Short event report

MGM School of Biomedical Sciences organized a workshop for faculty members of the MGM SBS. On **04 March 2022**. On the topic of "How to Catch Fake/ Predatory/ Clone Journals in Academics"

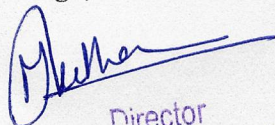

The workshop began with an engaging introduction led by the speaker, who explained the prevalence and potential consequences of predatory journals in academia. Then explored various red flags that can help identify these journals, such as poor peer-review processes, quick publication turnaround times, and questionable impact factors..

The speaker outlined effective strategies to spot fake journals, emphasizing the importance of conducting thorough background checks on publishers and using reputable databases to verify journal legitimacy. And also highlighted the significance of assessing the editorial board and investigating the journal's publication ethics and policies.

In conclusion, the workshop on "How to Catch Fake/Predatory/Clone Journals in Academics" was highly enlightening and resourceful. Audience left with a clearer understanding of the indicators of predatory journals and armed with reliable techniques to identify and avoid them.
