAS number is detailed in section 1 below. The CAS number is valid only for the programme and the start and end dates detailed below. You cannot apply for a visa earlier than six months before your programme commences. **If you require a Student visa to enter the UK, it is essential that you have the necessary funds in an approved bank account for a minimum of 28 days BEFORE you apply for a visa.** Please visit www.gov.uk/student-visa and www.gov.uk/student-visa/money for more information.

THE CAS NUMBER BELOW IN SECTION 1 IS LINKED TO THE COURSE AWARD AND TITLE IN SECTION 3. IF YOU USE THE CAS NUMBER AND APPLY FOR A STUDENT VISA – YOU CANNOT THEN CHANGE TO A DIFFERENT PROGRAMME OF STUDY BEFORE OR AFTER YOU ARRIVE IN ABERDEEN. IF YOU WISH TO STUDY A DIFFERENT PROGRAMME YOU MUST EMAIL PGADMISSIONS@ABDN.AC.UK ON RECEIPT OF THIS DOCUMENT.

In providing this CAS number, please note that you are subject to Student visa restrictions and requirements as set by UK Visas and Immigration (UKVI). Please ensure you read about your responsibilities as a Student visa holder before you submit your Student visa application. By using the CAS issued by the University of Aberdeen, you are confirming you agree to abide by these conditions.

Tuition Fees paid to date are correct at the date this document was produced. The University can make no assurances that your CAS can be updated to include any future payment after your visa application has been submitted.

1. Applicant Details

Applicant Name: Miss Janvi Kishor Ghoricha
Nationality: INDIA
Applicant ID Number: 8229054275 D001

Passport Number: M9158143
Student ID Number: 52212047

Date of Birth: 21 Dec 1998
CAS Number: E4G4UB8J45K0M9
Fee Status: Overseas

2. Sponsor Details

Sponsor Licence Number: 1GF1B20B2
Address/Main place of study: University of Aberdeen, King's College, Aberdeen, AB24 3FX
The University of Aberdeen is a Higher Education Institution with a track record of compliance.

3. Programme Details

ESSENTIAL INFORMATION

The paragraphs below contain very important information that you should read. **Full details appear on our website** - please use the links below to access this information.

1 CERTIFICATE OF ACCEPTANCE

Please check the Certificate of Acceptance carefully. If you find any mistakes, you must let us know IMMEDIATELY so that the Certificate of Acceptance and CAS can be amended BEFORE you apply for your visa. Please also read information on English Language Proficiency. [MORE...](#)

2 ADVANCE PAYMENT OF FEES

If you choose to send a tuition fee payment before you apply for your Student visa, please email [Pauline Davidson](#) with a copy of your payment receipt. Tuition fees can be paid by bank transfer. We require a minimum of 7 days to receive your payment and to update your CAS. [MORE...](#)

3 MAINTENANCE FUNDS AND ACCOMMODATION FEES

In applying for your Student visa, the UKVI will expect to see evidence that you hold the required funds for maintenance. This is currently set at £9207. This is to cover your living costs and expenses whilst you are a student. This amount, as well as full tuition fees (if you have not paid these in advance), will need to be in your bank account for 28 consecutive days. Please refer to [Policy Guidance](#). [MORE...](#)

4 OFFICIAL FINANCIAL SPONSORS

Please note that UK Visas & Immigration will only recognise specific types of organisation as Official Financial Sponsors. Therefore, if you are not being financially sponsored by an organisation type that will be accepted by UKVI, you should make alternative arrangements to demonstrate funds available to you. [MORE...](#)

5 IMMIGRATION HEALTHCARE SURCHARGE (IHS)

You should note that in addition to the visa application fee which can be found [here](#), all Student visa applicants (and any dependents coming with the student) who are entering the UK for a period of 6 months or more will be required to pay a surcharge for healthcare. [MORE...](#)

Director

MGM School of Biomedical Science
Kamothe, Navi Mumbai

6 VISA APPLICATION PROCESS

Further information about Student Visas, the visa application process and the documents that you are required to submit with your visa application can be found [here](#) and in the Policy Guidance [here](#). **MORE...**

8 ARRANGING TRAVEL TO THE UK

Student visa holders are advised not to enter the UK via the Republic of Ireland (Eire), for example by flying direct to Dublin or Shannon Airport and then flying to Scotland, because you will not pass through Immigration Control. **MORE...**

7 REGISTRATION

Once your visa has been issued, you should start the University's eRegistration process. A Step-by-step guide and answers to the most Frequently Asked Questions (FAQs) can be accessed [here](#). Please start [eRegistration](#) before you arrive. **MORE...**

9 BIOMETRIC RESIDENCE PERMIT

Student visa holders and their dependents will be given a vignette (sticker) in their passport which will be valid for 30 days only. You must arrive in the UK before the expiry date of the Vignette. Please contact us if you have any queries. **MORE...**

10 NEW STUDENTS' WEBSITE

Please do not hesitate to contact us if you have any queries but, before doing so, we suggest that you refer to the New Students' pages of the University's website where you will find most of the information you will need to help you prepare for your arrival in Aberdeen.

Specific induction information, including details about course induction, the teaching of your course and key contacts in the School, will be available [here](#), and timetables will be issued during induction meetings.

PROVISIONAL ADMISSION LETTER

Student ID: 220702298

Category: Open

Constituent: Symbiosis School of Biological Sciences (SSBS)

Programme: M.Sc. Biochemistry

Dear JAWALE JAGRUTI DHARMENDRA,
Congratulations! We are pleased to inform you that you have been selected for admission to the two-year full-time M.Sc. Biochemistry programme for the batch 2022-2024 at the Symbiosis School of Biological Sciences (SSBS).

As a constituent of the prestigious Symbiosis International (Deemed University) [SIU], we strive to provide you with a learning environment which will help you to always be abreast of changing global practices and give you a head start in your chosen field of work. Your faculty is drawn from accomplished academics and practicing professionals with rich and varied experience.

Please note that this admission is provisional and will be confirmed on payment of fees (**As per Annexure I**) on or before **July 9th, 2022, Saturday 12 am (midnight)**, subject to the fulfilment of eligibility conditions as mentioned in the Post-Graduate Studies Prospectus 2022-23 and in accordance with the Eligibility Rules of the Symbiosis International (Deemed University) as amended from time to time.

Your programme commences on 25th July 2022. Please study the details given in the Post Graduate Studies Prospectus 2022-23 and the SSBS website. We are happy to provide shared hostel accommodation (as applicable) to students admitted to the programme. SIU reserves the right to change these dates in view of the uncertainties prevailing across the country on account of the Covid-19 pandemic or any other unavoidable circumstances.

Please bring all relevant self-attested/ original documents for submission on the day of commencement of your programme. In case of cancellation of provisional admission for any reason whatsoever, the SIU refund rules shall be applicable.

We look forward to having you amidst us. Welcome to Symbiosis!

With Best Wishes,

Dr. Anuradha Vaidya
Director, Symbiosis School of Biological Sciences

Constituent: Symbiosis Institute of Health Sciences (SIHS)

Programme: M.Sc. Medical Technology

Dear BHATKAR SANIYA SHAKIL,

Congratulations! We are pleased to inform you that you have been selected for admission to the two years full time M.Sc. Medical Technology (Batch 2021-23) at Symbiosis Institute of Health Sciences (SIHS).

Please note that this admission is provisional and will be confirmed on payment of fees (**As attached Annexure I**) on or before **Tuesday, 15th June, 2021, 11.59 pm**, subject to the fulfilment of eligibility conditions (**As per Annexure II:** [eligibility-ug.pdf \(siu.edu.in\)](#)) and in accordance with the rules of the Symbiosis International (Deemed University) [SIU].

As a constituent of the prestigious Symbiosis International (Deemed University), we strive to provide you with a learning environment which will help you to always be abreast of changing global practices and give you a head start in your chosen field of work. Your faculty will be drawn from accomplished academicians and practicing professionals with rich and varied experience.

Your programme commences on **Tuesday, 3rd August, 2021**. Please go through the various details given in the Post Graduate Prospectus and www.sihspune.org website. SIU reserves the right to change these dates in view of uncertainties prevailing across the country on account of COVID-19 pandemic or any other unavoidable circumstances.

You are advised to bring all relevant self-attested documents as mentioned in Annexure II for submission on the day of commencement of your programme.

We look forward to having you amidst us. Welcome to Symbiosis!

With Best Wishes,

Dr. Rajiv Yeravdekar
Director, Symbiosis Institute of Health Sciences (SIHS)

Mary Carolyn D Souza
Neo Cottage Kumbalangi P O Ernakulam 682007
Kerala IN

Dear Mary Carolyn,

Congratulations! It is my pleasure to offer you acceptance into the Post-Baccalaureate Diploma in Health Care Management program at Cape Breton University for the 2022 Fall academic term.

I am thrilled to welcome you to the Caper community and provide you the opportunity to study on Canada's #1 Island destination, Cape Breton Island, Nova Scotia, Canada. Here you will become the leader you were meant to be and create the kind of impact that will make a difference, all with the help of a supportive and welcoming academic environment.

Students from more than 55 countries choose to study at CBU and enjoy the natural beauty of Cape Breton Island as the backdrop to their studies. As a university that is dedicated to excellence in teaching and learning, I trust you will find your experience at CBU one to remember. Our people, our cultures and our strong sense of community truly make CBU a special place.

To ensure you are able to begin in your studies in the 2022 Fall academic term and your journey to CBU goes smoothly, please review the following important deadlines:

Admission Deadlines	Information
Saturday, September 3, 2022	CBU Residence opens
Wednesday, September 7, 2022	Last day to register for classes
September 7, 2022	Classes begin
Note:	<ul style="list-style-type: none">• Admission Deadlines must be met. You must register for classes by September 7, 2022 in order to begin classes. If you are not registered for classes by September 7, 2022 your admission will be deferred to January 9, 2023.• If you wish to defer your program start term please contact internationaladmissions@cbu.ca.• Both on-campus and off-campus housing is limited and must be arranged prior to arrival in Canada.• Part-time employment opportunities are very limited.

Please find enclosed your Notice of Acceptance which you will need to apply for a study visa at the nearest Canadian Consulate or Embassy. You will also find a detailed list of next steps you must complete prior to arrival in Canada. Don't forget to follow CBU on all your favourite social media channels to stay connected and learn about the amazing community you're about to join. Finally, I encourage you to check your email regularly for information regarding other important dates, advising and events.

Should you have any questions or concerns, for more information please visit www.cbu.ca or contact us at internationaloffice@cbu.ca.

Congratulations,

University Registrar and Director of Admissions
Cape Breton University

International students attending Cape Breton University must be in possession of a VALID STUDY PERMIT, indicating their specific attendance at Cape Breton University or one that states they are allowed to attend any university in Canada, pursuant to the Canadian Immigration Act. Please note that it may take up to four months to obtain a Canadian visa.

STUDENT ID: 0275928

2022/04/08

International Student Tuition and Fees 2021-2022

TUITION AND FEES: Updated Cape Breton University (CBU) tuition and fees can be found on our website at: www.cbu.ca/tuition. Please note that these numbers are an **estimate** based on the 2021-2022 tuition and fees. We cannot provide updated tuition numbers for future terms; however, rates are subject to annual review and are subject to change without notice.

PRE-PAYMENT: All payments will be credited directly to the student's account at CBU and the funds will be applied to their tuition and fees as incurred.

PAYMENT OPTIONS: Payments **must** be made through the CIBC International Student Pay system accessed at: <https://www.cbu.ca/future-students/tuition-fees/payment-options/>.

REFUND POLICY: CBU has recently updated its refund policy and it must be noted:

- 100% of a student's deposit will be returned in the case their study visa is not granted and they were not enrolled in any courses (appropriate documentation is required from the student). Please email internationalaccounts@cbu.ca to **make this request**. CBU reserves the right to contact IRCC to verify the status of a visa and/or study permit application and/or to verify the contents of a refusal letter.
- For fully accepted students arriving to CBU with a valid study permit, should you choose to withdraw from those courses, 100% of your tuition deposit is classified as non-refundable and non-transferable. Tuition deposits will automatically withheld/forfeited to CBU. Please notify internationalaccounts@cbu.ca **if you plan to withdraw from classes to ensure you are not charged additional fees**.
- For fully accepted students who enrol in courses **without final visa approval** (Approval in Principle), should your visa application be refused and you choose to withdraw after courses begin, refunds will be pro-rated based on the duration of study, and appropriate documentation will be requested from the student to verify visa refusal. The unused portion of your tuition deposit will be returned.
- Any student who enrolls in courses and then chooses to defer to a later semester is responsible for ensuring all registered courses are dropped and medical plan opt outs are completed before the deadline. Students will not be reimbursed for courses that they enrolled in after the deadline passes to drop those courses.

Please refer to the following link for the most recent information on important payment deadlines and tuition policies: <https://www.cbu.ca/future-students/tuition-fees/payment-deadlines/>.

The tuition and fees listed below are in Canadian (CAD) dollars and are an estimate of international student tuition and other related fees for a full-time student. As a part of your study permit application process, you may be required to make a deposit of your first year's fees which equal to the subtotal of the below three amounts.

Estimated Tuition 2021/22
Post-Baccalaureate Diploma in Health Care Management program
Tuition (based on 8 courses for Fall/Winter 2021/22): \$9,128CAD* International Differential: \$6,824CAD** International Medical Plan (mandatory): \$744CAD***

*Tuition does not include costs for books or supplies.

**Permanent Residents of Canada: Students registering as Permanent Residents of Canada will be charged International Differential Fees unless documentation verification has been provided to Cape Breton University. International Differential fees are mandatory for all international students.

***Our international medical and dental plan is mandatory for all students. Dependent and family coverage options are available upon request.

INTERNATIONAL STUDENT PRE-ARRIVAL CHECKLIST

YOUR EDUCATIONAL JOURNEY AT **CAPE BRETON UNIVERSITY** IS ABOUT TO BEGIN. HERE ARE SOME TIPS TO SET YOU UP FOR SUCCESS FROM DAY ONE.

Watch for your CBU Email information - You will receive an email from IT Services (helpdesk@cbu.ca) several days after your acceptance, outlining your new CBU email information. As soon as you receive this information, it's very important that you log in and check this email frequently. All future communication from CBU will be sent to your CBU email address and not to the email you used to apply.

Log into your COMPASS Account - Use your CBU email credentials received from IT Services to log in into your COMPASS student account to become familiar with the self-serve options and other features that will help you during your time at CBU.

Download your proof of payment - Your proof of payment will be available for download through your COMPASS student account within 5-7 business days approximately after your payment is made. Check out the [How-To CBU YouTube series](#) for helpful videos.

Apply for your VISA - Now that you have all of the required documents from CBU, apply for your visa. For more information on this process, [click here](#).

Book Your Advising Appointment - As a new student to CBU, it's mandatory you book an advising appointment. The team at the first year advising centre (FYAC) will help you define your academic goals, create a schedule that works for you, register your classes and everything else that's needed in order to prepare for university. To learn more and to book your appointment, visit cbu.ca/advising.

Register for courses - Once you've been advised, you can register for your courses. Browse the COMPASS student system and watch the [How-to-CBU YouTube series](#) to ensure your registration goes as planned. Once advised, we encourage you to register as soon as possible, as courses are limited.

Review Tuition & Fees - Review CBU's tuition and fees to help guide your financial planning for the upcoming year, and familiarize yourself with CBU's payment deadlines and accepted payment options at cbu.ca/tuition-fees.

Plan Accommodations -

On Campus Housing

If you require housing, our on campus residence will be a big part of your university experience. It's true when they say, CBU residence will be your new home away from home. You can apply for on-campus housing once you have been issued your CBU email address by visiting cbu.ca/residence. Please note, once you receive an offer of accommodation letter, you must submit a confirmation deposit of \$700.

Off Campus Housing

CBU is surrounded by close-knit communities that offer amenities like grocery stores, fitness centres, urgent care and pharmacies. These communities are home to local residents, and international students like yourself. Visit cbu.ca/off-campus-living to learn more about housing options.

Meet Your Classmates

Join the CBU Student Facebook Group to meet your classmates, stay up to date on important dates and exciting upcoming events.

Bookmark CBU's Important Dates Calendar

Make sure you are informed about important deadlines regarding registration, finances and more. Visit cbu.ca/important-dates.

Prepare For Week of Welcome

Week of welcome (WOW) is held at the beginning of each semester. New students are strongly encouraged to get involved and attend WOW events. Keep an eye on your CBU email account so you don't miss important information about this fun filled week or visit cbu.ca/wow.

UNIVERSITY OF CONNECTICUT

14th November 2021

To,

The Professor-Director & Registrar
MGM School of Physiotherapy
Navi Mumbai.

Subject: Request to provide attested copies of degree certificate, transcripts, and mark sheets to finalize admission to the Master of Science in Kinesiology program for Ms. Hanna Rakhangi

Respected Madam Sir,

Ms. Hanna Rakhangi, who completed her Bachelor's in Physiotherapy from MGM University has applied to the University of Connecticut (UConn) for a Master of Science degree in Kinesiology (Concentration: Exercise Science) starting Spring 2022 (i.e. January 18th 2022). I will be serving as her primary advisor for this degree. We would like to grant Hanna admission to this program for the Spring semester. However, the graduate school at UConn is unable to complete the admission procedures unless we receive attested copies of Hanna's degree certificate, transcripts, and mark sheets from MGM University.

It would be very helpful if you can kindly mail sealed, attested, hard copies to the Graduate school at the University of Connecticut at the earliest. Hanna is an international student, who will need to apply for a student (F1) visa at the US Consulate. Following receipt of the finalized admission letter from the Graduate school (this can be issued once they have confirmed the validity of all the degree-related documents), the procedures require her to go through the International Student & Scholar Services (ISSS) at UConn. The ISSS will issue a US Government approved I-20 document that will allow her to apply for the F1 visa at the US Consulate. Despite having a confirmed admission from UConn, Hanna will only be able to travel to the US if she has a valid F1 visa in time prior to the start of the semester.

Given the protracted and highly time-sensitive nature of the next set of steps required to finalize Hanna's admission to the program and ensure that she is able to get here to the US in time for the Spring 2022 semester, we would really appreciate any steps you could take to expedite the process at your end.

I thank you in advance for your cooperation and I hope we can work together to help Hanna begin her Master's program at the University of Connecticut in Spring 2022. Please do not hesitate to contact me in case of any questions.

Hanna Rakhangi
(hannarakhangl09.hr@gmail.com) Log Out
Not Hanna Rakhangi? Click here.

Please note, you must respond by the enrollment deadline date given in your decision letter (November 15, 2021). After this date, the offer will expire.

Once you have accepted enrollment, The Graduate School will review your file for official transcripts and/or degree certificates/diplomas. If your official materials have been received, we will finalize your admission and a matriculation letter will be posted to your application status portal. If official documents required for matriculation are missing, you will be notified by email.

International applicants will not receive visa documents from UConn until their admission has been finalized.

University at Buffalo

School of Public Health
and Health Professions

March 10, 2022

Dear Jalak Rishikesh Upadhyay,

After thorough review of your application materials, it is a pleasure to inform you that you have been accepted to pursue graduate study for the Master's degree in **Exercise Science**.

Your acceptance is also pending final review by the Office of International Admissions of your application and determination of your eligibility to receive the official documents necessary for a US student visa (should it be required).

The University at Buffalo reserves the right to rescind admission and revoke the I-20 Certificate of Visa Eligibility if it learns that any fraudulent documents were submitted, or if any false or misleading statements were submitted, or if any required information or documents were omitted as part of your application

To formalize your acceptance to the graduate program, please confirm your intention to attend our program by returning your signed **Statement of Intent** as soon as possible by e-mail (kmlanski@buffalo.edu). You will also receive an email notification about your acceptance directly from the application portal. **It is important that you confirm your acceptance of our program by following the instructions in that email.** If you choose not to attend the University at Buffalo, you must complete the PPHP response form indicating this. If you have not received this notice or need additional information, please contact our department at kmlanski@buffalo.edu.

The website listed below will provide very useful information and answer many of the questions you may have.

- The Graduate School (Next Steps for New Students)
 - o <http://grad.buffalo.edu/apply/enroll/nextsteps.html>

As you get excited to begin our program, you'll want to take some time to review course registration policies on the [Registrar's website](#). There are several helpful areas, including [information on graduate registration](#), as well as a [series of videos and guides](#).

It's also important to note that UB has immunization requirements for students. You can learn more about these requirements and how to provide sufficient documentation on the [Student Life Health Resources page](#). The University at

Department of Exercise & Nutrition Sciences

116 Health Tower
Buffalo, NY 14214-5003
Phone: 716-617-1113 | Fax: 716-827-0423
www.buffalo.edu/ehns

Buffalo has a variety of resources available, particularly for welcoming information for new graduate students. You can learn more about financial aid, tuition and billing, as well as general information about the graduate school, UB, and our department.

As accepted University at Buffalo students, please be aware that UB requires students to demonstrate proof of being fully vaccinated against COVID-19, including the COVID-19 vaccine booster, or receive approval for a medical or religious exemption before they can register for classes. More information on UB's COVID-19 vaccination requirement can be found on the COVID-19 Immunization Requirements webpage.

Students who receive approved medical or religious exemptions should be aware that some clinical placements may have stricter vaccination requirements than the university and do not accept UB's exemptions. In these instances, students who receive UB-approved medical or religious exemptions may not be able to complete their degree.

The Fall 2022 semester begins **Monday, August 29, 2022**. A School of Public Health and Health Professions orientation and a departmental orientation program will be scheduled in August, prior to the start of classes. More details to follow as the date draws closer.

On behalf of the faculty, we look forward to your involvement in our graduate program and I would be happy to answer any questions that may arise.

Sincerely,

Jennifer Temple, PhD
Director of Graduate Studies
University at Buffalo

Physical Therapy (Post-Prof DPT (Prior BS in PT)), DPT
Accepted (Regular)

Prachi Tokekar 9054721
B-1/805, Vikas Complex
MD Joshi Road
Meenatai Thackeray Chowk
Thane,
India

Dear Ms. Tokekar:

You will be pleased to learn. I am sure, that the Admissions Committee of the School of Allied Health Professions has accepted you for the program in Physical Therapy (Post-Prof DPT (Prior BS in PT)), DPT beginning Monday, September 26, 2022.

Once you have confirmed that you are coming, by paying your deposit, you will receive an email on how to access the "New Student Portal" which will help you complete the items required to register.

To practice physical therapy in the United States you must meet the criteria of the state in which you wish to practice. Credentials are evaluated based on the applicant's entry-level education.

Students are required to have an iPad for the courses in the orthopedic and neurology tracks as well as for testing activities in all courses. It is highly recommended that students have access to a personal computer (minimum: 800 MHz multimedia) with internet access (minimum: 56 k.b.p.s. [connected at 44+ k.b.p.s.]).

For financial assistance information, call the Loma Linda University Student Financial Aid Office directly at (909)558-4509. All questions other than financial should be directed to Sondra Caposio at (909)651-5921. Information on campus security may be accessed on the internet at www.llu.edu/llumc/security.

You must notify the Admissions Office to confirm that you are coming to LLU before you will be allowed to register. When we process your confirmation, you will be given an LLU e-mail account and you will be able to access the New Student Portal which will help you complete the items required to register.

We in the Admissions Office want to join the Dean in saying CONGRATULATIONS! We are delighted that you have been accepted to our School and look forward to having you on campus.

Sincerely yours,

Dana McCree, MS, SHRM-CP

If your offer is conditional on meeting our English Language requirements please see our website for full details of the alternative tests considered.

<https://www.gcu.ac.uk/study/internationalstudents/howtoapply/englishlanguagerequirements>

GCU offers a range of online pre-sessional English courses. Our courses help students improve their English language skills and provide expert preparation for students who are already academically qualified to start their programme with us. To apply for a Pre-sessional English course you must have a valid UKVI IELTS test result (or other language qualification which is recognised by the University), and hold a conditional offer to study with GCU. For more information and to apply for one of our online pre-sessional English courses, please see:

<https://www.gcu.ac.uk/study/internationalstudents/howtoapply/englishlanguagecourses/>

Offer:	Conditional
Fees for academic year 22/23:	£14500
Scholarship awarded: New to GCU Postgraduate Scholarship £2,000 Please note this scholarship is only available to self-funded students and applies to your first year of study only. You are deemed to be a self-funded student if you are paying your tuition fees yourself or with support from a relative or friend Self-funded students may be eligible for scholarships for each consecutive year of study of this programme. For further information please visit the scholarships section of our website.	£ 2000
Total fees due for academic year 22/23:	£ 12500

This offer is subject to you meeting the necessary UK Government (UKVI) immigration requirements for international students. UKVI rules are complex and strict with regards to whether a student visa application can be made in the UK or out of the UK.

For further advice on this please contact the GCU Visa, Immigration, Support and Advice Team by emailing visa@gcu.ac.uk.

This offer is made on the understanding that in accepting it you undertake to observe the Ordinances and Regulations of the University and to comply with such other rules which the University may make for its students from time to time. You can read about student terms and conditions here: <http://www.gcu.ac.uk/student/about/regulations>. You should note that the University has the right to withdraw an offer of a place after it has been made due to circumstances beyond its control. The University's programmes are subject to a continuous process of review. For more information on this please see: <http://www.gcu.ac.uk/student/regulations/changesandcancellationtoprogrammes/>.

The University's full terms and conditions are available on our website: www.gcu.ac.uk/termsandconditions.

If you have disclosed a disability on your application form the University's Disability Team will contact you in due course to discuss any support you may require.

If you have applied for other programmes for which the University has not yet responded, your application is still under consideration and you will be informed of the outcome as soon as a decision has been made.

Next Steps

Please log onto your [applicant portal](#) to accept this offer within the next 30 days.

By accepting this offer of study you confirm that you have read and understood [Glasgow Caledonian University's Student Terms and Conditions](#).

To secure your place of study on the programme you must provide evidence that you have met your conditions of offer.

Please note that all offers for programmes of study at Glasgow Caledonian University are sent electronically so you will not receive an offer by post.

We look forward to welcoming you as a student at Glasgow Caledonian University.

Yours sincerely,

Admissions and Enquiries Service

Dear Hricha Dileep,

Conditional Offer Letter

Thank you for your application to the University of Central Lancashire (UCLan). We are delighted to make you a conditional offer for the following course, commencing 12 September 2022:

Course Title:	Master of Science in Sports Medicine
RQF Level:	Level 7
Start date:	12 September 2022 Completion date: 12 October 2023
Point of entry:	Year 1
Mode of study:	Full time
University Application ID:	G21018507
Nationality:	India
Academic Conditions:	Submission of official transcript and certificate of Bachelor of Physiotherapy with an overall 58.5%, Subject to passing the interview. Interview to be arranged by immediately emailing the academic tutors: Russell Hitchen RHitchen@uclan.ac.uk . Please note a satisfactory In Country Police Check and enhanced DBS Check will be required at enrolment.
Financial conditions:	The Net Tuition Fee payable is £13500. The deposit payment you are required to pay must be equivalent to 50% of the Net Tuition Fee or you must provide evidence of sponsorship. A reduced deposit of £1000 applies to students who have successfully completed a programme of study at the University of Central Lancashire or UCLan ONCAMPUS.
Other conditions:	The deposit must be paid by 31 July 2022

This offer has been made on the basis of the information provided with your application form. Your CAS letter will be forwarded once you have met any academic and financial conditions. On your arrival to the University you will be required to produce a valid visa allowing you to remain in the UK while studying at the University of Central Lancashire. Please note you will not be able to enrol until this has been seen by the University.

What to do next

We very much hope that you want to take up the offer of a place and look forward to welcoming you to the University. For more information please visit our website www.uclan.ac.uk/international-students

How much will my course cost?

The tuition fee includes all course costs that are essential for you to complete the course. Please see the attached document 'Standard Additional Costs' for costs over and above the tuition fees which are optional and/or are costs that do not relate to the course of study. These may be costs you incur on top of the total course cost set out below.

Postgraduate Masters Taught International Conditional Offer

Miss Arya Vinayak Savadi

Sr. No	Please upload the following documents at the time of filling up e-admission form
1	PHOTO IDENTITY PROOF (AADHAR CARD,PASSPORT,VOTERS ID,PAN CARD)
2	10th MARKSHEET
3	12th MARKSHEET

Admission Offer Letter for Master of Physiotherapy, Mumbai campus, Batch 2022

NMIMS Application ID : SOSMPT-202200042

NAME : Smerra Cardoza

Student Number	Merit No.	Campus	Status	Fees Payable (First year annual fees in Rs)
00000616274	2	Mumbai	Selected	Rs.3,50,000/-

* This offer is subject to fulfilment of eligibility criteria/s as mentioned in the Admission Information Handout.

Dear Candidate,

Congratulations!

We wish to inform you that you have qualified for admission to the Master of Physiotherapy, Mumbai campus, Batch 2022. You will be allotted a provisional admission based on your merit ranking and preference

given. Please confirm your acceptance of admission offer within given timeline by clicking on Accept offer & completing all the admission formalities.

Candidate has to check dashboard for admission offer letter. Further, confirmation does not necessarily mean

final admission or seat is reserved. Please upload all the required documents while filling up the e-admission form, ensure have pay the full course fees before the given timeline.

You are requested to complete your admission process by filling up e-admission form and uploading required documents within the given timeline i.e. between **13.07.2022 to 18.07.2022** and fees payment till **19.07.2022**.

Only those candidates who complete the process by paying fees will be admitted to the program.

If you do not accept the admission offer within the given time limit, it will be presumed that you are not interested in joining the course and this offer of admission will stand withdrawn automatically.

The provisional admission will be confirmed after the candidate submits all the required documents as given below and the same has been verified and found appropriate by the NMIMS Admissions team.

Sr. No	Please upload the following documents at the time of filling up e-admission form
1	PHOTO IDENTITY PROOF (AADHAR CARD,PASSPORT,VOTERS ID,PAN CARD)
2	10th MARKSHEET
3	12th MARKSHEET

Number of the graduates in the preceding academic year who have had progressed to higher education

Year	Name (s) of students progressed into higher education	Programme graduated from	Department graduated from	Name of institution joined	Name of Programme admitted to
2021	Ms. Sharvari Sardeshmukh	BPT	MGM School of Physiotherapy, Navi Mumbai	Manipal Academy of Higher Education	MPT Musculoskeletal Sciences- Manual therapy
2021	Ms. Rachel Lobo	BPT	MGM School of Physiotherapy, Navi Mumbai	Manipal Academy of Higher Education	MPT in Women's Health
2021	Ms. Ovi Ghadigaonkar	BPT	MGM School of Physiotherapy, Navi Mumbai	Sheffield Hallam University	MSc Specialist Physiotherapy Practice
2021	Mr. Samruddha Bhamankar	BPT	MGM School of Physiotherapy, Navi Mumbai	Sheffield Hallam University	MSc Specialist Physiotherapy Practice
2021	Ms. Shweta Hedukar	BPT	MGM School of Physiotherapy, Navi Mumbai	Auckland University	Postgraduate Diploma in Health Science in Rehabilitation

PROVISIONAL ADMISSION ORDER

This is to certify that the following candidate had applied and appeared in Manipal Entrance Test MET 2021 for admission to Master of Physiotherapy (MPT) courses. Based on MET 2021 Rank she/he has been selected for admission at our constituent institution for the academic year 2021-22.

Name:	SARDESHMUKH SHARVARI VIVEK	APPLICATION NO:	121262459
Rank:	38	FEES:	392000 INR
COURSE ADMITTED:	MPT Musculoskeletal Sciences - Manual Therapy	DATE OF ADMISSION:	09/09/2021
COLLEGE:	MCHP, Manipal		

You should submit the following original documents at the time of Physical reporting for MPT Musculoskeletal Sciences - Manual Therapy Branch at MCHP, Manipal

- UG marks card issued by the recognized University
- Provisional/Degree certificate
- Conduct / Character Certificate issued by school / college
- Internship Completion Certificate
- Aadhaar Card of the Candidate
- Pan Card of the Parent(s)
- 2 recent passport size photographs

PGK

Director (Admissions), MAHE Manipal
Dated: 09-09-2021

ADVISORY: All the admissions made are subject to fulfillment of the eligibility conditions by the candidate. During active verification, if it is found at a later stage, that the candidate has given false information/certificate or is found to have concealed some information, his/her admission is liable to be cancelled without any notice. The jurisdiction for dispute, if any, shall be at Udupi Court only.

MANIPAL

ACADEMY of HIGHER EDUCATION

(Institution of Excellence Deemed to be University)

ADMISSION ORDER

This is to certify that the following candidate had applied and appeared for our All India Entrance Test for admission to MPT courses. Based on the All India Merit she/he has been provisionally selected for admission at our constituent institution for the academic year 2021-22.

NAME	: LOBO RACHELLE ROCKY	ROLL NO.	: 211139151
FEES	: INR 3,92,000/-	RANK	
CATEGORY	: GENERAL	DATE OF ADMISSION	: 01/10/2021
COURSE ADMITTED	: MPT (OBG) - Gynecological Physiotherapy		
COLLEGE	: MCHP, Manipal		: 05/11/2021

Documents Submitted for verification during admission.

DOCUMENTS SUBMITTED FOR VERIFICATION

CONDUCT CERTIFICATE
PHOTOGRAPHS
FEES
MARKS CARD/S
DEGREE CERTIFICATE
INTERNSHIP CERTIFICATE

The candidate is required to report to the college on or before the date indicated above. This Admission Order will serve as provisional ID card till the original ID card is issued.

Note : Please note that Subsequent annual course fees must be paid on or before the deadline, specified by the respective Institute.

P. G. Srinivas

Director (Admissions)

Dated : 05/11/2021

All admissions are subject to fulfillment of all the eligibility conditions by the candidate. If it is found at a later stage, during active verification, that the candidate has given false information / certificate or is found to have concealed some information, his/her admission will be canceled without any notice. Jurisdiction for disputes, if any shall be at Manipal court, Karnataka state only.

Dear Miss Ovi Satyawan Ghadigaonkar

Course: MSc Specialist Physiotherapy Practice
Month: January
Year: 2022

We are pleased to make you an unconditional offer of a place on the above course. Please note that this offer letter will expire on 31st October 2021. If you wish to accept this offer you must return the enclosed reply slip before that date. No student will be allowed to join the course after the start date without the agreement of the course leader.

ATTENDANCE MODE:	Full-Time
START DATE:	January 2022
END DATE:	June 2023
COURSE DURATION:	18 months
FEES FOR ACADEMIC YEAR 2021/2:	16070 GBP
FEE DISCOUNT **:	3000 GBP
TOTAL FEE PAYABLE:	13070 GBP

For fees purposes you have been classed as an international student and this status will usually stay with you for the duration of the course.

Gamification of health professions education: a systematic review

A. E. J. van Gaalen¹ · J. Brouwer² · J. Schönrock-Adema³ · T. Bouwkamp-Timmer³ · A. D. C. Jaarsma³ · J. R. Georgiadis¹

Abstract

Gamification refers to using game attributes in a non-gaming context. Health professions educators increasingly turn to gamification to optimize students' learning outcomes. However, little is known about the concept of gamification and its possible working mechanisms. This review focused on empirical evidence for the effectiveness of gamification approaches and theoretical rationales for applying the chosen game attributes. We systematically searched multiple databases, and included all empirical studies evaluating the use of game attributes in health professions education. Of 5044 articles initially identified, 44 met the inclusion criteria. Negative outcomes for using gamification were not reported. Almost all studies included assessment attributes ($n=40$), mostly in combination with conflict/challenge attributes ($n=27$). Eight studies revealed that this specific combination had increased the use of the learning material, sometimes leading to improved learning outcomes. A relatively small number of studies was performed to explain mechanisms underlying the use of game attributes ($n=7$). Our findings suggest that it is possible to improve learning outcomes in health professions education by using gamification, especially when employing game attributes that improve learning behaviours and attitudes towards learning. However, most studies lacked well-defined control groups and did not apply and/or report theory to understand underlying processes. Future research should clarify mechanisms underlying gamified educational interventions and explore theories that could explain the effects of these interventions on learning outcomes, using well-defined control groups, in a longitudinal way. In doing so, we can build on existing theories and gain a practical and comprehensive understanding of how to select the right game elements for the right educational context and the right type of student.

Keywords Gamification · Serious games · Simulation · Game-based learning · E-learning · Computers · New technology · Instructional methods

Introduction

Gamification is rapidly becoming a trend in health professions education. This is at least suggested by the number of peer-reviewed scientific publications on gamification in this field, which has increased almost tenfold over the past 5 years. At the same time, there seems to be little shared understanding of what constitutes gamification and how this concept differs from other, related concepts. Furthermore, according to business and education literature, there is still no clear understanding of when and why gamification can be an appropriate learning and instructional tool (Dicheva et al. 2015; Landers et al. 2015). The purpose of this systematic review was to provide a comprehensive overview of the use and effectiveness of gamification in health professions education and to add to the existing research on gamification in several ways. To this end, we first clearly and carefully distinguished gamification studies from studies investigating other types of game-based learning. Then, we summarized the contexts in which the gamification interventions took place and their underlying theories. Finally, we analysed the effects of individual game elements by using a conceptual framework that was originally developed by Landers et al. to structure game elements in other, non-educational domains (Landers 2014).

What is (or is not) gamification?

The use of game design elements to enhance academic performance (e.g., learning attitudes, learning behaviours and learning outcomes) is known as gamification or ‘gamified learning’ (Deterding et al. 2011). Due to the rapidly growing body of information and proliferation of different types of game-based learning (e.g. serious games), authors tend to use different terms for the same concept, or the same term for different concepts (for examples see Amer et al. 2011; Borro-Escribano et al. 2013; Chan et al. 2012; Chen et al. 2015; Frederick et al. 2011; Gerard et al. 2018; Lim and Seet 2008; Stanley and Latimer 2011; Webb and Henderson 2017). In part, this indiscriminate use of terms may be caused by the fact that in the literature of play and gaming there is neither consensus on what a ‘game’ is conceptually (Arjoranta 2014; Caillois 1961; Huizinga 1955; Ramsey 1923; Salen and Zimmerman 2004; Suits 1978; Sutton-Smith 2000), nor on what the essential elements of a game are (Bedwell et al. 2012; Klabbers 2009).

Since there was a lack of uniformity in the definitions of the main forms of game-based learning—gamification, serious games, and simulations—we chose well-known, academically accepted definitions to distinguish among the three concepts that guided the search strategy and enabled selection of articles relevant for this systematic review. First, although various definitions of *gamification* can be found in various fields of literature such as business, education and information technology (Blohm and Leimeister 2013; Burke 2014; Burkey et al. 2013; De Sousa Borges et al. 2014; Domínguez et al. 2013; Gaggioli 2016; Hamari et al. 2014; Hsu et al. 2013; Huotari and Hamari 2012, 2017; Kumar 2013; Muntean 2011; Perrotta et al. 2013; Robson et al. 2015; Simões et al. 2013; Warmelink et al. 2018; Zuk 2012), a commonly applied definition is that of Deterding et al. (De-Marcos et al. 2014; Deterding et al. 2011; Dicheva et al. 2015; Lister et al. 2014; Mekler et al. 2017; Sailer et al. 2017; Seaborn and Fels 2015). He and his colleagues define gamification as the use of game elements (e.g. points, leader boards, prizes) in non-gaming contexts (Deterding et al. 2011). This implies that, even though game elements are used in a certain context (such as education), there should be *no intention of creating a game*. Second, this intention is different from the intention in serious games, which are defined as *games* (in their various forms) in which education is the primary goal, rather than entertainment (Susi et al. 2007). Serious

games address real-world topics in a gameplay context. In contrast to gamification, serious game designers' *intention is to create a game*. Therefore, the characteristic difference between gamification and serious games lies in their design intention. Third, a simulation can be defined as a situation in which a particular set of conditions is created artificially in order to study or experience something that could exist in reality (Oxford English Dictionary 2017). Simulations provide instant feedback on performance, which is delivered as accurate and realistic as possible in a safe environment (Alessi 1988; Vallverdú 2014). Simulations do not need game elements like a scoring system and a win/lose condition. However, game-design techniques and solutions can be employed to create the simulated reality and the experience of something real (Alessi 1988; Jacobs and Dempsey 1993). Simulations are therefore best seen as learning activities that necessarily carry some game intention, but do not use game elements. By explicitly adding the designers' intentions to the chosen definitions for these three types of game-based learning, we established criteria for distinguishing between them and guiding study inclusion and analysis in this systematic review.

Game elements and game attributes

In academic literature, various game elements have been proposed to improve the learning experience in gamification, e.g. rewards, leader boards and social elements (Petrucci et al. 2015; Van Dongen et al. 2008). In addition, grey literature also lists vast amounts of different types of game elements (Marczewski 2017), which—though lacking an academic framework or basis—have been used in previous research (Wells 2018). Different terminology is used for the same type of game-elements; for example, badges (Davidson and Candy 2016), donuts (Fleiszer et al. 1997) and iPads (Kerfoot and Kissane 2014) are all types of rewards. In a recent systematic review on serious games (and gamification), Gorbanev et al. (2018) ascertained a lack of consensus regarding terminology used in games and welcomed any effort to reduce this terminological variety. Therefore, to make the results of gamification research in health professions education more comprehensive and transferable with regard to the game elements involved, we applied a conceptual framework of aggregated game elements that was originally proposed by Bedwell et al. (2012) and Wilson et al. (2009), and later modified by Landers (2014) (Table 2; “Appendix”). This framework posits that all existing game elements can be described and structured into nine attributes, while avoiding significant overlap between these attributes (Bedwell et al. 2012). The following game attributes are included in the framework: action language, assessment, conflict/challenge, control, environment, game fiction, human interaction, immersion and rule/goals. Instead of only focusing on specific game elements, we chose to use this framework to identify whether there is a *class* of game elements that hold the highest promise of improving health professions education. In doing so, we added a new perspective to existing reviews on gamification in higher (Caponetto et al. 2014; De Sousa Borges et al. 2014; Dichev and Dicheva 2017; Dicheva et al. 2015; Faiella and Ricciardi 2015; Nah et al. 2014; Subhash and Cudney 2018) and health professions education (Gentry et al. 2016; McCoy et al. 2016). In addition, we attempted to uncover the theory underpinning the gamified interventions reported in this systematic review. In doing so, we responded to the call for more theory-driven medical education research (Bligh and Parsell 1999; Bligh and Prideaux 2002; Cook et al. 2008), which we felt should also apply to research on game-based learning in general and gamification in particular (Caponetto et al. 2014; De Sousa Borges et al. 2014; Faiella and Ricciardi 2015; Gentry et al. 2016; McCoy et al. 2016; Nah et al. 2014).

This study, therefore, was intended to contribute to the literature (including existing systematic reviews) in several ways: (1) by creating a sharper distinction between gamification

and other forms of game-based learning; (2) by using a more generic way to structure game elements; and (3) by responding to the call for more theory-driven medical education research.

In sum, this systematic review aimed to provide teachers and researchers with a comprehensive overview of the current state of gamification in health professions education, with a particular focus on the effects of gamification elements on learning, the underlying mechanisms and considerations for future research.

We formulated five principal research questions that guided this systematic review:

1. What are the contexts in which game elements are used in health sciences education?
2. What game elements are tested and what attributes do they represent?
3. Is there empirical evidence for the effectiveness of gamified learning in health professions education?
4. What is the quality of existing research on gamified learning in health professions education?
5. What is the theoretical rationale for implementing gamified learning in health professions education?

Methods

We conducted a systematic review in accordance with the guidelines of the Associations for Medical Education in Europe (AMEE) (Sharma et al. 2015).

Search strategy

We systematically searched the literature for publications on the use of game elements in health professions education. First, we consulted two information specialists with expertise in systematic reviews to assist in developing the search strategy. Together, we identified keywords, key phrases, synonyms and alternative keywords for gamification as well as game elements and attributes that were derived from a list of 52 game elements and Landers' framework. Some of the 52 game elements and attributes were omitted from the search as they were too broad and generated a huge amount of hits (e.g., 'environment', 'scarcity', 'consequences'), irrelevant hits or as they did not generate any hits (e.g. 'Easter eggs'). Based on these main keywords we formulated the search strategy for PubMed.

The first author (AvG) translated the PubMed search strategy for use in other databases and then systematically searched eight databases: Academic Search Premier; CINAHL; EMBASE; ERIC; Psychology and Behavior Sciences Collection; PsychINFO, PubMed and the Cochrane Library. The search was performed in April 2018. We used the following search terms: (gamif* OR gameplay* OR game OR games OR gamelike OR gamebased OR gaming OR videogam* OR edugam* OR flow-theor* OR "social network*" OR scoreboard* OR leveling OR levelling OR contest OR contests OR badgification) AND (medical educat* OR medical train* OR medical field training OR medical school* OR medical Intern* OR medical residen* OR medical student* OR dental student* OR nursing student* OR pharmacy student* OR veterinary student* OR clinical education* OR clinical train* OR clinical Intern* OR clinical residen* OR clinical clerk* OR teaching round* OR dental education* OR pharmacy education* OR pharmacy residen* OR nursing education* OR paramedics education* OR paramedic education* OR paramedical education* OR physiotherapy education* OR physiotherapist education* OR emergency medical services educat* OR curricul* OR veterinary education OR allied health personnel).

Inclusion criteria

We included peer-reviewed journal articles on the use of gamification or game elements in education for (future) health professionals. We defined health professionals as individuals oriented towards providing curative, preventive and rehabilitative health care for humans as well as animals (e.g. individuals working in the fields of medicine, nursery, pharmacology and veterinary medicine). Real-life contexts (e.g. lectures and practicals) as well as digital contexts (e.g. mobile applications or computer software) were eligible for inclusion if they incorporated gamified learning to improve (future) health professionals' (bio)medical knowledge or skills. We included quantitative as well as mixed-method studies.

Exclusion criteria

We excluded articles that (a) only described the development of gamified learning activities in educational contexts without reporting the effects of their interventions, (b) only focused on qualitative data, (c) focused on serious games, (d) focused on patient education, (e) focused on simulations, except when the focus was on the effects of gamification in simulations (gamified simulations), (f) described adapted environments such as game-shows (e.g., "jeopardy" or "who wants to be a millionaire") and board-games (e.g., "monopoly" or "trivial pursuit") which we considered to be game contexts, and (g) were not written in Dutch or English.

Although the term "gamification" has been used since 2008 (Deterding et al. 2011; Szyma 2014), we did not set a timeframe for our search since individual game elements were used in a non-game context long before the term "gamification" was coined and appeared in scientific literature.

Study selection

After retrieving the search results from different databases, AvG removed the duplicates and uploaded the remaining articles to Rayyan, a mobile and web-based application developed for systematic reviews (Ouzzani et al. 2016). Then, AvG and JB independently screened all titles and abstracts for preliminary eligibility. In case of uncertainty, the articles in question were retained. Subsequently, AvG read the full text of all retained articles to determine eligibility for inclusion in this systematic review. In case of uncertainty, articles were marked for discussion and independently screened by all researchers. To ensure consistency in the application of selection criteria, we undertook double screening on a 10% random sample of the excluded articles as a form of triangulation. The researchers met at a regular basis to discuss challenges, uncertainties and conflicts with respect to article selection. Disagreement between researchers was resolved by discussion.

In addition, we hand-searched the reference lists of included articles and citations for additional articles.

Data extraction and quality assessment processes

We extracted the following data from the included articles using the extraction methods described in the AMEE guideline (Sharma et al. 2015):

1. General information (e.g., author, title and publication year), participant characteristics (including demographics and sample size) and characteristics of the educational content (including topic and the context in which the topic is presented, e.g. digital or analogue and type of study or profession);
2. Intervention (type of game element(s) and game attributes used);
3. Study outcomes (including satisfaction, attitudes, perceptions, opinions, knowledge, behaviour and patient outcomes);
4. Study quality (see below);
5. Theoretical frameworks used to design or evaluate gamified educational programs.

We used the Medical Education Research Study Quality Instrument (MERSQI) to measure the methodological quality of the selected studies (Reed et al. 2007). MERSQI is designed for measuring the quality of experimental, quasi-experimental and observational studies and consists of ten items covering six domains (study design, sampling, type of data, validity of evaluation instrument, data analysis, and outcomes). The maximum score for each domain is three. Five domains have a minimum score of one, resulting in a range of 5–18 points. We calculated individual total MERSQI scores, mean scores and standard deviations.

To provide a clear overview of the current state of studies on gamification in health sciences education, we used the framework for classifying the purposes of research in medical education proposed by Cook et al. (2008). They distinguished studies as focusing on description, justification and clarification. Description studies make no comparison, focus on observation and describe what was done. Justification studies make comparisons between interventions, generally lack or do not present a conceptual framework or a predictive model and describe whether the new intervention worked. Clarification studies apply a theoretical framework to understand and possibly explain the processes underlying the observed effects, describe why and how interventions (i.e. gamification) work and illuminate paths of future directions (Cook et al. 2008).

We classified all included studies as descriptive, justification or clarification.

Results

The study selection process is shown in Fig. 1. Our search identified 5044 articles, of which 38 met the inclusion criteria on the basis of full-text screening. Uncertainty about inclusion or exclusion of 20 other articles (Bigdeli and Kaufman 2017; Boysen et al. 2016; Campbell 1967; Courtier et al. 2016; Creutzfeldt et al. 2013; Dankbaar et al. 2016, 2017; Hudon et al. 2016; Inangil 2017; Kaylor 2016; Leach et al. 2016; Lim and Seet 2008; Mishori et al. 2017; Montrezor 2016; Patton et al. 2016; Richey Smith et al. 2016; Sabri et al. 2010) were resolved by consensus discussion among all members of the research team, which yielded three additional studies. Of the 17 studies excluded in this step, one was excluded because no consensus could be reached (Mullen 2018), the others did not meet the inclusion criteria. Hand search of references and citations yielded three additional studies. A total of 44 studies were eligible for inclusion in our systematic review (Table 1).

As a form of triangulation and to assess the level of agreement between the researchers, a random sample of 10% of the excluded articles was double screened by the other members of the team. The overall agreement between JB, JSA, DJ and JRG was 94%. The

disagreements about the remaining 6% were resolved by discussion, which led to the conclusion that all studies in the sample had rightly been excluded from the review.

Educational context and student characteristics

The majority of the studies were conducted in the USA ($n=20$) or Canada ($n=8$). Most studies involved undergraduate ($n=15$) and postgraduate medical students (e.g. residency) ($n=15$), followed by nursing ($n=7$), dental ($n=1$), pharmacy ($n=1$), osteopathic ($n=1$), allied health ($n=1$), speech language and hearing pathology students ($n=1$) or a mix of students of different professional courses ($n=3$) (Table 1). From the gamification studies in post-graduate medical education, the number of studies in surgical specialties ($n=6$) equalled the number of studies in other medical specialties ($n=6$). Compared to analogue gamified learning activities ($n=14$), twice as many digital learning activities ($n=28$) were identified. An example of gamification in a digital environment was a web-based platform where gamification elements were inspired by the Tetris game (Lin et al. 2015). The goal of that pilot study was to collect validity evidence for a gaming platform as training and assessment tool for surgical decision making of general residents. An example of an analogue gamified learning activity was the use of a board game for undergraduate medical students. The game consisted of a board depicting a mitochondrion and cards representing components of the mitochondrial electron transport chain that had to be put in the right order. The goal of that study was to assess the effect of this active learning activity (Forni et al. 2017).

Game attributes

We categorized the identified game elements into the game attributes for learning of Landers' framework (Landers 2014).

In most studies, the game attributes "assessment" ($n=40$) and/or "conflict/challenge" ($n=27$) (Table 1) were embedded in the learning environment. Intervention studies with assessment attributes particularly used scoring ($n=26$) and rewards ($n=10$). Scoring mostly entailed keeping record of points earned for completing a certain task or answering a question correctly. Rewards varied considerably and included digital trophies, donuts, iPads and money. Intervention studies with the conflict/challenge attribute particularly used competition ($n=21$).

Combinations of game attributes were most common in our review ($n=36$). Assessment and conflict/challenge attributes were often applied together ($n=24$), predominantly in the form of leader boards displaying rank orders of participants, thus enabling comparison of students' achievements. Compared to the other attributes, assessment attributes were more often examined separately ($n=6$), followed by "conflict/challenge" ($n=1$) and "human-interaction" ($n=1$). The other attributes were always studied in combination with other game attributes (Table 1).

Effects of gamified learning interventions

We did not find any negative outcome of the use of gamification in health professions education. All studies reported positive results compared to a control group not using gamification, or similar results for both groups (Table 1).

Fig. 1 Flow chart of the article selection process

Multiple studies reported that the (frequently used) combination of assessment and conflict/challenge game attributes could increase the use of gamified learning materials ($n=8$), strengthen satisfaction ($n=16$) or improve learning outcomes ($n=11$) (Table 1). Whether or not increased use ensured improved learning remained uncertain. For instance, two comparable studies using assessment and conflict/challenge attributes each reported increased use of simulators, but did not investigate or report learning outcomes (Kerfoot and Kissane 2014; Van Dongen et al. 2008). Two different studies in which the same gamified elements were used also found that the use of simulators had increased (El-Beheiry et al. 2017; Petrucci et al. 2015), but only one study found improved performance (El-Beheiry et al. 2017).

One study focused on the level of health care outcome (Kerfoot et al. 2014). This randomized controlled trial had the highest MERSQI score and investigated whether gamification in an online learning activity could improve primary care clinicians' hypertension management. The intervention group participated in a gamified, spaced learning activity comprising three game elements: competition, space-learning and scoring. The control group received the same spaced education through online postings. The gamification

intervention was associated with a modest reduction in numbers of days to reach the target blood pressure in a subgroup of already hypertensive patients. That study did not uncover the underlying mechanisms of how gamification supported these positive patient outcomes. A proper theory was also lacking or not presented. Because of the study design, we were not able to disentangle whether competition, spaced learning, scoring, or a combination of them had caused the effect. In fact, adopting and testing a combination of game elements without being able to disentangle their individual effects on learning is a quite general phenomenon in gamification research in health professions education.

Contextual differences and effects of game attributes

We found that certain game attributes were more often applied to a particular context. For instance, a combination of conflict and challenge attributes was relatively more often applied to digital contexts (24 out of 28 digital studies) than to analogue contexts (3 out of 14 analogue studies). A combination of conflict and challenge attributes was also more often chosen by researchers from Europe (6 out of 8 European studies) and the USA (17 out of 21 USA studies) than by researchers from Canada (3 out of 8 Canadian studies). We found differences in use of a combination of conflict and challenge attributes between undergraduate and postgraduate settings (9 out of 15 undergraduate studies and 14 out of 15 postgraduate studies used such a combination). Yet, we could not find a direct indication that the effects of game attributes were dependent on these contextual factors.

Quality of the current gamified learning research

The total MERSQI scores of the 44 studies included in our review ranged between 5 and 17 points (mean 9.8 points, SD 3.1; see Table 1).

Descriptive studies

Most of the included studies ($n=25$; Table 1) were descriptive in nature in such sense that they focused on observation and described what was done, without using comparison groups. These descriptive studies were typically low in MERSQI scores (mean 8.3, SD 2.3) and only contained post-intervention measurements.

Justification studies

In twelve studies (Table 1), groups involved in gamified learning sessions were compared with control groups to investigate whether gamification enhances learning outcomes. Almost half of these justification studies were confounded in such a way that the outcomes could not be attributed to the gamification intervention under study, because the groups not only differed in treatment, but also with respect to other aspects (Table 1; marked with asterisks). Comparing a group of participants who took part in a gamified learning activity with a group of participants who did not take part in any learning activity is an example of a confounded comparison (Adami and Cecchini 2014). The remaining seven justification studies, which were without confounds, showed an average MERSQI score of 12.5 (SD 2.6), which was the highest study quality in our sample.

Clarification studies

In seven studies, theoretical assumptions were affirmed or refuted, based on the results of the study (Table 1). Three of these studies had a design with a control group (Butt et al. 2018; Van Nuland et al. 2015; Verkuyl et al. 2017), out of which two were confounded by poor design (Table 1; asterisks). The other four studies did not include control groups. With an average MERSQI score of 11.1 (SD 3.5), the seven clarification studies were of medium quality.

The use of theory

The hallmark of clarification studies is the use of theory to explain the processes that underlie observed effects (Cook et al. 2008). In most studies ($n=5$), multiple game attributes were related to a chosen theory. In three out of the seven clarification studies, the authors referred to Experiential Learning Theory (El Tantawi et al. 2018; Koivisto et al. 2016; Verkuyl et al. 2017) and in each of the remaining four studies the authors referred to a different theory: Reinforcement Learning Theory (Chen et al. 2017), Social Comparison Theory (Van Nuland et al. 2015), Self-Directed Learning (Fleiszer et al. 1997) and Deliberate Practice Theory (Butt et al. 2018). Each theory will be discussed briefly below, with specific attention to how these theories can be linked to game elements.

Experiential Learning Theory states that concrete experience provides information that serves as a basis for reflection. After this reflection, learners think of ways to improve themselves and, after this abstract conceptualization, they will try to improve their behaviours accordingly (Kolb et al. 2000; Kolb and Boyatzis 2001). Some researchers assumed that by gamifying their courses, students' experiences and, consequently, their understanding (through reflection and conceptualization) might be enhanced. For instance, dentistry students' experiences of being a part of an exciting narrative in an academic writing course, including game elements like role-playing, feedback, points, badges, leader boards and a clear storyline, were assumed to improve their performance (El Tantawi et al. 2018).

Self-Directed Learning is the process of diagnosing one's own learning needs, formulating one's own learning goals and planning one's own learning trajectory. The increased autonomy in the pursuit of knowledge is assumed to result in higher motivation (Knowles 1980). Gamification that was inspired by Self-Directed Learning involved quizzes that were fully developed by small groups of medical students or residents about a self-chosen subject of their surgical intensive care unit rotation, right answers were rewarded with donuts (Fleiszer et al. 1997).

Deliberate Practice Theory is based on engaging already motivated students to become experts via well-defined goals, real world tasks and immediate and informative feedback (Butt et al. 2018; Ericsson et al. 1993). Deliberate Practice Theory was applied to develop an educational tool using game-elements (such as points and time constraints) and virtual reality to practice urinary catheterization in nursing education (Butt et al. 2018).

Two studies stood out for the way in which they used theory to explain the effect of a single game attribute. Van Nuland et al. (2015) used social comparison theory to explain the effect of competition and Chen et al. (2017) used Reinforcement Learning Theory to explain the effect of direct feedback in digital learning.

According to the Social Comparison Theory, social comparison is a fundamental mechanism for modifying judgment and behaviour through the inner drive individuals have to gain accurate self-evaluations (Corcoran et al. 2011; Festinger 1954). Gamification based on Social Comparison Theory involved the introduction of leader boards. According to

Van Nuland et al. improved performance would be achieved by letting students identify discrepancies in their knowledge through upward comparison or validate their assumptions on knowledge through downward comparison (Van Nuland et al. 2015).

Reinforcement Learning Theory relates to a form of behavioural learning that is dependent on rewards and punishments (Börgers and Sarin 1997). If a desired behaviour or action is followed by a reward, individuals' tendency to perform that action will increase. Punishment will decrease individuals' tendency to perform that action. The gamification study based on this theory assumed that rewards and punishments (e.g. receiving points or negative, red-coloured responses, respectively) would improve the subjective learning experience and help learners acquire implicit skills in radiology (Chen et al. 2017).

Although different theories predicted the effectiveness of different mechanisms to improve performance, a common assumption seemed to be that the use of game attributes would improve learning outcomes by changing learning behaviours or attitudes towards learning.

Discussion

The purpose of this systematic review was to investigate the current evidence for using gamification in health profession education and understand which mechanism are involved and how they can explain the observed effects.

The majority of the included studies—only quantitative and mixed-methods studies—were performed in medical schools in the USA and Canada, and used digital technologies to develop and implement gamified teaching and learning. No negative effects of using gamification were observed. Almost all interventions included assessment game attributes, mostly in combination with conflict/challenge attributes. Especially this combination of attributes was found to increase the use of learning materials, sometimes leading to improved learning outcomes. Our review revealed a relatively small number of studies involving high-quality control groups, which limited recommendations for evidence-based teaching practice. In addition, high-quality clarification studies on how underlying mechanisms could explain the observed effects are uncommon in gamified learning research. In most studies, an explicit theory of learning was not presented and an appropriate control group was lacking. Of the few studies that did refer to theory, most researchers essentially proposed that the game element(s) under study would strengthen attitudes or behaviours towards learning, which in turn might positively influence the learning outcomes.

Empirical evidence for using gamification

At first glance, it may seem that improved or unchanged academic performance (e.g. learning behaviours, attitudes towards learning or learning outcomes) can justify the use of gamification in health professions education. However, caution should be taken in drawing strong conclusions, because most studies were descriptive, (confounded) justification or (confounded) clarification studies, or clarification studies that did not include control groups (total $n=36$). In sum, despite the apparent encouraging early results, it remains unclear whether the reported effects on academic performance can be solely attributed to the gamified interventions due to the absence of (non-confounded) control-groups. The remaining eight studies included in our study were well-controlled studies using assessment and conflict/challenge attributes, so these study results could be interpreted with more confidence. The use of the learning material was increased in all intervention groups compared

to their control groups (El-Beheiry et al. 2017; Kerfoot and Kissane 2014; Kerfoot et al. 2014; Petrucci et al. 2015; Scales et al. 2016; Van Dongen et al. 2008; Van Nuland et al. 2015; Worm and Buch 2014), often in combination with improved learning outcomes (El-Beheiry et al. 2017; Kerfoot et al. 2014; Scales et al. 2016; Van Nuland et al. 2015; Worm and Buch 2014). Using conflict/challenge and assessment attributes, especially competition and scoring, therefore seemed to positively influence learning. The apparently consistent effect of gamification is promising but also warrants further investigation. First, gamification research is still much in its infancy, it should be recognized that positive results may have been overreported due to a publication bias (Kerr et al. 1977; Møllerand and Jennions 2001) and that negative results remain un- or underreported. Second, so far, mainly small-scale and pilot studies have been conducted, which is not just typical of health professions education but also applies to areas where gamification is already more often used, such as computer sciences (Dicheva et al. 2015). Third, it is important to realise that gamification can also have unexpected or unwanted effects (Andrade et al. 2016). Competition, which is one of the most frequently used game elements in this review, is particularly interesting in that regard. In theory, competition can hamper learning by turning projects into a race to the finish line. In this case, participating in a gamified learning activity might diminish learning: winning becomes more important than the internalisation of knowledge and/or skills. This shift in attention from task to competition might, therefore, come at the expense of students' performance and even their intrinsic motivation to learn (Reeve and Deci 1996). For example, in our review, four studies involving simulators showed that competition leads to increased use of the simulators (e.g., for a longer time and more frequently) (El-Beheiry et al. 2017; Kerfoot et al. 2014; Petrucci et al. 2015; Van Dongen et al. 2008). However, only one of these studies reported improved learning outcomes (El-Beheiry et al. 2017). That this outcome was not found in the other three studies might be attributed to a shift in attention as explained before. Increased use of learning material generally indicated repetition, which is one of the most powerful variables to affect memory, leading to improved learning outcomes and retention (Hintzman 1976; Kerfoot et al. 2009; Murre and Dros 2015; Slamecka and McElree 1983). However, as a corollary from using gamification in learning, repetition may become less effective when students' attention shifts from the learning task to, for instance, competition. So even though repetition is vital for knowledge retention, increased repetition of the learning material in gamified interventions might not necessarily benefit learning, especially when students get distracted by game elements. Similarly, shifts of motivation may occur with different game attributes. In interventions applying the game attribute assessment, for example, the elements scoring and rewards are frequently used. However, giving rewards for a previously unrewarded activity can lead to a shift from intrinsic to extrinsic motivation and even loss of interest in the activity when the rewards are no longer given. This is also called the over-justification effect (Deci et al. 1999, 2001; Hanus and Fox 2015; Landers et al. 2015; Lepper et al. 1973). In such cases, students' motivation might shift from being internally driven to learn to being externally driven by gamification, possibly ending with amotivation when the gamified activities are over.

We did not find a direct indication that the effects of game attributes were dependent on contextual factors, since all included studies reported positive results. However, we did find that a combination of conflict and challenge attributes was more often used in the context of postgraduate education and in digital modalities. Whether this implies that opting for digital modalities is better suited to postgraduate courses or whether digital modalities are better suited for a combination of conflict and challenge attributes remains uncertain. Future research should investigate whether other game attributes and/or modalities are also

applicable to postgraduate students. In addition, researchers might focus on identifying reasons for choosing specific (combinations of) attributes in a specific context.

The use of a conceptual framework

The conceptual framework we used in this study originated from serious games. It was altered by Landers (2014) for gamification purposes and was now—at least to our knowledge—used for the first time to systematically structure gamification studies. It was not the aim of this study to evaluate this method, however, future researchers may want to re-evaluate before applying it to systematic analyses. Coding was relatively easy which may imply that game-elements are over-generalized. For instance, points, badges, iPads and money are kinds of rewards and, therefore, confirmed as assessment attributes. However, the timing of the rewards (e.g., immediate versus delayed rewards) as well as the context of the rewards (e.g., negative or positive feedback) might have a different impact on the outcomes (Ashby and O'Brien 2007; Bermudez and Schultz 2014; Butler et al. 2007). Consequently, the claim that assessment attributes can increase or improve learning is insufficiently substantiated, or at least incomplete. Besides, some attributes appeared to have much overlap: immersion and environment attributes were almost always implemented in conjunction. This conceptual framework was helpful in guiding our review and interpreting the results, although some work is needed to refine its contents.

Theory-driven gamification

The purpose of theory is to generate hypotheses, predict (learning) outcomes and explain underlying mechanisms. Unfortunately, most identified studies on gamification in health professions education were not based on theory, or theoretical considerations were not included or not yet elaborated. Our review showed that researchers who did use theory hypothesized that effective gamified learning might strengthen students' learning behaviours or positive attitudes towards learning, which in turn might improve their learning outcomes. For instance, in studies referring to ELT (El Tantawi et al. 2018; Koivisto et al. 2016; Verkuyl et al. 2017), it was assumed that incorporating gamification into courses could enhance students' experience and, therefore, their reflection on and conceptualization of that experience (Kolb et al. 2001). For example, El Tantawi et al. (2018) used story-telling and game-terminology (together with other game-elements) to improve students' attitudes towards academic writing. This way, the researchers intended to modify students' perceptions of a task and made it seem like an exciting adventure, with a story built around a fictitious organisation.

Next to changing attitudes, the aim of studies that applied theory was also to change behaviours. For example, reinforcement learning theory was applied to increase repetition by reinforcing right answers (Chen et al. 2017). Although all theories we identified in this review were useful in clarifying research findings in the field of gamification of education and learning, it remains difficult to explain on the basis of these theories why specific game attributes or combinations of them should be preferred over others. For instance, Van Nuland et al. (2015) used social comparison theory to develop a digital, competition-based learning environment and explain research outcomes. Social comparison theory poses that individuals compare their performances to those of others to evaluate their abilities and seek self-enhancement (Gruder 1971; Wills 1981). Van Nuland et al. (2015) aimed to trigger social comparison in an intervention group by using leader boards with peer-to-peer competition in a tournament environment. They found that the intervention group outperformed their noncompeting peers on the second term

test. Here, the use of social comparison theory helped clarify this effect through the *comparative* element underlying the *competitive* features of gamified learning that may have increased participants' motivation to excel. However, because scientific theories are general statements describing or explaining causes or effects of phenomena, it remains unclear which *specific* game element has the highest potential of triggering social comparison and whether competition should be the most viable option. Although the use of leader boards appears to be a valid choice, it can also hamper learning when it (1) shifts attention from learning to competition (see earlier), (2) is not liked by all students and (3) is not the only game attribute that triggers social comparison. Perhaps less competitive game elements (e.g., upgrading avatars, receiving badges, building things) or even different game attributes (e.g., control, game-fiction or human-interaction) could also trigger social comparison.

Theoretical and practical implications

Based on the scarcity of high-quality studies on processes underlying the effects of gamified educational interventions, we urgently call for more high-quality clarification research. Clarification studies could provide researchers with an understanding of the mechanisms that are involved in gamified learning (and illuminate paths for future research) (Cook et al. 2008) and teachers with evidence-based information on how to implement gamification in a meaningful way. Based on our findings, future clarification studies should use and validate existing learning theories in the context of gamification. The theories we identified in this review could, among others, serve as a basis for this research (Landers 2014; Landers et al. 2015). Because theories are general ideas, researchers should focus on (separate) specific game elements to identify the most promising game attributes in relation to a specific theory. Important negative results should be reported as well. In addition, realist evaluation can help provide a deeper understanding by identifying what works for whom, in what circumstances, in what respects and how (Tilley and Pawson 2000). The finding that (a combination of) game attributes may enhance learning outcomes by strengthening learning behaviours and attitudes towards learning could be used as a starting point for such an approach.

In addition, we would like to emphasize the need for design-based research using well-defined controlled groups to find out whether gamified interventions work (justification research). Although justification research hardly allows for disentangling underlying processes, there should always be room for innovative ideas and interventions (e.g., applying infrequently used game attributes) to inform future research (Cook et al. 2008). Furthermore, design-based research on gamification can shed more light on learning outcomes. For instance, further research could illuminate whether increased repetition results in less positive learning outcomes when students' attention is distracted from their learning task by one or more game attributes. We would also like to encourage design-based research for interventions that combine different outcome measures, such as learning outcomes and frequency of using gamified educational interventions.

Finally, most studies in this review showed promising results for implementing gamification in health professions education. This opens new ways for educators to carefully experiment with the way they teach and implement gamified learning in their curricula. First, they need to determine whether there are behavioural or attitudinal problems that need attention and can be resolved by integrating game elements into the non-gaming learning environment. Subsequently, they have to determine which game attribute or combination of game attributes and matching game elements may help prevent consolidation of undesirable behaviours and/or attitudes. In this sense, gamification could be seen as an experimental educational tool to resolve behavioural or attitudinal problems towards learning which, therefore, may improve learning outcomes.

Strengths and limitations

The literature in this review represents a broad spectrum of gamified applications, investigated across the health professions education continuum. The strengths of our systematic review are the comprehensive search strategy using multiple databases, the use of explicit in- and exclusion criteria and the transparent approach to collecting data. Furthermore, our study offers a unique analysis approach implying a combination of four core elements—namely (a) an alternative way to distinguish gamification from other forms of game-based learning, (b) structuring game elements in a comprehensive way, (c) uncovering theories underpinning gamified intervention and (d) assessing study quality—which sets our study apart from existing systematic reviews on gamification. Using such an approach, we were better able to make a distinction between the three forms of game-based learning (gamification, serious games and simulations) and, therefore, to make an accurate selection of gamification studies. In doing so, we added a new perspective to literature reviews in health professions education by applying a conceptual framework and using a more generic way of structuring individual game elements into overarching game attributes to investigate whether there is a (combination of) game attribute(s) that holds the highest promise of improving health professions education.

This study had several limitations. First, although we took a systematic approach to identifying relevant articles, it is possible that we unintentionally overlooked some articles that explored the same phenomenon using different keywords. We also may have missed some articles while we had to exclude keywords that were too general and resulted in too many irrelevant articles. Yet, we tried to include as many relevant articles as possible by basing our search on a list of 52 game elements and Lander's framework (Landers 2014; Marczewski 2017). We kept our search as comprehensive as possible while critically evaluating the output. In addition, we did not set a timeframe for our search since individual game elements were used in a non-game context long before the term “gamification” was coined.

Second, we are aware that other scholars may have different views of what constitutes (serious) games or gamified learning, since there is no consensus on the definition of “game” and, therefore, “gamification” and “serious games” (Arjoranta 2014; Ramsey 1923; Salen and Zimmerman 2004; Suits 1978). Since we explicitly added “game-intention” to our definitions of gamification, serious games and simulations, there may have been subjectivity in our decision-making process for inclusion/exclusion of studies. Views of designers, participating students, teachers and scholars can differ as to whether something is a game or not, because meanings are constructed on the basis of historical, cultural and social circumstances through specific discourse of games or acts of gameplay. This means that even though designers, researchers and teachers may have the intention to *not* create a game and to only use game-elements, a participants' view of whether it actually *is* a game can be quite different, depending on his or her background. For instance, some students or researchers may interpret the inclusion of a leader board as a game element in a non-gaming context, while others may interpret it as a game. So, although the intention of creating a game is the characteristic difference between gamification and serious games, the interpretation of gamified interventions is prone to subjectivity due to a lack of consensus of what the word ‘game’ refers to. This, in turn, suggests that our study selection process may also be prone to subjectivity. However, the distinction we made between the three forms of game-based learning proved to be quite straightforward and we used a form of triangulation to overcome this limitation. Although we underline the need for clarification of terms like (serious) game and gamification, we do feel that our research method was appropriate for this study. A third limitation may be that only one researcher (AvG) was involved in screening the full texts to confirm the eligibility of each study on the basis of our

in- and exclusion criteria. However, in case of uncertainties, the entire team was involved in the decision-making process and we undertook double screening on a 10% random sample of the excluded articles as a form of triangulation. Additionally, all researchers independently reviewed full texts during the process and engaged in joint discussions to resolve uncertainties and reach consensus, when necessary. The fourth limitation is that we included mixed methods studies, but ranked the included studies using MERSQI only. MERSQI is an instrument for assessing the methodological quality of experimental, quasi-experimental and observational studies in medical education, so it does not assess the qualitative parts of mixed methods studies. Although using the MERSQI enabled comparison between all studies included in our study, we realize that our outcomes neglected the quality of the qualitative parts of these studies and may not reflect the quality of each mixed-methods study in its entirety. We acknowledge, however, that the qualitative components of the mixed-methods studies may be very valuable. Fifth, although the applied conceptual framework enabled us to generalize our findings, at times, generalization might have caused too much information loss since the framework could use more refinement. Sixth and finally, we only included articles written in English and Dutch, so there is the potential for language and culture bias, since studies with positive results are more likely to be published in English-language journals (Egger et al. 1997).

Conclusion

Gamification seems a promising tool to improve learning outcomes by strengthening learning behaviours and attitudes towards learning. Satisfaction rates are generally high and positive changes in behaviour and learning have been reported. However, most of the included studies were descriptive in nature and rarely explained what was meant by gamification and how it worked in health professions education. Consequently, the current research status is too limited to provide educators with evidence-based recommendations on when and how specific game elements should be applied. Future clarification research should explore theories that could explain positive or negative effects of gamified interventions with well-defined control groups in a longitudinal way. In this way, we can build on existing theories and gain a practical and comprehensive understanding of how to select the right game elements for the right educational context and the right type of student.

	Chen et al. (2017)	Medicine (mixed) (n = 60)	Assessment, conflict/challenge	Rewards (points and colours), time	Radiology	6	Digital	Helpful learning aid
	el Tantawi et al. (2018)	Dentistry (n = 98)	Assessment, conflict/challenge, game fiction, human interaction	Scoring, boss battles, competition, quests, storytelling	Scientific writing	14	Analogue	Modest satisfaction, increased knowledge
	Fleischer et al. (1997)	Medicine (mixed) (n = 25)	Assessment	Award, quiz	Critical care surgery	7	Analogue	High satisfaction
	Koivisto et al. (2016)	Nursing (n = 166)	Assessment, conflict/challenge	Scoring, competition	Clinical reasoning	11	Digital	Overall satisfaction
	van Nuland et al. (2015)	Medical students (n = 67)	Assessment, conflict/challenge, human interaction	Scoring, competition	Anatomy learning	12	Digital	High motivation, increased knowledge
	Verkuyl et al. (2017)	Nursery (n = 47)	Assessment	Scoring	Paediatric knowledge	15.5	Digital	High satisfaction, increased knowledge*

The first column (Cat) contains categories for research purpose of gamification studies. Description studies (D) make no comparison, focus on observation and describe what was done. Justification (J) studies make comparisons between interventions, generally lack a conceptual framework or a predictive model and describe whether the new intervention worked. Clarification studies (C) apply a theoretical framework to understand and possibly explain the processes underlying the observed effects, describe why and how interventions (i.e. gamification) work and illuminate paths for future investigation. Question marks in study population indicates unknown or unmentioned number of participants. MERSQI = Medical Education Research Study Quality Instrument, * = confounded comparison group

Table 2 Definitions and examples of gamified learning by attribute category

Attribute category	Definition	Example of gamified learning
Action language	The method and interface by which communication occurs between a player and the game itself	To participate in a learning activity, students are now required to use controls (e.g., a laparoscopic simulator)
Assessment	The method by which accomplishment and game progress are tracked	In a learning activity, points are used to track the number of correct answers obtained by each learner as each learner completes the activity
Conflict/challenge	The problems faced by players, including both the nature and difficulty of those problems	A small group discussion activity is augmented such that each small group competes for the “best” answer
Control	The degree to which players are able to alter the game, and the degree to which the game alters itself in response	A small group discussion activity is restructured such that each decision made by each small group influences the next topic that group will discuss
Environment	The representation of the physical surroundings of the player	A class meeting is moved from a physical classroom to a 3D virtual world (e.g. using virtual reality)
Game fiction	The fictional game world and story	Lectures, tests, and discussions are renamed adventures, monsters, and councils, respectively
Human interaction	The degree to which players interact with other players in both space and time	Learners participate in an activity where teams are used or interaction is needed to progress in that activity
Immersion	The affective and perceptual experience of a game	The gamified learning activity provide haptic feedback with realistic sound effects.
Rules/goals	Clearly defined rules, goals, and information on progress toward those goals, provided to the player	When completing worksheet assignments on tablet computers, a progress bar is displayed to indicate how much of the assignment has been completed.

Attribute categories were identified empirically by Bedwell et al. (2012), definitions were adapted from their work by landers (2015), examples were altered for the health professions education context
